

Use with or without included screws for added tamper-resistance or standard installation.

Protect the iPad 10/11 and expand your connectivity options with the Shield Extreme-X2 case with 3.5mm adapter. The included adapter integrates seamlessly with the case to provide a 3.5mm port for headphones/headsets along with USB-C connectivity with charging. The updated design features a completely clear back perfect for viewing asset tags and unique identifiers, along with a rugged TPU exterior bumper for outstanding shock dissipation and protection from drops and impact damage. This durable outer layer additionally resists grease, abrasion, and tears. The removable screen protector enables easy replacement and reinsertion as needed. The FlexStand kickstand is virtually break-proof and provides unlimited, stable positioning options thanks to the easy-sliding friction hinge. The custom-fit design delivers easy access to all ports and buttons, ensuring seamless device functionality. Optional tamper-resistant feature prevents users from prying open the case when installed with the included screws; or omit for a standard case installation.

Shield Extreme-X2 w/ 3.5 mm Adapter for iPad 10/11

Rugged protection with double the connectivity

Shield Extreme-X2 w/ 3.5 mm Adapter for iPad 10/11

Rugged protection with double the connectivity
