

Venture VideoBAR Conference Room in a Box **SKU: 999-50909-770**

An all-in-one conferencing bundle that combines the Venture VideoBAR's exceptional audio and video with the flexibility of C2G connectivity for smaller conference rooms and huddle rooms.

Key Features:

- 5x digital zoom camera with 110° horizontal field of view
- Simultaneous camera video outputs provide 4K signals from HDMI® and USB 3.0, and full HD signals via IP streaming
- Premium conferencing audio with built-in Hi-Fi speaker system and integrated 6-element beamforming microphone array
- Advanced tracking technology options frame the active speaker, the whole group or present a gallery view
- Remote camera management with a browser-based user interface for configuration, management, and control
- TableMIC's six-element array head provides 360° extended microphone coverage with a radius of up to 12 feet
- Premium docking station supports 10Gbps USB-C transfer speeds, up to three displays, and up to 85W of power delivery to a connected laptop

Pairing the Venture VideoBAR and accessories with the reliable cabling from C2G delivers ease of installation, high performance and savings in a single purchase. Optimized for smaller conference rooms and huddle rooms, this bundle allows Venture's 4K resolution and auto-tracking features to be deployed easily and flexibly.

The Venture VideoBAR is an all-in-one 4K video conferencing solution designed to deliver exceptional audio and video quality with an ultra-high-definition image sensor and advanced tracking technology. This includes 4K video quality and a wide-angle lens that can capture the space. It has room-filling audio along with advanced tracking capabilities (Speaker Framing, Participant Framing, and SmartGallery). The tracking options allow you to easily adapt the space for single or multiple participants. You can connect this system to your computer to use in Teams/Zoom/etc. as your camera, microphone and speaker.

Paired with the Venture TableMIC, the bundle offers enhanced audio coverage for larger or uniquely shaped meeting spaces. While the Venture VideoBAR's built-in six-element microphone array already delivers impressive 20-foot pickup range and beamforming clarity, the TableMIC extends that capability with its own six-element array head, providing 360° coverage and a 12-foot pickup radius. The TableMIC connects easily via a single category cable for full-room coverage, making it ideal for U-shaped tables or boardrooms where participants are spread out. Its universal mute button with status light ensures intuitive control, while its integration with the VideoBAR maintains consistent audio fidelity across all microphones in the room.

The Venture VideoBAR comes ready to deploy with an integrated tilt-adjustable table stand, making setup as simple as placing it on a conference table. For more permanent installations, the included wall mount cleat and hardware allow secure wall attachment with minimal effort.

For a more integrated installation, the optional Venture VideoBAR Deluxe Mount reduces wall mounting depth to just 5.5 inches and supports compatibility with Chief and other third-party mounts, including carts and swing arms. Built from durable powder-coated steel, it's ideal for flexible or mobile setups. The bundle also includes a 50-foot plenum-rated HDMI cable, perfect for clean, in-wall installations and reliable connection between the conferencing computer and room display.

Everything runs through the included docking station that enables you to easily plug in to your computer to allow access to the conferencing system, the display and any peripherals you would like to add to the room.
