Finding the right size privacy screen for a new device can be a challenging and time-consuming task.

Simplify your search with the Kensington Privacy Screen Finder, streamlining the process of identifying the correct size for your new device.

HIGH CLARITY PRIVACY SCREEN FILTERS

Many professionals struggle to maintain privacy while working with sensitive information in public or shared spaces. Standard privacy screens can sacrifice clarity, hindering visibility. Kensington High Clarity Privacy Screen Filters address these challenges with advanced nanolouver technology for vibrant visuals, unleashing up to 40% more light transmittance compared to standard screens.* Their limited viewing angle safeguards sensitive information, and their blue filters and anti-reflective coatings ease eye strain for enhanced comfort.

*Performance comparisons are made against Kensington Direct Attach privacy screen filters.

Privacy screens filters designed for high light transmittance may produce visual artifacts such as Moire pattern effects when used on OLED displays.

High Clarity Privacy Screens are compatible with LCD and LED displays only. Not recommended for use with OLED displays.

SKU Number	Packaging & Label Description	Width (inches)	Height (inches)	Diagonal Size	Ratio	UPC Code
