[2] Multi-core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering, branding and/or naming is not a measurement of higher performance.

[3] Features and software that require an NPU may require software purchase, subscription or enablement by a software or platform provider, and third-party software may have specific configuration or compatibility requirements. Performance varies by use, configuration, and other factors.

[4] No camera option available and must be configured at the time of purchase.

[5] Accessories are not included and sold separately.

[6] Flex port is an optional feature that must be configured at the time of purchase. Choose from the following flex ports: 2 x USB 3.2 Gen 1, 3 x USB 3.2 Gen 2, 1x DP2.0, 1 x HDMI 1.4 (in), 1 x RJ-45.

[9] 100% of HP paper-based packaging is from recycled or certified sustainable sources. HP paper and fiber based packaging for PCs, displays, home and office print, and supplies is reported by suppliers as recycled or certified, with a minimum of 97% by volume verified by HP. Packaging is the box that comes with the product and all paper-based materials inside the box. Packaging for commercial, personal systems accessories, and spare parts is not included.
