[3] Chromebooks with the Titan C2 chip receive automatic software and security updates without interruption, ensuring they stay protected against emerging threats. The Titan C2 is integrated into the Chromebook's hardware and works in conjunction with other security measures to provide a layered approach to security, according to Google.

[4] The Titan C2 chip is designed to help protect Chromebooks from malware and phishing attacks by providing a secure hardware foundation. It acts as a hardware root of trust, meaning it verifies the integrity of the system's firmware and software, ensuring they haven't been tampered with.

[5] Recycled plastic is expressed as a percentage of the total plastic weight. Post-consumer recycled content is based on the definition set in the EPEAT standard for computers, IEEE 1680.1-2018 standard.

[6] EPEAT tier levels may vary by country. See www.epeat.net for registration status and tier levels by country.

[5] Recharges your battery up to 50% within 45 minutes when the system is off using "shut down" command, using HP adapter provided with the notebook or recommended power adapter disclosed in specifications (see <http://store.hp.com>). After charging has reached 50% capacity, charging speed will return to normal speed. Charging time may vary +/-10% due to System tolerance. Available on select HP products.

[6] Multi-core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering, branding and/or naming is not a measurement of higher performance.

[7] Intel® Turbo Boost performance varies depending on hardware, software and overall system configuration. See <http://www.intel.com/technology/turboboost/> for more information.

[12] Wireless access point and internet service required and sold separately. Availability of public wireless access points limited. Wi-Fi 6 is backwards compatible with prior 802.11 specs. Wi-Fi 6 is designed to support gigabit data rate when transferring files between two devices connected to the same router. Requires a wireless router, sold separately, that supports 80MHz and higher channels. Wi-Fi 6 (802.11ax) is not supported in Belarus where Wi-Fi settings will be optimized to local regulatory requirements (802.11ac).

[18] Percent of active plus nonactive viewing area to active viewing area plus border. Measure with lid vertical to the desk.

[19] For best results with HP Sleep and Charge, use a USB charging protocol standard cable or cable adapter with an external device.

[46] Bluetooth® 5.4 operation requires Microsoft OS/Chrome OS support. Until Microsoft OS/Chrome OS support is available, Bluetooth® 5.4 will function as Bluetooth® 5.3 or lower.

[53] The Flicker-free capability is eliminating screen flickering through integrating DC-dimming LED backlights or LED emissions. OLED panel is functional with DC-DIMMING when above 100nits.
