## Wireless Split Keyboard\*

### The healthier way to type.

The Lenovo Go Wireless Split Keyboard\* is a revolution in workplace comfort designed to reduce the strain on your forearms, hands, and shoulders. Sculpted using the latest ergonomic science, the keyboard features strain-reducing vertical tenting and a negative tilt that ensure your posture is correctly aligned at all times so you can maintain focus and productivity for longer.

### Why choose the Lenovo Go Wireless Split Keyboard\*?

#### Put the health back in your work

For generations, keyboards have been designed for computers, not people. The Go Wireless Split Keyboard\* delivers an experience designed for you with split keys and negative tilt that encourage optimal typing posture when sitting or standing.

#### The 'key' to better performance

A comfortable typing experience is vital to productivity. That's why the keyboard features premium scissor-switch keys with tactile 1.8 mm feedback, 62.5 g of actuation force, and island-style keys with ergonomically curved keytops.

#### Get the support you need

By adding a high-quality cork palm rest, we can support your palms and ensure that your arms remain free from pain while in use. Keeping your keyboard clean is easy, too, thanks to the liquid-resistant UV-coating that covers the cork palm rest.
