ThinkPad T14s 2-in-1 Gen 2

At the core of modern mobile workflows, this AI-enabled laptop integrates Intel Core Ultra 5/7 processors with Copilot+ PC capabilities to handle intensive multitasking across analytics, design, and collaboration tasks. Its NPU delivering up to 50 TOPS enables faster execution of AI-assisted functions such as automated content generation, real-time transcription, and workflow optimization. Combined with Windows 11 Pro or Ubuntu Linux, along with high-speed LPDDR5X memory and PCIe storage, it ensures consistent performance when professionals manage complex applications, large datasets, and dynamic business environments efficiently.

Redefining possibilities with powerful performance and groundbreaking on-device AI

ThinkPad T series laptops offer professional-grade durability, powerful performance with good processors, ample memory, and fast SSD storage. They feature robust security features and long battery life for productivity on-the-go.

In dynamic work settings, the versatile 360° hinge and 14-inch WUXGA touch display enable smooth transitions between laptop, tablet, tent, and stand modes, supporting presentations, annotations, and fieldwork. Enhanced audio and camera technologies ensure clear communication during virtual meetings and collaborative sessions across distributed teams.

For professionals constantly on the move, its lightweight yet durable build combined with Wi-Fi 7 and optional 5G ensures reliable connectivity, while enterprise-grade security and manageability features help organizations maintain control, protect data, and support distributed workforces efficiently.

With a 5MP IR camera, dual microphones with Dolby Voice, and stereo speakers with Dolby Atmos, it delivers clear video calls and immersive audio, ensuring seamless collaboration and professional communication across virtual meetings and remote interactions.
