

Lenovo ThinkSystem ST45 V3

Trust, performance and great value

Designed for Remote Work

The ThinkSystem ST45 V3 is a powerful and robust entry-level server tailored for growing businesses seeking to manage IT infrastructure and business applications. Powered by the AMD EPYC™ 4004 Processor and DDR5 memory, it delivers the necessary performance for handling the IT infrastructure of a remote or home office.

With the compact size and low-decibel noise level of the ThinkSystem ST45 V3, it is ideal for installations outside of a traditional data center. As your business expands, it offers the flexibility to transition into a data center environment seamlessly.

Easy to Deploy & Manage

Lenovo XClarity Provisioning Manager Lite (LXPM Lite) is a USB memory key-based application for system setup and firmware upgrades.

The ThinkSystem ST45 V3 can be deployed at a branch office and managed at the company's main office, reducing the workload of branch IT managers.

It also shares common options with the entire ThinkSystem portfolio making it easier to manage the entire infrastructure.

Powerful & Energy-Efficient

The ThinkSystem ST45 V3 merges cutting-edge performance with energy efficiency, featuring support for the latest DDR5 memory.

Additionally, the ThinkSystem ST45 V3, available with a platinum power supply option, complies with Energy Star 4.0 standards.
