

140-A Wall Mount for HP

SKU: 104-8648

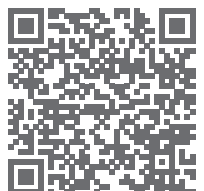

The RackSolutions 140-A Wall Mount for HP is designed to maximize space and efficiently mount your Thin Client desktop directly to a wall, behind a monitor, or desk. This wall mount provides a vertical, low-profile installation that keeps your device off surfaces, improves airflow for cooling, and prevents accidental disconnection or theft (with the lock upgrade).

It is ideal for healthcare facilities, government offices, education labs, reception areas, call centers, and other shared or space-constrained work environments. You can further customize your setup by pairing the wall mount with the Tilt Monitor Bracket (101-5483), Secure Lock Bracket (101-5205), Dual VESA Adapter (101-7732), and Universal Monitor Wall Mount Arm (180-5209).

The Universal Monitor Wall Mount Arm must be paired with the Dual VESA Adapter for installation. For setups with an existing monitor mount or stand, only the Dual VESA Adapter is needed for customization.
