Overview of the Machine

This section shows the component names of the machine and describes the basic operations you need to know before using it.

Main Components

[Front View](#)

[Rear View](#)

[Inside View](#)

[Operation Panel](#)

How to Navigate Menus on the LCD

[Selecting Menus on the Top Menu Screen](#)

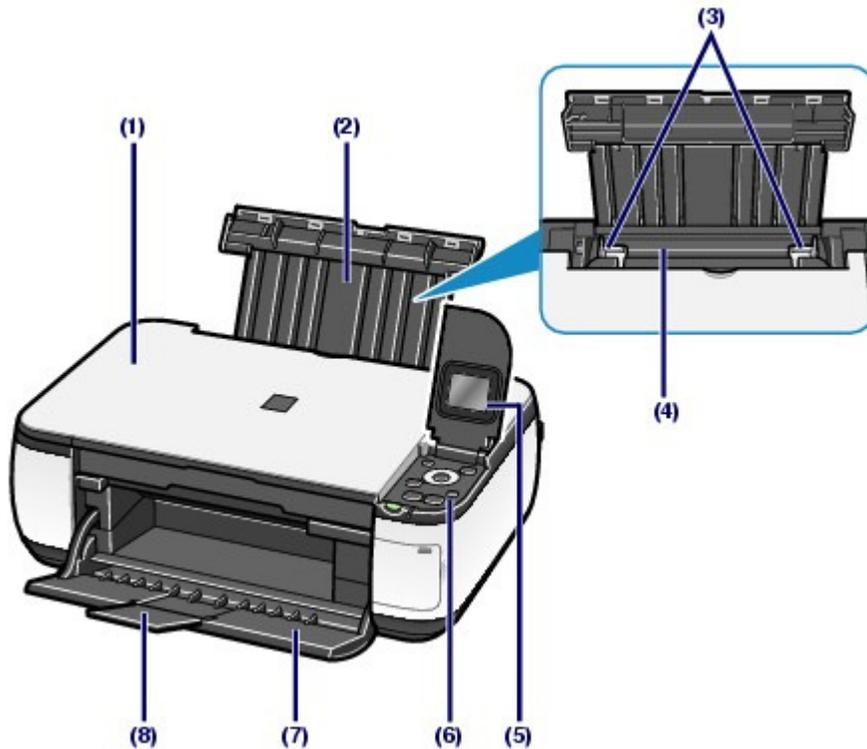

[↑ Page top](#)

Main Components

- ➔ Front View
- ➔ Rear View
- ➔ Inside View
- ➔ Operation Panel

■ Front View

(1) Document Cover

Open to load an original on the Platen Glass.

(2) Paper Support

Raise and tip back to load paper in the Rear Tray.

(3) Paper Guides

Slide to align with both sides of the paper stack.

(4) Rear Tray

Load various sizes or types of paper which you can use on the machine. Two or more sheets of the same size and type of paper can be loaded at the same time, and fed automatically one sheet at a time.

See [Loading Plain Paper / Photo Paper](#).

(5) LCD (Liquid Crystal Display)

Displays messages, menu selections, and the operation status. You can also preview photos on the LCD before printing.

Note

- The LCD will turn off if the machine is not operated for about 5 minutes. To restore the display, press any button except the **ON** button or perform the print operation.

(6) Operation Panel

Use to change the settings of the machine or to operate it.

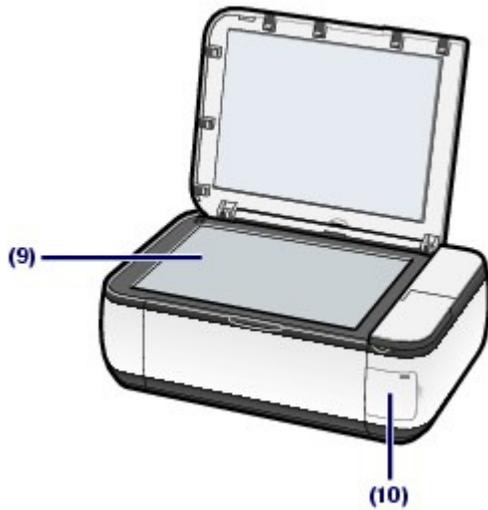

See [Operation Panel](#).

(7) Paper Output Tray

Opens automatically when printing or copying starts and printed paper is ejected.

(8) Output Tray Extension

Open to support the printouts. Open it when printing or copying.

(9) Platen Glass

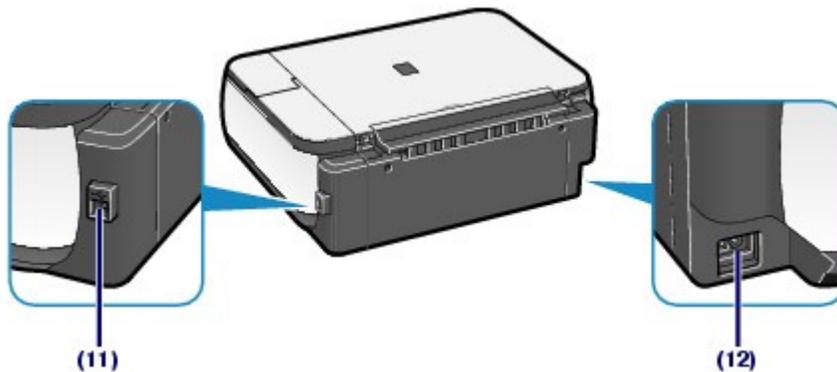

Load an original to copy or scan.

(10) Card Slot Cover

Open to insert a memory card.

See [Inserting the Memory Card](#).

■ Rear View

(11) USB Port

Plug in the USB cable to connect the machine with a computer.

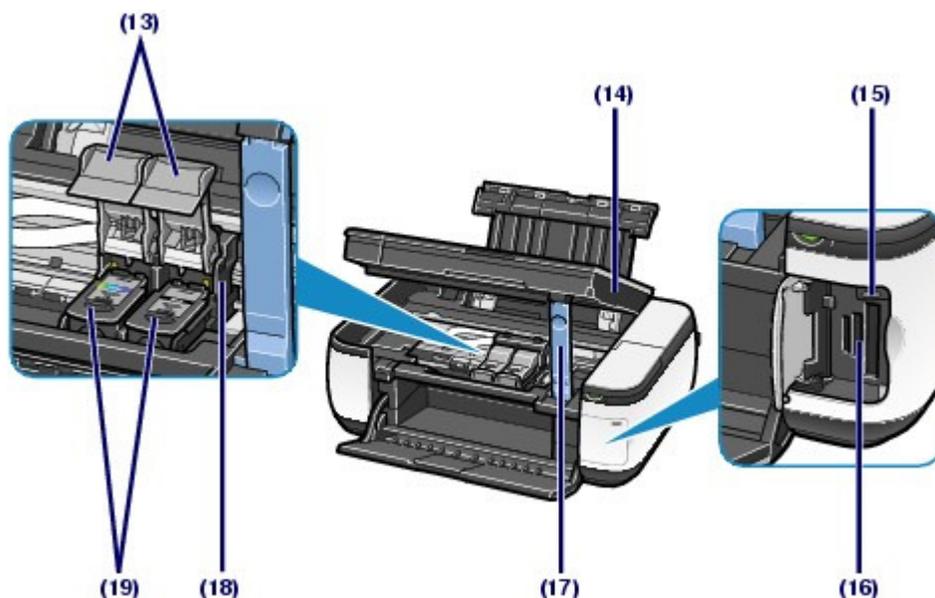

Important

- Do not touch the metal casing.
- Do not plug in or unplug the USB cable while the machine is printing or scanning originals with the computer.

(12) Power Cord Connector

Plug in the supplied power cord.

■ Inside View

(13) Ink Cartridge Locking Covers

Lock the FINE Cartridges into place.

(14) Scanning Unit (Cover)

Scans originals. Open it to replace the FINE Cartridges or remove jammed paper inside the machine. When opening the Scanning Unit (Cover), lift it with the Document Cover closed.

(15) Access lamp

Lights or flashes to indicate the memory card status.

See [Inserting the Memory Card](#).

(16) Card Slot

Insert a memory card.

See [Inserting the Memory Card](#).

(17) Scanning Unit Support

Holds the Scanning Unit (Cover) while it is open.

(18) FINE Cartridge Holder

Install the FINE Cartridges.

The Color FINE Cartridge should be installed into the left slot (C) and the Black FINE Cartridge should be installed into the right slot (B).

(19) FINE Cartridges (Ink Cartridges)

A replaceable cartridge that is integrated with Print Head and ink tank.

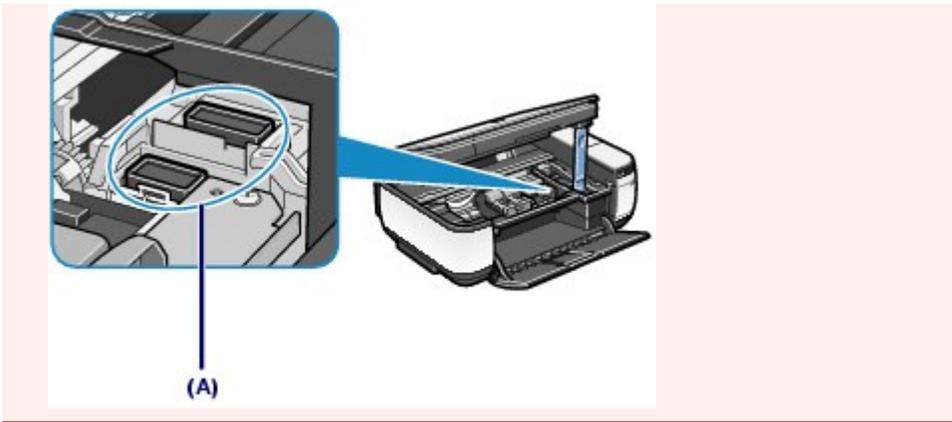

Note

- For details on installing the FINE Cartridges, refer to the printed manual: *Getting Started*.

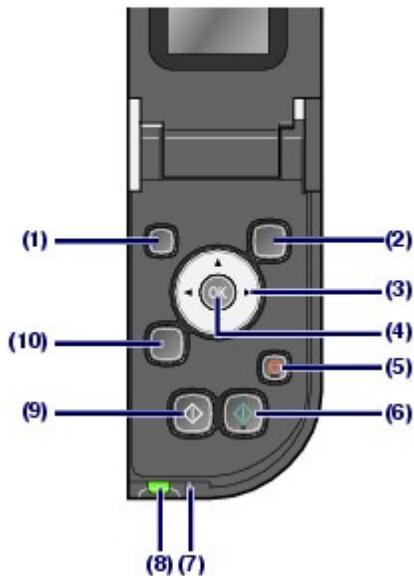

Important

- The area (A) indicated in the figure below may be splattered with ink. It does not affect the performance of the machine.
- Do not touch the area (A). The machine may not print properly if you touch it.

■ Operation Panel

(1) ON button

Turns the power on or off. Before turning on the power, make sure that the Document Cover is closed.

Important

Disconnecting the power plug

- When disconnecting the power plug after turning off the power, be sure to confirm that the **Power** lamp is not lit. If the power plug is disconnected from the wall outlet while the **Power** lamp is lit or flashing, the machine may become unable to print properly since the Print Head is not protected.

(2) Menu button

Displays the Top menu screen.

See [Selecting Menus on the Top Menu Screen](#).

(3) ◀ (Left) ▶ (Right) ▲ (Up) ▼ (Down) button

Specifies the number of copies or prints, or selects a menu or setting item.

(4) OK button

Selects a menu or setting item.

See [Selecting Menus on the Top Menu Screen](#).

Resolves an error when printing is in progress or resumes the machine's normal operation after removing jammed paper.

(5) Stop button

Cancels operation when a print, copy, or scan job is in progress.

(6) Color button

Starts color printing, copying, or scanning.

(7) Alarm lamp

Lights or flashes orange when an error, such as paper-out or ink-out, occurs.

(8) Power lamp

Lights green after flashing when the power is turned on.

(9) Black button

Starts black & white copying or scanning, etc.

(10) Back button

Returns to the previous screen.

[↑ Page top](#)

How to Navigate Menus on the LCD

You can use the machine to make copies or print out without a computer.

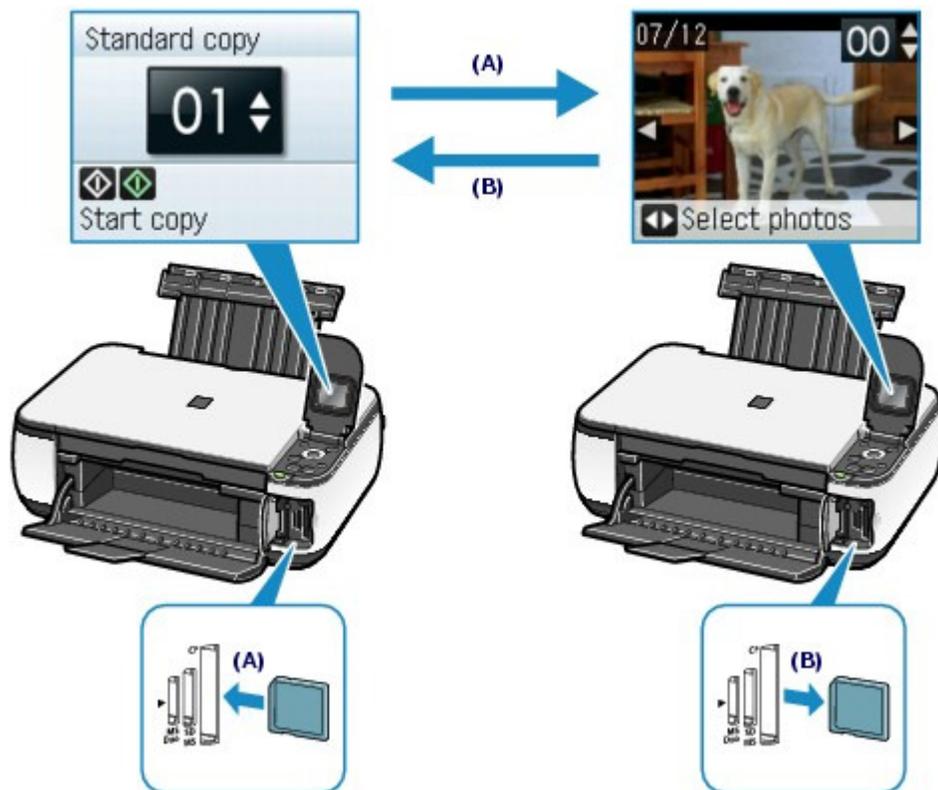

The copy mode screen will appear on the LCD when the machine is turned on. When you insert a memory card into the Card Slot, the LCD changes automatically to the card mode screen, and allows you to print photos.

Copy mode screen.

See [Copying](#).

Card mode screen.

See [Printing from a Memory Card](#).

(A) Insert a memory card

(B) Remove the memory card

■ Selecting Menus on the Top Menu Screen

The Top menu screen will appear when the **Menu** button is pressed. To start printing, scanning, or maintaining the machine, etc., select menus on the Top menu screen.

1. Press the **Menu** button.

The Top menu screen will appear.

2. Use the ▲ (Up) or ▼ (Down) button to select the menu, and press the **OK** button.

The selected menu screen will appear.

Note

- To return to the previous screen, press the **Back** button.

The following menus are available on the Top menu screen.

Copy:	Displays the copy mode screen. You can make enlarged or reduced copies with the scale the machine has specified to fit the page automatically or you have selected, or copy books without black margins around the image or shade of bound part. See Copying .
Scan:	You can save scanned data on your computer or on a memory card inserted into the machine with the Operation Panel. See Scanning .
Photo print:	Displays the card mode screen. You can print photos saved on a memory card of your digital camera. See Printing from a Memory Card .
Photo Index Sheet:	You can easily print photos on a memory card using the Photo Index Sheet. See Using Photo Index Sheet to print .
Template print:	You can print the template forms such as notebook paper, etc. See Printing the Template Forms such as Notebook Paper .
Remaining ink:	You can confirm the ink status. See Checking the Ink Status .
Maintenance:	You can perform maintenance of the machine. See When Printing Becomes Faint or Colors Are Incorrect , or Cleaning the Paper Feed Roller .
Device settings:	You can change settings of the machine. See Machine Settings .

Printing from a Memory Card

You can preview each photo from a memory card on the LCD, to select and print the desired photo. You can also print thumbnails of photos saved on the memory card on A4 or Letter-sized paper and select them to print, or the desired photos in the selected layout.

Printing Photos Saved on the Memory Card

Preview each photo from the memory card on the LCD, to select and print the desired photo. This section describes the procedure to print borderless photos on 4" x 6" / 10 x 15 cm photo paper. For the operation, see the notes and operation procedure described in the reference page.

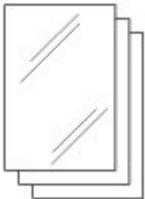

You need to prepare:

A memory card with saved photos. See [Before Inserting the Memory Card](#).

Paper for photo printing. See [Media Types You Can Use](#).

1. Prepare for printing.

(1) Turn on the power.

The copy mode screen will appear on the LCD.

If the memory card is inserted in the machine, the card mode screen will appear.

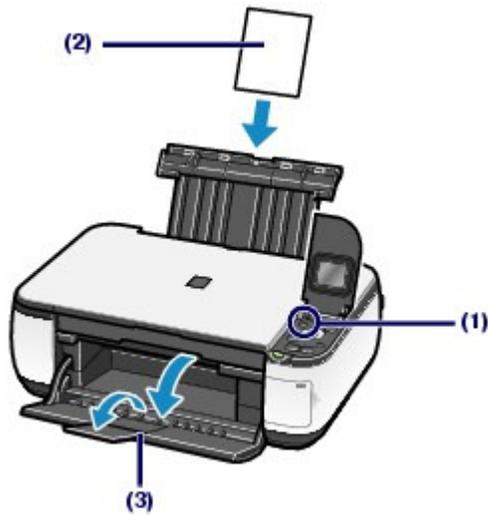

See [Operation Panel](#).

(2) Load paper.

See [Loading Paper](#).

Here we load 4" x 6" / 10 x 15 cm photo paper in the Rear Tray.

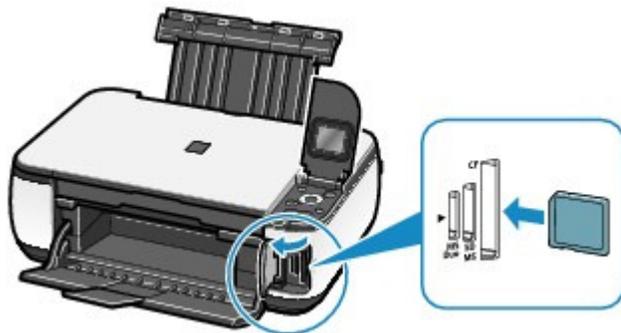

(3) Open the Paper Output Tray gently, and open the Output Tray Extension.

2. Insert a memory card WITH THE LABELED SIDE FACING TO THE LEFT into the Card Slot.

For the types of memory card compatible with the machine and locations to insert them, see [Inserting the Memory Card](#).

The card mode screen will appear.

Note

- You can also display the card mode screen by selecting Photo print on the top menu screen displayed by pressing the **Menu** button.
- When Read/Write attribute is set to Writable from PC, you cannot print image data from the memory card using the Operation Panel on the machine. Select Device settings on the top menu screen, and set Read/write attribute to Not writable from PC. For details, refer to the on-screen manual: [Advanced Guide](#).

3. Select photos to print.

(1) Use the ◀ (Left) or ▶ (Right) button to display the photo to print.

Note

- ⌚ may appear on the LCD while reading photos. If you use the ◀ (Left) or ▶ (Right) button to display the photo while ⌚ appears on the LCD, the desired photo may not be selected.

(2) Use the ▲ (Up) or ▼ (Down) button to specify the number of copies.

- (3) Repeat the procedures of (1) and (2) to specify the number of copies for each photo.

Up to 2000 photos can be specified in total.

- (4) Press the **OK** button.

The print confirmation screen will appear.

4. Start printing.

- (1) Press the **▶** (Right) button.

The print settings screen will appear.

- (2) Confirm the page size, media type, print quality, and layout, etc.

Here we confirm that 4"x6" (10x15cm) is selected for the page size, the type of loaded photo paper for the media type, and Borderless is selected for the layout.

To change the settings, use the **▲** (Up) or **▼** (Down) button to select the item to change, and press the **◀** (Left) or **▶** (Right) button. To switch to the other tab, use the **▲** (Up) or **▼** (Down) button to select the settings tab, and press the **◀** (Left) or **▶** (Right) button.

See [Changing the Settings](#).

Note

- If Auto photo fix ON is selected, with Prioritize Exif info selected in AutoPhotoFix setting under Device settings on the top menu screen, the settings specified when shooting can be adjusted in prior. We recommend you to normally select Do not prioritize Exif info. For details, refer to the on-screen manual: [Advanced Guide](#).

- (3) Press the **OK** button.

The screen will return to the print confirmation screen.

- (4) Confirm the number of sheets to be used for printing the selected photos.

(5) Press the **Color button or the **OK** button.**

The machine starts printing photos.

Note

- Press the **Stop** button to cancel printing.
- Printing does not start if you press the **Black** button.
- To remove the memory card, see [Removing the Memory Card](#).

■ Changing the Settings

You can use the ▲ (Up), ▼ (Down), ◀ (Left), or ▶ (Right) button to change the print setting such as the paper size, media type, or print quality to print.

● Settings Tab 1:**(1) Page size**

Select the page size of the paper to print: 4"x6" (10x15cm), A4, etc.

(2) Media type

Select the media type of the paper to print: Plus Glossy II, Plain paper, etc.

Note

- If you do not select media type correctly, the machine may not print with the proper print quality.

(3) Print quality

Adjust the print quality: Print quality ★★★ (quality-priority), Print quality ★★ (standard).

(4) Layout

Select layout of photo print, such as Borderless, Borderless half side, or Bordered x2, etc. For a sample image using this function, see [Using Various Functions](#).

Note

- When Plain paper is selected for the media type, you cannot select Borderless or Borderless half side.
- If the ratio of the height to the width differs from the image data when Borderless or Borderless half side is selected, a portion of the image may not be printed depending on the size of the media used.
- To enable the print date or auto photo fix function automatically or manually, select the Settings Tab 2. For details, refer to the on-screen manual: [Advanced Guide](#).

Note

- The settings of the page size, media type, print quality, layout, image correction are retained, and these settings will appear next time when a photo is selected in the card mode even if the power is turned off and on.
- Combination of some items cannot be specified depending on the function.

Using Photo Index Sheet to print

Thumbnails of photos on the memory card are printed on A4 or Letter-sized paper (this printed sheet is called Photo Index Sheet). You can select photos, number of copies, page size, etc. on this sheet, and

print them.

Select Photo Index Sheet on the Top menu screen and Photo Index Sheet print. For details on the operation, refer to the on-screen manual: [Advanced Guide](#).

[↑ Page top](#)

Using Various Functions

This section shows useful functions of the card mode.
For details, refer to the on-screen manual: [Advanced Guide](#).

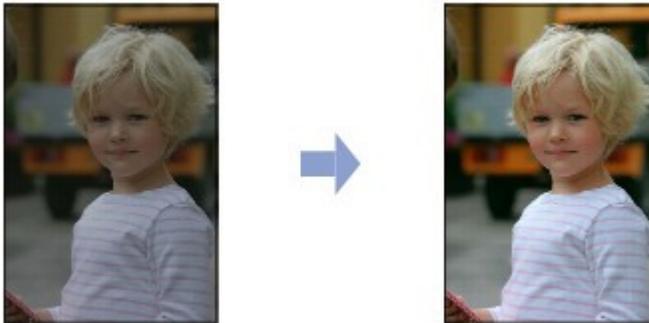

● Printing Photos in Various Layouts

You can select various layouts, such as Borderless, Borderless half side, or Bordered x2, etc., when you select layout in the print settings screen.

● Correcting Images

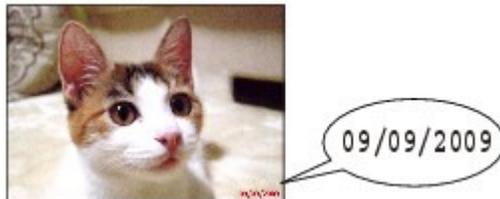

In Settings Tab 2 of the print settings screen, you can correct images automatically or manually, such as adjusting brightness, contrast, and color hue, or add effects to images.

Auto photo fix ON (Default)

● Printing the Photos with Shot Date

In Settings Tab 2 of the print settings screen, you can print photos with the shot date.

Print date ON

Inserting the Memory Card

■ Before Inserting the Memory Card

The following types of memory cards and image data are compatible with the machine.

▶ Important

- If you took and saved photos on a type of memory card that does not guarantee the operation on your digital camera, the image data may be unreadable on the machine or damaged. For information on memory cards that your digital camera guarantees operation, refer to the instruction manual supplied with your digital camera.
- Format the memory card with a digital camera compliant with the Design rule for Camera File system (Exif 2.2/2.21 compliant), TIFF (Exif 2.2/2.21 compliant). The memory card may not be compatible with the machine if it is formatted on a computer.

● Memory Cards that Do Not Require a Card Adapter

	<ul style="list-style-type: none"> ● SD Secure Digital memory card ● SDHC memory card ● MultiMediaCard ● MultiMediaCard Plus
	<ul style="list-style-type: none"> ● Compact Flash (CF) Card Supports Type I/II (3.3 V) ● Microdrive
	<ul style="list-style-type: none"> ● Memory Stick ● Memory Stick PRO ● Memory Stick Duo ● Memory Stick PRO Duo

● Memory Cards that Require a Card Adapter

▶ Important

- Be sure to attach the special card adapters to the following memory cards before inserting to the Card Slot.
If one of the following memory cards is inserted without the card adapter, you may not be able to remove the memory card. In this case, refer to "[Troubleshooting](#)" in the on-screen manual: *Advanced Guide*.

	<ul style="list-style-type: none"> ● miniSD Card *1 ● miniSDHC Card *1
	<ul style="list-style-type: none"> ● microSD Card *1 ● microSDHC Card *1
	<ul style="list-style-type: none"> ● xD-Picture Card *2 ● xD-Picture Card Type M *2

	<ul style="list-style-type: none"> ● xD-Picture Card Type H ^{*2}
	<ul style="list-style-type: none"> ● RS-MMC ^{*3}
	<ul style="list-style-type: none"> ● Memory Stick Micro ^{*4}

*1 Use the special "SD Card Adapter".

*2 Requires purchase of a separate compact flash card adapter for xD-Picture Card.

*3 Use the special card adapter.

*4 Use the special Duo size adapter or full size adapter.

● Printable Image Data

This machine accepts images taken with a camera compliant with the Design rule for Camera File system (Exif 2.2/2.21 compliant), TIFF (Exif 2.2/2.21 compliant). Other image or movie types such as RAW images cannot be printed.

■ Inserting the Memory Card

▶ Important

- When a memory card is inserted into the Card Slot, the **Access** lamp is lit. When the **Access** lamp is flashing, the machine is accessing to the memory card. In this case, do not touch the area around the Card Slot.

📖 Note

- When Read/write attribute is set to Writable from PC, you cannot print image data from the memory card or save scanned data on the memory card using the Operation Panel of the machine. After using the Card Slot as the memory card drive of a computer, remove the memory card, select Device settings on the Top menu screen, then set Read/write attribute to Not writable from PC. For details, refer to the on-screen manual: [Advanced Guide](#).
- When you use a computer to edit or enhance photos saved on a memory card, be sure to print them from the computer. If you use the Operation Panel, the photos may not be printed properly.

1. Prepare your memory card.

Attach a special card adapter if your memory card requires one.

See [Memory Cards that Require a Card Adapter](#).

2. Turn on the power, and open the Card Slot Cover.

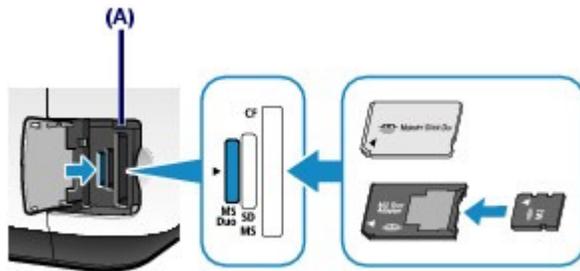

3. Insert only one memory card into the Card Slot.

The location to insert a memory card varies depending on each type of memory card. Insert your memory card straightforward WITH THE LABELED SIDE FACING TO THE LEFT into the Card Slot, according to the insert location in the figure below.

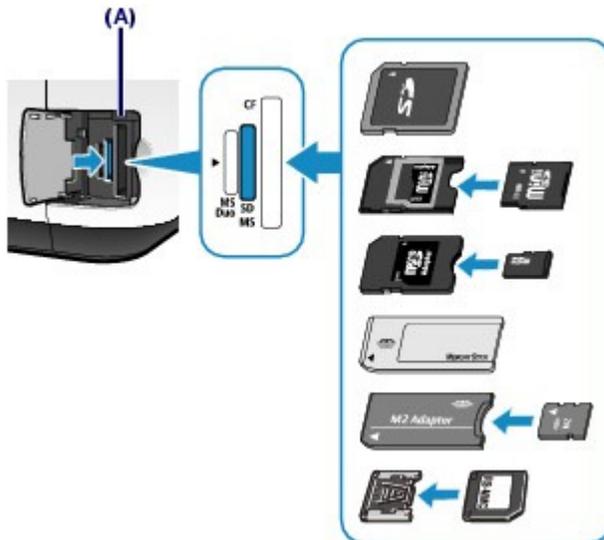

When the memory card is inserted properly, the **Access** lamp (A) will light up.

Be sure to attach the card adapter for memory card with the mark * (asterisk), and then insert it into the Card Slot as shown below.

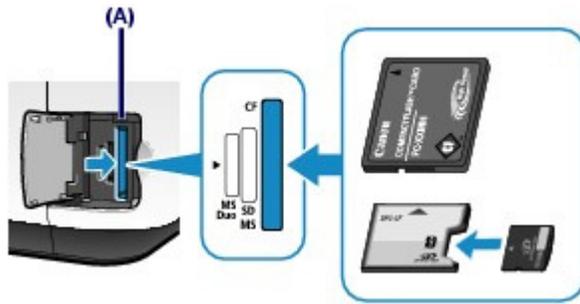

For Memory Stick Duo, Memory Stick PRO Duo, or Memory Stick Micro (with the Duo size adapter) * :

For SD Secure Digital memory card, SDHC memory card, MultiMediaCard, MultiMediaCard Plus, miniSD Card *, miniSDHC Card *, microSD Card *, microSDHC Card *, Memory Stick, Memory Stick PRO, Memory Stick Micro (with the full size adapter) *, or RS-MMC * :

For Compact Flash (CF) Card, Microdrive, xD-Picture Card *, xD-Picture Card Type M *, or xD-Picture Card Type H * :

▶ Important

- Part of the memory card will protrude from the Card Slot, but do not force it into the slot any further. This can damage the machine or the memory card.
- Make sure that the memory card is correctly oriented before inserting it into the Card Slot. If you force the memory card into the Card Slot in the wrong orientation, the memory card or the machine can be damaged.
- Do not insert more than one memory card at a time.

4. Close the Card Slot Cover.

■ Removing the Memory Card

▶ Important

- If you used the Card Slot as the memory card drive of a computer, you must perform the "safe removal" operation on your computer before physically removing the memory card from the machine.
 - In Windows, right-click the removable disk icon and click Eject. If Eject does not appear on the screen, make sure that the **Access** lamp is lit, and then remove the memory card.
 - In Macintosh, drag  (Mount drive) into the Trash.

1. Open the Card Slot Cover.

2. Make sure that the **Access** lamp is lit, and remove the memory card.

Hold the part of the memory card that is protruding and remove it straightforward from the machine.

▶ Important

- Do not remove the memory card while the **Access** lamp is flashing. The **Access** lamp flashes while the machine is reading or writing data from/to the memory card. If you remove the memory card or turn off the power while the **Access** lamp is flashing, the data saved on the memory card can be damaged.

3. Close the Card Slot Cover.

Copying

You can make enlarged or reduced copies of the original with the scale the machine has specified to fit the page automatically or you have selected, borderless copies of photos, and copies of books without black margins around the image or shade of bound part, besides standard copies.

Making Copies

[Changing the Settings](#)

Using Various Copy Functions

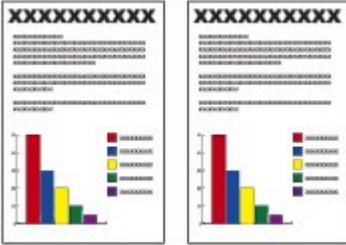

[Enlarging/reducing](#)

[↑ Page top](#)

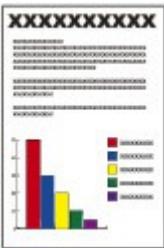

Making Copies

This section describes the procedure to copy a document of A4 size on plain paper.
For the operation, see the notes and operation procedure described in the reference page.

You need to prepare:

Originals to copy. See [Originals You Can Load](#).

Paper for printing. See [Media Types You Can Use](#).

1. Prepare for copying.

(1) Turn on the power.

See [Operation Panel](#).

The copy mode screen will appear in the monitor.

When the memory card is inserted, the card mode screen will appear. Remove the memory card.

Note

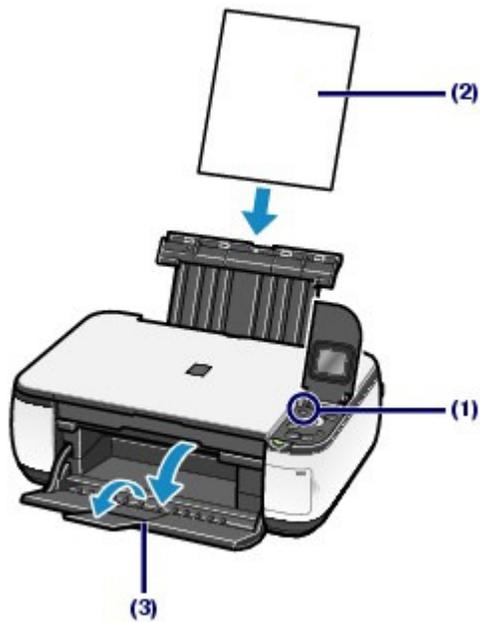

- You can also display the copy mode screen by selecting Copy on the top menu screen displayed by pressing the **Menu** button.

(2) Load paper.

See [Loading Paper](#).

Here we load A4 plain paper in the Rear Tray.

(3) Open the Paper Output Tray gently, and open the Output Tray Extension.

(4) Load an original on the Platen Glass.

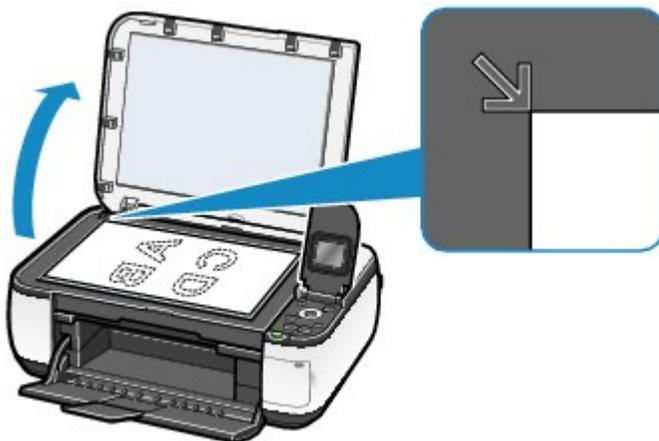

See [Loading Originals](#).

Load the original WITH THE SIDE TO COPY FACING DOWN and align it with the alignment mark  as shown below.

Then close the Document cover gently.

 **Note**

- For details on the types and conditions of the original which can be copied, see [Originals You Can Load](#).

2. Start copying.

- (1)** Press the ▲ (Up) or ▼ (Down) button to specify the number of copies.

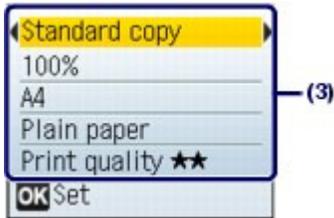

- (2)** Press the ► (Right) button.
The print settings screen will appear.

(3) Confirm the copy type, magnification, page size, media type, etc.

Here we confirm that Standard copy for the copy type, 100% for the magnification, A4 for the page size, Plain paper for the media type, and Print quality ★★ (standard) for the print quality are specified.

To change the settings, use the ▲ (Up) or ▼ (Down) button to select the item to change, and press the ◀ (Left) or ▶ (Right) button.

See [Changing the Settings](#).

**Note**

- To automatically adjust the intensity according to the original, set Copy auto intensity to Enable under Device settings.

(4) Press the **OK button.**

The LCD will return to the copy mode screen.

(5) Press the **Color button for color copying, or the **Black** button for black & white copying.**

The machine starts copying.

Remove the original on the Platen Glass after copying is completed.

Important

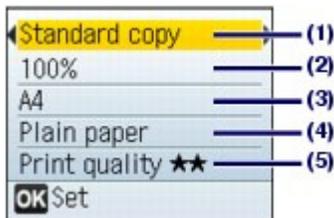

- Do not open the Document Cover or move the loaded original until copying is completed.

Note

- Press the **Stop** button, to cancel copying.

■ Changing the Settings

You can use the ▲ (Up), ▼ (Down), ◀ (Left), or ▶ (Right) button to change the print settings such as page size, media type, or print quality to print.

**(1) Copy type**

Select the copy type: Borderless copy, Frame erase, etc.

See [Using Various Copy Functions](#).

(2) Magnification

Specify the enlargement/reduction manner. You can select Fit to page to make the copy automatically enlarged or reduced to fit the selected page size. You can also specify the copy scale by selecting the page size: A4 to A5, A4 to B5, etc. If you do not want to enlarge/reduce the page size, select 100%. For details, refer to the on-screen manual: [Advanced Guide](#).

See [Using Various Copy Functions](#).

(3) Page size

Select the page size of the paper to print: A4, 8.5"x11"(LTR), etc.

(4) Media type

Select the media type of the paper to print: Plain paper, Plus Glossy II, etc.

Note

- If you do not select the media type correctly, the machine may not print with the proper print quality.

(5) Print quality

Adjust the print quality according to the original to copy: Print quality ★★★ (quality-priority), Print quality ★★ (standard), or Print quality ★ (speed-priority). The available print quality depends on the paper selected for the media type.

Note

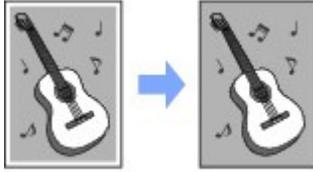

- Settings such as the page size, media type, and print quality are retained, and these settings will appear next time when the copy mode is selected even if the power is turned off and on.
- Combination of some items cannot be specified depending on the function.
- You can specify the amount of extension in Extension amount under Device settings, when Borderless copy is selected for the copy type.
- If Borderless copy is selected, select A4, 4"x6"(10x15cm), 5"x7"(13x18cm) or 8.5"x11"(LTR) for the page size and any types of paper except Plain paper for the media type.
- If Borderless copy is selected, slight cropping may occur at the edges since the copied image is enlarged to fill the whole page.
- Even if Borderless copy or Frame erase is selected, you can copy with the specified ratio by selecting a page size. However, if Borderless copy is selected, enlargement/reduction ratio differs from that when Standard copy is selected.
- You can set the print quality to Print quality ★ (speed-quality) only when Plain paper is selected for the media type.
- If you select Print quality ★ (speed-priority) with the media type set to Plain paper and the quality is not as good as expected, select Print quality ★★ (standard) or Print quality ★★★ (quality-priority) and then try copying again.
- You can specify Copy auto intensity. This function automatically adjusts the intensity of the original on the Platen Glass.
See [Machine Settings](#).

Using Various Copy Functions

You can make the following copies if you specify the copy type or magnification on the settings screen in the copy mode.

For details, refer to the on-screen manual: [Advanced Guide](#).

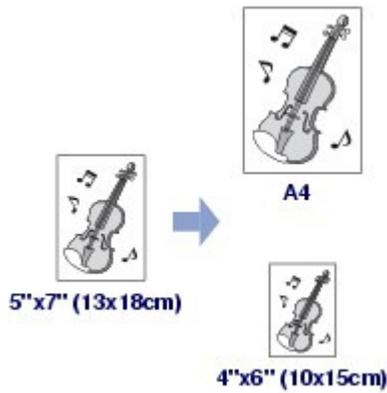

Borderless copy

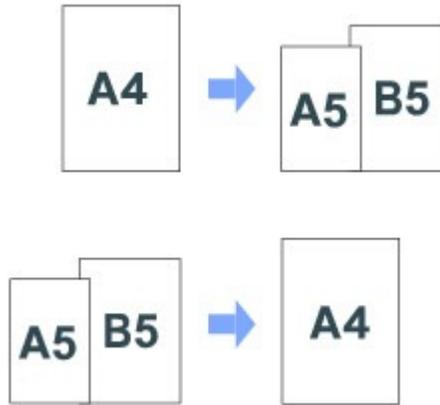

Frame erase

■ Enlarging/reducing

You can copy with enlarge or reduce page size depending on loaded paper, or by changing a ratio with the selected page size, such as 70% A4 → A5 or 115% B5 → A4.

Fit-to-page copy

Preset ratio

Printing the Template Forms such as Notebook Paper

You can print ruled lines or grids on a paper and use it as a notebook, etc.

Printing a Notebook Paper

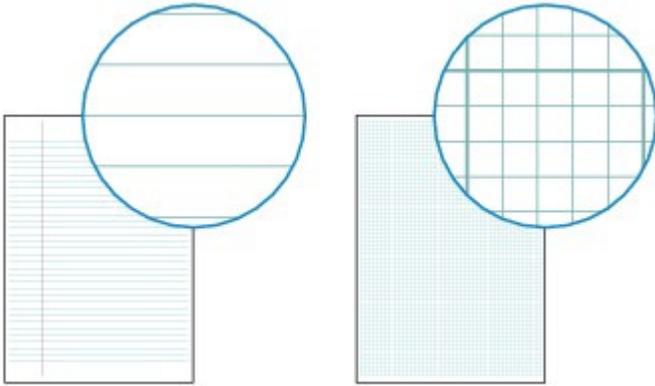

[Printing the Various Template Forms](#)

[↑ Page top](#)

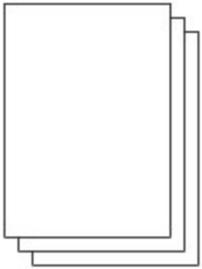

Printing a Notebook Paper

This section describes the procedure to select and print the template forms.

You need to prepare:

A4, B5, or Letter-sized plain paper.
See [Media Types You Can Use](#).

1. Prepare for printing.

- (1) Turn on the power.
See [Operation Panel](#).
- (2) Load A4, B5, or Letter-sized plain paper in the Rear Tray.
See [Loading Plain Paper / Photo Paper](#).
- (3) Open the Paper Output Tray gently, and open the Output Tray Extension.

2. Select a template form.

- (1) Press the **Menu** button.
- (2) Use the ▲ (Up) or ▼ (Down) button to select Template print on the top menu screen, and press the **OK** button.
- (3) Use the ◀ (Left) or ▶ (Right) button to select a template form to print, and press the **OK** button.

Note

● For information on the available templates forms, see [Printing the Various Template Forms](#).

3. Start printing.

(1) Use the ▲ (Up) or ▼ (Down) button to specify the number of copies to print.

(2) Use the ◀ (Left) or ▶ (Right) button to specify the page size.

Note

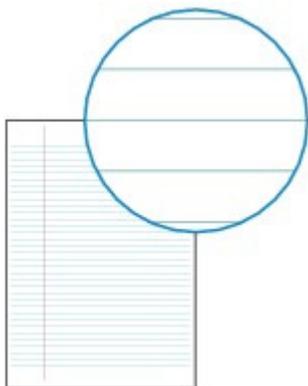

● You can only select A4, B5, or 8.5"x11"(LTR) for Page size. B5 may not be available depending on the selected template.

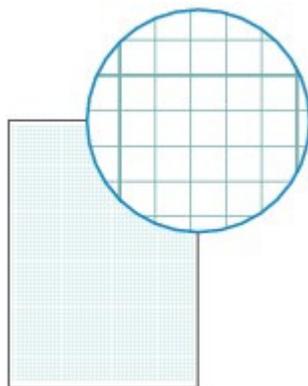

(3) Press the **OK** button.
The machine starts printing.

■ Printing the Various Template Forms

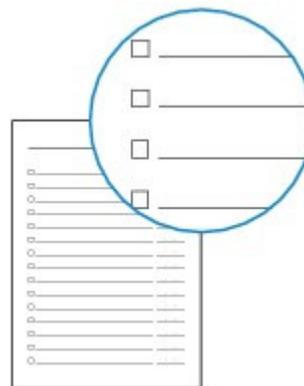

You can print the following templates with Template print.

- Notebook paper 1
8 mm spacing
- Notebook paper 2
7 mm spacing
- Notebook paper 3
6 mm spacing

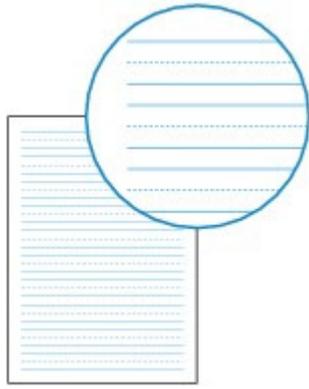

- Graph paper 1
Graph 5 mm
- Graph paper 2
Graph 3 mm

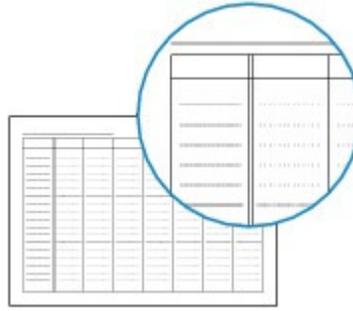

- Checklist
List with checkboxes

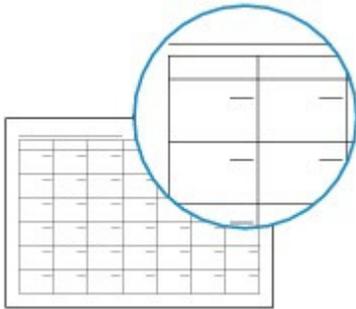

- StaffPaper 1
StaffPaper 10 staves
- StaffPaper 2
StaffPaper 12 staves

- Handwriting paper
Rows of three lines

- Weekly schedule
Vertical type

- Monthly schedule
Calendar type

Scanning

You can save scanned data on your computer, and edit or process them with the supplied software application. You can also save scanned data on a memory card inserted into the machine.

Saving Scanned Data on the Computer

[Preparing for Scanning with the Operation Panel](#)
[Saving Scanned Data on the Computer](#)

[↑ Page top](#)

Saving Scanned Data on the Computer

This section describes the procedure to scan originals using the Operation Panel on the machine and save them on the computer, according to the settings specified with the MP Navigator EX.

For other operations to save scanned data on a memory card and to scan originals from the computer, refer to the on-screen manual: [Advanced Guide](#).

Important

- Please note that Canon shall not be liable for any damage or loss of the data for any reason whatsoever, even within the warranty period of the machine.

■ Preparing for Scanning with the Operation Panel

Before scanning originals, check the following:

- Are the necessary software applications (MP Drivers and MP Navigator EX) installed?
Install MP Drivers and MP Navigator EX from the *Setup CD-ROM* when it has not been installed or has been uninstalled. To install MP Drivers and MP Navigator EX, select MP Drivers and MP Navigator EX in Custom Install.
- Are the required settings specified with MP Navigator EX?
When you scan to save originals on the computer using the Operation Panel, you can specify the settings for saving scanned data in Preferences of MP Navigator EX.
For details on the settings, refer to the on-screen manual: [Advanced Guide](#).
- Does the original to be scanned meet the requirements for the original to be loaded on the Platen Glass?
For details, see [Originals You Can Load](#).
- Is the machine connected to a computer with USB cable correctly?
Confirm that the connection with USB cable between the machine and the computer is physically secure.

Important

- Do not plug in or unplug the USB cable while the machine is scanning originals with the computer.

● If You Are Using Mac OS X v.10.3.9

You need to set MP Navigator EX as the starting software application in Image Capture under Applications in Mac OS X.

- (1) Select Applications on the Go menu, and double-click the Image Capture icon.
- (2) Click Options at lower left of the scanner window, select MP Navigator EX 3 in Application to launch when scanner button is pressed, then click OK.
To quit Image Capture, select Quit Image Capture on the Image Capture menu.

Note

- If Options does not appear, select Preferences on the Image Capture menu, click Scanner, and click Use TWAIN software whenever possible to clear the option. Then quit Image Capture and restart it.

■ Saving Scanned Data on the Computer

1. Prepare for scanning.
 - (1) Turn on the power.

See [Operation Panel](#).

- (2) Press the **Menu** button.
- (3) Use the ▲ (Up) or ▼ (Down) button to select Scan, and press the **OK** button.
The device selection screen will appear.
- (4) Use the ▲ (Up) or ▼ (Down) button to select Save to PC, and press the **OK** button.

2. Start scanning.

- (1) Confirm the message, and load an original on the Platen Glass.

See [Loading Originals](#).

- (2) Press the **OK** button.

MP Navigator EX will be started, the original will be scanned according to the settings specified with MP Navigator EX, and then the scanned data will be saved on the computer.

Scanning... will appear while scanning the original.

If you want to scan another original, load it on the Platen Glass, and press the **OK** button again.

Remove the original on the Platen Glass after scanning is completed.

Important

- Do not turn off the power while the machine is operating.
- Do not open the Document Cover or move the loaded original until scanning is completed.

Note

- To perform other functions, select the desired menu on the top menu screen displayed by pressing the **Menu** button.

Note

- The position or size of the original may not be scanned correctly depending on the type of original. In this case, refer to the on-screen manual: [Advanced Guide](#) to change the settings in Document Type and Document Size of MP Navigator EX to match the original and scan it again.

When the program selection screen appears:

The program selection screen may appear after performing step 2.

If the program selection screen appears, select MP Navigator EX Ver3.0 and click OK.

To start MP Navigator EX automatically without displaying the program selection screen, follow the procedure below.

- For Windows Vista users, refer to "For Windows Users" in "[Troubleshooting](#)" of the on-screen manual: *Advanced Guide*.
- For Windows XP users, select MP Navigator EX Ver3.0 as the software application to be used in the program selection screen, select Always use this program for this action, then click OK.

Printing from Your Computer

This section describes the procedure to print documents or photos with a computer. You can easily print photos taken with your digital camera by using Easy-PhotoPrint EX supplied with the machine.

Printing Photos (Easy-PhotoPrint EX)

[Using Various Functions of Easy-PhotoPrint EX](#)

Printing Documents (Windows)

Printing Documents (Macintosh)

[For Mac OS X v.10.5.x](#)

[For Mac OS X v.10.4.x or Mac OS X v.10.3.9](#)

[↑ Page top](#)

Printing Photos (Easy-PhotoPrint EX)

Print image data saved on your computer by using Easy-PhotoPrint EX supplied with the machine. This section describes the procedure to print borderless photos on 4" x 6" / 10 x 15 cm photo paper. For details on Easy-PhotoPrint EX, refer to the on-screen manual: [Advanced Guide](#).

Note

- The screens used in this section are for printing with Windows. The operations are also the same for printing with Macintosh.
- Install Easy-PhotoPrint EX from the *Setup CD-ROM* when it has not been installed or has been uninstalled. To install Easy-PhotoPrint EX, select Easy-PhotoPrint EX in Custom Install.

1. Prepare for printing.

(1) Make sure that the machine is turned on.

See [Operation Panel](#).

(2) Load paper.

See [Loading Plain Paper / Photo Paper](#).

Here we load 4" x 6" / 10 x 15 cm photo paper.

(3) Open the Paper Output Tray gently, and open the Output Tray Extension.

2. Start Easy-PhotoPrint EX, and select Photo Print.

(1) Start Easy-PhotoPrint EX.

Double-click  (Easy-PhotoPrint EX) on the desktop.

Click Here: [Easy-PhotoPrint EX](#)

Select the Go menu, Applications, Canon Utilities, Easy-PhotoPrint EX, then double-click Easy-PhotoPrint EX.

Note

Windows

- To start Easy-PhotoPrint EX from Solution Menu, double-click  (Solution Menu) on the desktop and click  (Print photos or albums, etc.). See [Solution Menu](#).
- To start Easy-PhotoPrint EX from the Start menu, select All Programs (or Programs), Canon Utilities, Easy-PhotoPrint EX, then Easy-PhotoPrint EX.

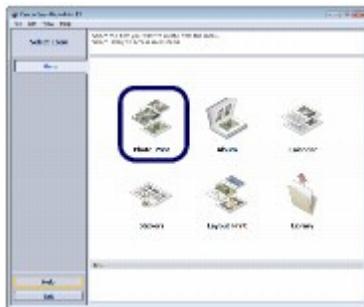

Macintosh

- To start Easy-PhotoPrint EX from Solution Menu, click  (Solution Menu) in the Dock and click  (Print photos or albums, etc.). See [Solution Menu](#).

(2) Click Photo Print.

Note

- You can select Album, Calendar, Stickers, etc., besides Photo Print. See [Using Various Functions of Easy-PhotoPrint EX](#).

3. Select a photo to print.

(1) Select the folder in which images are saved.

(2) Click the image to print.

The number of copies appears as "1", and the image you selected appears in the selected image area (A). You can select two or more images at the same time.

Note

- To print two or more copies, click  (Up arrow) to change the number of copies.
- To cancel the selection, click the image to cancel in the selected image area and click  (Delete Imported Image). You can also use  (Down arrow) to change the number of copies to zero.
- You can also correct or enhance the selected image. See [Using Various Functions of Easy-PhotoPrint EX](#).

(3) Click Select Paper.

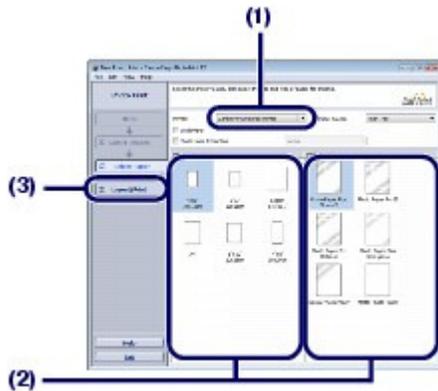

4. Select the loaded paper.

- (1) Make sure that your machine's name is selected in Printer.
- (2) Select the size and type of the loaded paper in Paper Size and Media Type.
Here we select 4"x6" 10x15cm in Paper Size and the type of the loaded photo paper in Media Type.

Note

- If you select the wrong media type, the machine may not print with the proper print quality.

(3) Click Layout/Print.

5. Select a layout and start printing.

- (1) Select the layout of the photo.
Here we select Borderless (full).

The preview appears in the selected layout for confirmation of the required print result.

Note

- You can change the direction of photo or crop photos (trimming) to print.
For details on the operation, refer to the on-screen manual: [Advanced Guide](#).

(2) Click Print.

Note

Windows

- To cancel a print job in progress, press the **Stop** button on the machine or click Cancel Printing on the printer status monitor.
To display the printer status monitor, click Canon XXX Printer (where " XXX" is your machine's name) on the taskbar.

Macintosh

- Click the printer icon in the Dock to display the list of print jobs in progress.
- To cancel a print job in progress, select the desired job in the Name list and click Delete.
To temporarily stop a job in progress, click Hold. To temporarily stop all the jobs in the list, click

Pause Printer (or Stop Jobs).

[↑ Page top](#)

Basic Guide[Advanced Guide](#) [Troubleshooting](#)

[Contents](#) > [Printing from Your Computer](#) > [Printing Photos \(Easy-PhotoPrint EX\)](#) > Using Various Functions of Easy-PhotoPrint EX

■ Using Various Functions of Easy-PhotoPrint EX

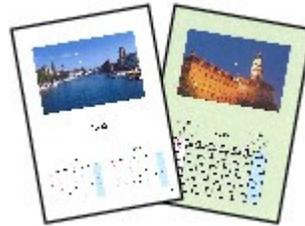

This section introduces a few of the useful functions of Easy-PhotoPrint EX.
For details, refer to the on-screen manual: [Advanced Guide](#).

● Creating Your Own Prints

You can create an album or calendar using your photos.

Album

Calendar

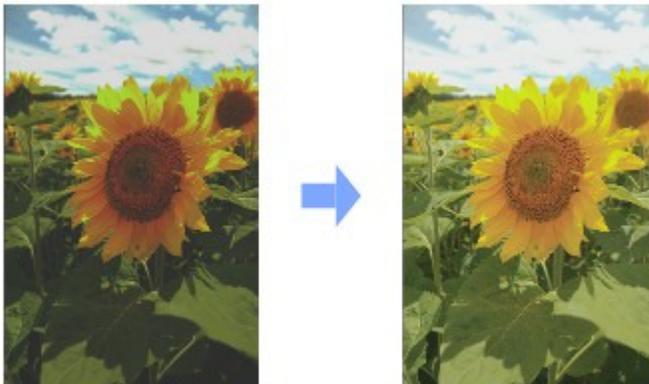

Stickers

Layout Print

● Correcting Images

You can use Red-Eye Correction, Face Sharpener, Digital Face Smoothing, Brightness, Contrast, etc. to adjust, correct, or enhance images automatically or manually.

Brightness

Printing Documents (Windows)

This section describes the procedure to print a document of A4 size on plain paper.
For details, refer to the on-screen manual: [Advanced Guide](#).

Note

- Operations may vary depending on your software application. For details on the operation, refer to the instruction manual of your application.
- The screens used in this section are for printing with Windows Vista operating system Ultimate Edition (hereafter referred to as "Windows Vista").

1. Make sure that the machine is turned on.

See [Operation Panel](#).

2. Load paper.

See [Loading Paper](#).

Here we load A4 plain paper.

3. Open the Paper Output Tray gently, and open the Output Tray Extension.

4. Create (or open) a document to print using an appropriate software application.

5. Open the printer driver setup window.

(1) Select Print on the File menu or the command bar in your software application.

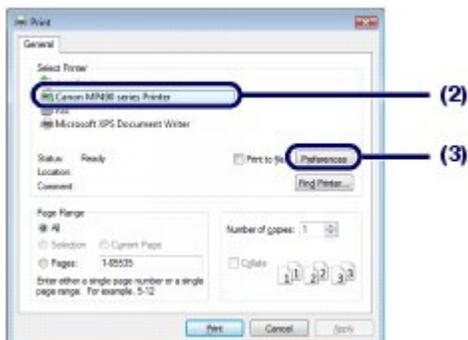

The Print dialog box will appear.

(2) Make sure that your machine's name is selected.

Note

- If another printer's name is selected, click and select your machine's name.

(3) Click Preferences (or Properties).

6. Specify the required print settings.

(1) Select Business Document in Commonly Used Settings.

Note

- When the print object such as Business Document or Photo Printing is selected in Commonly Used Settings, the items in Additional Features will be selected automatically. The settings suitable for the print object such as media type or print quality will also appear.
- When you specify two or more copies in Copies, the Collate check box will be selected.

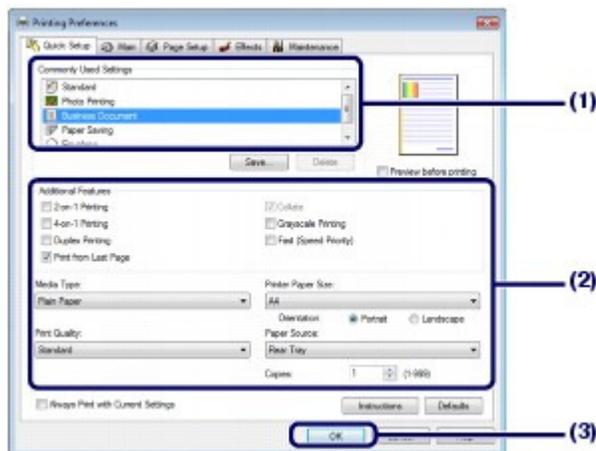

(2) Make sure of the displayed settings.

Here we make sure that Plain Paper in Media Type, Standard in Print Quality, and A4 in Printer Paper Size are selected.

Note

- The settings can be changed.
However, after changing Printer Paper Size, confirm that the setting for Page Size on the Page Setup sheet matches the setting set in the software application.
For details, refer to the on-screen manual: [Advanced Guide](#).
- If you select the wrong media type, the machine may not print with the proper print quality.

(3) Click OK.

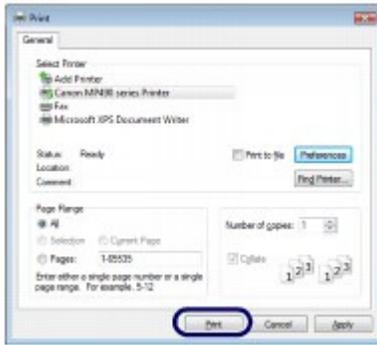

Note

- For details on the printer driver functions, click Help or Instructions to view the online help or the on-screen manual: *Advanced Guide*. The Instructions button appears on the Quick Setup, Main and Maintenance sheets if the on-screen manual is installed on your computer.
- You can name the changed settings and add to Commonly Used Settings.
For details, refer to the on-screen manual: [Advanced Guide](#).
- If the Always Print with Current Settings check box is selected, the current settings will be applied from the next print job onward. Some software applications may not have this function.
- To display the preview to confirm the print result, select the Preview before printing check box. Some software applications may not have a preview function.
- You can specify the detailed print settings on the Main sheet or Page Setup sheet.
For details, refer to the on-screen manual: [Advanced Guide](#).

7. Start printing.

Click Print (or OK) to start printing.

Note

- The message on how to load envelopes will appear when printing on them. This message will not appear next time if you select the Do not show this message again. check box. For details on the settings to print envelopes, see [Loading Envelopes](#).
- To cancel a print job in progress, press the **Stop** button on the machine or click Cancel Printing on the printer status monitor. To display the printer status monitor, click Canon XXX Printer (where " **XXX**" is your machine's name) on the taskbar.
- If printed ruled lines are misaligned or print results are unsatisfactory, adjust the print head position. See [Aligning the Print Head](#).

Printing Documents (Macintosh)

This section describes the procedure to print a document of A4 size on plain paper.
For details, refer to the on-screen manual: [Advanced Guide](#).

Note

- Operations may vary depending on your software application. For details on the operation, refer to the instruction manual of your application.

■ For Mac OS X v.10.5.x

1. Make sure that the machine is turned on.

See [Operation Panel](#).

2. Load paper.

See [Loading Paper](#).

Here we load A4 plain paper.

3. Open the Paper Output Tray gently, and open the Output Tray Extension.

4. Create (or open) a document to print using an appropriate software application.

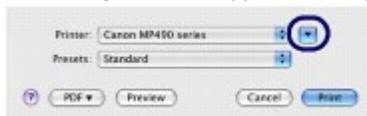

5. Open the Print dialog box.

Select Print on the File menu in your software application.

The Print dialog box will appear.

Note

- If the dialog box below appears, click  (Down arrow).

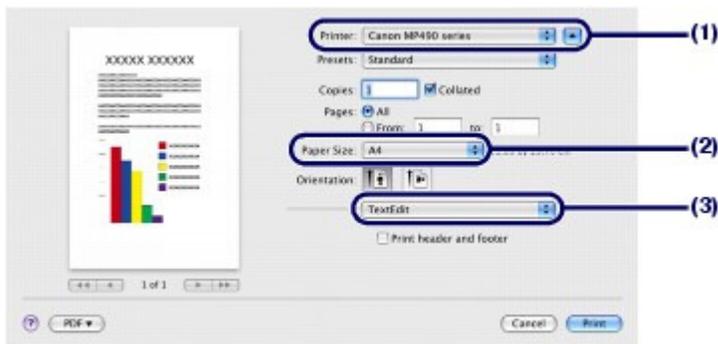

6. Specify the required print settings.

(1) Make sure that your machine's name is selected in Printer.

(2) Select the page size of the loaded paper in Paper Size.

Here we select A4.

(3) Select Quality & Media in the pop-up menu.

- (4) Select the media type of the loaded paper in Media Type.
Here we select Plain Paper.

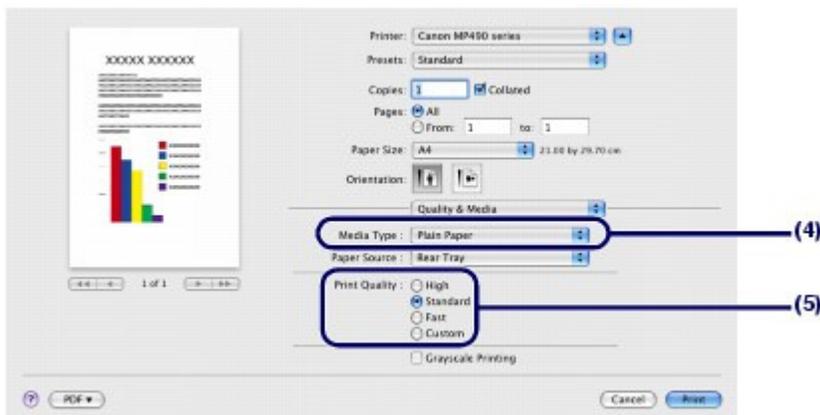

Note

- If you select the wrong media type, the machine may not print with the proper print quality.

- (5) Select the print quality in Print Quality.
Here we select Standard.

Note

- For details on the print quality, refer to the on-screen manual: [Advanced Guide](#).

Note

- For details on the printer driver functions, click (Question) on the Quality & Media, Color Options, Borderless Printing, or Margin screen.
- The preview appears on the left of the dialog box to confirm the print result. Some software applications may not have a preview function.

7. Start printing.

Click Print to start printing.

Note

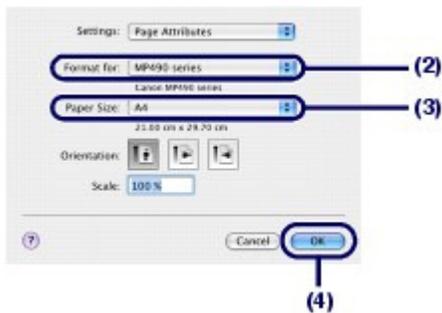

- Click the printer icon in the Dock to display the list of print jobs in progress.
- To cancel a print job in progress, select the desired job in the Name list and click Delete. To temporarily stop a job in progress, click Hold. To temporarily stop all the jobs in the list, click Pause Printer.
- If printed ruled lines are misaligned or print results are unsatisfactory, adjust the print head position.
See [Aligning the Print Head](#).

■ For Mac OS X v.10.4.x or Mac OS X v.10.3.9

Note

- The screens used in this section are for printing in Mac OS X v.10.4.x.

- 1.** Make sure that the machine is turned on.
See [Operation Panel](#).
- 2.** Load paper.
See [Loading Paper](#).
Here we load A4 plain paper.
- 3.** Open the Paper Output Tray gently, and open the Output Tray Extension.
- 4.** Create (or open) a document to print using an appropriate software application.
- 5.** Specify the page size.
 - (1)** Select Page Setup on the File menu in your software application.
The Page Setup dialog box will appear.
 - (2)** Make sure that your machine's name is selected in Format for.
 - (3)** Select the page size of the loaded paper in Paper Size.
Here we select A4.
 - (4)** Click OK.

- 6.** Specify the required print settings.
 - (1)** Select Print on the File menu in your software application.
The Print dialog box will appear.
 - (2)** Make sure that your machine's name is selected in Printer.
 - (3)** Select Quality & Media in the pop-up menu.
 - (4)** Select the media type of the loaded paper in Media Type.
Here we select Plain Paper.

Note

- If you select the wrong media type, the machine may not print with the proper print quality.

(5) Select the print quality in Print Quality.

Here we select Standard.

Note

- For details on the print quality, refer to the on-screen manual: [Advanced Guide](#).

Note

- For details on the printer driver functions, click  (Question) on the Quality & Media, Color Options, Special Effects, Borderless Printing, or Margin screen.
- To display the preview to confirm the print result, click Preview. Some software applications may not have a preview function.

7. Start printing.

Click Print to start printing.

Note

- Click the printer icon in the Dock to display the list of print jobs in progress.
- To cancel a print job in progress, select the desired job in the Name list and click Delete. To temporarily stop a job in progress, click Hold. To temporarily stop all the jobs in the list, click Stop Jobs.
- If printed ruled lines are misaligned or print results are unsatisfactory, adjust the print head position.
See [Aligning the Print Head](#).

Other Usages

This section introduces the machine settings and useful software applications you can use with the machine.

Machine Settings

Useful Software Applications

- [Solution Menu](#)
- [My Printer](#)
- [Easy-WebPrint EX](#)

[↑ Page top](#)

Machine Settings

This section describes the items you can set or change in Device settings of the Top menu screen. For details on setting or changing, refer to the on-screen manual: [Advanced Guide](#).

● Copy auto intensity

Automatically adjusts the intensity according to the original on the Platen Glass when copying.

● Prevent abrasion

Use this setting only if the print surface becomes smudged.

● Extension amount

Selects the amount of image that extends off the paper when making borderless copies.

● AutoPhotoFix setting

Selects whether or not to prioritize printing Exif information saved on a photo when Auto photo fix ON is selected in card mode.

● Date display

Selects the format of date that is to be printed on a photo when Print date On is selected in card mode.

● Read/write attribute

Selects whether to use the Card Slot of the machine as the memory card drive of a computer.

● Quiet mode

Enables this function if you want to reduce the operating noise of the machine, such as when using the machine at night (when copying, printing from the memory card).

● Key repeat

Enables to increase or decrease numbers rapidly by pressing and holding down the button when inputting numbers. When this setting is disabled, holding down the button is the same as pressing it once.

● Language selection

Changes the language for LCD messages and menus.

● Reset setting

Set the machine settings back to the default. (However, the values set for the print head alignment, the settings for Read/write attribute, and the language set in the Language selection will not be reset.)

Useful Software Applications

The machine can be used with useful software applications such as Solution Menu, My Printer, and Easy-WebPrint EX.

■ Solution Menu

With Solution Menu, you can start the software applications supplied with the machine or display the operating instructions.

Double-click  (Solution Menu) on the desktop.

Click Here: [Solution Menu](#)

Click  (Solution Menu) in the Dock.

* The screens below are for Windows Vista.

Click the button of a function to use.

↓ After starting Solution Menu, click the button on the title bar to reduce the window size.

Note

- Install Solution Menu from the *Setup CD-ROM* when it has not been installed or has been uninstalled. To install Solution Menu, select Solution Menu in Custom Install.
- The buttons displayed on the screen may vary depending on the country or region of purchase.

- To start Solution Menu from the Start menu, select All Programs (or Programs), Canon Utilities, Solution Menu, then Solution Menu.

- To start Solution Menu from the menu bar, select the Go menu, Applications, Canon Utilities, Solution Menu, then double-click Solution Menu.

■ My Printer

With My Printer, you can display the printer driver setup window. It also provides you with the information on how to take an action when you have trouble with the operation.

My Printer is not available in Macintosh.

Double-click  (My Printer) on the desktop.

Note

- You can also start My Printer from Solution Menu or the taskbar.
- Install My Printer from the *Setup CD-ROM* when it has not been installed or has been uninstalled. To install My Printer, select My Printer in Custom Install.
- To start My Printer from the Start menu, select All Programs (or Programs), Canon Utilities, My Printer, then My Printer.

■ Easy-WebPrint EX

Easy-WebPrint EX provides quick and easy printing of web pages for Internet Explorer. You can print web pages automatically resized to fit the paper width without cutting off the sides of pages, or preview and select the desired web pages to print.

Easy-WebPrint EX is not available in Windows 2000 and Macintosh.

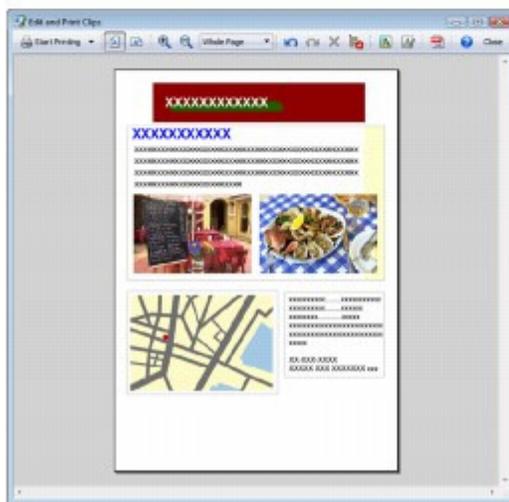

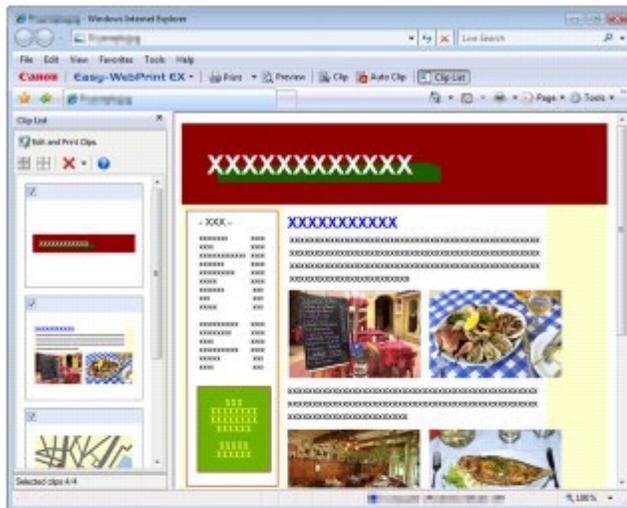

Important

- It is unlawful to reproduce or edit the copyrighted work of another person without permission from the copyright holder, except for personal use, use within the home, or other use within the limited scope as defined by the copyright. Additionally, reproducing or editing photographs of people may infringe on portrait rights.

When Easy-WebPrint EX is installed, it adds a toolbar to your Internet Explorer screen. The toolbar is available whenever Internet Explorer is running.

The clip function, for example, allows you to clip desired parts of web pages and edit them to print.

For details on printing web pages, click [?](#) (Help) to view the online help.

Note

Installing Easy-WebPrint EX

- If Easy-WebPrint EX is not installed, the guidance for installation of Easy-WebPrint EX may appear from the taskbar on the desktop.
To install Easy-WebPrint EX, click the displayed guidance and follow the instructions on the screen.
- You can also install Easy-WebPrint EX from the *Setup CD-ROM*.
To install Easy-WebPrint EX, select Easy-WebPrint EX in Custom Install.
- To install Easy-WebPrint EX on your computer, Internet Explorer 7 or later is required and the computer must be connected to the Internet.

Loading Paper / Originals

This section describes types of paper or originals you can load, how to load printing paper in the Rear Tray, and how to load originals to copy or scan.

Loading Paper

[Loading Plain Paper / Photo Paper](#)

[Loading Envelopes](#)

[Media Types You Can Use](#)

[Media Types You Cannot Use](#)

Loading Originals

[Loading Originals](#)

[Originals You Can Load](#)

[↑ Page top](#)

Loading Paper

- ➔ [Loading Plain Paper / Photo Paper](#)
- ➔ [Loading Envelopes](#)
- ➔ [Media Types You Can Use](#)
- ➔ [Media Types You Cannot Use](#)

■ Loading Plain Paper / Photo Paper

▶ Important

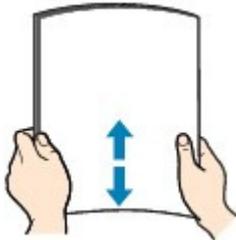

- If you cut plain paper into small size such as 4" x 6" / 10 x 15 cm, 4" X 8" / 101.6 x 203.2 mm, 5" x 7" / 13 x 18 cm, or 2.16" x 3.58" / 55.0 x 91.0 mm (Card size) to perform trial print, it can cause paper jams.

📖 Note

- We recommend Canon genuine photo paper for printing photos.
For details on the Canon genuine paper, see [Media Types You Can Use](#).
- You can use general copy paper.
For the page size and paper weight you can use for this machine, see [Media Types You Can Use](#).

1. Prepare paper.

Align the edges of paper. If paper is curled, flatten it.

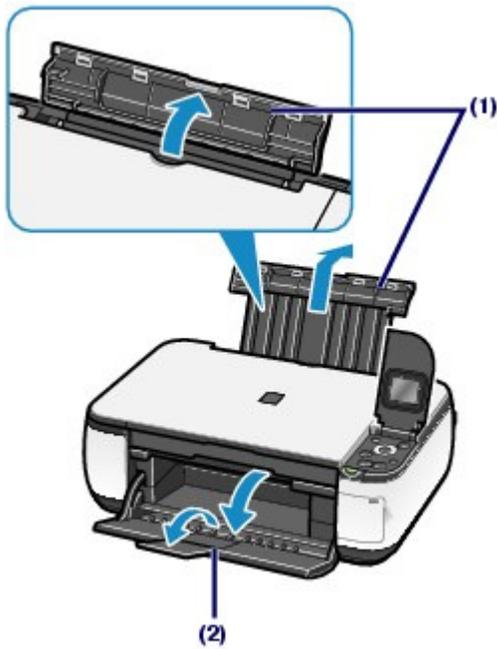

📖 Note

- Align the edges of paper neatly before loading. Loading paper without aligning the edges may cause paper jams.
- If paper is curled, hold the curled corners and gently bend them in the opposite direction until the paper becomes completely flat.
For details on how to flatten curled paper, refer to "[Troubleshooting](#)" in the on-screen manual: *Advanced Guide*.

2. Load paper.

- (1) Open the Paper Support, raise it, then tip it back.
- (2) Open the Paper Output Tray gently, and open the Output Tray Extension.

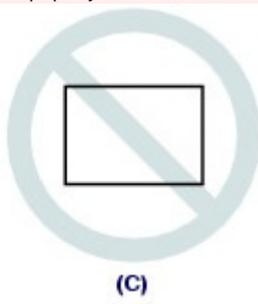

- (3) Slide the Paper Guides (A) to open them, and load the paper in the center of the Rear Tray WITH THE PRINT SIDE FACING YOU.

Important

- Always load paper in the portrait orientation (B). Loading paper in the landscape orientation (C) can cause paper jams.

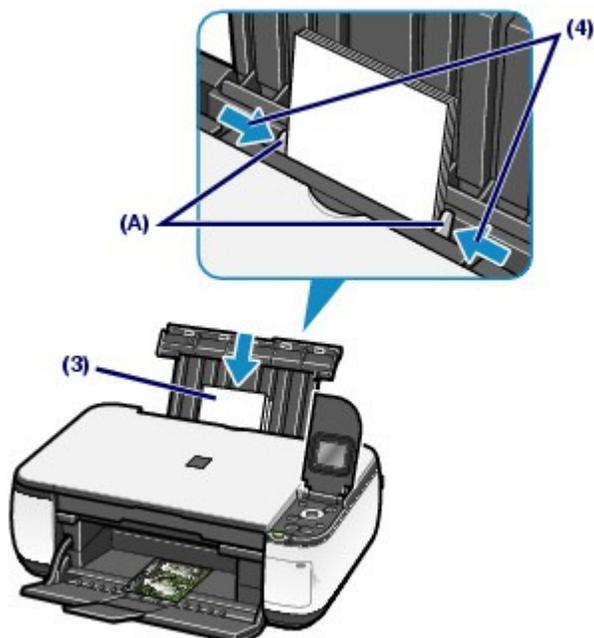

(B)

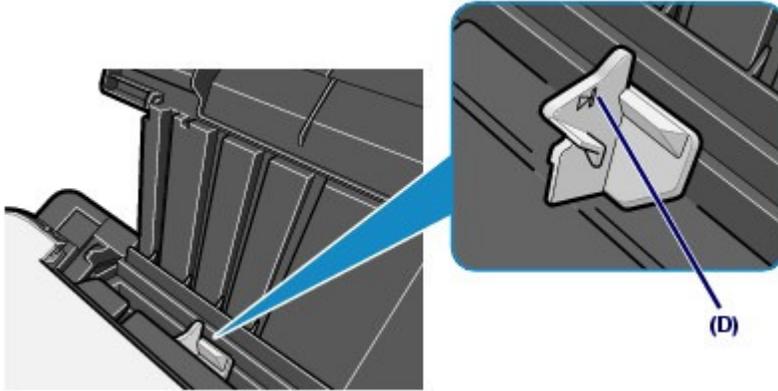

(C)

- (4) Slide the Paper Guides (A) to align them with both sides of the paper stack. Do not slide the Paper Guides too hard. The paper may not be fed properly.

 **Note**

- Do not load sheets of paper higher than the Load Limit Mark (D).

 **Note**

- The machine may make operating noise when feeding paper.

After loading paper

- When using the machine to copy or print without a computer, select the size and type of the loaded paper for the page size and the media type of the settings screen in each mode. See [Changing the Settings](#) in "Printing Photos Saved on the Memory Card" or [Changing the Settings](#) in "Making Copies".
- When printing with a computer, select the size and type of the loaded paper in Printer Paper Size (or Paper Size) and Media Type in the printer driver. See [Printing Documents \(Windows\)](#) or [Printing Documents \(Macintosh\)](#).

Basic Guide

■ [Advanced Guide](#) ■ [Troubleshooting](#)

[Contents](#) > [Loading Paper / Originals](#) > [Loading Paper](#) > Loading Envelopes

■ Loading Envelopes

You can print on European DL and US Comm. Env. #10-sized envelopes.

The address is automatically rotated and printed according to the envelope's direction by specifying with the printer driver properly.

▶ Important

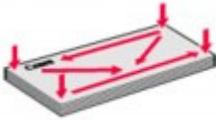

- You can only print on envelopes with the computer.
- You cannot use the following envelopes.
 - Envelopes with an embossed or treated surface
 - Envelopes with a double flap (or sticker flaps)
 - Envelopes whose gummed flaps are already moistened and adhesive

📖 Note

- In Windows, the message on how to load envelopes will appear when printing on them. This message will not appear next time if you select the Do not show this message again. check box.

1. Prepare envelopes.

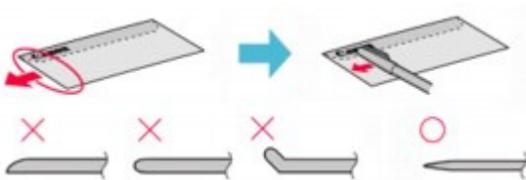

- Press down on all four corners and edges of the envelopes to flatten them.

- If the envelopes are curled, hold the opposite corners and gently twist them in the opposite direction.

- If the corner of the envelope flap is folded, flatten it.
- Use a pen to press the leading edge in the inserting direction flat and sharpen the crease.

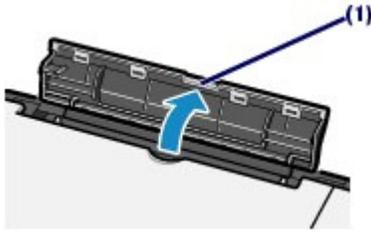

The figures above show a side view of the leading edge of the envelope.

▶ Important

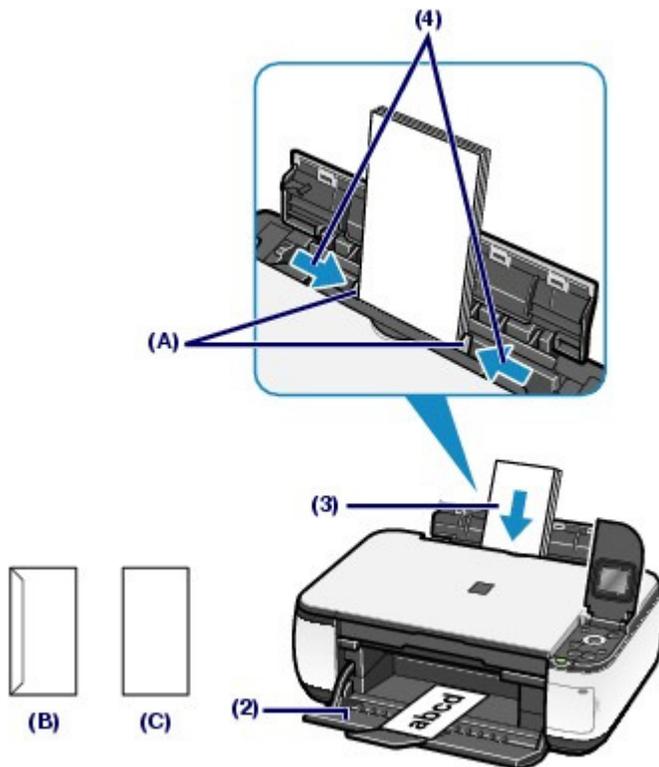

- The envelopes may jam in the machine if they are not flat or the edges are not aligned. Make sure that no curl or puff exceeds 0.1 inches / 3 mm.

2. Load envelopes.

- (1)** Open the Paper Support.
Do not raise the Paper Support.

- (2)** Open the Paper Output Tray gently, and open the Output Tray Extension.
See [Load paper](#) in "Loading Plain Paper / Photo Paper" of "Loading Paper".
- (3)** Slide the Paper Guides (A) to open them, and load the envelopes in the center of the Rear Tray WITH THE ADDRESS SIDE FACING YOU.
The folded flap of the envelope will be faced down on the left side.
Up to 10 envelopes can be loaded at once.
- (4)** Slide the Paper Guides (A) to align them with both sides of the envelopes.
Do not slide the Paper Guides too hard. The envelopes may not be fed properly.

(B) Rear side

(C) Address side

3. Specify the settings in the printer driver.

- (1)** Select Envelope in Commonly Used Settings on the Quick Setup sheet.
- (2)** Select DL Env. or Comm. Env. #10 in the Envelope Size Setting window.
- (3)** Select Landscape in Orientation.

- (1)** Select Envelope in Media Type.

(2) Select DL Envelope or #10 Envelope in Paper Size.

(3) Select the landscape orientation in Orientation.

Important

- If you do not specify the envelope size or orientation properly, the address will be printed upside down or will be turned to 90 degrees.

Note

- The machine may make operating noise when feeding envelopes.
- In Windows, if the print result is upside down, open the printer driver setup window, select Envelope in Commonly Used Settings, then select the Rotate 180 degrees check box in Additional Features.
- For details on the printer driver settings, see [Printing Documents \(Windows\)](#) or [Printing Documents \(Macintosh\)](#).

Basic Guide

■ Advanced Guide ■ Troubleshooting

[Contents](#) > [Loading Paper / Originals](#) > [Loading Paper](#) > Media Types You Can Use

■ Media Types You Can Use

Choose paper suitable for printing, for the best print results. Canon provides you various types of paper to enhance the fun of printing, such as stickers as well as papers for photo or document. We recommend the use of Canon genuine paper for printing your important photos.

● Media Types

Commercially available papers

Name of Paper <Model No.>*1	Rear Tray Paper Load Limit	Paper Output Tray Load Limit	Settings in Media Type	
			Operation Panel	Printer Driver
Plain Paper (Recycled paper)*2	Approx. 100 sheets	Approx. 50 sheets	Plain paper	Plain Paper
Envelopes*3	10 envelopes	*5	-	Envelope

Canon genuine papers

Name of Paper <Model No.>*1	Rear Tray Paper Load Limit	Paper Output Tray Load Limit	Settings in Media Type	
			Operation Panel	Printer Driver
For printing photos:				
				
Photo Paper Pro Platinum <PT-101>*4	A4, Letter, 5" x 7" / 13 x 18 cm, and 8" x 10" / 20 x 25 cm: 10 sheets 4" x 6" / 10 x 15 cm: 20 sheets	*5	Pro Platinum	Photo Paper Pro Platinum
Photo Paper Pro II <PR-201>*4			Pro II	Photo Paper Pro II
Glossy Photo Paper "Everyday Use" <GP-501>*4			Glossy	Glossy Photo Paper
Photo Paper Glossy <GP-502>*4			Glossy	Glossy Photo Paper
Photo Paper Plus Glossy II <PP-201>*4			Plus Glossy II	Photo Paper Plus Glossy II
Photo Paper Plus Semi-gloss <SG-201>*4			Plus Semi-gloss	Photo Paper Plus Semi-gloss
Matte Photo Paper <MP-101>			Matte	Matte Photo Paper
For printing business documents:				

				
High Resolution Paper <HR-101N>*3	80 sheets	50 sheets	-	High Resolution Paper
For creating your own prints:				
				
T-Shirt Transfers <TR-301>*3	1 sheet	*5	-	T-Shirt Transfers
Photo Stickers <PS-101>*3, *6				Glossy Photo Paper

*1 Paper with a Model Number is Canon genuine paper. Refer to the instruction manual supplied with the paper for detailed information on the printable side and notes on handling paper. For information on the page sizes available for each Canon genuine paper, visit our website. You may not be able to purchase some Canon genuine papers depending on the country or region of purchase. Paper is not sold in the US by Model Number. Purchase paper by name.

*2 Proper feeding of paper may not be possible at the maximum capacity depending on the type of paper or environmental conditions (either very high or low temperature or humidity). In such cases, reduce the number of paper you load at a time to less than half (100% recycled paper can be used).

*3 Available only when printing from your computer.

*4 When loading paper in stacks, the print side may become marked as it is fed or paper may not feed properly. In this case, load one sheet at a time.

*5 We recommend that you remove the previously printed sheet from the Paper Output Tray before continuously printing to avoid blurs and discoloration.

*6 You can easily specify print settings for sticker paper with Easy-PhotoPrint EX provided on the *Setup CD-ROM*. Install it on your computer.

● Page Sizes

You can use the following page sizes.

Note

- In Macintosh, Choukei 3 and Choukei 4 are not available.

Standard sizes:

- Letter (8.50 x 11.00 inches / 215.9 x 279.4 mm)
- Legal (8.50 x 14.00 inches / 215.9 x 355.6 mm)
- A5 (5.83 x 8.27 inches / 148.0 x 210.0 mm)
- A4 (8.27 x 11.69 inches / 210.0 x 297.0 mm)
- B5 (7.17 x 10.12 inches / 182.0 x 257.0 mm)
- 4" x 6" (4.00 x 6.00 inches / 10 x 15 cm)
- 4" x 8" (4.00 x 8.00 inches / 101.6 x 203.2 mm)
- 5" x 7" (5.00 x 7.00 inches / 13 x 18 cm)
- 8" x 10" (8.00 x 10.00 inches / 20 x 25 cm)
- L (3.50 x 5.00 inches / 89.0 x 127.0 mm)
- 2L (5.00 x 7.01 inches / 127.0 x 178.0 mm)
- Hagaki (3.94 x 5.83 inches / 100.0 x 148.0 mm)
- Hagaki 2 (7.87 x 5.83 inches / 200.0 x 148.0 mm)
- Comm. Env. #10 (4.12 x 9.50 inches / 104.6 x 241.3 mm)
- DL Env. (4.33 x 8.66 inches / 110.0 x 220.0 mm)
- Choukei 3 (4.72 x 9.25 inches / 120.0 x 235.0 mm)

- Choukei 4 (3.54 x 8.07 inches / 90.0 x 205.0 mm)
- Youkei 4 (4.13 x 9.25 inches / 105.0 x 235.0 mm)
- Youkei 6 (3.86 x 7.48 inches / 98.0 x 190.0 mm)
- Card (2.16 x 3.58 inches / 55.0 x 91.0 mm)
- Wide (4.00 x 7.10 inches / 101.6 x 180.6 mm)

Non-standard sizes:

You can also specify a custom size within the following range.

- Minimum size: 2.17 x 3.58 inches / 55.0 x 91.0 mm
- Maximum size: 8.50 x 26.61 inches / 215.9 x 676.0 mm

● Paper Weight

17 to 28 lb / 64 to 105 g/m² (except for Canon genuine paper)

Do not use heavier or lighter paper (except for Canon genuine paper), as it could jam in the machine.

● Notes on Storing Paper

- Take out only the necessary number of paper from the package, just before printing.
- To avoid curling, when you do not print, put unused paper back into the package and keep it on a level surface. And also, store it avoiding heat, humidity, and direct sunlight.

● Notes on Paper for Full-page Borderless Printing

- You cannot use A5, B5, and Legal-sized paper, and envelopes for full-page borderless printing.
- You can use plain paper for full-page borderless printing only when printing from a computer. However, this may result in lower print quality. We recommend using plain paper for a trial print.

[↑ Page top](#)

■ Media Types You Cannot Use

Do not use the following types of paper. Using such paper will cause not only unsatisfactory results, but also the machine to jam or malfunction.

- Folded, curled, or wrinkled paper
- Damp paper
- Paper that is too thin (weighing less than 17 lb / 64 g/m²)
- Paper that is too thick (weighing more than 28 lb / 105 g/m², except for Canon genuine paper)
- Paper thinner than a postcard, including plain paper or notepad paper cut to a small size (when printing on paper smaller than A5)
- Picture postcards
- Postcards affixed with photos or stickers
- Envelopes with a double flap (or sticker flaps)
- Envelopes with an embossed or treated surface
- Envelopes whose gummed flaps are already moistened and adhesive
- Any type of paper with holes
- Paper that is not rectangular
- Paper bound with staples or glue
- Paper with adhesives
- Paper decorated with glitter, etc.

Loading Originals

- ➔ [Loading Originals](#)
- ➔ [Originals You Can Load](#)

■ Loading Originals

You can load originals to copy or scan on the Platen Glass.

▶ Important

- After loading the original on the Platen Glass, be sure to close the Document Cover before starting to copy or scan.
 - When scanning from a computer using a software application, you need to load the original in a different way.
- For details, refer to the on-screen manual: [Advanced Guide](#).

1. Load an original on the Platen Glass.

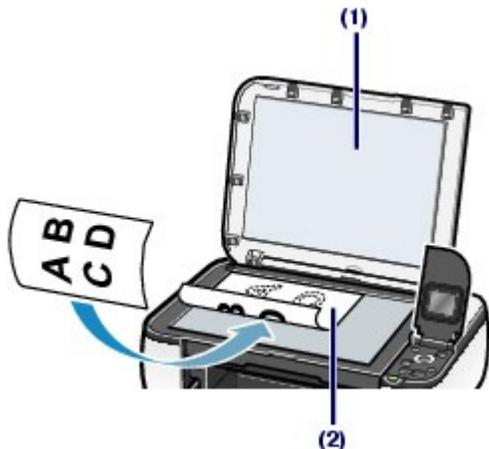

(1) Open the Document Cover.

▶ Important

- Do not place any object on the Document Cover. It will fall into the Rear Tray when the Document Cover is opened and cause the machine to malfunction.

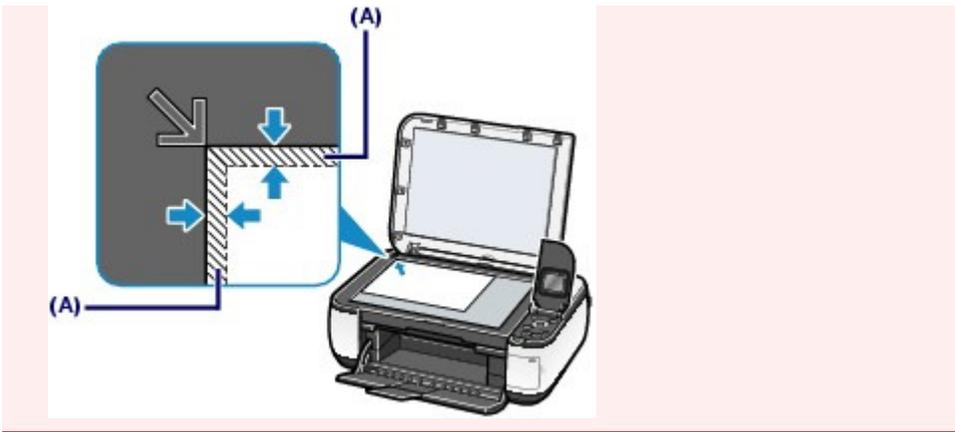

(2) Load an original WITH THE SIDE TO COPY OR SCAN FACING DOWN on the Platen Glass.

Align the corner of the original with the alignment mark .

▶ Important

- Do not place any objects weighing more than 4.4 lb / 2.0 kg on the Platen Glass.
- Do not press or put weight on the original with pressure exceeding 4.4 lb / 2.0 kg. Doing so may cause the scanner to malfunction or the Platen Glass to break.
- The machine cannot scan the shaded area (A) (0.04 inches / 1 mm from the edges of the Platen Glass).

2. Close the Document Cover gently.

[↑ Page top](#)

Basic Guide[Advanced Guide](#) [Troubleshooting](#)[Contents](#) > [Loading Paper / Originals](#) > [Loading Originals](#) > [Originals You Can Load](#)

■ Originals You Can Load

You can copy or scan the following originals.

Types of originals: Text document, magazine, or newspaper
Printed photo, postcard or business card or DVD/CD

Size (W x L): Max. 8.5 x 11.7 inches / 216 x 297 mm

Note

- When loading a thick original such as a book on the Platen Glass, you can load it by removing the Document Cover from the machine.
For details on how to remove or attach the Document Cover, refer to the on-screen manual: [Advanced Guide](#).
-

[↑ Page top](#)

Routine Maintenance

This section describes the procedure to clean the machine when the print result is faint, to replace FINE Cartridges when they run out of ink, or to take an action when paper does not feed properly.

When Printing Becomes Faint or Colors Are Incorrect

- [Printing the Nozzle Check Pattern](#)
- [Examining the Nozzle Check Pattern](#)
- [Cleaning the Print Head](#)
- [Cleaning the Print Head Deeply](#)
- [Aligning the Print Head](#)

Replacing a FINE Cartridge

- [Replacing Procedure](#)
- [Checking the Ink Status](#)

Cleaning the Paper Feed Roller

When Printing Becomes Faint or Colors Are Incorrect

If print results are blurred or colors are not printed correctly, the print head nozzles (FINE Cartridges) are probably clogged. Follow the procedure below to print the nozzle check pattern, check the print head nozzle condition, then clean the Print Head.

If printed ruled lines are misaligned or print results are otherwise unsatisfactory, aligning the Print Head may improve print quality.

Important

- Do not rinse or wipe the Fine Cartridges. This can cause trouble with the FINE Cartridges.

Note

Before performing maintenance

- Check if ink remains in the FINE Cartridge.
See [Checking the Ink Status](#).
- Check if the FINE Cartridges are installed correctly.
See [Replacing Procedure](#).
- Check if the orange protective tape on the bottom of the FINE Cartridge is removed.
See [Replacing Procedure](#).
- When an error message appears on the LCD, refer to " [Troubleshooting](#)" in the on-screen manual: [Advanced Guide](#).
- Increasing the print quality in the printer driver settings may improve the print result.
For details, refer to the on-screen manual: [Advanced Guide](#).

When the Print Results Are Blurred or Uneven:

Step 1

See [Printing the Nozzle Check Pattern](#).
See [Examining the Nozzle Check Pattern](#).

If there are missing lines or horizontal white streaks in the pattern:

Step 2

See [Cleaning the Print Head](#).

If the problem is not resolved after cleaning the Print Head twice:

Step 3

See [Cleaning the Print Head Deeply](#).

If the problem is not resolved, turn off the power and clean the Print Head deeply again after 24 hours:

If the problem is still not resolved:

Step 4

See [Replacing a FINE Cartridge](#).

After cleaning the Print Head, print and examine the nozzle check pattern.

Note

- If the problem is still not resolved after replacing the FINE Cartridge, contact the service center.
-

● When the Print Results Are Not Even such as the Ruled Lines Are Misaligned:

See [Aligning the Print Head](#) .

Note

- You can also perform the maintenance operations from your computer.
For details, refer to the on-screen manual: [Advanced Guide](#) .
-

[↑ Page top](#)

■ Printing the Nozzle Check Pattern

Print the nozzle check pattern to determine whether the ink ejects properly from the print head nozzles.

Note

- If the remaining ink level is low, the nozzle check pattern will not be printed correctly. Replace the FINE Cartridge whose ink is low. See [Replacing a FINE Cartridge](#).

You need to prepare: a sheet of A4 or Letter-sized plain paper

1. Make sure that the power is turned on.
2. Print the nozzle check pattern.
 - (1) Press the **Menu** button.
 - (2) Select Maintenance, and press the **OK** button.
 - (3) Select Nozzle check and press the **OK** button.

The pattern print confirmation screen will appear.

- (4) Select Yes, and press the **OK** button.
 - (5) Confirm the displayed message, and load a sheet of A4 or Letter-sized plain paper.
 - (6) Open the Paper Output Tray gently, and open the Output Tray Extension.
 - (7) Press the **OK** button.

The Nozzle check pattern will be printed.
 - (8) Confirm the displayed message and press the **OK** button.

The Check patterns screen will appear.
3. Examine the nozzle check pattern.

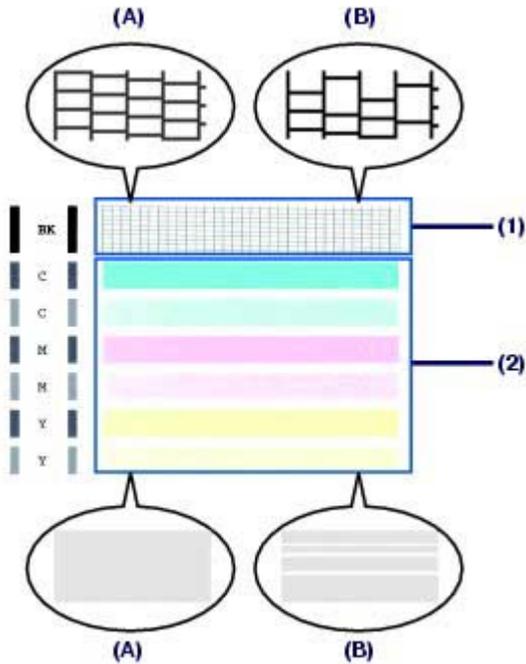

See [Examining the Nozzle Check Pattern](#).

■ Examining the Nozzle Check Pattern

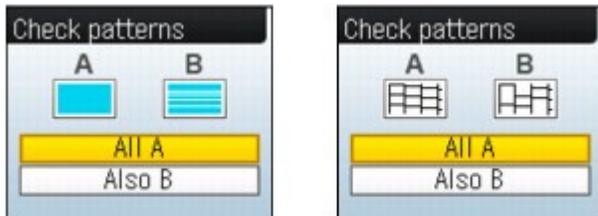

Examine the nozzle check pattern, and clean the Print Head if necessary.

1. Check if there are missing lines in the pattern (1) or horizontal white streaks in the pattern (2).

- (A) No missing lines/No horizontal white streaks
 (B) Lines are missing/Horizontal white streaks are present

2. Select the pattern that is closer to the printed nozzle check pattern on the Check patterns screen.

For (A) (no missing lines or no horizontal white streaks) in both (1) and (2):

- (1) Select All A and press the **OK** button.
The cleaning is not required.
- (2) Confirm the message and press the **OK** button.
The screen will return to the Maintenance screen.

Note

- To perform other functions, select the desired menu on the top menu screen displayed by pressing the **Back** or **Menu** button.

For (B) (lines are missing or horizontal white streaks are present) in (1) or (2), or in both (1) and (2):

(1) Select Also B and press the **OK button.**

Clean the Print Head. The cleaning confirmation screen will appear.

(2) Select Yes and press the **OK button.**

The machine starts cleaning the Print Head.

See [Cleaning the Print Head](#).

[↑ Page top](#)

■ Cleaning the Print Head

Clean the Print Head if lines are missing or if horizontal white streaks are present in the printed nozzle check pattern. Cleaning unclogs the nozzles and restores the print head condition. Cleaning the Print Head consumes ink, so clean the Print Head only when necessary.

You need to prepare: a sheet of A4 or Letter-sized plain paper

1. Make sure that the power is turned on.
2. Clean the Print Head.
 - (1) Press the **Menu** button.
 - (2) Select Maintenance, and press the **OK** button.
 - (3) Select Cleaning, and press the **OK** button.

The confirmation screen will appear.

- (4) Select Yes, and press the **OK** button.
The machine starts cleaning the Print Head.

Do not perform any other operations until the machine completes the cleaning of the Print Head. This takes about 1 to 2 minutes.

The pattern print confirmation screen will appear.

3. Print the nozzle check pattern.
 - (1) Select Yes, and press the **OK** button.
 - (2) Confirm the displayed message, and load a sheet of A4 or Letter-sized plain paper.
 - (3) Open the Paper Output Tray gently, and open the Output Tray Extension.
 - (4) Press the **OK** button.
The nozzle check pattern will be printed.
 - (5) Confirm the displayed message and press the **OK** button.

4. Examine the nozzle check pattern.

See [Examining the Nozzle Check Pattern](#).

Note

- If the problem is not resolved after cleaning the Print Head twice, clean the Print Head deeply.

See [Cleaning the Print Head Deeply](#) .

[↑ Page top](#)

■ Cleaning the Print Head Deeply

If print quality does not improve by the standard cleaning of the Print Head, clean the Print Head deeply. Cleaning the Print Head deeply consumes more ink than the standard cleaning of the Print Head, so clean the Print Head deeply only when necessary.

You need to prepare: a sheet of A4 or Letter-sized plain paper

1. Make sure that the power is turned on.
2. Clean the Print Head deeply.
 - (1) Press the **Menu** button.
 - (2) Select Maintenance, and press the **OK** button.
 - (3) Select Deep cleaning, and press the **OK** button.

The confirmation screen will appear.

- (4) Select Yes, and press the **OK** button.

The machine starts cleaning the Print Head deeply.

Do not perform any other operations until the machine completes the deep cleaning of the Print Head. This takes about 2 minutes.

The pattern print confirmation screen will appear.

3. Print the nozzle check pattern.
 - (1) Select Yes, and press the **OK** button.
 - (2) Confirm the displayed message, and load a sheet of A4 or Letter-sized plain paper.
 - (3) Open the Paper Output Tray gently, and open the Output Tray Extension.
 - (4) Press the **OK** button.

The nozzle check pattern will be printed and the screen will return to the Maintenance screen.

Note

- To perform other functions, select the desired menu on the top menu screen displayed by pressing the **Back** or **Menu** button.

4. Examine the nozzle check pattern.

See step 1 of [Examining the Nozzle Check Pattern](#).

If the problem is not resolved, turn off the power and clean the Print Head deeply again after 24 hours.

If the problem is still not resolved, replace the FINE Cartridge with a new one.

See [Replacing a FINE Cartridge](#).

If the problem is still not resolved after replacing the FINE cartridge, contact the service center.

[↑ Page top](#)

■ Aligning the Print Head

If printed ruled lines are misaligned or print results are otherwise unsatisfactory, adjust the print head position.

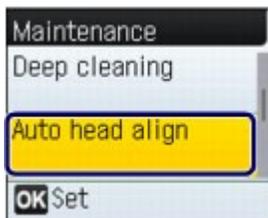

Note

- If the remaining ink level is low, the print head alignment sheet will not be printed correctly. Replace the FINE Cartridge whose ink is low.
See [Replacing a FINE Cartridge](#).

You need to prepare: a sheet of A4 or Letter-sized plain paper*

* Be sure to use paper that is white and clean on both sides.

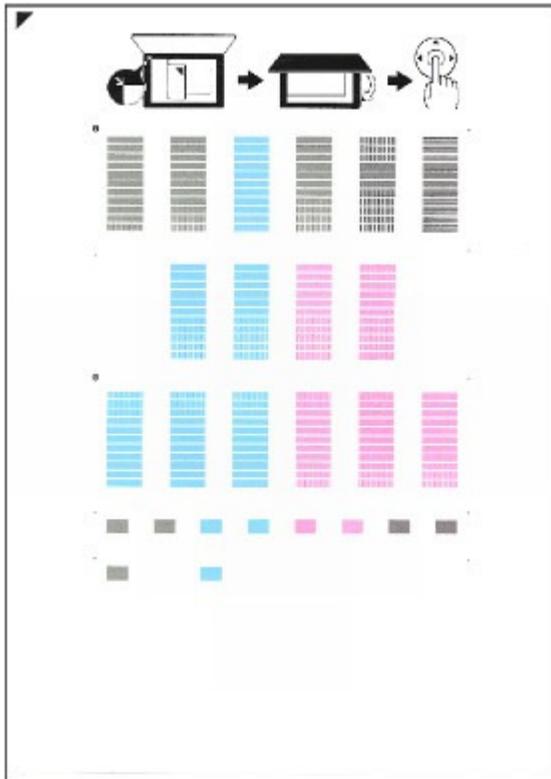

1. Make sure that the power is turned on.
2. Print the print head alignment sheet.
 - (1) Press the **Menu** button.
 - (2) Select Maintenance, and press the **OK** button.
 - (3) Select Auto head align, and press the **OK** button.

The confirmation screen will appear.

- (4) Select Yes, and press the **OK** button.
- (5) Confirm the displayed message, and load a sheet of A4-sized plain paper.
- (6) Open the Paper Output Tray gently, and open the Output Tray Extension.
- (7) Press the **OK** button.

The print head alignment sheet will be printed.

Important

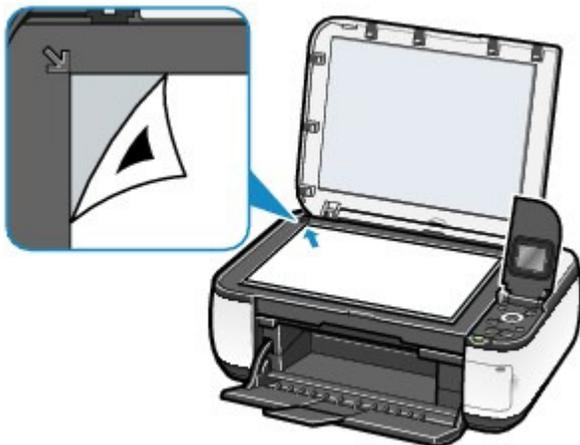

- Do not touch any printed part on the print head alignment sheet.
- Be careful not to get the print head alignment sheet dirty. If the sheet is stained or wrinkled, it may not be scanned properly.

(8) When the message, "Did the patterns print correctly?" appears, check the pattern is printed correctly, select Yes, then press the **OK** button.

3. Scan the print head alignment sheet to adjust the print head position.

(1) Confirm the displayed message, and load the print head alignment sheet on the Platen Glass.

Load the print head alignment sheet WITH THE PRINTED SIDE FACING DOWN and align the mark  on the upper left corner of the sheet with the alignment mark .

(2) Close the Document Cover gently, and press the **OK** button.

The machine starts scanning the print head alignment sheet, and the print head position will be adjusted automatically.

When adjusting the print head position is completed, remove the print head alignment sheet on the Platen

Glass.

Important

- Do not open the Document Cover or remove the print head alignment sheet on the Platen Glass until adjusting the print head position is completed.
- If the message "Failed to scan." appears, press the **OK** button and confirm the following:
 - The Platen Glass and print head alignment sheet are not dirty.
 - The print head alignment sheet is placed in the correct position with the printed side facing down.

Refer to "[Troubleshooting](#)" in the on-screen manual: *Advanced Guide*.

Note

- To perform other functions, select the desired menu on the top menu screen displayed by pressing the **Back** or **Menu** button.
- If the print results are still not satisfactory after adjusting the print head position as described above, adjust the print head position manually from a computer.
For details, refer to the on-screen manual: [Advanced Guide](#).
- To print and check the current head position adjustment values, select Head alignment print in the Maintenance menu.

 [Page top](#)

Replacing a FINE Cartridge

When ink runs out while printing is in progress, an error message will appear on the LCD or your computer screen. Make sure which FINE Cartridge has run out of ink and replace it with a new one.

Note

- If the error message appears, confirm the displayed message and take an appropriate action. For details, refer to the "An Error Message is Displayed on the LCD" in "[Troubleshooting](#)" of the on-screen manual: *Advanced Guide*.
- For information on the compatible FINE Cartridges, refer to the printed manual: *Getting Started*.

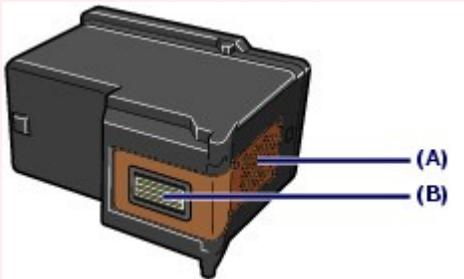

■ Replacing Procedure

When FINE Cartridges run out of ink, follow the procedure below to replace them.

Important

Handling FINE Cartridges

- Do not touch the electrical contacts (A) or print head nozzles (B) on the FINE Cartridge. The machine may not print properly if you touch it.

- To maintain optimal print quality, we recommend the use of specified Canon brand FINE Cartridges. Refilling the ink is not recommended.
- If you remove a FINE Cartridge, replace it immediately. Do not leave the machine with FINE Cartridges removed.
- Use new FINE Cartridges for replacement. Installing used FINE Cartridges may cause the nozzles to clog. Furthermore, with such cartridges, the machine will not be able to inform you when to replace the cartridges properly.
- Once a FINE Cartridge has been installed, do not remove it from the machine and leave it out in the open. This will cause the FINE Cartridge to dry out, and the machine may not operate properly when it is reinstalled. To maintain optimal printing quality, use a FINE Cartridge within six months of first use.

Note

- If a FINE Cartridge runs out of ink, you can print with either Color or Black FINE Cartridge, in whichever ink remains, only for a while. However the print quality may be reduced compared to when printing with both cartridges. We recommend to use new FINE Cartridges in order to obtain optimum qualities. Even when printing with one ink only, print with leaving the empty FINE Cartridge installed. If either of the Color FINE Cartridge or Black FINE Cartridge is not installed, an error occurs and the machine cannot print.

For information on how to configure this setting, refer to the on-screen manual: [Advanced Guide](#).

- Color ink may be consumed even when printing a black-and-white document or when black-and-white printing is specified.

Both color ink and black ink are also consumed in the standard cleaning and deep cleaning of the Print Head, which may be necessary to maintain the machine's performance. When ink runs out, replace the FINE Cartridge immediately with a new one.

1. Make sure that the power is turned on, and open the Paper Output Tray.
2. Lift the Scanning Unit (Cover), then hold it open with the Scanning Unit Support (C).

The FINE Cartridge Holder moves to the replacement position.

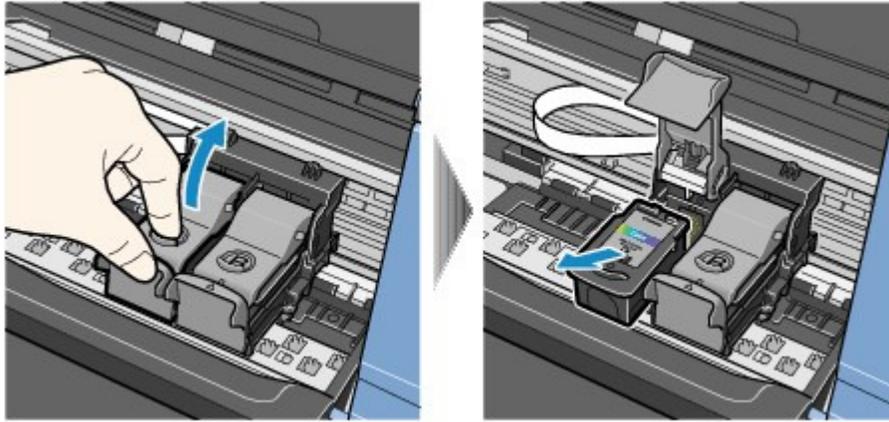

Caution

- Do not hold the FINE Cartridge Holder to stop or move it forcibly. Do not touch the FINE Cartridge Holder until it stops completely.
-

Important

- The inside of the machine may be stained with ink. Be careful not to stain your hands or clothing when replacing FINE Cartridges. You can easily wipe off the ink from the inside of the machine with tissue paper or the like.
For details on the cleaning, refer to the printed manual: *Getting Started*.
- Do not place any object on the Document Cover. It will fall into the Rear Tray when the Document Cover is opened and cause the machine to malfunction.
- When opening the Scanning Unit (Cover), lift it with the Document Cover closed.
- Do not touch the metallic parts or other parts inside the machine.
- If the Scanning Unit (Cover) is left open, the FINE Cartridge Holder moves to the right. In this case, close and reopen the Scanning Unit (Cover).

3. Remove the empty FINE Cartridge.
 - (1) Pinch the tabs and open the Ink Cartridge Locking Cover.
 - (2) Remove the FINE Cartridge.

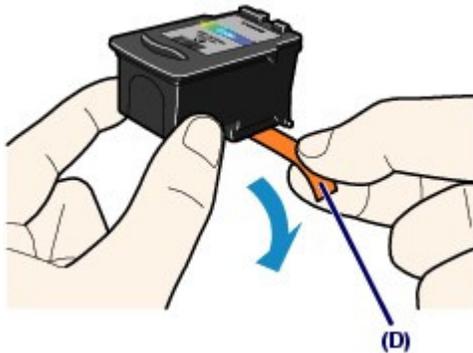

Important

- Handle FINE Cartridges carefully to avoid staining of clothing or the surrounding area.
- Discard empty FINE Cartridges according to the local laws and regulations regarding disposal of consumables.

4. Prepare the new FINE Cartridge.

- (1) Take a new FINE Cartridge out of its package and remove the orange protective tape (D) gently.

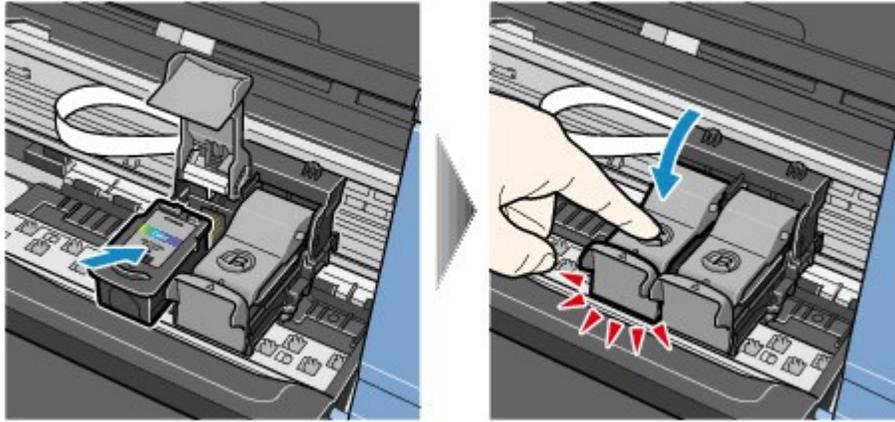

Important

- If you shake a FINE Cartridge, ink may spill out and stain your hands and the surrounding area. Handle a FINE Cartridge carefully.
- Be careful not to stain your hands and the surrounding area with ink on the removed protective tape.
- Do not reattach the protective tape once you have removed it. Discard it according to the local laws and regulations regarding disposal of consumables.
- Do not touch the electrical contacts or print head nozzles on a FINE Cartridge. The machine may not print properly if you touch it.

5. Install the FINE Cartridge.

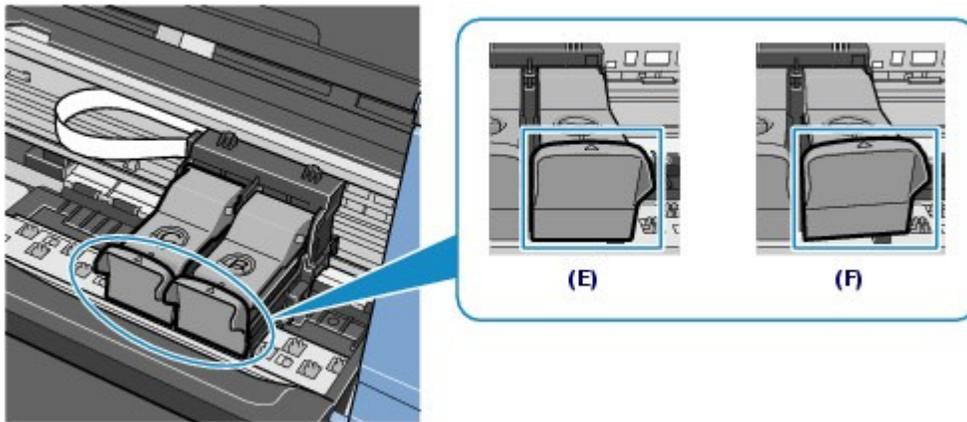

- (1) Put a new FINE Cartridge in the FINE Cartridge Holder.
The Color FINE Cartridge should be installed into the left slot and the Black FINE Cartridge should be installed into the right slot.
- (2) Close the Ink Cartridge Locking Cover to lock the FINE Cartridge into place.
Push down the Ink Cartridge Locking Cover until it clicks.

(3) Confirm that the Ink Cartridge Locking Cover is closed correctly.

Note

- If the Ink Cartridge Locking Cover is not closed correctly, push down the Ink Cartridge Locking Cover until it clicks.

(E) Closed correctly

(F) Not closed correctly (the cover is tilted)

Important

- The machine cannot print unless both the Color and Black FINE Cartridges are installed. Be sure to install both the FINE Cartridges.

6. Lift the Scanning Unit (Cover) slightly to set the Scanning Unit Support back to its original position, and gently close the Scanning Unit (Cover).

Caution

- When setting the Scanning Unit Support back to its original position, be sure to hold the Scanning Unit (Cover) firmly, and be careful not to get your fingers caught.

Note

- If the error message appears on the LCD after the Scanning Unit (Cover) is closed, refer to "[Troubleshooting](#)" in the on-screen manual: *Advanced Guide*.
- When you start printing after replacing the FINE Cartridge, the machine starts cleaning the Print Head automatically. Do not perform any other operations until the machine completes the cleaning of the Print Head. While cleaning is in progress, the Power lamp is flashing green.
- If printed ruled lines are misaligned or the print head position is misaligned, adjust the print head position.
See [Aligning the Print Head](#).

[↑ Page top](#)

■ Checking the Ink Status

You can check the ink status on the LCD.

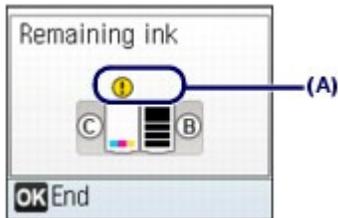

Note

- The ink level detector is mounted on the machine to detect the remaining ink level. The machine considers as ink is full when a new FINE Cartridge is installed, and then starts to detect a remaining ink level. If you install a used FINE Cartridge, the indicated ink level of it may not be correct. In such case, refer to the ink level information only as a guide.

- (1) Make sure that the power is turned on, and press the **Menu** button.
- (2) Press the ▲ (Up) or ▼ (Down) button to select Remaining ink, and press the **OK** button.

Check if any symbol (A) appears on the remaining ink volume screen.

Sufficient ink is left for printing if no symbol appears.

The ink with  (Ink low) is running low. You can continue printing for a while, but we recommend you to have a new FINE Cartridge available.

Note

- You can also check the ink status on a screen of the LCD displayed while printing.

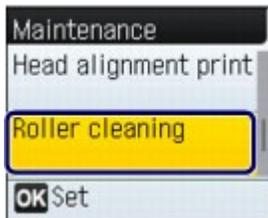

Cleaning the Paper Feed Roller

If the Paper Feed Roller is dirty or paper powder is attached to it, paper may not be fed properly. In this case, clean the Paper Feed Roller. Cleaning will wear out the Paper Feed Roller, so perform this only when necessary.

You need to prepare: three sheets of A4 or Letter-sized plain paper

1. Make sure that the power is turned on.
2. Open the Paper Output Tray gently, and open the Output Tray Extension.
3. Select Roller Cleaning.
 - (1) Press the **Menu** button.
 - (2) Select Maintenance, and press the **OK** button.
 - (3) Select Roller cleaning, and press the **OK** button.

The confirmation screen will appear.

- (4) Select Yes, and press the **OK** button.
4. Clean the Paper Feed Roller without paper.
 - (1) Follow the message to remove paper in the Rear Tray.
 - (2) Press the **OK** button.

The Paper Feed Roller will rotate as it is cleaned.
5. Clean the Paper Feed Roller with paper.
 - (1) Make sure that the Paper Feed Roller has stopped rotating, then follow the message to load three sheets of A4 or Letter-sized plain paper in the Rear Tray.
 - (2) Press the **OK** button.

The machine starts cleaning.

The cleaning will be completed after the paper is ejected.

Note

- To perform other functions, select the desired menu on the top menu screen displayed by pressing the **Back** or **Menu** button.

If the problem is not resolved after cleaning the Paper Feed Roller, contact the service center.

Tips on How to Use Your Machine

This section introduces the tips on how to use your machine and for printing with optimal quality.

■ Ink is used for various purposes.

● How is ink used for various purposes other than printing?

Ink may be used for purposes other than printing. Ink is not only used for printing, but also for cleaning the Print Head to maintain the optimal printing quality.

The machine has the function to automatically clean the ink jet nozzles to prevent clogging. In the cleaning procedure, ink is pumped out from the nozzles. Used ink for nozzle cleaning is limited to a small amount.

● Does black-and-white printing use color ink?

Black-and-white printing may use color ink depending on the type of printing paper or the settings of the printer driver. So, color ink is consumed even when printing in black-and-white.

■ Printing on special paper: How to print with optimal quality!?

● Tip!: Check the machine status before printing!

● Is the Print Head OK?

If print head nozzles are clogged, print will be faint and papers will be wasted. Print the nozzle check pattern to check the Print Head.

See [When Printing Becomes Faint or Colors Are Incorrect](#).

● Is the inside of the machine smeared with ink?

After printing large quantities of paper or performing borderless printing, the area where papers go through may get smeared with ink. Clean the inside of your machine with the Bottom Plate cleaning.

Refer to the on-screen manual: [Advanced Guide](#).

● Tip!: Check how to load the paper correctly!

● Is the paper loaded in the correct orientation?

Load paper in the Rear Tray with the printing side facing you.

● Is the paper curled?

The curled paper causes paper jam. Flatten the curled paper, then reload it.

Refer to "[Troubleshooting](#)" in the on-screen manual: [Advanced Guide](#).

● Tip!: After loading paper, be sure to specify the paper settings!

After loading paper, be sure to select the loaded paper for media type with the Operation Panel or Media Type with the printer driver or with the Operation Panel. If the type of paper is not selected, you may not be able to get the satisfactory print result.

See [Loading Plain Paper / Photo Paper](#).

There are various types of paper: paper with special coating on the surface for printing photos with optimal quality and paper suitable for documents. Media type of the Operation Panel or Media Type of the printer driver has different settings for each type of paper in advance (such as using ink, ejecting ink, or distance from nozzles) so that you can print on each paper with the optimal image quality. You can print with different settings in media type (or Media Type) suitable for each type of loaded paper.

■ Use the Stop button to cancel printing!

● Tip!: Never press the ON button!

If you press the **ON** button while printing is in progress, the print data sent from the computer queues in the machine and you may not be able to continue to print.

Press the **Stop** button to cancel printing.

Note

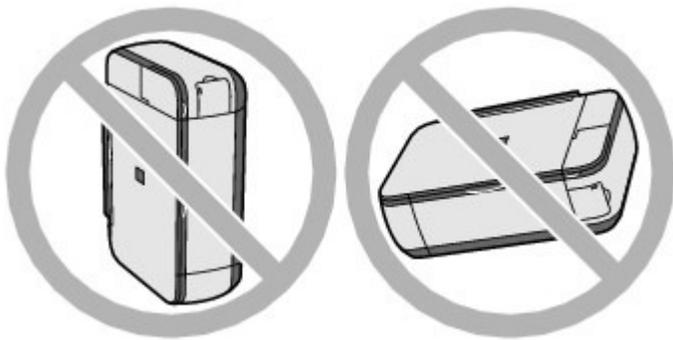

- If you cannot cancel printing by pressing the **Stop** button while printing from a computer, open the printer driver setup window to delete the unnecessary print jobs from the printer status monitor (Windows).

■ Does the machine need to be handled with care when using or transporting?

● Tip!: Do not use or transport the machine vertically or slanted!

If the machine is used or transported vertically or slanted, the machine may become damaged or ink may leak from the machine.

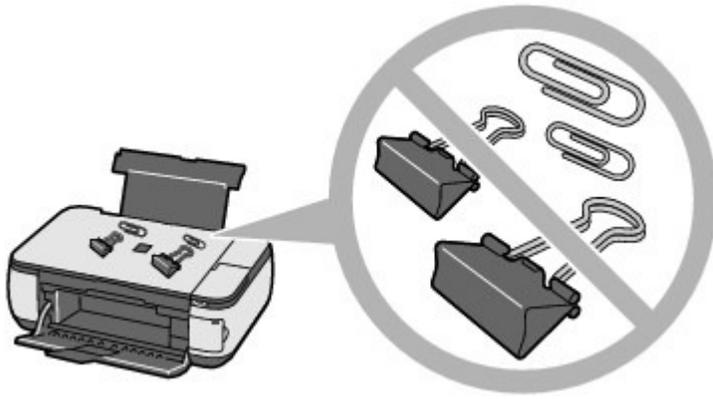

Be sure not to store or transport the machine vertically or slanted.

● Tip!: Do not place any object on the Document Cover!

Do not place any object on the Document Cover. It will fall into the Rear Tray when the Document Cover is opened and cause the machine to malfunction.

Also, place the machine where objects will not fall on it.

● Tip!: Carefully choose the area to place the machine!

Place the machine at least 5.91 inches / 15 cm away from other electrical appliances such as fluorescent lamps. If the machine is placed closer to those, it may not be able to work properly due to fluorescent noises.

■ How to maintain the optimal printing quality?

The key to printing with the optimal printing quality is to prevent the Print Head from drying or clogging. Always follow the following steps for optimal printing quality.

● Follow the procedure below to disconnect the power plug.

1. Press the **ON** button on the machine to turn it off.
2. Make sure that the **Power** lamp is not lit.
3. Disconnect the power plug from the wall outlet, or turn off the extender cable connector.

If you press the **ON** button to turn off the power, the machine caps the Print Head (nozzles) automatically to prevent from drying. If you disconnect the power plug from the wall outlet or turn off the extender cable connector before the **Power** lamp is turned off, the Print Head will not be capped properly and this will cause drying or clogging.

To disconnect the power plug, be sure to follow this procedure.

● Print periodically!

Just as the tip of a felt pen becomes dry and unusable if it has not been used for a long time, even if it is capped, the Print Head too, may become dried or clogged if the machine has not been used for a long time.

We recommend you to use the machine at least once a month.

Note

- Depending on the type of paper, ink may blur if you trace the printed area with a highlight pen or paint-stick, or bleed if water or sweat comes in contact with the printed area.

■ Colors are uneven, and print results are blurred.

● Tip!: Print the nozzle check pattern to check if the nozzles are clogged.

If the print head nozzles are clogged, colors may become uneven or the print results may be blurred.

In this case

Print the nozzle check pattern

Check the printed check pattern to see if the nozzles are clogged.
See [When Printing Becomes Faint or Colors Are Incorrect](#) .

Advanced Guide > How to Use This Manual > Operating the Contents Pane

Operating the Contents Pane

When you click a document title displayed in the contents pane found to the left of the on-screen manual, the documents of that title are displayed in the explanation window on the right side.

When you click  found to the left of , the document titles found in the lower hierarchies are displayed.

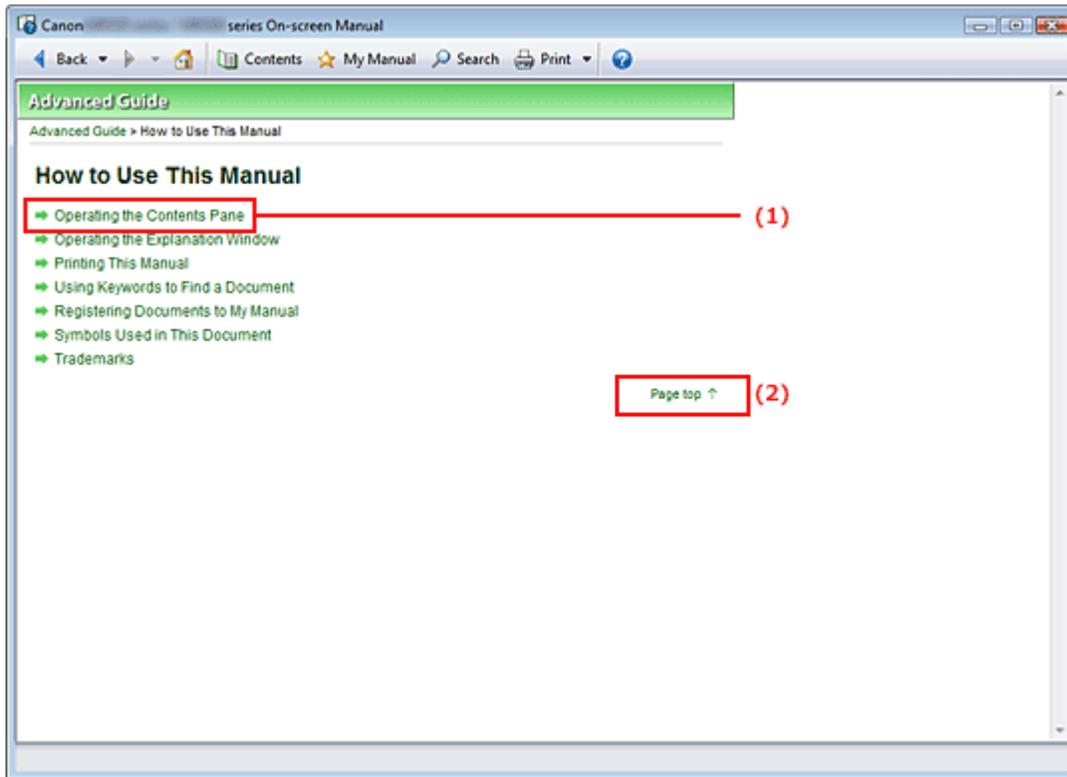

Note

- Click  to close or display the contents pane.

Advanced Guide

Advanced Guide > How to Use This Manual > Operating the Explanation Window

Operating the Explanation Window

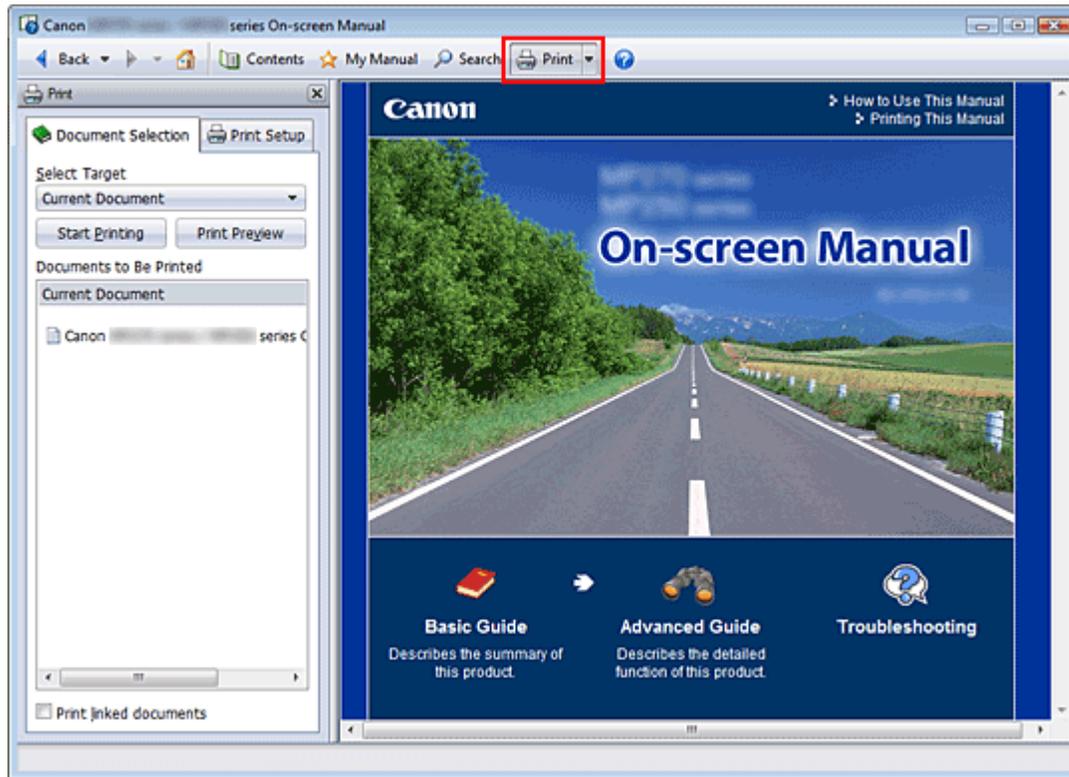

- (1) Click the green characters to jump to the corresponding document.
- (2) The cursor jumps to the top of this document.

Page top ↑

Advanced Guide

Advanced Guide > How to Use This Manual > Printing This Manual

Printing This Manual

Click  to display the print pane to the left of the on-screen manual.

Note

- Click  to close or display the print pane.
- When you click  and then click Page Setup, the Page Setup dialog box appears. You can then easily set up the paper to be used for printing.
- Click  and then click Print Settings to display the Print dialog box. When the dialog box is displayed, select the printer to be used for printing. The Print Setup tab also allows you to select the printer to be used.
After selecting the printer to be used, click Properties... to specify the print settings.
- Click  and then click Option Settings to display the Option Settings dialog box. You can then set up the printing operation.
 - Print document title and page number
When this check box is checked, the manual name and the page number are printed in the header (top of the document).
 - Print background color and images
When this check box is checked, the background color and the image are printed. Some images are printed regardless of whether this check box is checked or not.
 - Check number of pages to be printed before printing
When this check box is checked, the Print Page Count Confirmation dialog box is displayed before printing starts. This dialog box allows you to check how many pages will be printed.

On the Document Selection tab, select the method for printing the document. The following four methods of printing are available:

- [Print Current Document](#)
- [Print Selected Documents](#)
- [Print My Manual](#)

- [Print All Documents](#)

Note

- You can select the type to be printed, and then easily specify print settings on the Print Setup tab.
-

Print Current Document

You can print the currently displayed document.

1. From Select Target, select Current Document

The title of the currently displayed document is displayed in the Documents to Be Printed list.

Note

- By selecting Print linked documents, you can also print documents that are linked to the current document. The linked documents are added to the Documents to Be Printed list.
 - Click Print Preview to display and check what the print results will look like before you actually print the document.
-

2. Click Print Setup tab

On the Page Setup tab, select the printer to be used and specify simple print settings, as necessary.

3. Click Start Printing

A message confirming the number of print pages is displayed.

4. Execute print

Confirm the number of pages to be printed, and then click Yes.

The documents that are currently displayed are printed.

Print Selected Documents

You can select and print the documents that you want printed.

1. From Select Target, select Selected Documents

The titles of all documents are displayed in the Documents to Be Printed list.

2. Select the documents to be printed

From the Documents to Be Printed list, select the title check boxes of the documents to be printed.

Note

- When you select the Automatically select documents in lower hierarchies check box, the check boxes of all document titles found in the lower hierarchies are selected.
 - Click Select All to select the check boxes of all document titles.
Click Clear All to clear the check boxes of all document titles.
 - Click Print Preview to display and check what the print results will look like before you actually print the document.
-

3. Click Print Setup tab

On the Page Setup tab, select the printer to be used and specify simple print settings, as necessary.

4. Click Start Printing

A message confirming the number of print pages is displayed.

5. Execute print

Confirm the number of pages to be printed, and then click Yes.

All documents with selected check boxes are printed.

Print My Manual

You can select and print documents registered in My Manual.

For details about My Manual, see " [Registering Documents to My Manual](#) ."

1. From Select Target, select My Manual

The titles of the documents that have been registered to My Manual are displayed in the Documents to Be Printed list.

2. Select the documents to be printed

From the Documents to Be Printed list, select the title check boxes of the documents to be printed.

Note

- Click Select All to select the check boxes of all document titles.
Click Clear All to clear the check boxes of all document titles.
 - Click Print Preview to display and check what the print results will look like before you actually print the document.
-

3. Click Print Setup tab

On the Page Setup tab, select the printer to be used and specify simple print settings, as necessary.

4. Click Start Printing

A message confirming the number of print pages is displayed.

5. Execute print

Confirm the number of pages to be printed, and then click Yes.

All documents with selected check boxes are printed.

Print All Documents

You can print all documents of the on-screen manual.

1. From Select Target, select All Documents

The titles of all documents are displayed in the Documents to Be Printed list, and the check boxes are automatically selected.

Note

- When you uncheck the check box of a document title, that document is not printed.
 - Click Select All to select the check boxes of all document titles.
Click Clear All to clear the check boxes of all document titles.
 - Click Print Preview to display and check what the print results will look like before you actually print the document.
-

2. Click Print Setup tab

On the Page Setup tab, select the printer to be used and specify simple print settings, as necessary.

3. Click Start Printing

A message confirming the number of print pages is displayed.

4. Execute print

Confirm the number of pages to be printed, and then click Yes.

All documents are printed.

Important

- A large amount of paper is necessary to print all documents. Before printing, be sure to check the number of print pages displayed in the Print Page Count Confirmation dialog box.
- The Print Preview dialog box allows you to scale the printing to the paper width or to set the zoom rate. However, if the print data extends outside the paper because of the new zoom rate, that portion of the document will not be printed on the paper.

Advanced Guide

Advanced Guide > How to Use This Manual > Using Keywords to Find a Document

Using Keywords to Find a Document

You can enter a keyword to search for a target document.

All documents in the currently displayed on-screen manual are searched.

1. Click

The search pane is displayed to the left of the on-screen manual.

Note

- Click  to close or display the search pane.

2. Enter a keyword

In Keyword, enter a keyword for the item to be checked.

When you want to enter multiple keywords, insert a space between the keywords.

Note

- You can enter up to 10 search keywords or up to 255 characters.
- Uppercase and lowercase are not discriminated.
- The program can also search for keywords that contain spaces.
- A convenient way of quickly finding a document to be read is to enter keywords as described below.
 - To learn how to operate a function you are using:
Enter the menu name displayed on the operation panel of this machine or on the computer (for example, frame erase copy).
 - To find an explanation of the operation for a specific purpose:
Enter function + item to be printed (for example, print calendar).

3. Click Start Searching

The search is started, and the titles of documents containing the keyword are displayed in the search results list.

When you execute a search by entering multiple keywords, the search results are displayed as shown below.

[Documents Containing Perfect Match]

Documents containing the entire search character string (including spaces) exactly as entered (perfect match)

[Documents Containing All Keywords]

Documents containing all keywords that were entered

[Documents Containing Any Keyword]

Documents containing at least one of the keywords that were entered

4. Display the document that you want to read

From the search results list, double-click (or select and press Enter) the title of the document you want to read.

When the documents of that title are displayed, the keywords found on those documents are highlighted.

Note

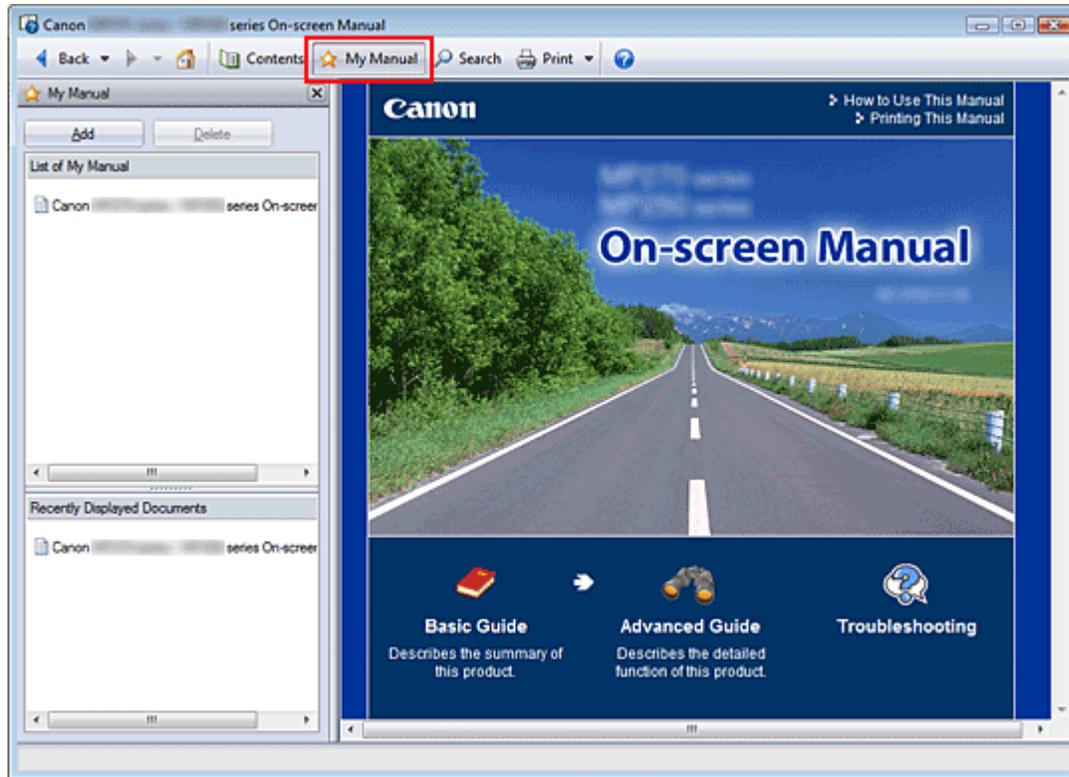

- If you modify the keyword entry and perform multiple searches, a search history remains. To delete the search history, click  located to the right of Keyword, and select Clear History, which is displayed.
-

Advanced Guide

Advanced Guide > How to Use This Manual > Registering Documents to My Manual

Registering Documents to My Manual

Register frequently read documents as My Manual documents so that you can refer to those documents easily at any time.

1. Display the document

Display the document to be added to My Manual.

2. Click

The My Manual pane is displayed to the left of the on-screen manual.

Note

- Click  to close or display the My Manual pane.

3. Register the document to My Manual

Click Add.

The title of the currently displayed document is added to List of My Manual.

Note

- You can also add documents to My Manual by the following methods. If you add a document to My Manual, a  mark is displayed in the document icons in the contents pane.
 - From the Recently Displayed Documents list, double-click the document title that you want to add to My Manual (or select the document and press Enter key) to display the title, and then click Add.
 - Right-click the document title displayed in the contents pane or right-click the explanation window, and then select Add to My Manual from the right-click menu.
 - In the contents pane, select the document title that you want to add to My Manual, and then click Add to My Manual at the bottom right of the pane.

4. Display My Manual

When you double-click (or select and press Enter) a document title displayed in List of My Manual, that document is displayed in the explanation window.

Note

- To delete a document from List of My Manual, select that document title from the list, and then click Delete (or press Delete).
-

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > What Is Easy-PhotoPrint EX?

Easy-PhotoPrint EX

What Is Easy-PhotoPrint EX?

Easy-PhotoPrint EX allows you to create albums, calendars and stickers easily using photos taken with digital cameras.

You can also print borderless photos easily.

Important

- Easy-PhotoPrint EX does not support Windows 95, Windows 98, Windows Me, or Windows NT4.
- Easy-PhotoPrint EX can only be used with Canon inkjet printers. It does not support some printers, including Canon compact printers (SELPHY CP series).
- If a printer that supports Easy-PhotoPrint EX is not installed, you cannot print items you create.
- If Easy-PhotoPrint EX is installed on a computer that already has Easy-LayoutPrint installed, Easy-LayoutPrint will be replaced by Easy-PhotoPrint EX.

Note

- Printing on paper larger than A4 is available with supported printers only. See your printer manual for details.
- See Help of Easy-PhotoPrint EX for descriptions of Easy-PhotoPrint EX screens. Click Help in a screen or dialog box, or select Easy-PhotoPrint EX Help... from the Help menu. Help appears.

About Exif Print

Easy-PhotoPrint EX supports "Exif Print." Exif Print is a standard for enhancing the communication between digital cameras and printers.

By connecting to an Exif Print-compliant digital camera, the image data at the time of shooting is used and optimized, yielding extremely high quality prints.

Starting Easy-PhotoPrint EX from Other Applications

Easy-PhotoPrint EX can be started from other applications.

See the application's manual for details on the procedure for starting.

The Photo Print function is available with the following applications:

- MP Navigator EX Ver.1.00 or later
- ZoomBrowser EX Ver.6.0 or later
- Digital Photo Professional Ver.3.2 or later

Important

- Easy-PhotoPrint EX is subject to the following restrictions when started from Digital Photo Professional:
 - Menu does not appear in the step button area on the left side of the screen.
 - Images cannot be corrected/enhanced.
 - Image display order cannot be changed.
 - Edited images cannot be saved.
 - Options other than Enable ICC Profile cannot be selected for Color correction for printing on the Advanced tab of the Preferences dialog box. Therefore, you cannot use the Vivid Photo and Photo Noise Reduction functions.

The Album function is available with the following applications:

- MP Navigator EX Ver.1.00 or later
- ZoomBrowser EX Ver.5.8 or later

Supported Image File Formats (Extensions)

- BMP (.bmp)
- JPEG (.jpg, .jpeg)
- TIFF (.tif, .tiff)
- PICT (.pict, .pct)
- Easy-PhotoPrint image files (.epp)

Important

- When selecting an image, if there is a TIFF file in the selected folder, the image may not be displayed correctly or Easy-PhotoPrint EX may shut down depending on the TIFF format. In such cases, move the TIFF file to another folder or recreate the file in a different file format, and then select the folder again.

Note

- The thumbnails of files in unsupported formats are displayed as  (Question Mark).
- When Easy-PhotoPrint EX is started from Digital Photo Professional, all image files supported by Digital Photo Professional will be displayed.

File Formats (Extensions) Supported by Easy-PhotoPrint EX

- Easy-PhotoPrint EX Photo Print file (.el6)
- Easy-PhotoPrint EX Album file (.el1)
- Easy-PhotoPrint EX Stickers file (.el2)
- Easy-PhotoPrint EX Calendar file (.el4)
- Easy-PhotoPrint EX Layout file (.el5)

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Printing Photos

Easy-PhotoPrint EX

Printing Photos

Easy-PhotoPrint EX allows you to print your favorite photos in a variety of layouts.

You can also create borderless photos easily.

Corrections suitable for photos will be applied automatically when printing.

Steps

1. Starting Easy-PhotoPrint EX
2. Selecting a Photo
3. Selecting the Paper
4. Printing

Try This

- ➔ Correcting and Enhancing Photos
- ➔ Printing Vivid Photos
- ➔ Reducing Photo Noise
- ➔ Cropping Photos (Photo Print)
- ➔ Printing Dates on Photos (Photo Print)
- ➔ Printing Multiple Photos on One Page
- ➔ Printing an Index
- ➔ Printing ID Photos (ID Photo Print)

Easy-PhotoPrint EX

Starting Easy-PhotoPrint EX

1. From the Start menu, select (All) Programs > Canon Utilities > Easy-PhotoPrint EX > Easy-PhotoPrint EX.

Easy-PhotoPrint EX starts and Menu appears.

[Page top](#)

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Printing Photos > Selecting a Photo

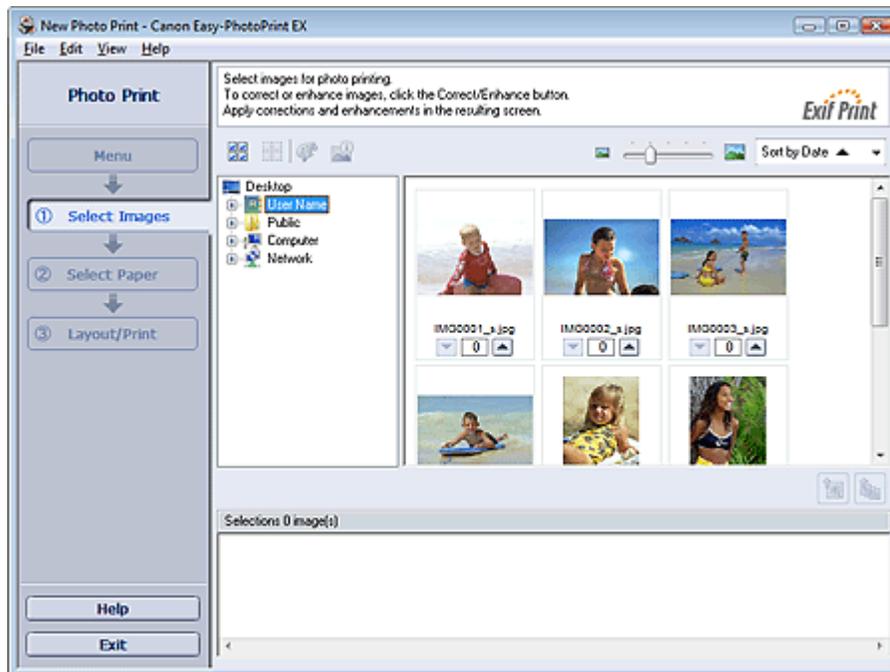

Easy-PhotoPrint EX

Selecting a Photo

1. Click Photo Print from Menu.

The Select Images screen appears.

Important

- The thumbnails (reduced images) displayed in the screen may appear as follows:
 - A black line appears along an edge of the image.
 - An edge of the image appears cropped.
 However, such images will be displayed normally when enlarged or previewed, and print results will not be affected.

2. Select the folder that contains the image you want to print from the folder tree area.

The images in the folder will be displayed as thumbnails (miniatures).

Important

- If Easy-PhotoPrint EX is started from another application (MP Navigator EX, ZoomBrowser EX or Digital Photo Professional), the folder tree area will not be displayed. The images opened in the application will be displayed as thumbnails.

3. Click the image you want to print.

The number of copies appears as "1" below the clicked image, while the selected image itself will appear in the selected image area.

Note

- To delete an image in the selected image area, select the image you want to delete and click

(Delete Imported Image).

To delete all images from the selected image area, click

(Delete All Imported Images).

- To print two or more copies of an image, click  (Up arrow) until the number of copies you want is reached. To reduce the number of copies shown in the box, click  (Down arrow).
- You can change the order of photos using the list located at the top right corner of the screen. You can select the printing order from Sort by Date and Sort by Name.

Note

- You can correct or enhance the selected image before printing.
 - ➔ [Correcting and Enhancing Photos](#)
- See Help for details on the Select Images screen.

Easy-PhotoPrint EX

Printing

1. Click Layout/Print.

The Layout/Print screen appears.

Important

- The thumbnails (reduced images) displayed in the screen may appear as follows:
 - A black line appears along an edge of the image.
 - An edge of the image appears cropped.
 However, such images will be displayed normally when enlarged or previewed, and print results will not be affected.

2. Select a layout you want to use.

Click a borderless layout to print borderless photos.

Note

- The layouts that can be selected may vary depending on the printer, paper size, and media type.

3. Click Print.

Important

- When you print on large size paper such as A3/A3+, some computers cannot print properly if you print more than one page or copy at a time. It is recommended that you print page by page when you print on such paper.
- While printing on paper larger than A4 or printing high-resolution images, data may be printed only to the middle if many images are printed at one time. In such cases, select the Spool print job page by page checkbox in the Preferences dialog box, and then print again.

To display the Preferences dialog box, click  (Settings) or select Preferences... from the File menu.

- The photo print settings will be discarded if you exit Easy-PhotoPrint EX without saving the settings. It is recommended that you save the printed image if you want to print it again.
 - ➔ [Saving Photos](#)
- When you print on a bordered layout, the margins on the left and right or the top and bottom may become wider than the other.
 - ➔ [How Do I Print with Even Margins?](#)

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Creating an Album > Selecting the Paper and Layout

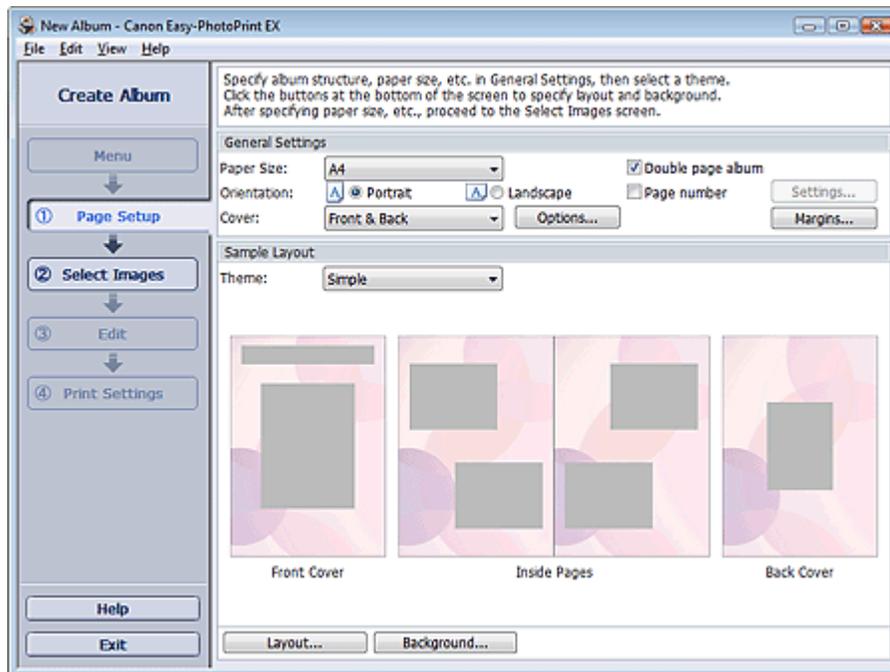

Easy-PhotoPrint EX

Selecting the Paper and Layout

1. Click Album from Menu.

The Page Setup screen appears.

2. Set the following items in the General Settings section:

Paper Size

Orientation

Cover

Double page album

Page number

Note

- See Help on the paper size that can be selected.
- You can select whether to display images on the inside of the front and back covers in the Cover Options dialog box. To display the Cover Options dialog box, select Front or Front & Back for Cover and click Options....
- Select the Double page album checkbox to enable the spread page layout (consisting of two-page master). In a double-page album, you can arrange an image across the left and right pages.
- You can customize the page numbers (position, font size, etc.) in the Page Number Settings dialog box. To display the Page Number Settings dialog box, select the Page number checkbox and click Settings....
- You can customize the margins of the front cover, inside pages and back cover in the Margin Settings dialog box. To display the Margin Settings dialog box, click Margins....

3. Select the theme you want to use from Theme in Sample Layout.

4. If you want to change the layout, click Layout....

The Change Layout dialog box appears.

In the Change Layout dialog box, you can change the layout or select whether to print the date (on which the picture was taken) on the photo.

Note

- The layouts that can be selected may vary depending on the Paper Size, Orientation, Double page album, or the type of page selected (front cover, inside pages or back cover).
 - You can customize the date (position, size, color, etc.) in the Date Settings dialog box. To display the Date Settings dialog box, select the Print date checkbox in the Change Layout dialog box and click Date Settings....
-

5. If you want to change the background, click Background....

The Change Background dialog box appears.

In the Change Background dialog box, you can paint the background in a single color or paste an image file to it.

Note

- See Help for details on the Page Setup screen.
-

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Correcting and Enhancing Photos

Easy-PhotoPrint EX

Correcting and Enhancing Photos

You can correct and enhance images.

Click  (Correct/Enhance Images) in the Select Images or Edit screen, or in the Layout/Print screen of Photo Print. You can make the following corrections and enhancements in the Correct/Enhance Images window.

Important

- For Photo Print, if you select Enable ICC Profile in the Advanced tab of the Preferences dialog box, you cannot correct/enhance images.

Note

- See "Correct/Enhance Images Window" for details on the Correct/Enhance Images window.

Auto Photo Fix

This function will automatically analyze the captured scene and apply suitable corrections.

➡ Using the Auto Photo Fix Function

Red-Eye Correction Function

You can correct red eyes caused by a camera flash.

➡ Using the Red-Eye Correction Function

Face Brightener Function

You can brighten dark faces caused by bright background.

➡ Using the Face Brightener Function

Face Sharpener Function

You can sharpen out-of-focus faces in a photo.

➡ Using the Face Sharpener Function

Digital Face Smoothing Function

You can enhance skin beautifully by removing blemishes and wrinkles.

➡ Using the Digital Face Smoothing Function

Blemish Remover Function

You can remove moles.

➡ Using the Blemish Remover Function

Image Adjustment

You can adjust brightness and contrast or sharpen the entire image.

You can also blur the outline of the subjects or remove the base color.

➔ Adjusting Images

[Page top](#) ↕

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Correcting and Enhancing Photos > Using the Auto Photo Fix Function

Easy-PhotoPrint EX

Using the Auto Photo Fix Function

Apply optimum corrections automatically to the photos used for an album, calendar, etc.

Important

- The Auto Photo Fix function is not available for Photo Print. Photo Print allows you to automatically apply suitable corrections to all photos when printing, by selecting Auto Photo Fix in Color correction for printing on the Advanced tab of the Preferences dialog box. To display the Preferences dialog box, click  (Settings) in the Layout/Print screen or select Preferences... from the File menu.
- Once image is corrected with Auto Photo Fix and saved, it cannot be corrected again with Auto Photo Fix.
Also, Auto Photo Fix may not be available for images edited using an application, digital camera, etc. manufactured by other companies.

1. Select photos in the Select Images screen, then click  (Correct/Enhance Images).

The Correct/Enhance Images window appears.

Note

- You can also display the Correct/Enhance Images window by clicking  (Correct/Enhance Images) in the Layout/Print or Edit screen. In that case, only the image displayed in Preview can be corrected/enhanced.
- See "[Correct/Enhance Images Window](#)" for details on the Correct/Enhance Images window.

2. Select the image you want to correct from the list displayed in the lower part of the Correct/Enhance Images window.

The image appears in Preview.

 **Note**

- If only one image is selected, the thumbnail does not appear below Preview.
-

3. Make sure that Auto is selected.

4. Click Auto Photo Fix, then click OK.

The entire photo is corrected automatically and the  (Correction/Enhancement) mark appears on the upper left of the image.

 **Note**

- Click  (Compare) to display the images before and after the correction side by side so that you can compare and check the result.
 - Click Reset Selected Image to undo the correction operation.
 - If you want to apply the correction to all the selected images at once, select the Apply to all images checkbox.
 - Select the Prioritize Exif Info checkbox to apply corrections primarily based on the settings made at the time of shooting. Deselect this checkbox to apply corrections based on the image analysis results. It is recommended that you normally select this setting.
-

5. Click Save Selected Image or Save All Corrected Images.

You can save corrected images as new files.

 **Note**

- To save only the image you like, click Save Selected Image. To save all images, click Save All Corrected Images.
 - Only JPEG/Exif file format is available for corrected images.
-

6. Click Exit.

 **Important**

- The corrections will be lost if you exit before saving corrected images.
-

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Correcting and Enhancing Photos > Using the Red-Eye Correction Function

Easy-PhotoPrint EX

Using the Red-Eye Correction Function

You can correct red eyes caused by a camera flash.

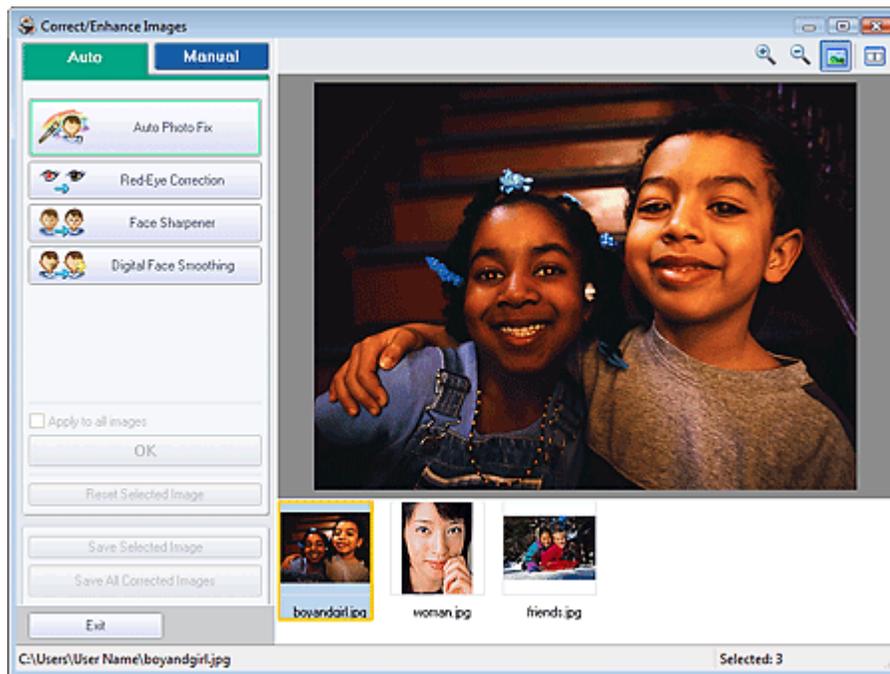

You can perform the Red-Eye Correction function either automatically or manually.

Note

- Photo Print allows you to automatically correct red eyes when printing. To correct automatically, select Enable Auto Photo Fix in Color correction for printing on the Advanced tab of the Preferences dialog box and select the Enable Red-Eye Correction checkbox.

- Select photos in the Select Images screen, then click  (Correct/Enhance Images).

The Correct/Enhance Images window appears.

Note

- You can also display the Correct/Enhance Images window by clicking  (Correct/Enhance Images) in the Layout/Print or Edit screen. In that case, only the image displayed in Preview can be corrected/enhanced.
- See "[Correct/Enhance Images Window](#)" for details on the Correct/Enhance Images window.

- Select the image you want to correct from the list displayed in the lower part of the Correct/Enhance Images window.

The image appears in Preview.

Note

- If only one image is selected, the thumbnail does not appear below Preview.

Auto Correction

3. Make sure that Auto is selected.
4. Click Red-Eye Correction.
5. Click OK.

Red eyes are corrected and the  (Correction/Enhancement) mark appears on the upper left of the image.

Important

- Areas other than the eyes may be corrected depending on the image.

Note

- Click  (Compare) to display the images before and after the correction side by side so that you can compare and check the result.
- Click Reset Selected Image to undo the correction operation.
- If you want to apply the correction to all the selected images at once, select the Apply to all images checkbox.

Manual Correction

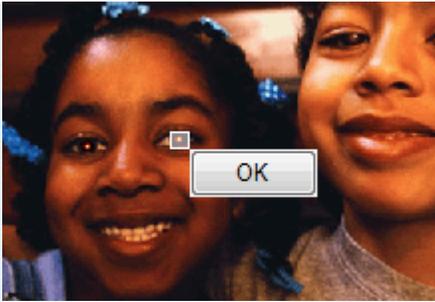

3. Click Manual, then click Correct/Enhance.
4. Click Red-Eye Correction.

Note

- Effect levels can be changed using the slider below Red-Eye Correction.
- Move the cursor over the image. The shape of the cursor changes to  (Paintbrush).

5. Drag to select the red area you want to correct, then click OK that appears over the image.

Red eye is corrected and the  (Correction/Enhancement) mark appears on the upper left of the image.

Note

- Click Undo to undo the preceding correction operation.

6. Click Save Selected Image or Save All Corrected Images.

You can save corrected images as new files.

Note

- To save only the image you like, click Save Selected Image. To save all images, click Save All Corrected Images.
- Only JPEG/Exif file format is available for corrected images.

7. Click Exit.

Important

- The corrections will be lost if you exit before saving corrected images.

Note

- You can also display the Correct/Enhance Images window by clicking  (Correct/Enhance Images) in the Layout/Print or Edit screen. In that case, only the image displayed in Preview can be corrected/enhanced.
- See "[Correct/Enhance Images Window](#)" for details on the Correct/Enhance Images window.

2. Select the image you want to correct from the list displayed in the lower part of the Correct/Enhance Images window.

The image appears in Preview.

Note

- If only one image is selected, the thumbnail does not appear below Preview.

Auto Correction

3. Make sure that Auto is selected.

4. Click Face Sharpener.

Note

- Effect levels can be changed using the slider below Face Sharpener.

5. Click OK.

The face is sharpened and the  (Correction/Enhancement) mark appears on the upper left of the image.

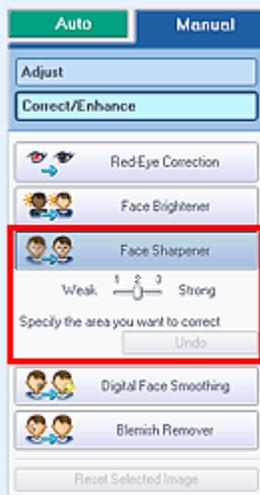

Note

- Click  (Compare) to display the images before and after the correction side by side so that you can compare and check the result.
- Click Reset Selected Image to undo the correction operation.
- If you want to apply the correction to all the selected images at once, select the Apply to all images checkbox.

Manual Correction

3. Click Manual, then click Correct/Enhance.

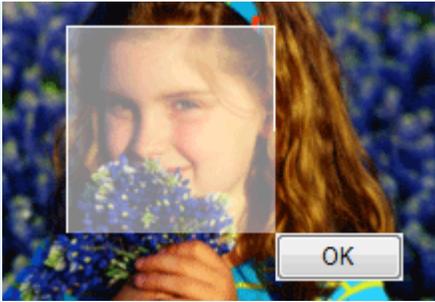

4. Click Face Sharpener.

Note

- Effect levels can be changed using the slider below Face Sharpener.
- Move the cursor over the image. The shape of the cursor changes to  (Cross).

5. Drag to select the area you want to correct, then click OK that appears over the image.

The facial area in and around the selected area is sharpened and the  (Correction/Enhancement) mark appears on the upper left of the image.

Note

- You can also drag to rotate the selected area.
- Click Undo to undo the preceding correction operation.

6. Click Save Selected Image or Save All Corrected Images.

You can save corrected images as new files.

Note

- To save only the image you like, click Save Selected Image. To save all images, click Save All Corrected Images.
- Only JPEG/Exif file format is available for corrected images.

7. Click Exit.

Important

- The corrections will be lost if you exit before saving corrected images.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Correcting and Enhancing Photos > Using the Digital Face Smoothing Function

Easy-PhotoPrint EX

Using the Digital Face Smoothing Function

You can enhance skin beautifully by removing blemishes and wrinkles.

You can perform the Digital Face Smoothing function either automatically or manually.

1. Select photos in the Select Images screen, then click  (Correct/Enhance Images).

The Correct/Enhance Images window appears.

Note

- You can also display the Correct/Enhance Images window by clicking  (Correct/Enhance Images) in the Layout/Print or Edit screen. In that case, only the image displayed in Preview can be corrected/enhanced.
- See "[Correct/Enhance Images Window](#)" for details on the Correct/Enhance Images window.

2. Select the image you want to enhance from the list displayed in the lower part of the Correct/Enhance Images window.

The image appears in Preview.

Note

- If only one image is selected, the thumbnail does not appear below Preview.

Auto Enhancement

3. Make sure that Auto is selected.

4. Click Digital Face Smoothing.

Note

- Effect levels can be changed using the slider below Digital Face Smoothing.

5. Click OK.

Skin is enhanced beautifully and the  (Correction/Enhancement) mark appears on the upper left of the image.

Note

- Click  (Compare) to display the images before and after the enhancement side by side so that you can compare and check the result.
- Click Reset Selected Image to undo the enhancement operation.
- If you want to apply the enhancement to all the selected images at once, select the Apply to all images checkbox.

Manual Enhancement

3. Click Manual, then click Correct/Enhance.

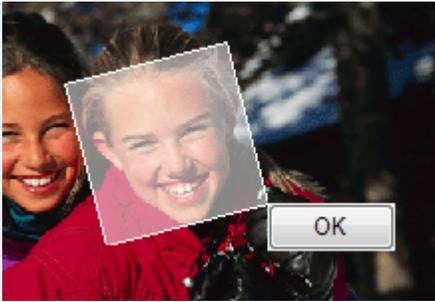

4. Click Digital Face Smoothing.

Note

- Effect levels can be changed using the slider below Digital Face Smoothing.
- Move the cursor over the image. The shape of the cursor changes to  (Cross).

5. Drag to select the area you want to enhance, then click OK that appears over the image.

Skin in and around the selected area is enhanced beautifully and the  (Correction/Enhancement) mark appears on the upper left of the image.

Note

- You can also drag to rotate the selected area.
- Click Undo to undo the preceding enhancement operation.

6. Click Save Selected Image or Save All Corrected Images.

You can save enhanced images as new files.

Note

- To save only the image you like, click Save Selected Image. To save all images, click Save All Corrected Images.
- Only JPEG/Exif file format is available for enhanced images.

7. Click Exit.

Important

- The enhancements will be lost if you exit before saving enhanced images.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Correcting and Enhancing Photos > Using the Blemish Remover Function

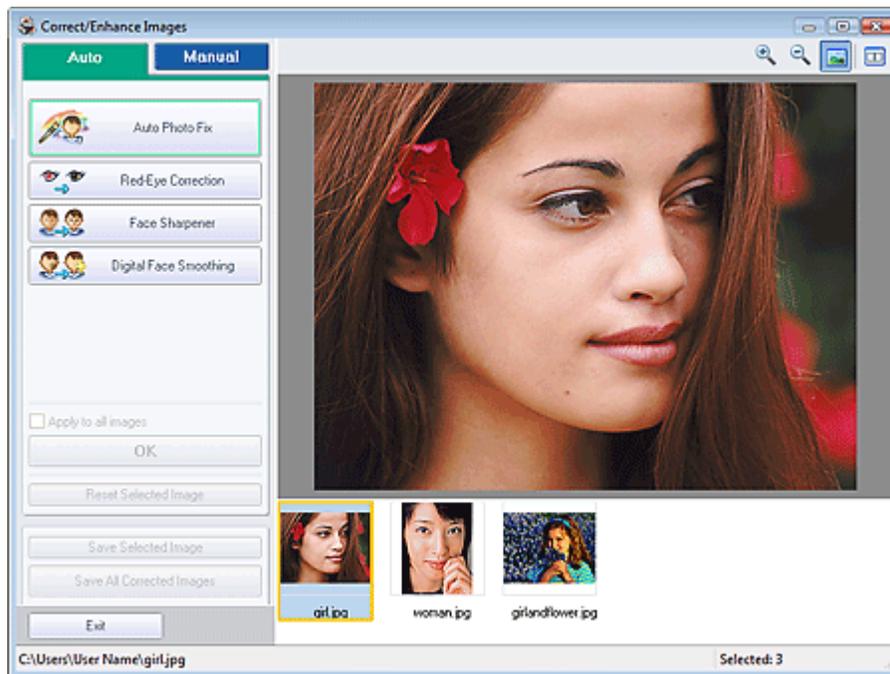

Easy-PhotoPrint EX

Using the Blemish Remover Function

You can remove moles.

1. Select photos in the Select Images screen, then click  (Correct/Enhance Images).

The Correct/Enhance Images window appears.

Note

- You can also display the Correct/Enhance Images window by clicking  (Correct/Enhance Images) in the Layout/Print or Edit screen. In that case, only the image displayed in Preview can be corrected/enhanced.
- See "[Correct/Enhance Images Window](#)" for details on the Correct/Enhance Images window.

2. Select the image you want to enhance from the list displayed in the lower part of the Correct/Enhance Images window.

The image appears in Preview.

Note

- If only one image is selected, the thumbnail does not appear below Preview.

3. Click Manual, then click Correct/Enhance.

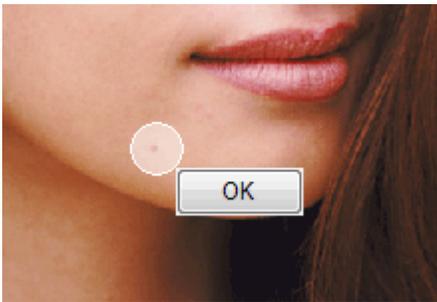

4. Click Blemish Remover.

Note

- Move the cursor over the image. The shape of the cursor changes to  (Cross).

- Drag to select the area you want to enhance, then click OK that appears over the image.

Moles in and around the selected area are removed and the  (Correction/Enhancement) mark appears on the upper left of the image.

Note

- Click Undo to undo the preceding enhancement operation.

- Click Save Selected Image or Save All Corrected Images.

You can save enhanced images as new files.

Note

- To save only the image you like, click Save Selected Image. To save all images, click Save All Corrected Images.
- Only JPEG/Exif file format is available for enhanced images.

- Click Exit.

Important

- The enhancements will be lost if you exit before saving enhanced images.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Correcting and Enhancing Photos > Adjusting Images

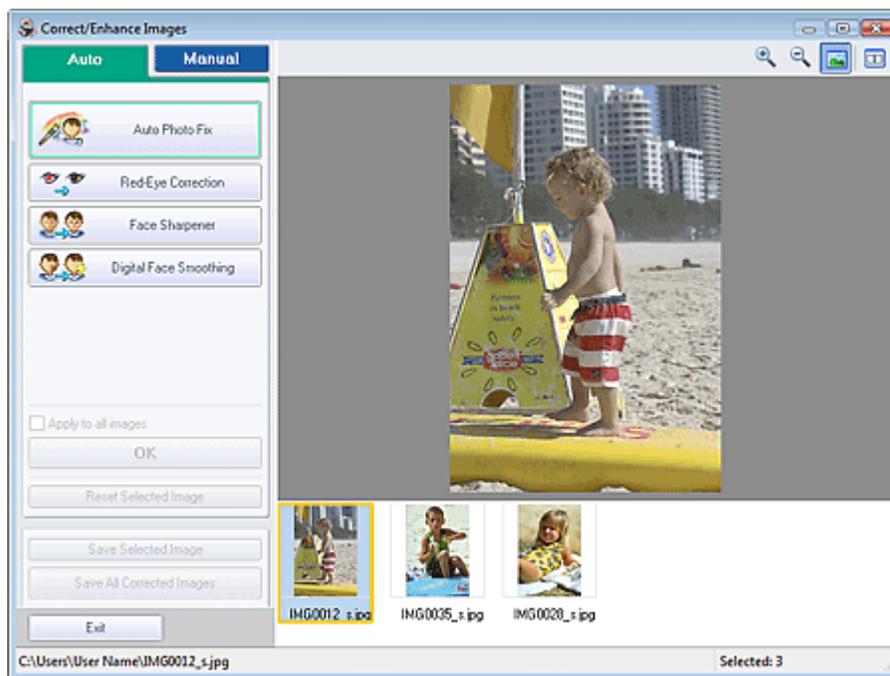

Easy-PhotoPrint EX

Adjusting Images

You can make fine adjustments to the overall brightness, contrast, etc. of images.

1. Select photos in the Select Images screen, then click  (Correct/Enhance Images).

The Correct/Enhance Images window appears.

Note

- You can also display the Correct/Enhance Images window by clicking  (Correct/Enhance Images) in the Layout/Print or Edit screen. In that case, only the image displayed in Preview can be corrected/enhanced.
- See "[Correct/Enhance Images Window](#)" for details on the Correct/Enhance Images window.

2. Select the image you want to adjust from the list displayed in the lower part of the Correct/Enhance Images window.

The image appears in Preview.

Note

- If only one image is selected, the thumbnail does not appear below Preview.

3. Click Manual, then click Adjust.
4. Move the slider of the item you want to adjust and set the effect level.

The following adjustments are available:

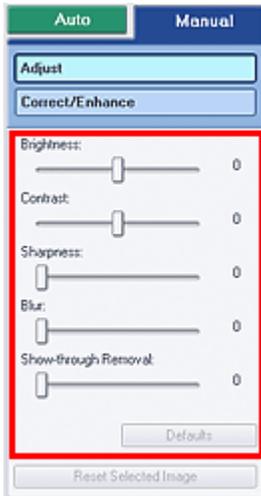

Brightness

Contrast

Sharpness

Blur

Show-through Removal

Note

- Click Defaults to reset all adjustments.

5. Click Save Selected Image or Save All Corrected Images.

You can save adjusted images as new files.

Note

- To save only the image you like, click Save Selected Image. To save all images, click Save All Corrected Images.
- Only JPEG/Exif file format is available for adjusted images.

6. Click Exit.

Important

- The adjustments will be lost if you exit before saving adjusted images.

Advanced Guide

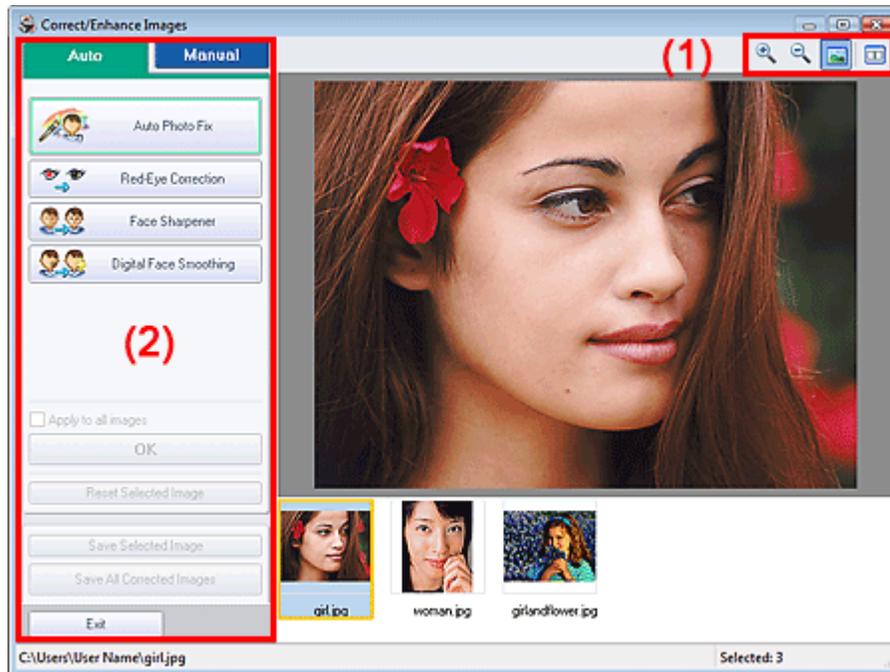

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Correcting and Enhancing Photos > Correct/Enhance Images Window

Easy-PhotoPrint EX

Correct/Enhance Images Window

You can correct/enhance images in this window.

To display the Correct/Enhance Images window, click  (Correct/Enhance Images) in the Select Images or Edit screen, or in the Layout/Print screen of Photo Print.

(1)Toolbar

Toolbar

(Zoom In/Zoom Out)

Displays the enlarged or reduced preview of the page.

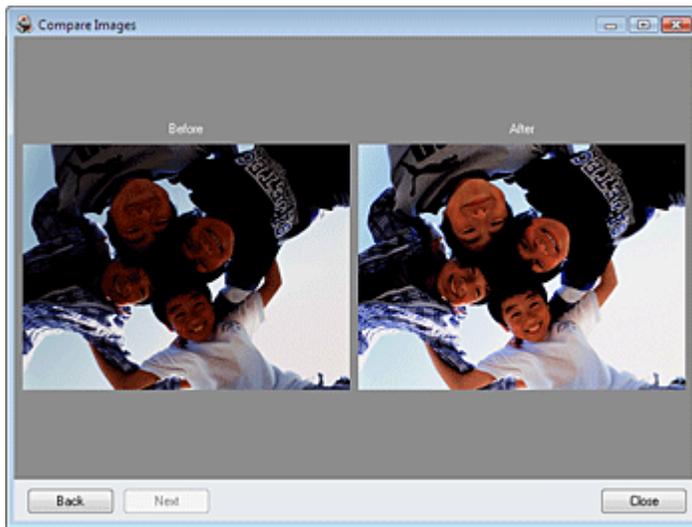

(Full Screen)

Displays the entire image in Preview.

(Compare)

Displays the Compare Images window. You can compare the images before and after the correction/enhancement side by side.

The image before the correction/enhancement is displayed on the left, and the image after the correction/enhancement is displayed on the right.

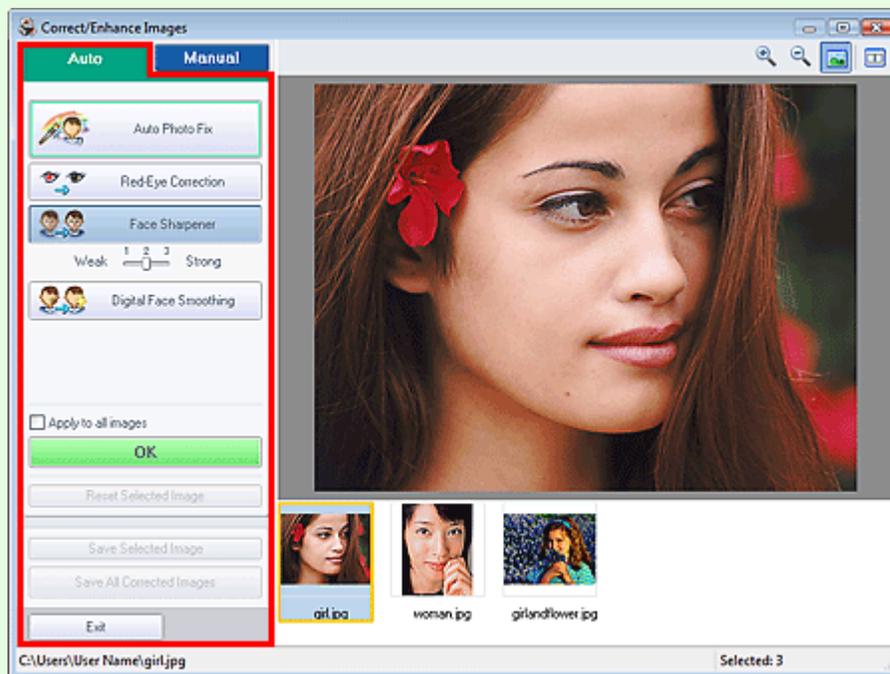

(2)Task Area

Available tasks and settings may vary between the Auto and Manual tabs.

Click Auto or Manual to display the corresponding tab.

Auto Tab

Select to correct automatically.

Auto Photo Fix

Applies automatic corrections suitable for photos.

Important

- The Auto Photo Fix function is not available for Photo Print. Photo Print allows you to automatically apply suitable corrections to all photos when printing. Select this option in Color correction for printing on the Advanced tab of the Preferences dialog box. To display the Preferences dialog box, click  (Settings) in the Layout/Print screen or select Preferences... from the File menu.

Prioritize Exif Info

Select this checkbox to apply corrections primarily based on the settings made at the time of

shooting.

Deselect this checkbox to apply corrections based on the image analysis results. It is recommended that you normally select this setting.

Note

- Exif is a standard format for embedding various shooting data in digital camera images (JPEG).
- For Photo Print, you can apply suitable corrections based on Exif information automatically by selecting Enable Auto Photo Fix in Color correction for printing on the Advanced tab of the Preferences dialog box and selecting the Prioritize Exif Info checkbox.

Red-Eye Correction

Corrects red eyes.

Note

- For Photo Print, you can also correct red eyes by selecting Enable Auto Photo Fix in Color correction for printing on the Advanced tab of the Preferences dialog box and selecting the Enable Red-Eye Correction checkbox.

Face Sharpener

Sharpens out-of-focus faces.

You can adjust the effect level using the slider.

Digital Face Smoothing

Enhances skin beautifully by removing blemishes and wrinkles.

You can adjust the effect level using the slider.

Apply to all images

Automatically corrects all the images displayed in the list.

OK

Applies the selected effect to the selected image or all images.

Reset Selected Image

Cancels all corrections and enhancements applied to the selected image.

Save Selected Image

Saves the selected image in the list that applied corrections and enhancements.

Save All Corrected Images

Saves all the images that applied corrections and enhancements displayed in the list.

Exit

Click to close the Correct/Enhance Images window.

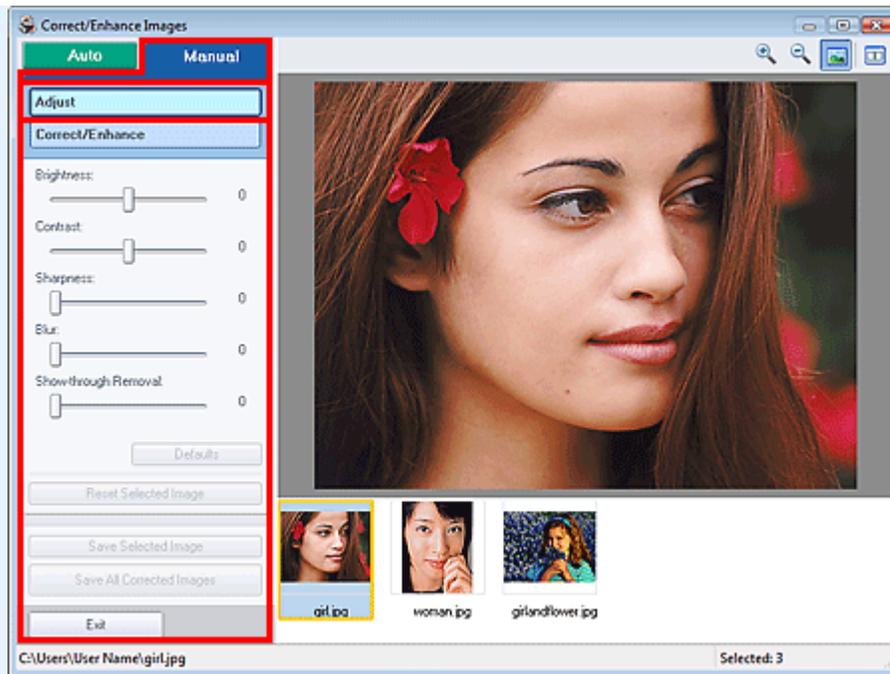

Manual Tab

Select to correct manually.

Use Adjust to adjust brightness and contrast, or to sharpen the entire image.

Use Correct/Enhance to correct/enhance specific areas.

Adjust

Brightness

Adjusts the overall image brightness.
Move the slider to the left to darken and right to brighten the image.

Contrast

Adjusts the contrast of the image. Adjust the contrast when the image is flat due to lack of contrast.
Move the slider to the left to decrease and right to increase the contrast of the image.

Sharpness

Emphasizes the outline of the subjects to sharpen the image. Adjust the sharpness when the photo is out of focus or text is blurred.
Move the slider to the right to sharpen the image.

Blur

Blurs the outline of the subjects to soften the image.
Move the slider to the right to soften the image.

Show-through Removal

Removes show-through of text from the reverse side or removes the base color. Adjust the show-through level to prevent text on the reverse side of thin document or the base color of the document from appearing on the image.
Move the slider to the right to increase the show-through removal effect.

Defaults

Resets each adjustment (brightness, contrast, sharpness, blur, and show-through removal).

Reset Selected Image

Cancels all adjustments applied to the selected image.

Save Selected Image

Saves the selected image in the list that applied adjustments.

Save All Corrected Images

Saves all the images that applied adjustments displayed in the list.

Exit

Click to close the Correct/Enhance Images window.

Correct/Enhance

Red-Eye Correction

Corrects red eyes.

You can specify the area you want to apply the effect to. You can adjust the effect level using the slider.

Note

- For Photo Print, red eyes are automatically corrected when Enable Auto Photo Fix is selected in Color correction for printing on the Advanced tab of the Preferences dialog box and the Enable Red-Eye Correction checkbox is selected. To disable the automatic correction, deselect the checkbox.

Face Brightener

Corrects the entire image so that the selected facial area is brightened.

You can adjust the effect level using the slider.

Face Sharpener

Sharpens out-of-focus faces.

You can specify the area you want to apply the effect to. You can adjust the effect level using the slider.

Digital Face Smoothing

Enhances skin beautifully by removing blemishes and wrinkles.

You can specify the area you want to apply the effect to. You can adjust the effect level using the slider.

Blemish Remover

Removes moles.

You can specify the area you want to apply the effect to.

OK

Applies the selected effect to the specified area.

Undo

Cancels the latest correction/enhancement.

Reset Selected Image

Cancels all corrections and enhancements applied to the selected image.

Save Selected Image

Saves the selected image in the list that applied corrections and enhancements.

Save All Corrected Images

Saves all the images that applied corrections and enhancements displayed in the list.

Exit

Click to close the Correct/Enhance Images window.

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Questions and Answers
> How Can I Move (or Copy) the Saved File?

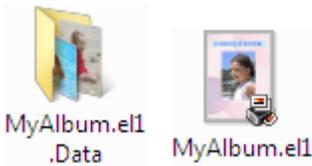

Easy-PhotoPrint EX

How Can I Move (or Copy) the Saved File?

If you want to move (or copy) a file created and saved with Easy-PhotoPrint EX from one folder to another, you need to move (or copy) the folder that was automatically created when originally saving that file as well.

For example, when you save a file named "MyAlbum.el1," a folder named "MyAlbum.el1.Data" is automatically created in the same folder that contains the "MyAlbum.el1" file. If you want to move (or copy) the "MyAlbum.el1" file to another folder, move (or copy) the "MyAlbum.el1.Data" folder as well. The "MyAlbum.el1.Data" folder contains the photos used in the album.

Note

- The icons may vary depending on the items.

Important

- Do not change the Data folder name; otherwise you will not be able to display the photos you edited with Easy-PhotoPrint EX.

[Page top](#)↑

Easy-PhotoPrint EX

Printing Vivid Photos

Select the Vivid Photo checkbox in the Select Paper screen to boost the colors in a photo before printing.

Important

- This function is available only with a printer that supports Vivid Photo.
- This function is not available when Enable ICC Profile is selected on the Advanced tab of the Preferences dialog box.

Note

- Even if you select the Vivid Photo checkbox, this effect applies only to the print result. The original image or preview image will not be affected.

[Page top](#)

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Photo Print Settings > Reducing Photo Noise

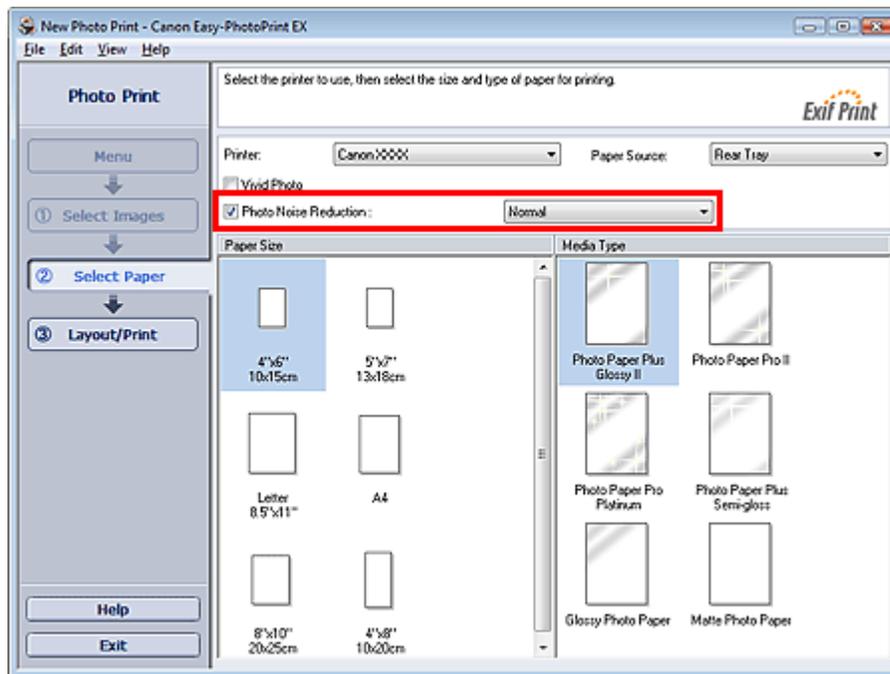

Easy-PhotoPrint EX

Reducing Photo Noise

When a photo is taken in a dark location such as night scene using digital camera, noise may appear in the image.

Select the Photo Noise Reduction checkbox in the Select Paper screen to reduce noise in the image and make the printed photos more vivid.

Important

- This function is not available when Enable ICC Profile is selected on the Advanced tab of the Preferences dialog box.

Note

- When the noise is severe, change Normal to Strong.
- The noise reduction effect applies only to the print result. The original image or preview image will not be affected.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Photo Print Settings > Cropping Photos (Photo Print)

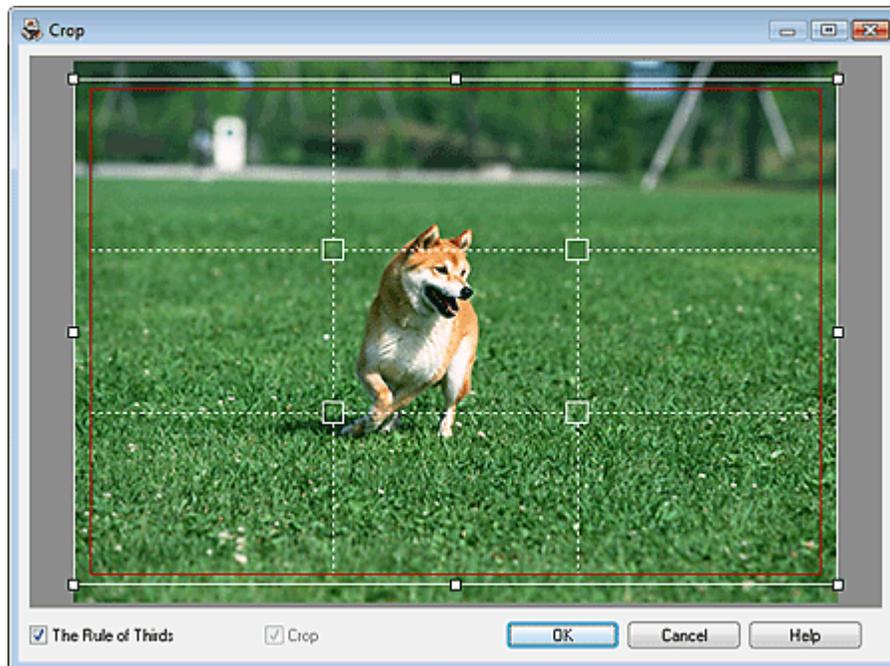

Easy-PhotoPrint EX

Cropping Photos (Photo Print)

Cropping a photo is the act of removing the unnecessary portions of the photo by selecting the necessary portions.

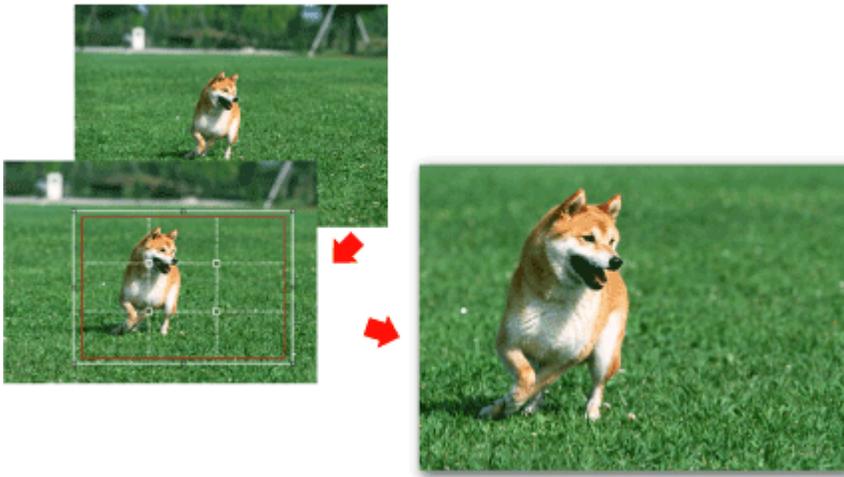

Click  (Crop Image) in the Layout/Print screen or double-click the preview image.

Move the white frame to the portion to print and click OK.

Note

- To move the cropping area, place the cursor within the white frame and drag it. Drag the white lines to enlarge/reduce the cropping area.
- Select the The Rule of Thirds checkbox to display white broken lines. To create a balanced composition, drag any of the intersecting points (white squares) or white broken lines over the main subject of the photo.

- The cropping effect applies only to the print result. The original image will not be cropped.
- See Help for details on the Crop window.

Advanced Guide

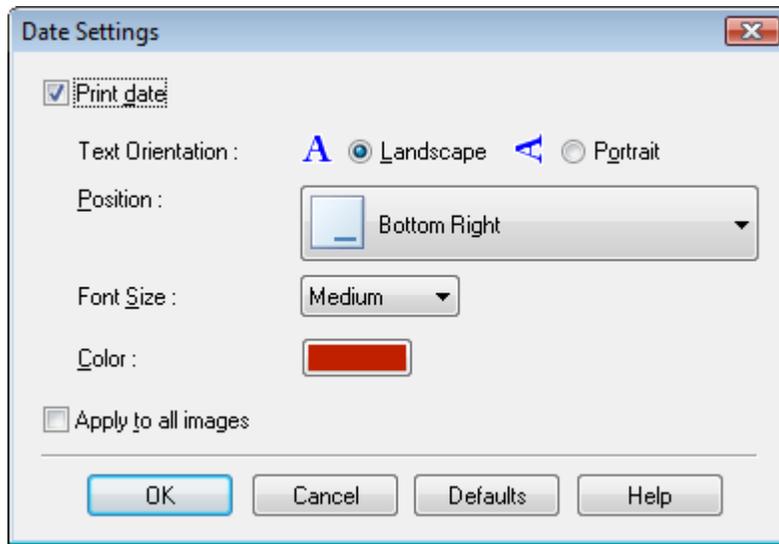

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Photo Print Settings > Printing Dates on Photos (Photo Print)

Easy-PhotoPrint EX

Printing Dates on Photos (Photo Print)

To print the date the photo was taken on the photo, click  (Date Settings) in the Layout/Print screen, then select the Print date checkbox in the Date Settings dialog box.

Note

- The date is displayed in the short date format (mm/dd/yyyy, etc.) specified in your operating system.
- See Help for details on setting dates.

Advanced Guide

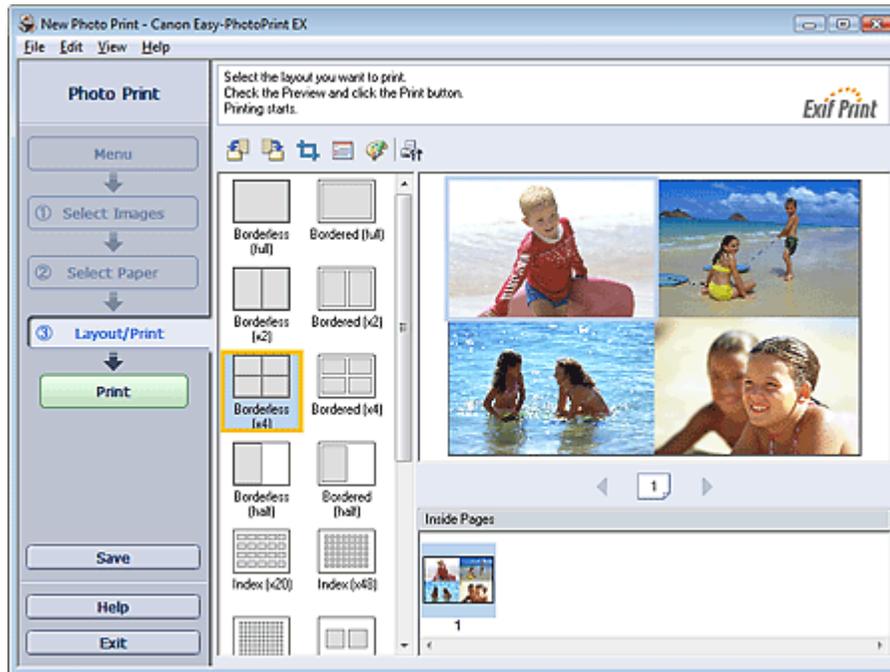

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Photo Print Settings > Printing Multiple Photos on One Page

Easy-PhotoPrint EX

Printing Multiple Photos on One Page

You can print multiple photos on one page by selecting a multiple-photo layout in the Layout/Print screen.

Note

- See the following section for details on how to select photos.
 ➔ [Selecting a Photo](#)
- The available number of photos and layout may vary depending on the media type.
- Photos are arranged in the following order.

Example: Borderless (x4)

1	3
2	4

- You can change the printing order in Printing Order on the Print tab of the Preferences dialog box. You can select the printing order from By Date, By Name and By Selection.

To display the Preferences dialog box, click  (Settings) or select Preferences... from the File menu.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Photo Print Settings > Printing an Index

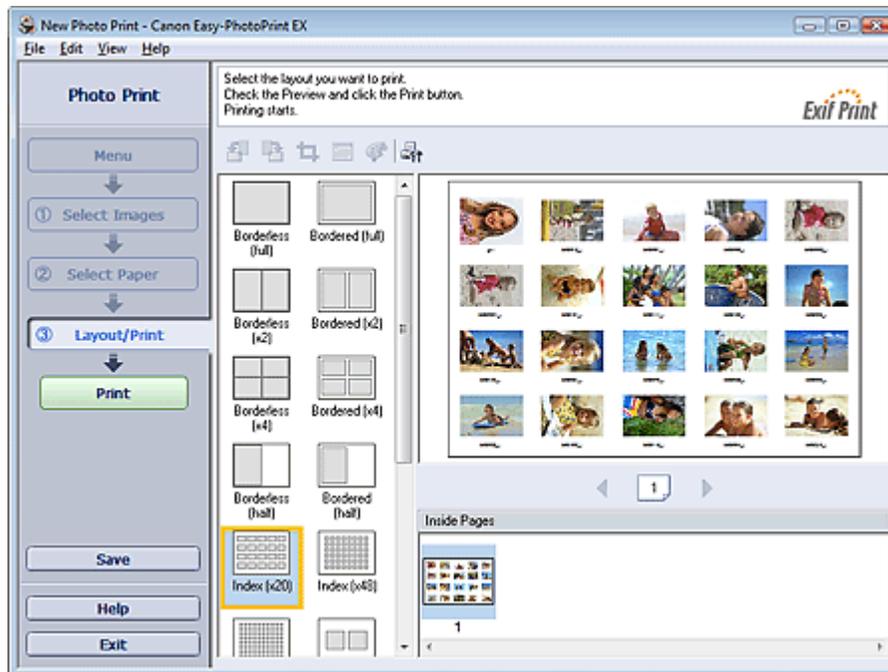

Easy-PhotoPrint EX

Printing an Index

You can print an index of selected photos. An index print shows the thumbnails of the photos in one page. It is convenient for managing your photos.

To print an index, select Index from the layouts in the Layout/Print screen.

Important

- Index print will be disabled if you select any of the following paper sizes.
 - Credit Card
- You can print up to 80 images on one page.

Note

- See the following section for details on how to select photos.
 - ➔ [Selecting a Photo](#)
- Photos are arranged in the following order.

Example: Index (x20)

1	2	3	4	5
6	7	8	9	10
11	12	13	14	15
16	17	18	19	20

- You can change the printing order in Printing Order on the Print tab of the Preferences dialog box. You can select the printing order from By Date, By Name, and By Selection.

To display the Preferences dialog box, click  (Settings) or select Preferences... from the File menu.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Photo Print Settings > Printing ID Photos (ID Photo Print)

Easy-PhotoPrint EX

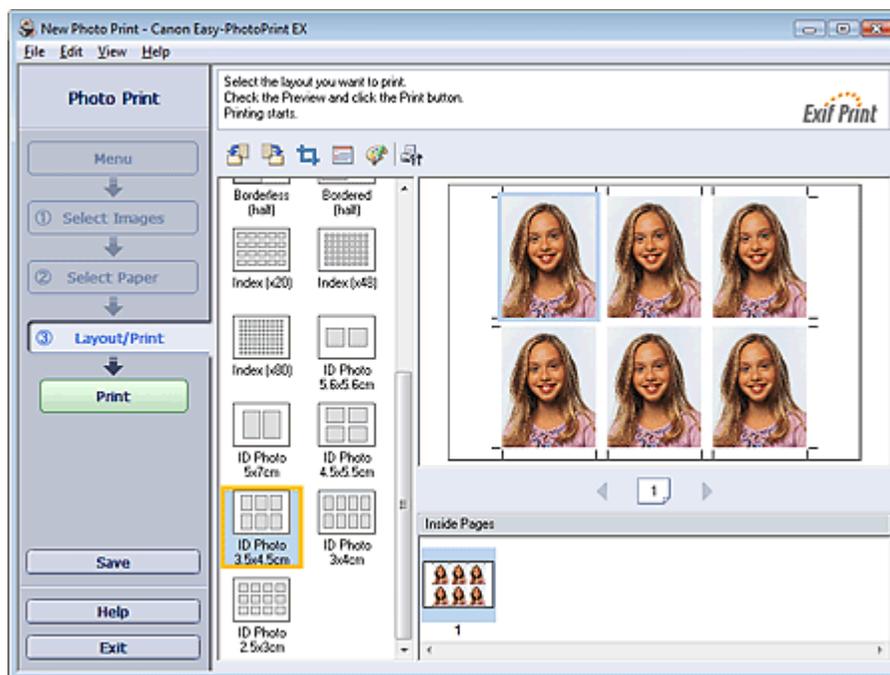

Printing ID Photos (ID Photo Print)

You can print a variety of ID photos.

Important

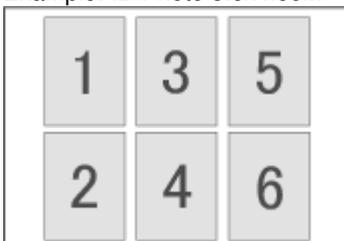

- The photo may not qualify as an official ID photo depending on its use. For details, contact the party to whom you will be submitting the photo.

To print ID photos, select 4"x6" 10x15cm for Paper Size in the Select Paper screen, and select a layout of the ID photo from the layouts in the Layout/Print screen.

Note

- See the following section for details on how to select photos.
➔ [Selecting a Photo](#)
- Photos are arranged in the following order.
Example: ID Photo 3.5x4.5cm

- You can change the printing order in Printing Order on the Print tab of the Preferences dialog box. You can select the printing order from By Date, By Name, and By Selection.
To display the Preferences dialog box, click  (Settings) or select Preferences... from the File menu.
- ID photos can only be printed on 4"x6" 10x15cm paper.

Easy-PhotoPrint EX

Changing Layout

You can change the layout of each page separately.

Select the page you want to change the layout of in the Edit screen, then click  (Change Layout).
Select the layout you want to use in the Change Layout dialog box and click OK.

Album

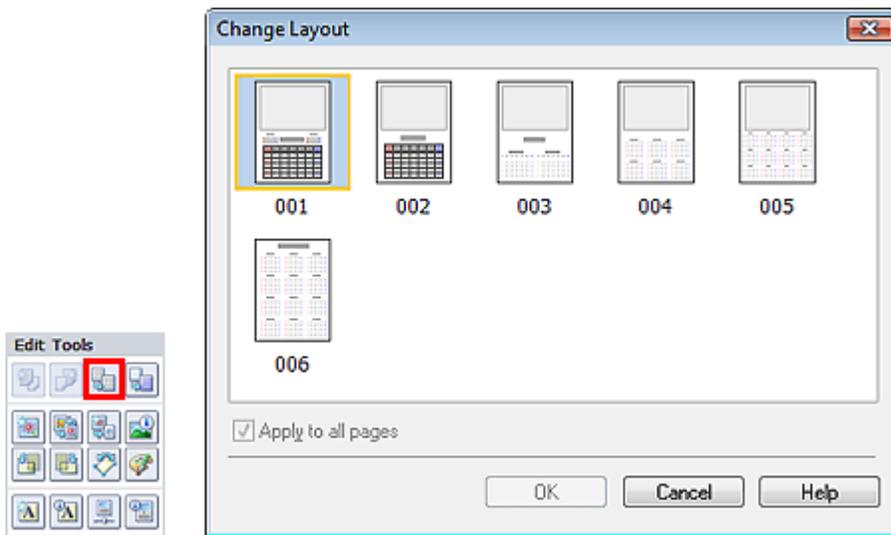

Important

- If the new layout has a different number of frames per page from the current layout, the following will happen:
 - If the number of layout frames is increased : Images will move from the subsequent pages to fill all the frames in the new layout.
 - If the number of layout frames is decreased : Pages with the new layout will be added until all the images on the pages with the current layout can be fitted.
- If you change the current layout for the front or back cover to one that has fewer layout frames, any image that does not fit in the new layout will be deleted, starting with the last image that was added to the former layout page.

Note

- The layouts that can be selected may vary depending on the Paper Size, Orientation, or the type of page selected (front cover, inside pages or back cover).
- Select the Apply to all pages checkbox to change the layouts of all pages to the one you newly selected.

Calendar

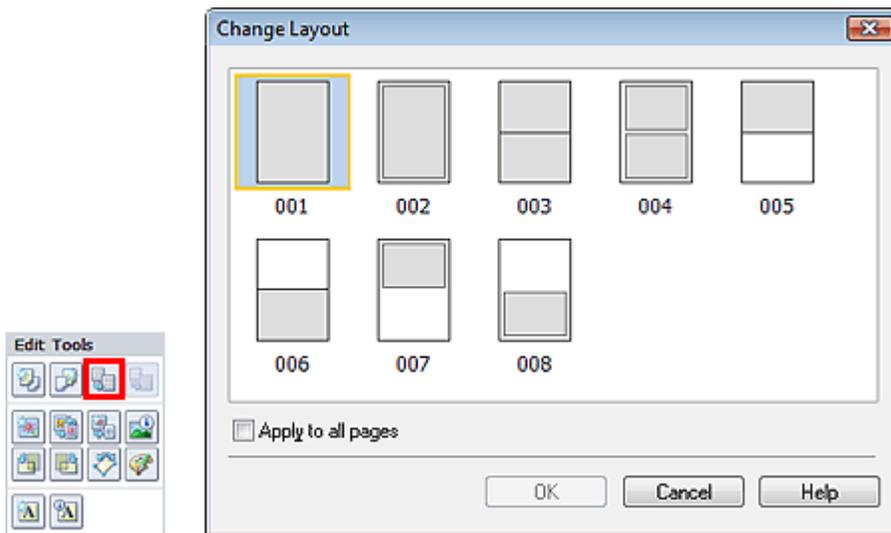

Important

- The layouts of all pages are changed to the selected layout.
- All images that do not fit in the new layout will be collected on the last page.

Note

- The layouts that can be selected may vary depending on the Paper Size and Orientation.

Layout Print

Important

- If the new layout has a different number of frames per page from the current layout, the following will happen:
 - If the number of layout frames is increased : Images will move from the subsequent pages to fill all the frames in the new layout.
 - If the number of layout frames is decreased : Pages with the new layout will be added until all the images on the pages with the current layout can be fitted.

Note

- The layouts that can be selected may vary depending on the Paper Size and Orientation.
- Select the Apply to all pages checkbox to change the layouts of all pages to the one you newly selected.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Other Settings > Changing Background

Easy-PhotoPrint EX

Changing Background

You can change the background of each page.

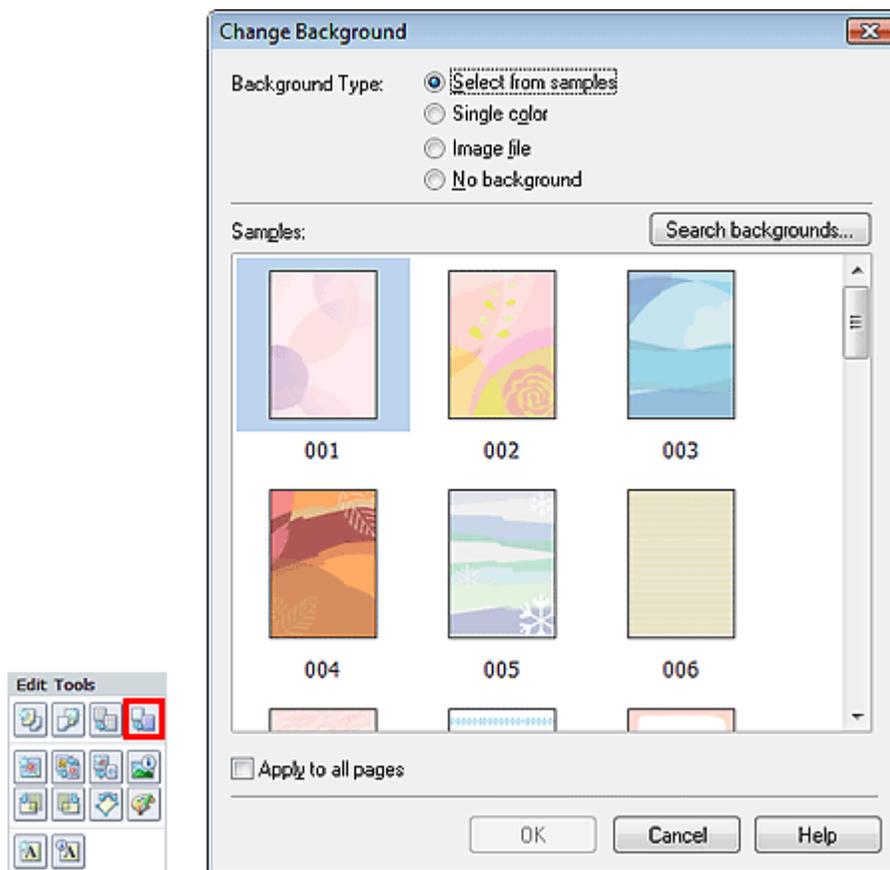

Important

- You cannot change the background of the Photo Print, Stickers, and Layout Print.

Click Background... in the Page Setup screen or select the page you want to change the background of in the Edit screen, then click  (Change Background).

Note

- The screens for Album printing are used as examples in the following descriptions. The screens may vary depending on what you create.

Select the type of background you want to use in the Change Background dialog box.

When Select from samples is Selected

Select the image you want to use from Samples and click OK.

Note

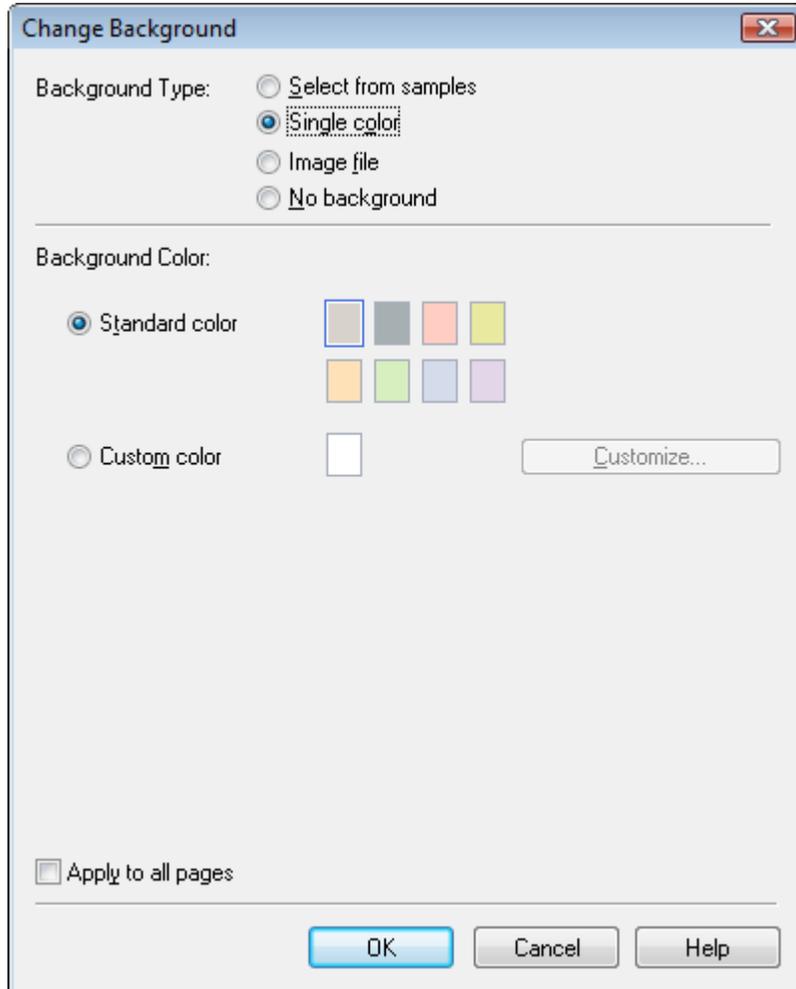

- Select from samples will be displayed only if Album has been selected.
- Various backgrounds are available on our website besides those saved in the application.

Click Search backgrounds... to access the Canon website from which you can download additional materials for free.

- Internet connection is required to access the website. Internet connection fees apply.
- This function may not be available in some regions.
- Exit Easy-PhotoPrint EX before installing backgrounds.

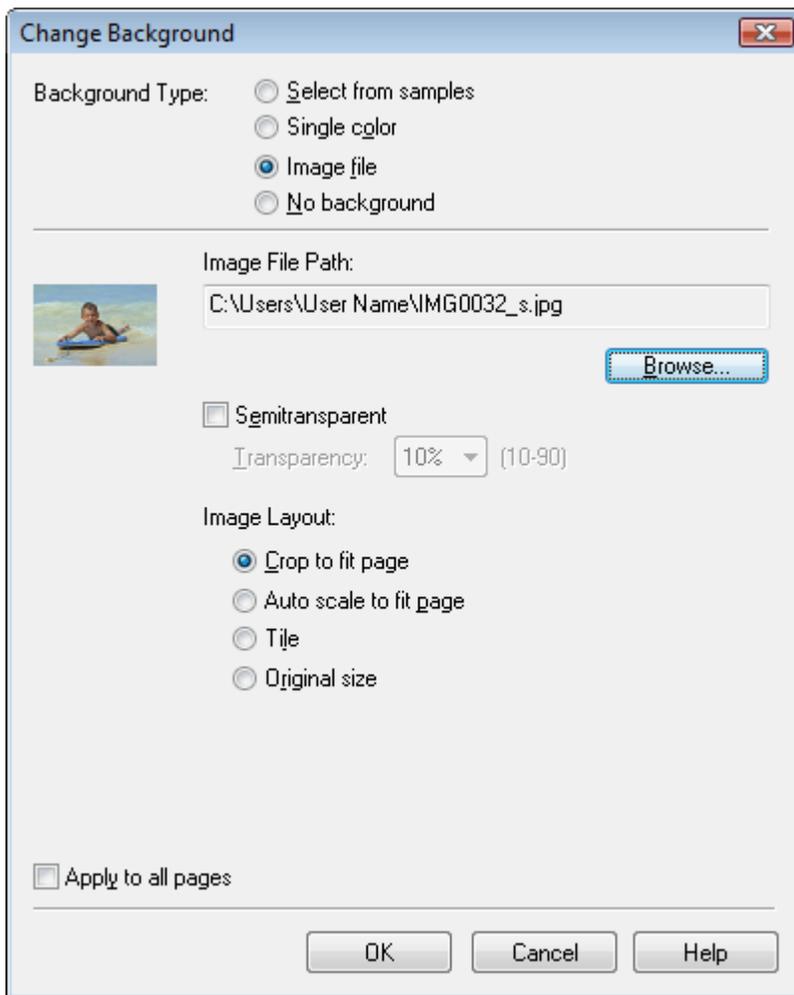

When Single color is Selected

Select the color you want to use from Standard color or Custom color and click OK.

When Image file is Selected

Set Image File Path and Image Layout, then click OK.

Note

- See Help for details on how to set the background in the Change Background dialog box.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with the Bundled Application Software > Other Settings > Adding Photos

Easy-PhotoPrint EX

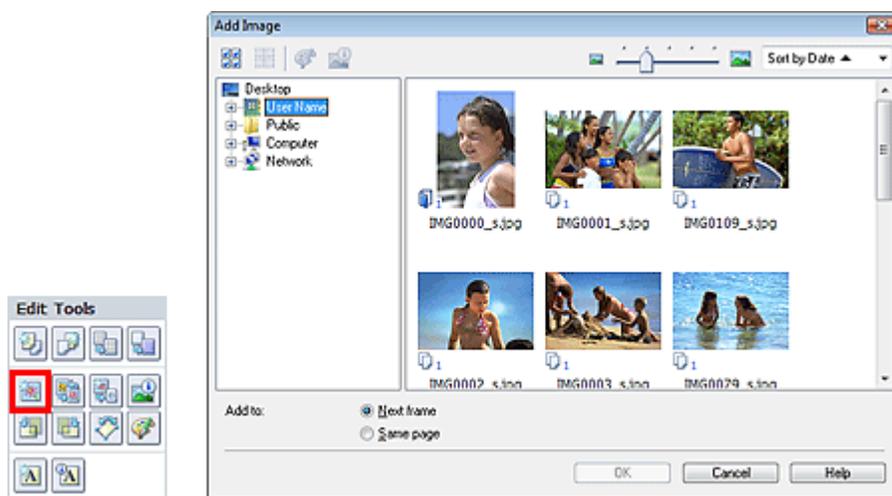

Adding Photos

You can add images to pages.

Select the page you want to add photos in the Edit screen, then click  (Add Image).

Note

- The screens for Album printing are used as examples in the following descriptions. The screens may vary depending on what you create.

Select the folder containing the image you want to add from the folder tree area on the left of the Add Image dialog box, and select the image you want to add from the thumbnail window on the right.

Note

- Click an image to select it (background turns blue) or deselect it (background turns white). You can also select multiple images.

Select an option for Add to and click OK.

Important

- You can add up to 20 images at one time to a single page.
- Up to 99 of the same images can be added to all pages combined.
- You cannot add two or more of the same image at one time. Add it one at a time.
- When the number of pages increases due to added images, you cannot add images beyond page 400.

Note

- In the Add Image dialog box, you can select all images at one time or change the display size and order of the thumbnails. See Help for details.

Replacing Photos

You can replace an image with another image.

Select the image you want to replace in the Edit screen, then click  (Replace Selected Image).

Select the folder containing the image you want to replace with from the folder tree area on the left of the Replace Image dialog box.

Select the image you want to replace with from the thumbnail window on the right of the screen and click OK.

If you want to select from the images already imported, click the Imported Images tab and select the image you want to replace with from the thumbnail window and click OK.

Important

- You cannot select multiple images in the Replace Image dialog box.

Note

- If you select multiple images in the Edit screen and use the replacement function, all the images selected in the Edit screen will be replaced with the image selected in the Replace Image dialog box.
- When images are replaced, the following settings of the old image are inherited to the new image.
 - Position
 - Size
 - Frame
 - Position and size of the date
 The cropping information and image orientation are not inherited.
- In the Replace Image dialog box, you can change the display size and order of the thumbnails. See Help for details.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Printing with Easy Setup

Printing with Easy Setup

The simple setup procedure for carrying out appropriate printing on this machine, is as follows:

1. Open the [printer driver setup window](#)
2. Select a frequently used profile

In Commonly Used Settings on the Quick Setup tab, select a printing profile suited for the purpose. When you select a printing profile, the Additional Features, Media Type, and Printer Paper Size settings are automatically switched to the values that were preset.

3. Select the print quality

Select High, Standard, or Fast that matches your purpose for Print Quality.

4. Complete the setup

Click OK.

When you execute print, the document is printed with settings that matches your purpose.

Important

- When you check the Always Print with Current Settings check box, all settings on the Quick Setup, Main, Page Setup, and Effects tabs are saved, and you can print with the same settings from the next time as well.
- Click Save... to register the specified settings. For instructions on registering settings, see "[Registering a Frequently Used Printing Profile.](#)"

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Setting a Page Size and Orientation

Setting a Page Size and Orientation

The paper size and orientation are essentially determined by the application. When the page size and orientation set for Page Size and Orientation on the Page Setup tab are same as those set with the application, you do not need to select them on the Page Setup tab.

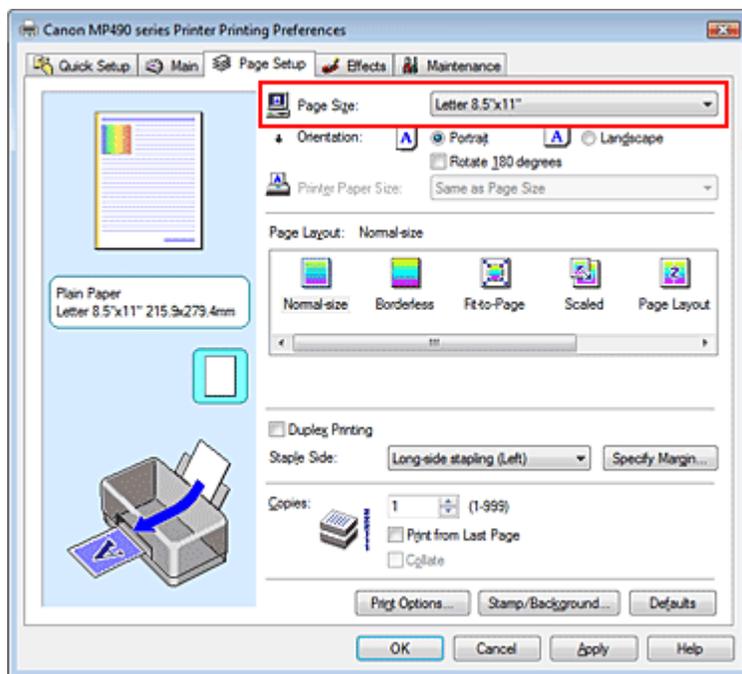

When you are not able to specify them with the application, the procedure for selecting a page size and orientation is as follows:

You can also set page size and Orientation on the Quick Setup tab.

1. Open the printer driver setup window

2. Select the paper size

Select a page size from the Page Size list on the Page Setup tab.

3. Set Orientation

Select Portrait or Landscape for Orientation. Check Rotate 180 degrees check box when you want to perform printing with the original being rotated 180 degrees.

4. Complete the setup

Click OK.

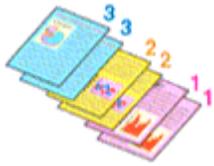

When you execute print, the document will be printed with the selected page size and the orientation.

Advanced Guide

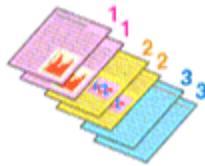

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Setting the Number of Copies and Printing Order

Setting the Number of Copies and Printing Order

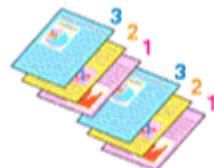

Default Setting

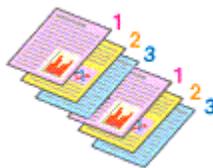

Print from Last Page

Collate

Print from Last Page + Collate

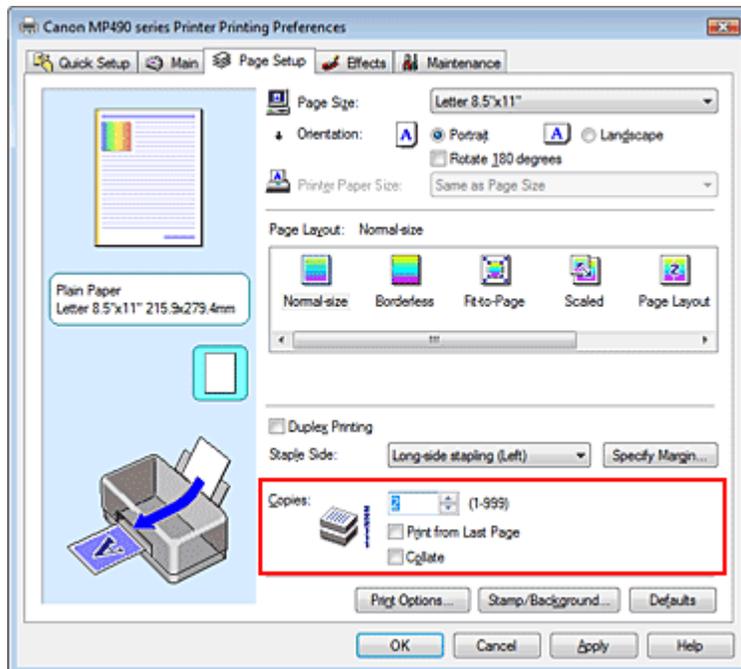

The procedure for specifying the number of copies and printing order is as follows:
You can also set the number of copies on the Quick Setup tab.

1. Open the printer driver setup window

2. Specify the number of copies to be printed

For Copies on the Page Setup tab, specify the number of copies to be printed.

3. Specify the print order

Check the Print from Last Page check box when you want to print from the last page in order. When you do this, you do not need to sort pages into their correct order after printing.

4. Set up collated printing when you specify multiple copies in the Copies box

Check the Collate check box when you are specifying multiple copy together.

Uncheck this check box to print all pages with the same page number together.

5. Complete the setup

Click OK.

The specified number of copies will be printed with the specified printing order.

Important

- When the application software that you used to create the document has the same function, give priority to the printer driver settings. However, if the print results are not acceptable, specify the function settings on the application software. When you specify the number of copies and the printing order with both the application and this printer driver, the number of copies may be multiplied numbers of the two settings or the specified printing order may not be enabled.
- Print from Last Page and Collate appear grayed out and are unavailable when Booklet is selected for Page Layout.
- Print from Last Page appears grayed out and is unavailable when Poster is selected for Page Layout.

Note

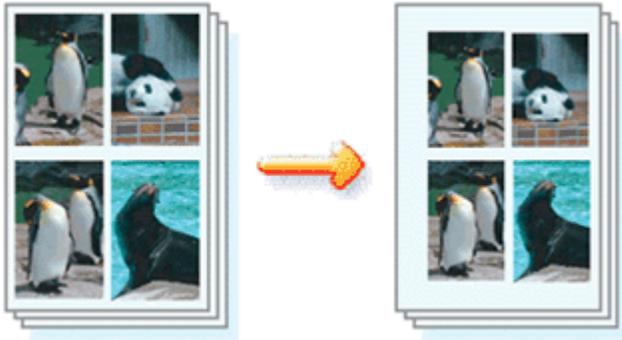

- By setting both Print from Last Page and Collate, you can perform printing so that papers are collated one by one starting from the last page.
These settings can be used in combination with Borderless, Normal-size, Fit-to-Page, Scaled, Page Layout, and Duplex Printing.

[Page top ↕](#)

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Setting the Stapling Margin

Setting the Stapling Margin

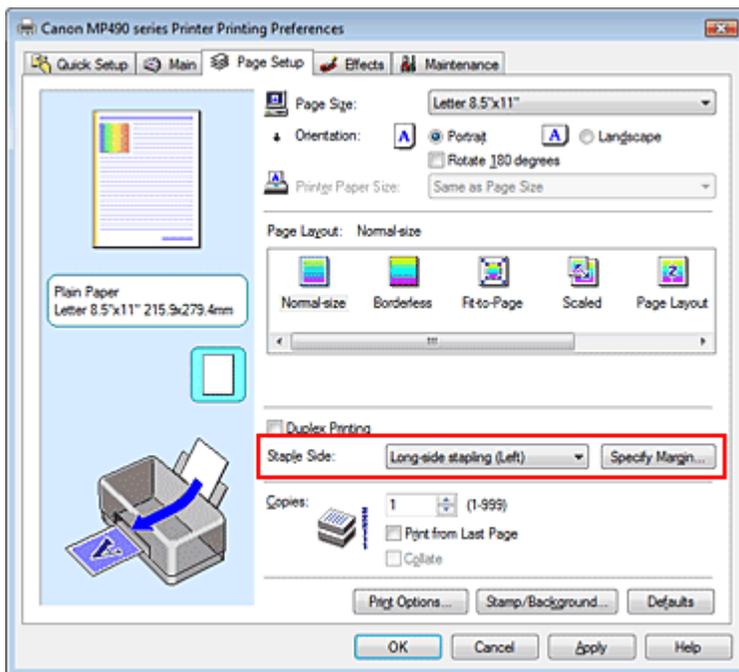

The procedure for setting the staple side and the margin width is as follows:

1. Open the **printer driver setup window**
2. Specify the side to be stapled

Check the position of the stapling margin from Staple Side on the Page Setup tab.

The printer analyzes the Orientation and Page Layout settings, and automatically selects the best staple position. When you want to change the setting, select from the list.

3. Set the margin width

If necessary, click Specify Margin... and set the margin width, and then click OK.

4. Complete the setup

Click OK on the Page Setup tab.

When you execute print, the data is printed with the specified staple side and margin width.

Important

- Staple Side and Specify Margin... appear grayed out and are unavailable when:
 - Borderless, Poster, or Booklet is selected for Page Layout.
 - Scaled is selected for Page Layout (When Duplex Printing is also selected, only Staple Side can be specified).

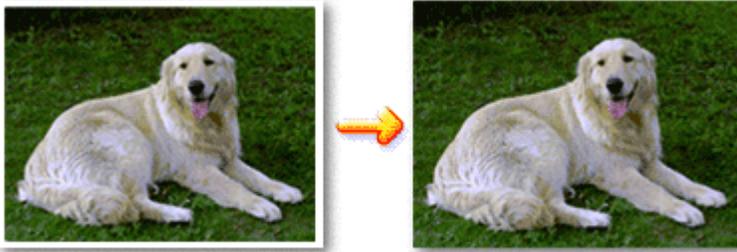

[Page top](#) 

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Borderless Printing

Borderless Printing

The borderless printing function allows you to print data without any margin by enlarging the data so that it extends slightly off the paper. Without the borderless printing function, a margin is provided around the printed data. When you want to print data such as a photo without providing any margin around it, select borderless printing.

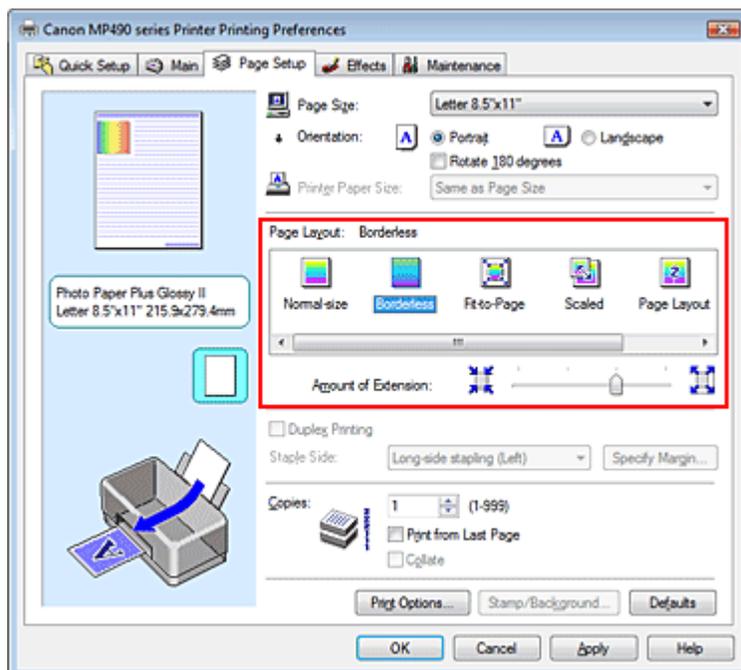

The procedure for performing borderless printing is as follows:

You can also set borderless printing in Additional Features on the Quick Setup tab.

Setting Borderless Printing

1. Open the **printer driver setup window**
2. Set borderless printing

Select Borderless from the Page Layout list on the Page Setup tab.

Click OK when the confirmation message appears.

When a message prompting you to change the media type appears, select a media type from the list and click OK.

3. Check the paper size

Check the Page Size list. When you want to change, select another page size from the list. The list displays only sizes that can be used for borderless printing.

4. Adjust the amount of extension from the paper

If necessary, adjust the amount of extension using the Amount of Extension slider.

Moving the slider to the right makes the amount larger and moving the slider to the left makes the amount smaller.

It is recommended to set the slider at the second position from the right for most cases.

Important

- When you set the slider at the rightmost position, the back side of the paper may become smudged.

5. Complete the setup

Click OK.

The data will be printed without any margins on the paper.

Important

- When a page size that cannot be used for borderless printing is selected, the size is automatically changed to the valid page sizes for borderless printing.
- When High Resolution Paper, T-Shirt Transfers, or Envelope is selected from the Media Type list on the Main tab, you cannot perform borderless printing.
- When Borderless is selected, the Printer Paper Size, Staple Side (when Duplex Printing is not selected) settings, and the Stamp/Background... button on the Page Setup tab appear grayed out and are unavailable.
- Print quality may deteriorate or the sheet may be stained at the top and bottom depending on the type of the media used.
- When the ratio of the height to the width differs from the image data, a portion of the image may not be printed depending on the size of the media used.
In this case, crop the image data with an application software according to the paper size.

Note

- When Plain Paper is selected for Media Type on the Main tab, borderless printing is not recommended, and therefore the dialog box for media selection appears.
When you are using plain paper for test printing, select Plain Paper, and click OK.

Expanding the Range of the Document to Print

Specifying a large amount of extension allows you to perform borderless printing with no problems. However, the portion of the document that extends off the paper range will not be printed. Subjects around the perimeter of a photo may not be printed.

Try borderless printing once. When you are not satisfied with the result of borderless printing, reduce the amount of extension. The extension amount becomes shorter as the Amount of Extension slider is moved to the left.

Important

- When the amount of extension is shortened, an unexpected margin may be produced on the print, depending on the size of the paper.

Note

- When the Amount of Extension slider is set to the leftmost position, image data will be printed in the full size.
- When Preview before printing is checked on the Main tab, you can confirm before printing whether there will be no border.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Fit-to-Page Printing

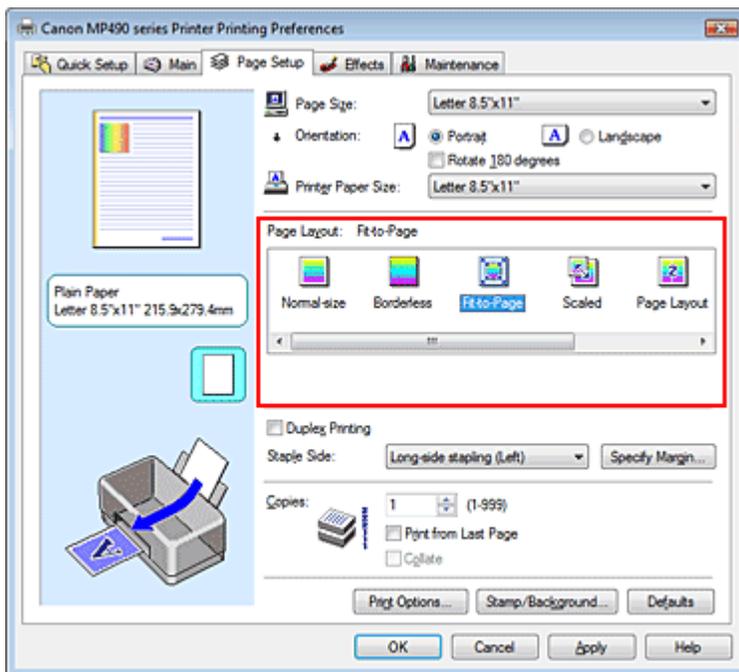

Fit-to-Page Printing

The procedure for printing a document that is automatically enlarged or reduced to fit the page size to be used is as follows:

1. Open the printer driver setup window
2. Set fit-to-page printing

Select Fit-to-Page from the Page Layout list on the Page Setup tab.

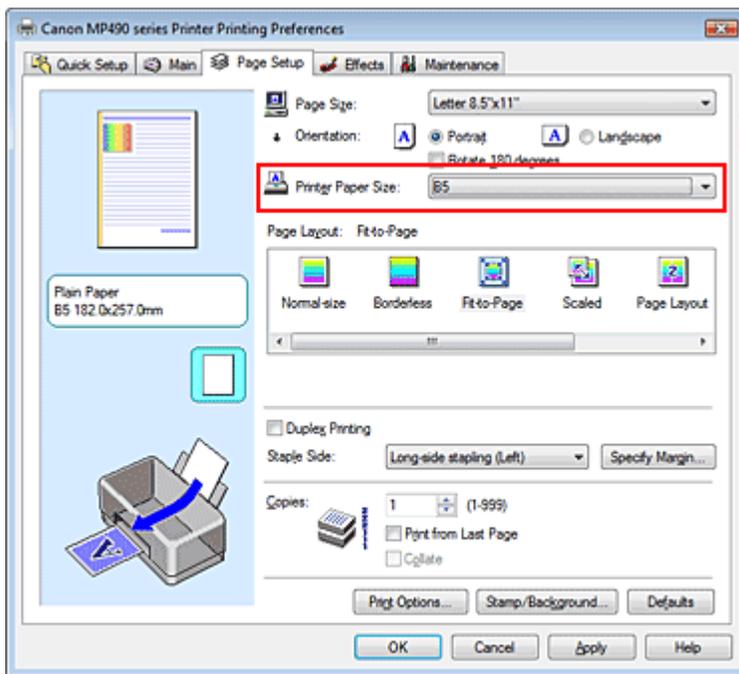

3. Select the paper size for the data

Using Page Size, select the page size that is set with your application.

4. Select the print paper size

Select the size of the paper loaded in the machine from the Printer Paper Size list. When the Printer Paper Size is smaller than the Page Size, the page image will be reduced. When the Printer Paper Size is larger than the Page Size, the page image will be enlarged.

The current settings are displayed in the settings preview on the left side of the printer driver.

5. Complete the setup

Click OK.

When you execute print, the document will be enlarged or reduced to fit to the page size.

[Page top](#) ↕

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Scaled Printing

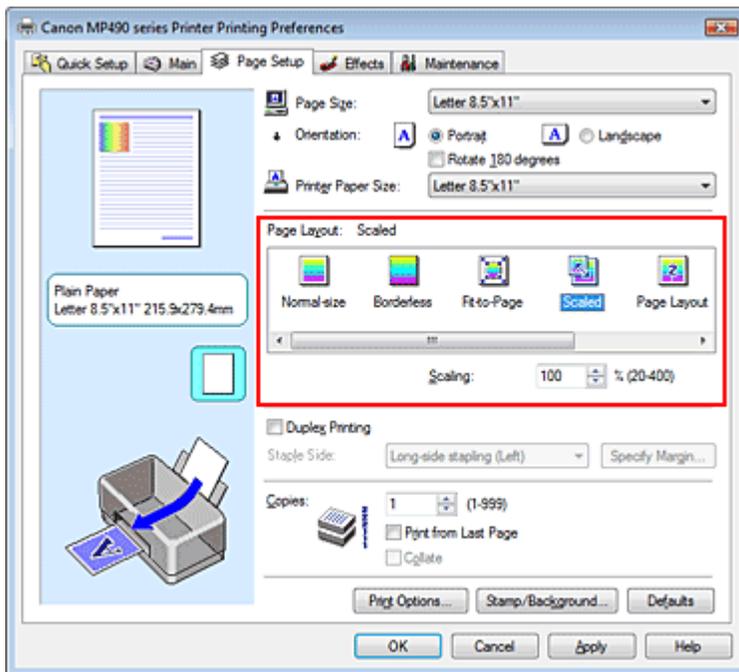

Scaled Printing

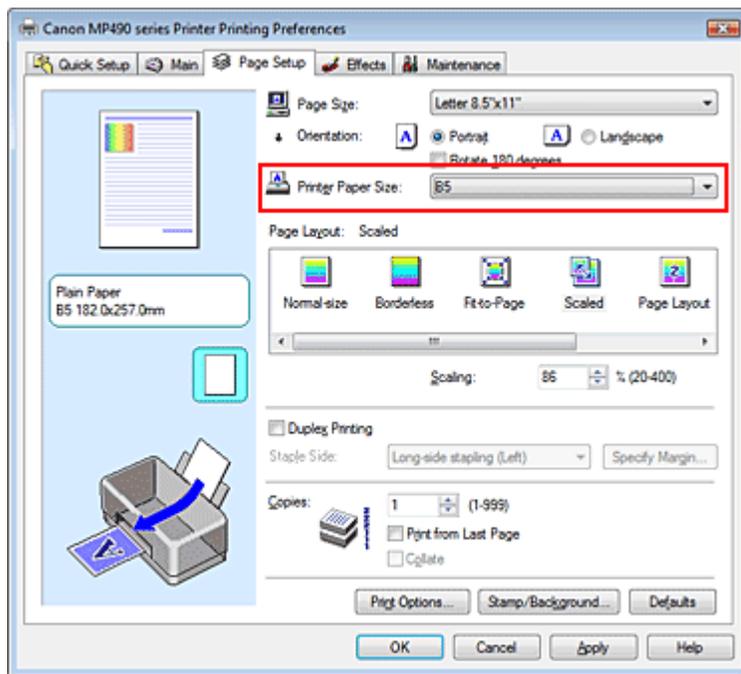

The procedure for printing a document with pages enlarged or reduced is as follows:

1. Open the printer driver setup window
2. Set scaled printing

Select Scaled from the Page Layout list on the Page Setup tab.

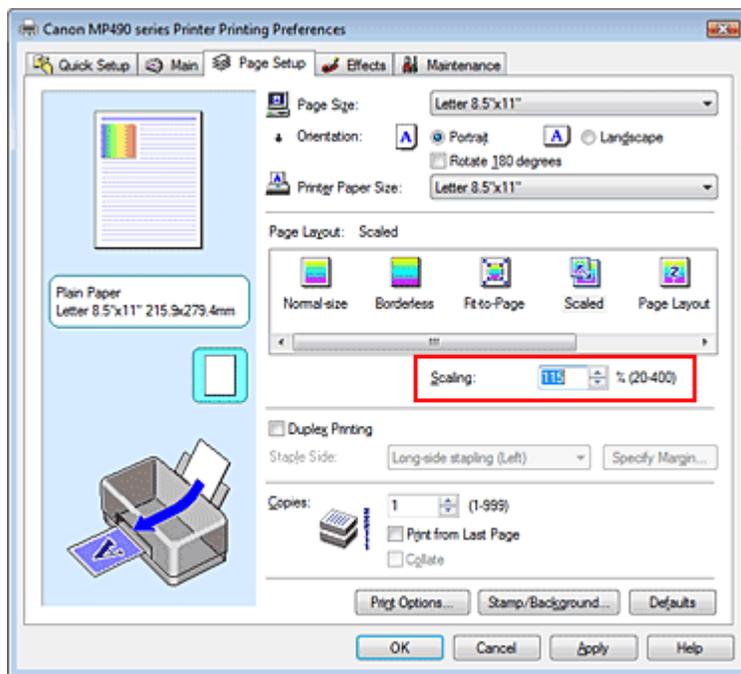

3. Select the paper size for the data
Using Page Size, select the page size that is set with your application.
4. Set the scaling rate by using one of the following methods:
 - **Select a Printer Paper Size**
When the printer paper size is smaller than the Page Size, the page image will be reduced.
When the printer paper size is larger than the Page Size, the page image will be enlarged.

- **Specify a scaling factor**

Directly type in a value into the Scaling box.

The current settings are displayed in the settings preview on the left side of the printer driver.

5. Complete the setup

Click OK.

When you execute print, the document will be printed with the specified scale.

Important

- When the application software with which you created the original has the scaled printing function, configure the settings on your application software. You do not need to configure the same setting in the printer driver.
- When Scaled is selected, the Staple Side list box appears grayed out and is unavailable (when Duplex Printing is not selected).

Note

- Selecting Scaled changes the printable area of the document.
-

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Page Layout Printing

Page Layout Printing

The page layout printing function allows you to print more than one page image on a single sheet of paper.

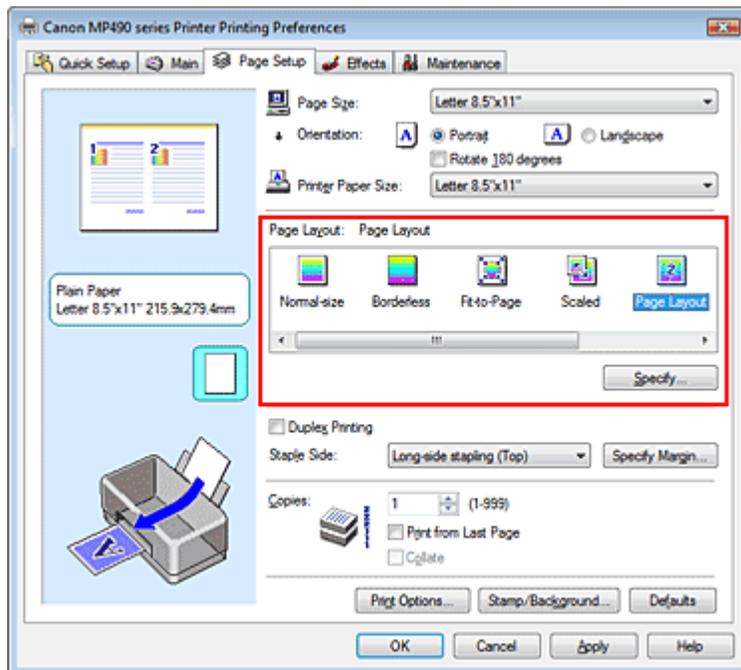

The procedure for performing page layout printing is as follows:

1. Open the **printer driver setup window**
2. Set page layout printing

Select Page Layout from the Page Layout list on the Page Setup tab.

The current settings are displayed in the settings preview on the left side of the printer driver.

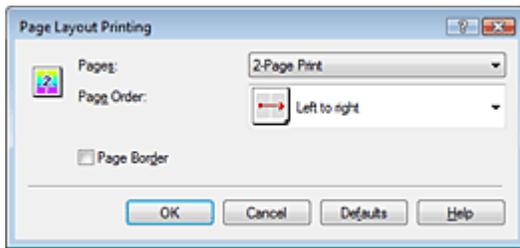

3. Select the print paper size

Select the size of the paper loaded in the machine from the Printer Paper Size list. Setting the layout of two pages of the document from left to right is complete.

4. Set the number of pages to be printed on one sheet and the page order

If necessary, click Specify..., specify the following settings in the Page Layout Printing dialog box, and click OK.

**Pages**

To increase the number of pages to be included on a single sheet of paper, select a desired number of pages from the list.

You can also set 2-Page Print or 4-Page Print on the Quick Setup tab.

Page Order

To change the page arrangement order, select an icon from the list to change the page placement order.

Page Border

To print a page border around each document page, check this check box.

5. Complete the setup

Click OK on the Page Setup tab.

When you execute print, the specified number of pages will be arranged on each sheet of paper in the specified order.

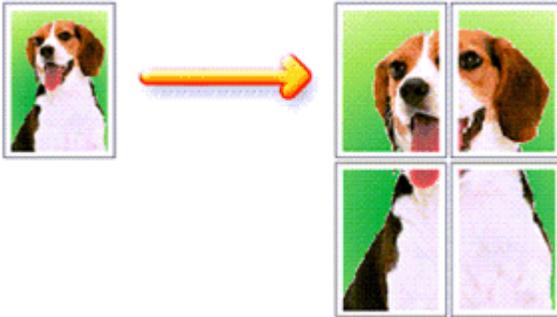

[Page top ↕](#)

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Poster Printing

Poster Printing

The poster printing function allows you to enlarge image data, divide it into several pages, and print these pages on separate sheets of paper. When the pages are pasted together, they form a large print like a poster.

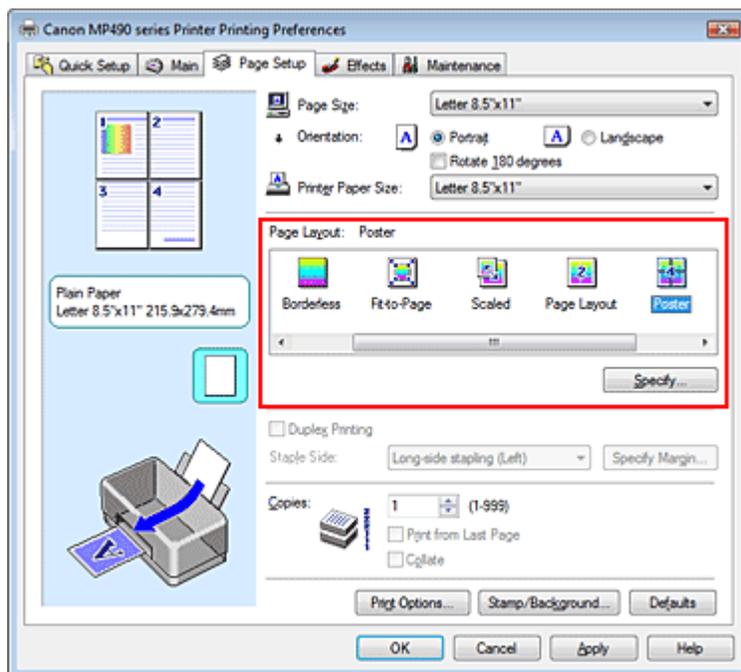

The procedure for performing poster printing is as follows:

Setting Poster Printing

1. Open the printer driver setup window
2. Set poster printing

Select Poster from the Page Layout list on the Page Setup tab.

The current settings are displayed in the settings preview on the left side of the printer driver.

3. Select the print paper size

Select the size of the paper loaded in the machine from the Printer Paper Size list.

Setting 2 by 2-page poster printing is complete.

4. Set the number of image divisions and the pages to be printed

If necessary, click Specify..., specify the following settings in the Poster Printing dialog box, and then click OK.

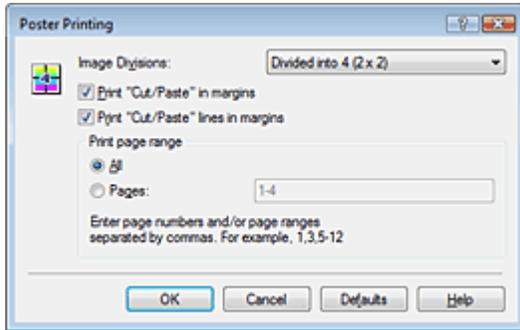

Image Divisions

Select the number of divisions (vertical x horizontal). As the number of divisions increases, the number of sheets used for printing increases, allowing you to create a larger poster.

Print "Cut/Paste" in margins

To leave out words "Cut" and "Paste", uncheck this check box.

Important

- This feature is unavailable when the 64-bit printer driver is used.

Print "Cut/Paste" lines in margins

To leave out cut lines, uncheck this check box.

Pages

To reprint only specific pages, enter the page number you want to print. To print multiple pages, specify by separating the pages with commas or entering a hyphen between the page numbers.

Note

- You can also specify the print range by clicking the pages in the settings preview.

5. Complete the setup

Click OK on the Page Setup tab.

When you execute print, the document will be divided into several pages during printing.

After all poster pages have been printed, paste the pages together to create a poster.

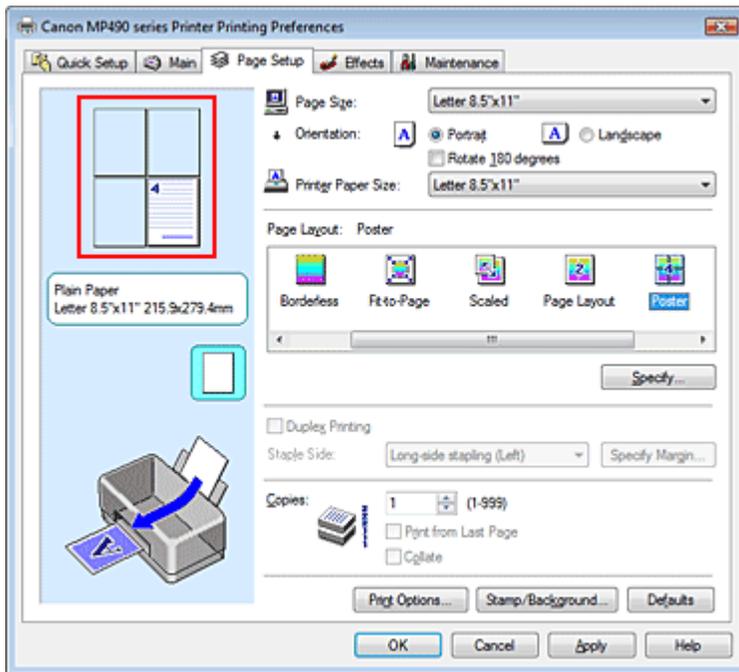

Printing Only Specific Pages

If ink becomes faint or runs out during printing, you can reprint specific pages by following the procedure below:

1. Set the print range

In the settings preview on the left of the Page Setup tab, click the pages that do not need to be printed.

The pages that were clicked are deleted, and only the pages to be printed are displayed.

Note

- Click the deleted pages to display them again.
- Right-click the settings preview to select Print all pages or Delete all pages.

2. Complete the setup

After completing the page selection, click OK.

When you execute print, only specified pages will be printed.

Important

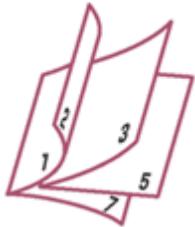

- When Poster is selected, the Duplex Printing, Staple Side and Print from Last Page appear grayed out and are unavailable.
- Since poster printing enlarges the document when printing it, the print results may become coarse.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Booklet Printing

Booklet Printing

The booklet printing function allows you to print data for a booklet. Data is printed on both sides of the paper. This type of printing ensures that pages can be collated properly, in page number order, when the printed sheets are folded and stapled at the center.

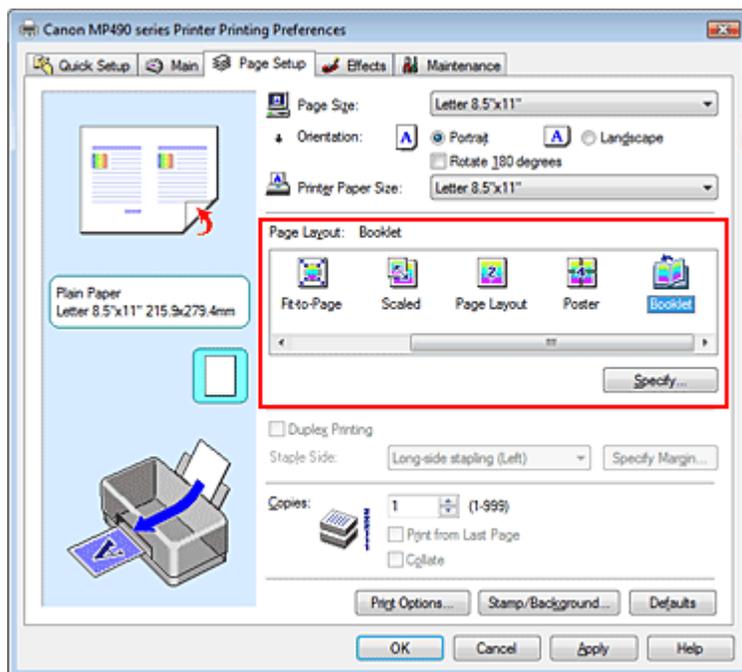

The procedure for performing booklet printing is as follows:

1. Open the **printer driver setup window**
2. Set booklet printing

Select Booklet from the Page Layout list on the Page Setup tab.

The current settings are displayed in the settings preview on the left side of the window.

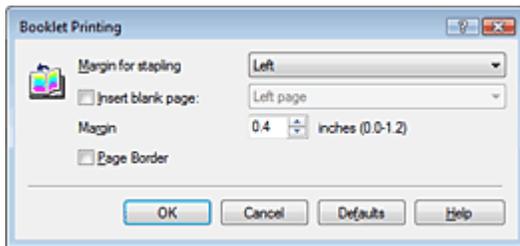

3. Select the print paper size

Select the size of the paper loaded in the machine from the Printer Paper Size list.

4. Set the margin for stapling and the margin width

Click Specify... and specify the following settings in the Booklet Printing dialog box, and then click OK.

**Margin for stapling**

Select which side should the stapling margin be on when the booklet is completed.

Insert blank page

To leave one side of a sheet blank, check the check box, and select the page to be left blank.

Margin

Enter the margin width. The specified width from the center of the sheet becomes the margin width for one page.

Page Border

To print a page border around each document page, check the check box.

5. Complete the setup

Click OK on the Page Setup tab.

When you execute print, the document will be printed on one side of a sheet of paper. When the printing of one side is complete, set the paper correctly by following the message and click OK. When the printing of the other side is complete, fold the paper at the center of the margin and make a booklet.

Important

- Booklet cannot be selected when a media type other than Plain Paper is selected for Media Type.
- When Booklet is selected, Duplex Printing, Staple Side, Print from Last Page, and Collate appear grayed out and are unavailable.

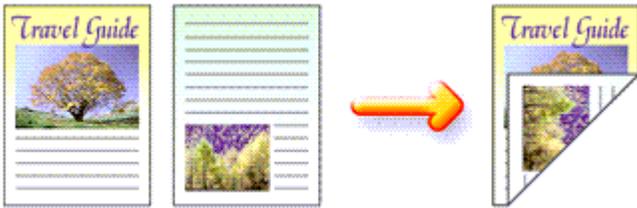

Note

- The stamp and background are not printed on blank sheets inserted with the Insert blank page function of booklet printing.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Duplex Printing

Duplex Printing

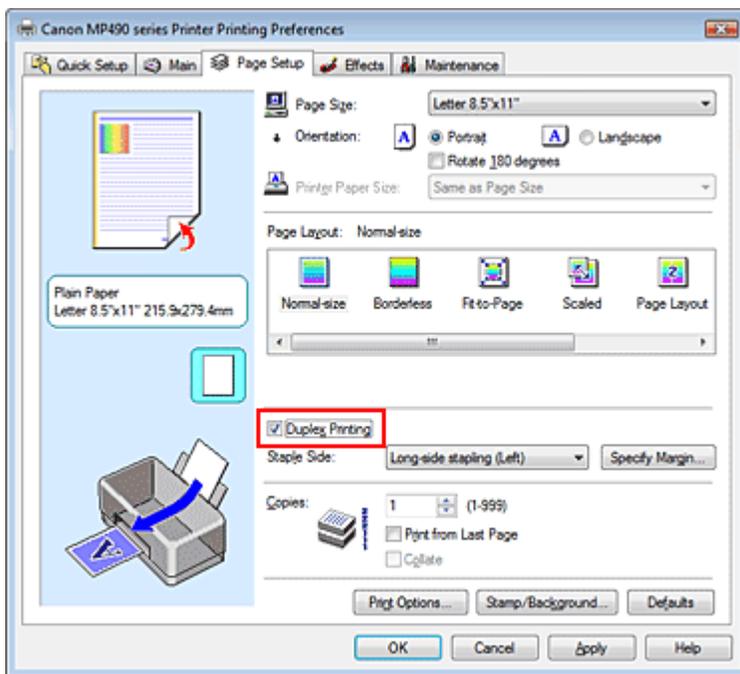

The procedure for printing data on both sides of a sheet of paper is as follows:
You can also set duplex printing in Additional Features on the Quick Setup tab.

1. Open the printer driver setup window

2. Set duplex printing

Check the Duplex Printing check box on the Page Setup tab.

3. Select the layout

Select Normal-size (or Fit-to-Page, Scaled, or Page Layout) from the Page Layout list.

4. Specify the side to be stapled

The machine analyzes the Orientation and Page Layout settings, and automatically selects the best Staple Side. When you want to change the setting, select another value from the list.

5. Set the margin width

If necessary, click Specify Margin... and set the margin width, and then click OK.

6. Complete the setup

Click OK on the Page Setup tab.

When you execute print, the document will be printed on one side of a sheet of paper. When the printing of one side is complete, load the paper correctly by following the message and click OK. The document will be printed on the opposite side.

Important

- Duplex Printing appears grayed out and is unavailable when:
 - A media type other than Plain Paper is selected from the Media Type list.
 - Poster is selected from the Page Layout list.
- When Booklet is selected from the Page Layout list, Duplex Printing and Staple Side appear grayed out and are unavailable.

Note

- When you select borderless printing during duplex printing, a dialog box for media type selection may appear. If that happens, select Plain Paper.
- If the back side of the paper becomes smudged during duplex printing, perform Bottom Plate Cleaning in the Maintenance tab.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Stamp/Background Printing

Stamp/Background Printing

This feature is unavailable when the 64-bit printer driver is used.

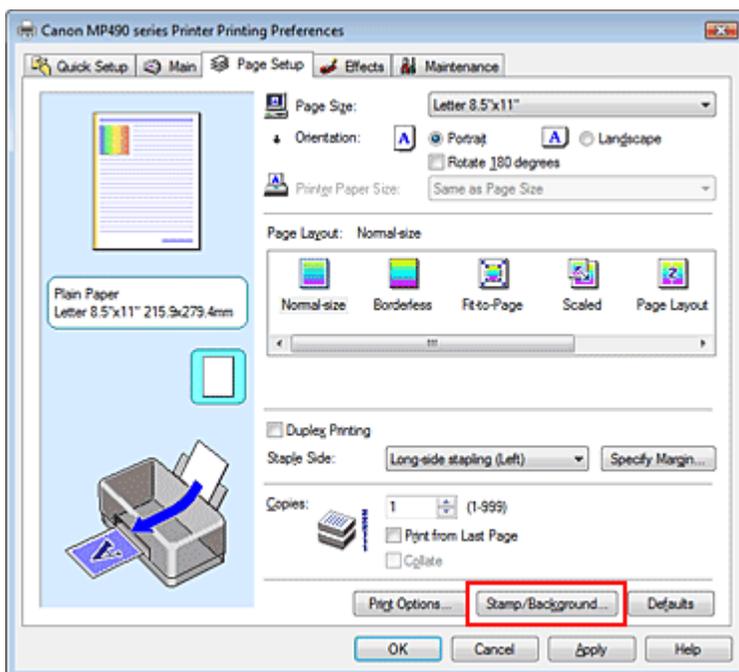

The Stamp function allows you to print a stamp text or a bitmap over or behind document data. It also allows you to print date, time and user name. The Background function allows you to print a light illustration behind the document data.

The procedure for performing stamp/background printing is as follows:

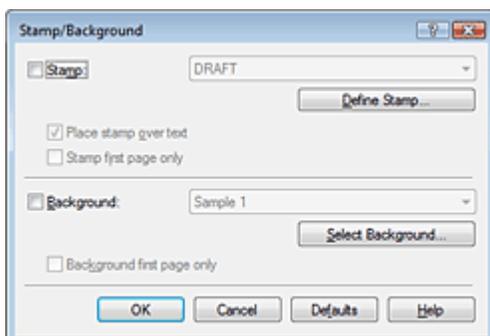

Printing a Stamp

"CONFIDENTIAL," "IMPORTANT," and other stamps that are used often in companies are pre-registered.

1. Open the **printer driver setup window**
2. Click Stamp/Background... on the Page Setup tab

The Stamp/Background dialog box opens.

3. Select a stamp

Check the Stamp check box, and select a desired stamp from the list.

The current settings are displayed in the settings preview on the left side of the Page Setup tab.

4. Set the stamp details

If necessary, specify the following settings, and then click OK.

Place stamp over text

To print the stamp on the front of the document, check this check box.

Note

- The stamp is given priority because the stamp is printed over the document data in the sections where the stamp and the document data overlap. When this check box is unchecked, the stamp is printed behind the document data and may be hidden in the overlapping sections depending on the application used.

Stamp first page only

To print the stamp only on the first page, check this check box.

Define Stamp... button

To change the stamp text, bitmap, or position, click this (refer to "[Registering a Stamp](#)").

5. Complete the setup

Click OK on the Page Setup tab.

When you execute print, the data is printed with the specified stamp.

Printing a Background

Two bitmap files are pre-registered as samples.

1. Open the [printer driver setup window](#)

2. Click Stamp/Background... on the Page Setup tab

The Stamp/Background dialog box opens.

3. Select the background

Check the Background check box, and select a desired background from the list.

The current settings are displayed in the settings preview on the left side of the Page Setup tab.

4. Set the background details

If necessary, complete the following settings, and then click OK.

Background first page only

To print the background only on the first page, check this check box.

Select Background... button

To use another background or change the layout or density of a background, click this (refer to "[Registering Image Data to be Used as a Background](#)").

5. Complete the setup

Click OK on the Page Setup tab.

When you execute print, the data is printed with the specified background.

Important

- When Borderless is selected, the Stamp/Background... button appears grayed out and is unavailable.

Note

- The stamp and background are not printed on blank sheets inserted with the Insert blank page

function of booklet printing.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Stamp/Background Printing > Registering a Stamp

Registering a Stamp

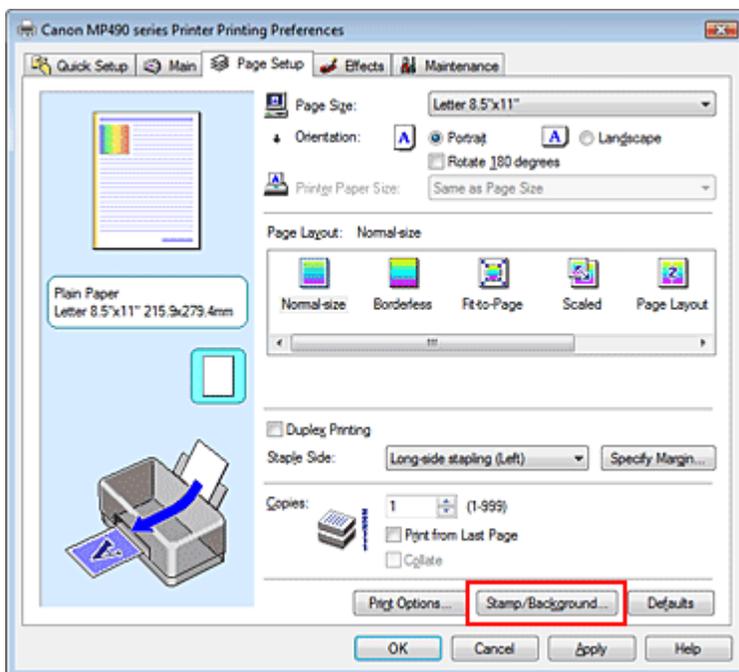

This feature is unavailable when the 64-bit printer driver is used.

You can create and register a new stamp. You can also change and register some of the settings of an existing stamp. Unnecessary stamps can be deleted at any time.

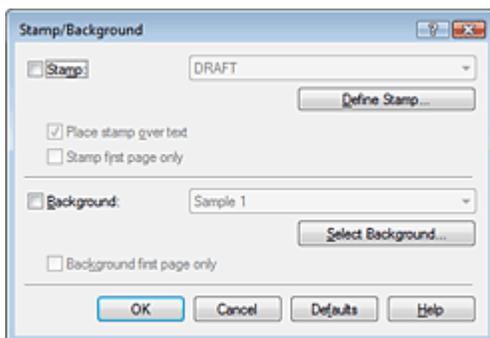

The procedure for registering a new stamp is as follows:

Registering a New Stamp

1. Open the printer driver setup window
2. Click Stamp/Background... on the Page Setup tab

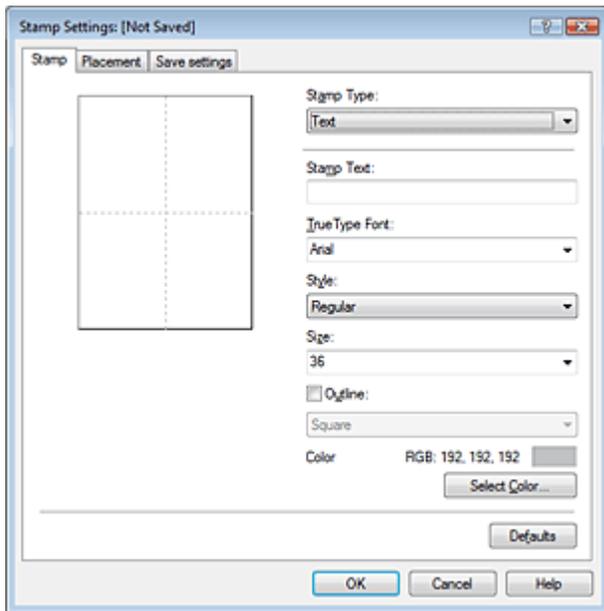

The Stamp/Background dialog box opens.

3. Click Define Stamp...

The Stamp Settings dialog box opens.

4. Configure the stamp while viewing the preview window

- **Stamp tab**

Select Text, Bitmap, or Date/Time/User Name that matches your purpose for Stamp Type.

- For Text registration, the characters must already be entered in Stamp Text. If necessary, change the TrueType Font, Style, Size, and Outline settings. You can select the color of the stamp by clicking Select Color....
- For Bitmap, click Select File... and select the bitmap file (.bmp) to be used. If necessary, change the settings of the Size and Transparent white area.
- For Date/Time/User Name, the creation date/time and user name of the printed object are displayed in Stamp Text. If necessary, change the settings of TrueType Font, Style, Size, and Outline. You can select the color of the stamp by clicking Select Color....

Important

- Stamp Text appears grayed out and is unavailable when Date/Time/User Name is selected.

- **Placement tab**

Select the stamp position from the Position list. You can also select Custom from the Position list and specify coordinates for X-Position and Y-Position.

You can also change the stamp position by dragging the stamp in the preview window.

To change the stamp position angle, type a value in the Orientation box directly.

5. Save the stamp

Click the Save settings tab and enter a title in the Title box, and then click Save.

Click OK when the confirmation message appears.

6. Complete the setup

Click OK. The Stamp/Background dialog box opens again.

The registered title appears in the Stamp list.

Changing and Registering Some of Stamp Settings

1. Select the stamp for which the settings are to be changed

Check the Stamp check box in the Stamp/Background dialog box, and then select the title of the stamp to be changed from the Stamp list.

2. Click Define Stamp...

The Stamp Settings dialog box opens.

3. Configure the stamp while viewing the preview window**4. Overwrite save the stamp**

Click Save overwrite on the Save settings tab.

When you want to save the stamp with a different title, type a new title in the Title box and click Save.

Click OK when the confirmation message appears.

5. Complete the setup

Click OK. The Stamp/Background dialog box opens again.

The registered title appears in the Stamp list.

Deleting an Unnecessary Stamp**1. Click Define Stamp... in the Stamp/Background dialog box**

The Stamp Settings dialog box opens.

2. Select the stamp to be deleted

Select the title of the stamp you want to delete from the Stamps list on the Save settings tab. Then click Delete.

Click OK when the confirmation message appears.

3. Complete the setup

Click OK. The Stamp/Background dialog box opens again.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Stamp/Background Printing > Registering Image Data to be Used as a Background

Registering Image Data to be Used as a Background

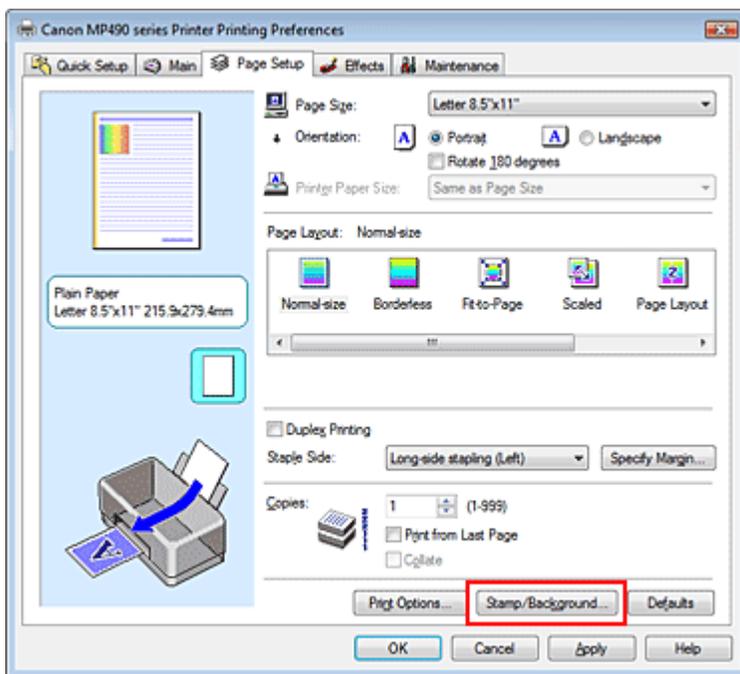

This feature is unavailable when the 64-bit printer driver is used.

You can select a bitmap file (.bmp) and register it as a new background. You can also change and register some of the settings of an existing background. An unnecessary background can be deleted at any time.

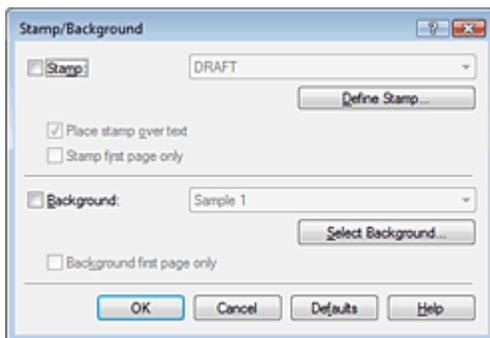

The procedure for registering image data to be used as a background is as follows:

Registering New Background

1. Open the printer driver setup window
2. Click Stamp/Background... on the Page Setup tab

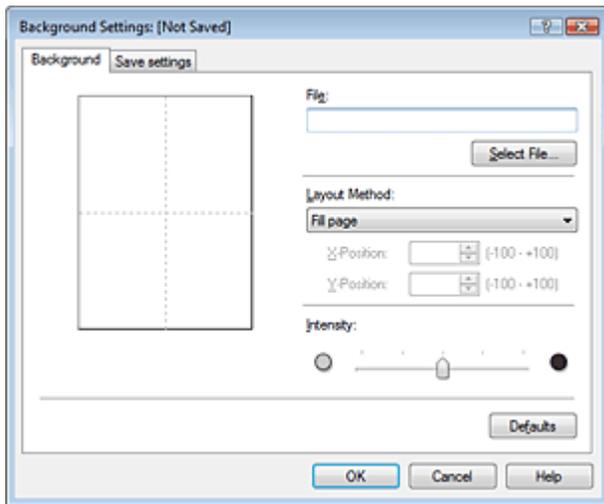

The Stamp/Background dialog box opens.

3. Click Select Background...

The Background Settings dialog box opens.

4. Select the image data to be registered to the background

Click Select File.... Select the target bitmap file (.bmp), and then click Open.

5. Specify the following settings while viewing the preview window

Layout Method

Select how the background image data is to be placed.

When Custom is selected, you can set coordinates for X-Position and Y-Position.

You can also change the background position by dragging the image in the preview window.

Intensity

Set the intensity of the background image data with the Intensity slider. To lighten the background, move the slider to the left. To darken the background, move the slider to the right. To print the background at the original bitmap intensity, move the slider to the rightmost position.

6. Save the background

Click the Save settings tab and enter a title in the Title box, and then click Save.

Click OK when the confirmation message appears.

7. Complete the setup

Click OK. The Stamp/Background dialog box opens again.

The registered title appears in the Background list.

Changing and Registering Some Background Settings

1. Select the background for which the settings are to be changed

Check the Background check box in the Stamp/Background dialog box, and then select the title of the background you want to change from the Background list.

2. Click Select Background...

The Background Settings dialog box opens.

3. Specify the items on the Background tab while viewing the preview window.

4. Save the background

Click Save overwrite on the Save settings tab. When you want to save the background with a different title, enter a new title in the Title box and click Save.

Click OK when the confirmation message appears.

5. Complete the setup

Click OK. The Stamp/Background dialog box opens again.
The registered title appears in the Background list.

Deleting an Unnecessary Background**1. Click Select Background... in the Stamp/Background dialog box**

The Background Settings dialog box opens.

2. Select the background to be deleted

Select the title of the background you want to delete from the Backgrounds list on the Save settings tab, and then click Delete.

Click OK when the confirmation message appears.

3. Complete the setup

Click OK. The Stamp/Background dialog box opens again.

Advanced Guide

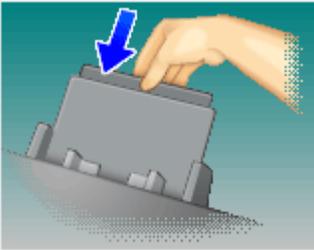

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Printing an Envelope

Printing an Envelope

For details on how to load an envelope into the machine, refer to "Loading Paper" in the manual: Basic Guide.

The procedure for performing envelope printing is as follows:

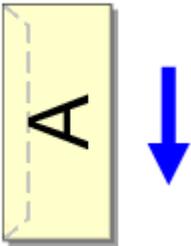

1. Fold down the paper support

2. Load an envelope into the machine

Fold down the envelope flap.

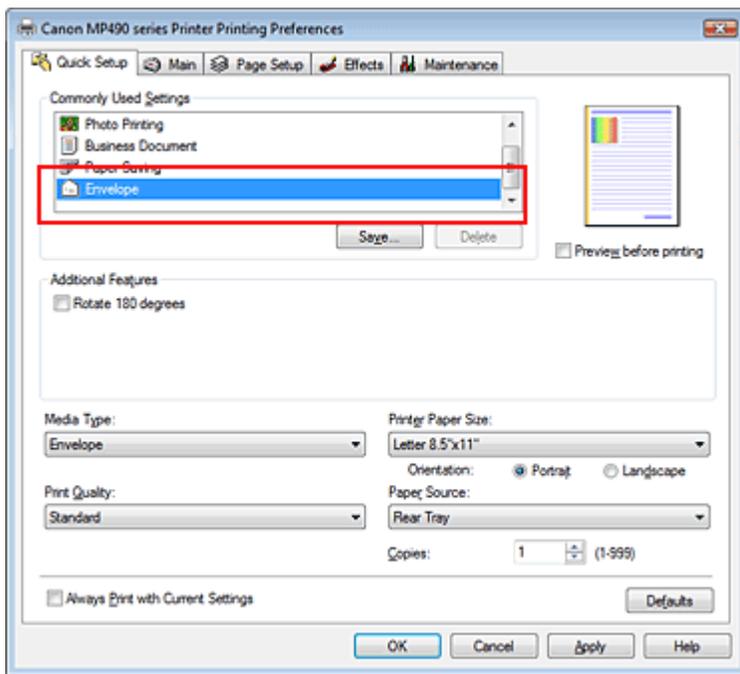

Orient the envelope so that the flap is on the left and the folded surface is facing down, and load in the rear tray.

3. Open the [printer driver setup window](#)

4. Select the media type

Select Envelope from Commonly Used Settings on the Quick Setup tab.

5. Select the paper size

Select Comm.Env. #10, DL Env., Youkei 4 105x235mm, or Youkei 6 98x190mm in the Envelope Size Setting dialog box, and then click OK.

6. Set the orientation

To print the addressee horizontally, select Landscape for Orientation.

7. Select the print quality

Select High or Standard that matches your purpose for Print Quality.

8. Complete the setup

Click OK.

When you execute print, the information is printed on the envelope.

Important

- When you execute envelope printing, guide messages are displayed. To hide the guide messages, check the Do not show this message again. check box. To show the guide again, click the View Printer Status... button on the Maintenance tab, and start the Canon IJ Status Monitor. Then click Envelope Printing from Display Guide Message of the Option menu, and change the setting to on.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Displaying the Print Results before Printing

Displaying the Print Results before Printing

You can display and check the print result before printing.

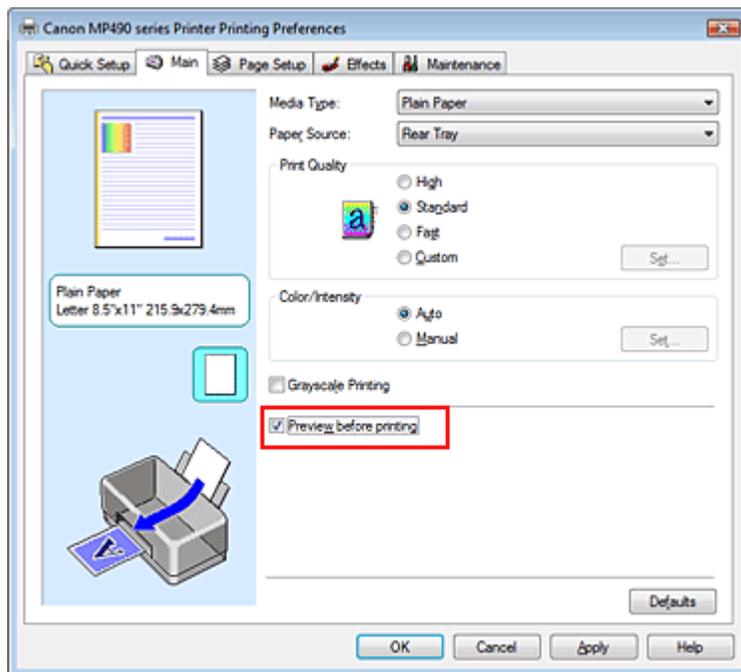

The procedure for displaying the print result before printing is as follows:

You can also set the print results display on the Quick Setup tab.

1. Open the printer driver setup window

2. Set the preview

Check the Preview before printing check box on the Main tab.

3. Complete the setup

Click OK.

The Canon IJ Preview will start and the print result will be displayed before printing.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Various Printing Methods > Setting Paper Dimensions (Custom Size)

Setting Paper Dimensions (Custom Size)

You can specify the height and width of paper when its size cannot be selected from the Page Size. Such a paper size is called a custom size.

The procedure for specifying a custom size is as follows:

You can also set a custom size in Printer Paper Size on the Quick Setup tab.

1. Set the custom size in the application software

On your application's paper size feature, specify the custom size.

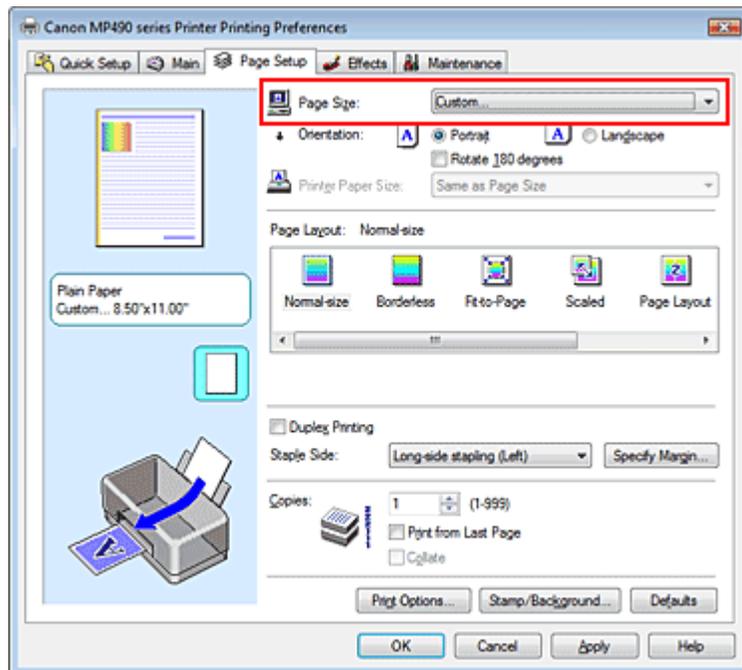

Important

- When the application software that created the document has a function for specifying the height and width values, use the application software to set the values. When the application software does not have such a function or if the document does not print correctly, use the printer driver to set the values.

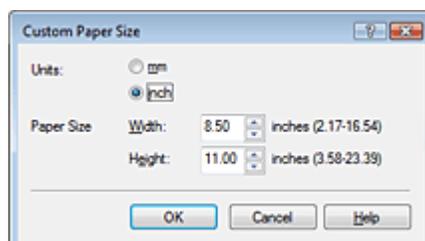

2. Open the printer driver setup window

3. Select the paper size

Select Custom... for Page Size on the Page Setup tab.

The Custom Paper Size dialog box opens.

4. Set the custom paper size

Specify Units, and enter the Width and Height of the paper to be used. Then click OK.

5. Complete the setup

Click OK on the Page Setup tab.

When you execute print, the data is printed with the specified paper size.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Changing the Print Quality and Correcting Image Data > Selecting a Combination of the Print Quality Level and a Halftoning Method

Selecting a Combination of the Print Quality Level and a Halftoning Method

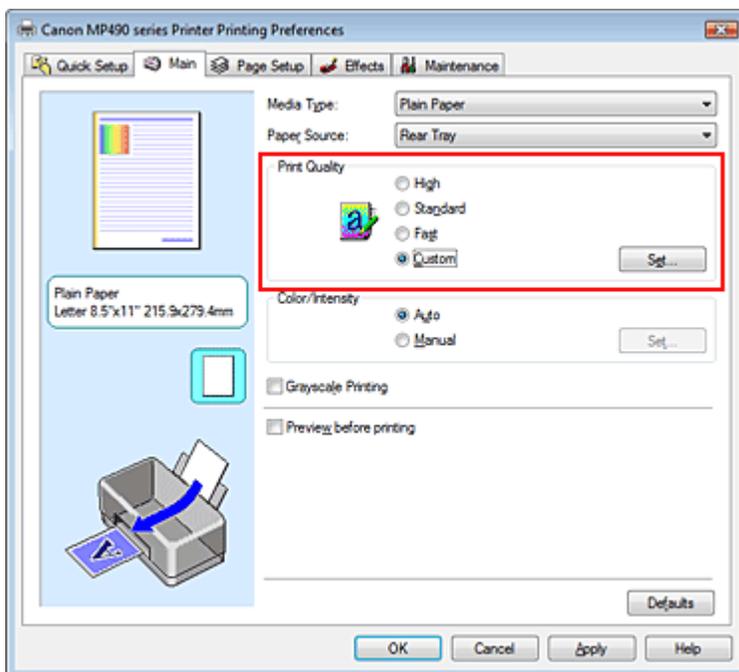

You can individually set the combined representation method for the print quality level and the halftoning method.

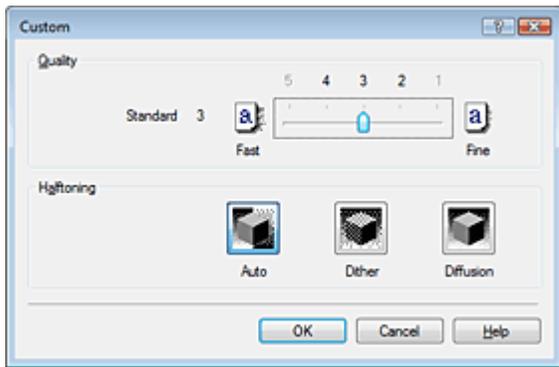

The procedure for setting the print quality level and the halftoning method is as follows:

1. Open the printer driver setup window
2. Select the print quality

Select Custom for Print Quality on the Main tab, and click Set...

The Custom dialog box opens.

3. Setting the print quality and halftone expression method

Move the Quality slider to select the quality level.
Select the expression method in Halftoning and click OK.

Note

- Halftones refer to color shades between the darkest color and the brightest color. The printer replaces the color shades with a collection of small dots to express the halftones. Dither arranges the dots according to fixed rules to express the halftones. Diffusion places the dots randomly to express the halftones. When you select Auto, the data is printed with the optimal halftoning method for the selected print quality.

4. Complete the setup

Click OK on the Main tab.
When you execute print, the data is printed with the specified quality level and halftoning method.

Important

- Certain print quality levels and halftoning methods cannot be selected depending on the settings of Media Type.

Note

- When the part of the object is not printed, selecting Diffusion for Halftoning may solve the problem.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Changing the Print Quality and Correcting Image Data > Printing a Color Document in Monochrome

Printing a Color Document in Monochrome

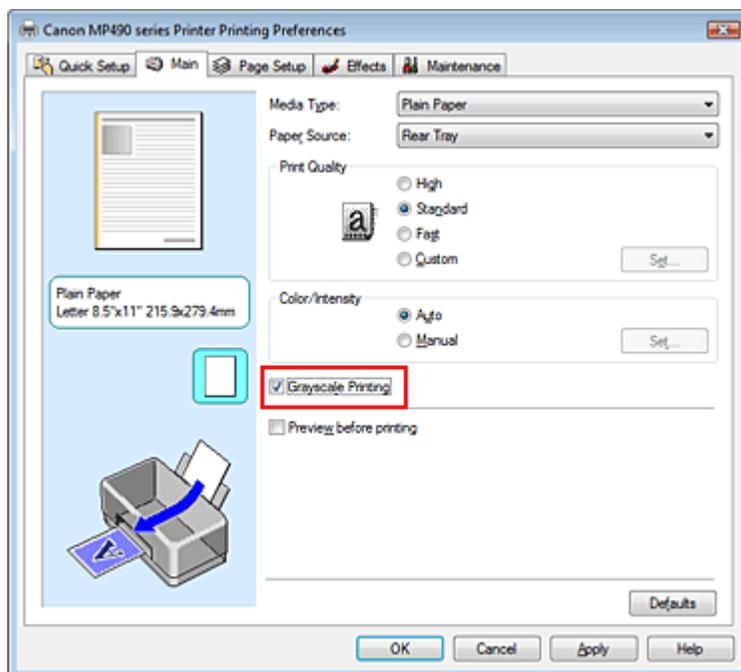

The procedure for printing a color document in monochrome is as follows:

You can also set a grayscale printing in Additional Features on the Quick Setup tab.

1. Open the printer driver setup window

2. Set grayscale printing

Check the Grayscale Printing check box on the Main tab.

3. Complete the setup

Click OK.

When you execute print, the document is converted to grayscale data. It allows you to print the color document in monochrome.

Important

- When the Grayscale Printing check box is checked, the printer driver processes image data as sRGB data. In this case, actual colors printed may differ from those in the original image data. When using the grayscale printing function to print Adobe RGB data, convert the data to sRGB data using an application software.

Note

- During Grayscale Printing, color inks may be used as well as black ink.
-

[Page top](#) 

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Changing the Print Quality and Correcting Image Data > Specifying Color Correction

Specifying Color Correction

You can specify the color correction method suited to the type of document to be printed.

Normally, the printer driver adjusts the colors by using Canon Digital Photo Color so that data is printed with color tints that most people prefer. This method is suitable for printing sRGB data.

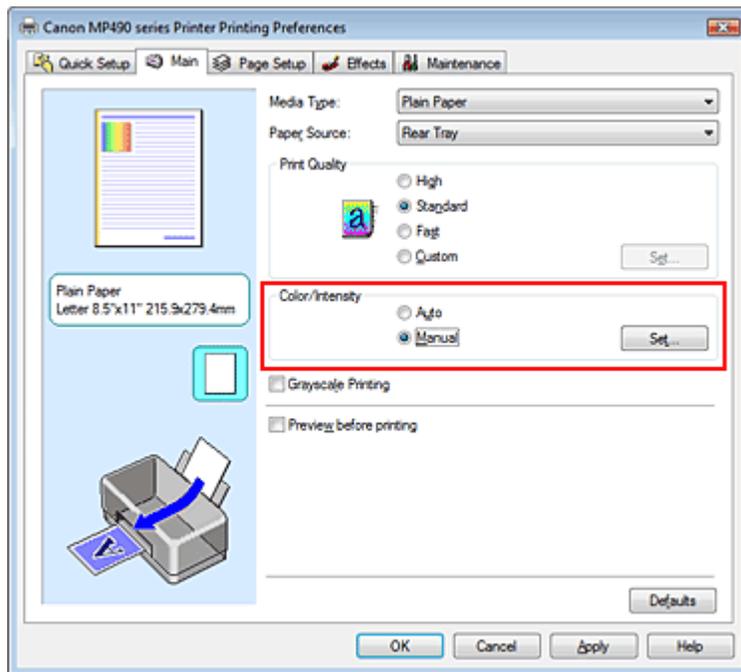

When you want to print by using the color space (Adobe RGB or sRGB) of the image data effectively, select ICM. When you want to use an application software to specify a printing ICC profile, select None.

The procedure for specifying color correction is as follows:

You can also set color correction on the Quick Setup tab by choosing Photo Printing under Commonly Used Settings, and then choosing Color/Intensity Manual Adjustment under Additional Features.

1. Open the **printer driver setup window**
2. Select the manual color adjustment

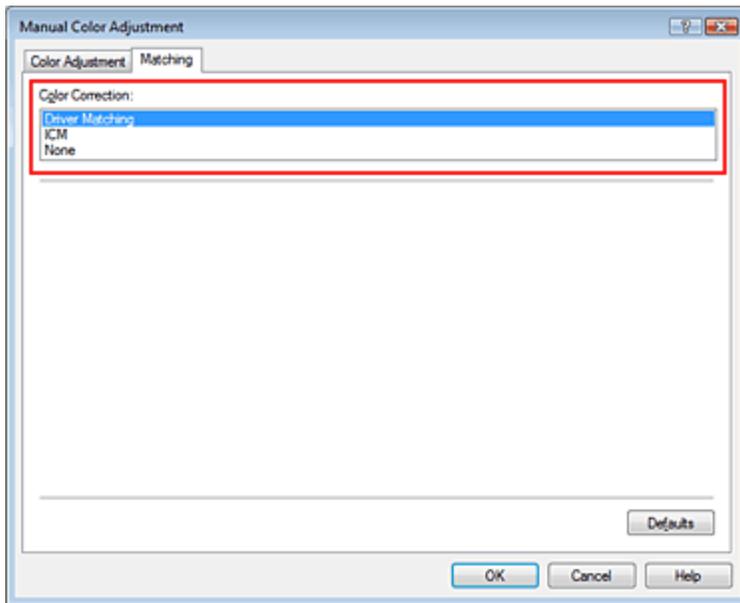

On the Main tab, select Manual for Color/Intensity, and click Set....

The Manual Color Adjustment dialog box opens.

3. Select color correction

Click Matching tab, select Color Correction setting that matches your purpose from the following, and click OK.

Driver Matching

By using Canon Digital Photo Color, you can print sRGB data with color tints that most people prefer. Driver Matching is the default setting for color correction.

ICM

You can print by using the color space (Adobe RGB or sRGB) of the image data effectively.

None

The printer driver does not perform color correction. Select this value when you are specifying an individually created printing ICC profile or a printing ICC profile for special Canon paper in an application software to print data.

4. Complete the setup

Click OK on the Main tab.

When you execute print, the data is printed with the specified color correction method.

Important

- When ICM is disabled in the application software, ICM is unavailable for Color Correction and the printer may not be able to print the image data properly.
- When the Grayscale Printing check box on the Main tab is checked, Color Correction appears grayed out and is unavailable.

Advanced Guide

[Advanced Guide](#) > [Printing from a Computer](#) > [Printing with Other Application Software](#) > [Changing the Print Quality and Correcting Image Data](#) > [Specifying Color Correction](#) > [Optimal Photo Printing of Image Data](#)

Optimal Photo Printing of Image Data

When people print images taken with digital cameras, they sometimes feel that the printed color tones differ from those of actual image or those displayed on the monitor.

To get the print results as close as possible to the desired color tones, you must select a printing method that is best suited to the application software used or to your purpose.

Color Management

Devices such as digital cameras, scanners, monitors, and printers handle color differently. Color management (color matching) is a method that manages device-dependent "colors" as a common color space. For Windows, a color management system called "ICM" is built into the operating system. Adobe RGB and sRGB are popularly used as common color spaces. Adobe RGB has a wider color space than sRGB.

ICC profiles convert device-dependent "colors" into a common color space. By using an ICC profile and carrying out color management, you can draw out the color space of the image data within the color reproduction area that the printer can express.

Selecting a Printing Method Suited to the Image Data

The recommended printing method depends on the color space (Adobe RGB or sRGB) of the image data or the application software to be used. There are two typical printing methods. Check the color space (Adobe RGB or sRGB) of the image data and the application software to be used, and then select the printing method suited to your purpose.

Adjusting Colors with the Printer Driver

Describes the procedure for printing sRGB data by using the color correction function of the printer driver.

- **To print using Canon Digital Photo Color**

The printer prints data with color tints that most people prefer, reproducing colors of the original image data and producing three-dimensional effects and high, sharp contrasts.

- **To print by directly applying editing and touch-up results of an application software**

When printing the data, the printer brings out subtle color difference between dark and light areas, while leaving the darkest and lightest areas intact.

When printing the data, the printer applies fine adjustment results, such as brightness adjustments made with an application software.

Printing with ICC Profiles

Describes the procedure for printing by using the color space of Adobe RGB or sRGB effectively.

You can print with a common color space by setting up the application software and the printer driver so that the color management matches the input ICC profile of the image data.

The method for setting up the printer driver differs depending on the application software to be used.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Changing the Print Quality and Correcting Image Data > Specifying Color Correction > Adjusting Colors with the Printer Driver

Adjusting Colors with the Printer Driver

You can specify the color correction function of the printer driver to print sRGB data with color tints that most people prefer through the use of Canon Digital Photo Color.

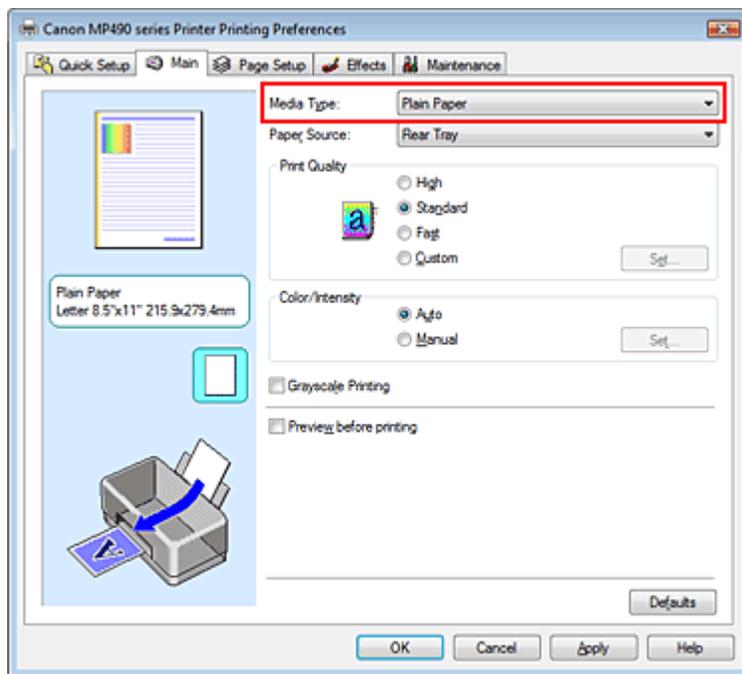

When printing from an application software that can identify ICC profiles and allows you to specify them, use a printing ICC profile in the application software, and select settings for color management.

The procedure for adjusting colors with the printer driver is as follows:

1. Open the printer driver setup window

2. Select the media type

Select the type of paper loaded in the machine from the Media Type list on the Main tab.

3. Select the print quality

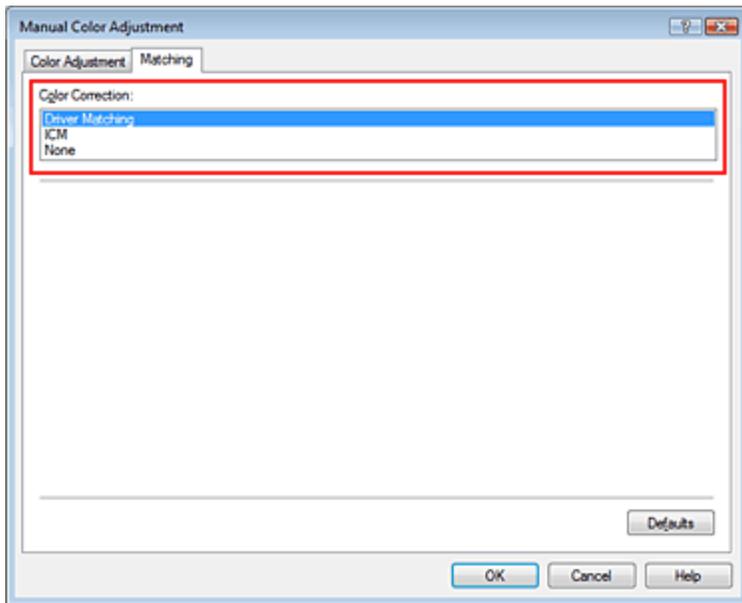

Select High, Standard, or Fast that matches your purpose for Print Quality.

4. Select the manual color adjustment

Select Manual for Color/Intensity, and click Set....
The Manual Color Adjustment dialog box opens.

5. Select color correction

Click Matching tab, and select Driver Matching for Color Correction.

6. Set the other items

If necessary, click Color Adjustment tab, and adjust the color balance of Cyan, Magenta, Yellow, and adjust Brightness, Intensity, and Contrast settings, and then click OK.

7. Complete the setup

Click OK on the Main tab.

When you execute print, the printer driver adjusts the colors when printing the data.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Changing the Print Quality and Correcting Image Data > Specifying Color Correction > Printing with ICC Profiles

Printing with ICC Profiles

When the image data has a specified input ICC profile, you can print by using the color space (Adobe RGB or sRGB) of the data effectively.

The printer driver setting procedure varies depending on the application software used to print.

Specify an ICC Profile from the Application Software and Print the Data

When you print the editing and touch-up results of Adobe Photoshop, Canon Digital Photo Professional, or any application software that allows you to specify input and printing ICC profiles, you print by effectively using the color space of the input ICC profile specified in the image data.

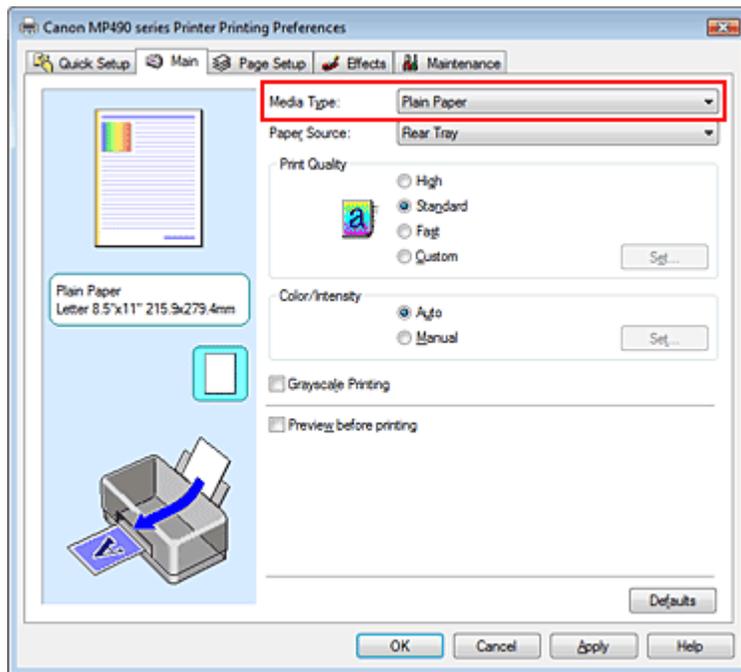

To use this printing method, use your application software to select color management items and specify an input ICC profile and a printing ICC profile in the image data.

Even if you print using a printing ICC profile that you created yourself or one for special Canon paper from your application software, be sure to select color management items from your application software. For instructions, refer to the manual of the application software you are using.

1. Open the printer driver setup window

2. Select the media type

Select the type of paper loaded in the machine from the Media Type list on the Main tab.

3. Select the print quality

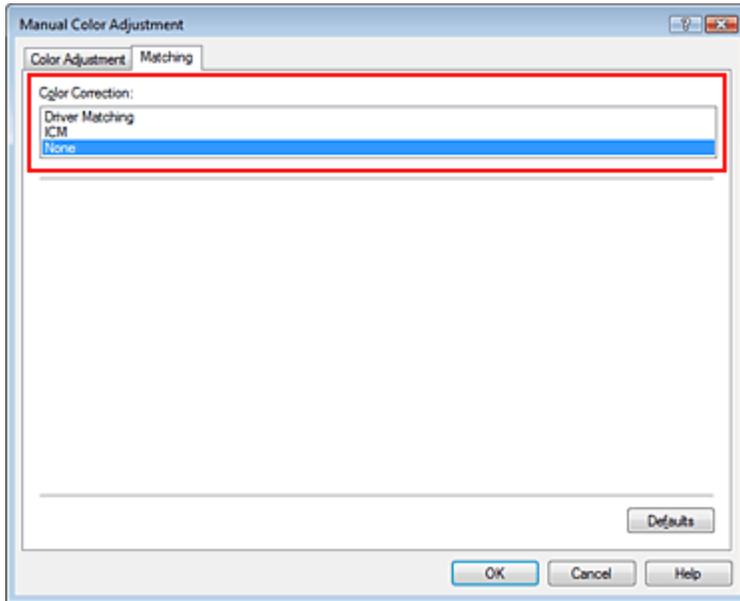

Select High, Standard, or Fast that matches your purpose for Print Quality.

4. Select the manual color adjustment

Select Manual for Color/Intensity, and click Set....
The Manual Color Adjustment dialog box opens.

5. Select color correction

Click Matching tab, and select None for Color Correction.

6. Set the other items

If necessary, click Color Adjustment tab, and adjust the color balance of Cyan, Magenta, Yellow, and adjust Brightness, Intensity, and Contrast settings, and then click OK.

7. Complete the setup

Click OK on the Main tab.

When you execute print, the printer uses the color space of the image data.

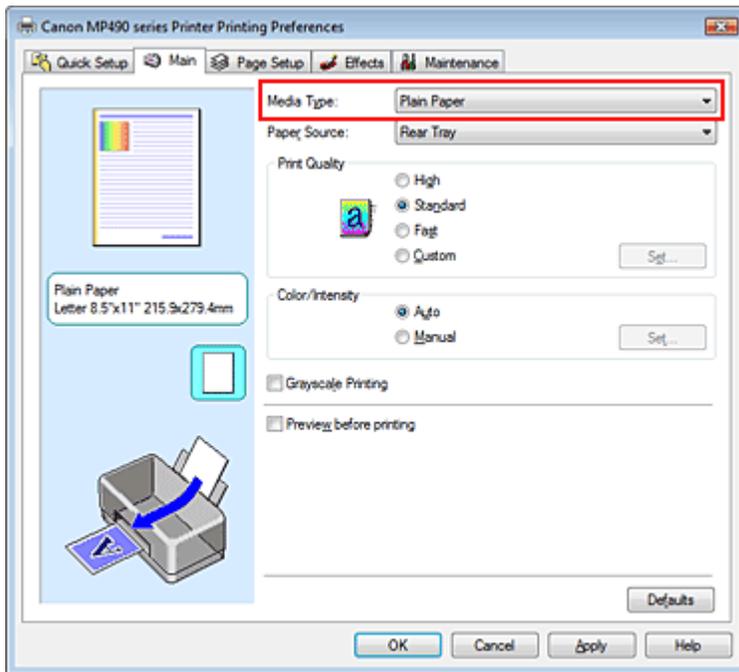

Specify an ICC Profile with the Printer Driver, and then Print

Print from a program that cannot identify input ICC profiles or does not allow you to specify one by specifying input ICC profiles from printer profiles of the printer driver. When printing Adobe RGB data, you can print the data with the Adobe RGB color space even if the application software does not support Adobe RGB.

1. Open the printer driver setup window

2. Select the media type

Select the type of paper loaded in the machine from the Media Type list on the Main tab.

3. Select the print quality

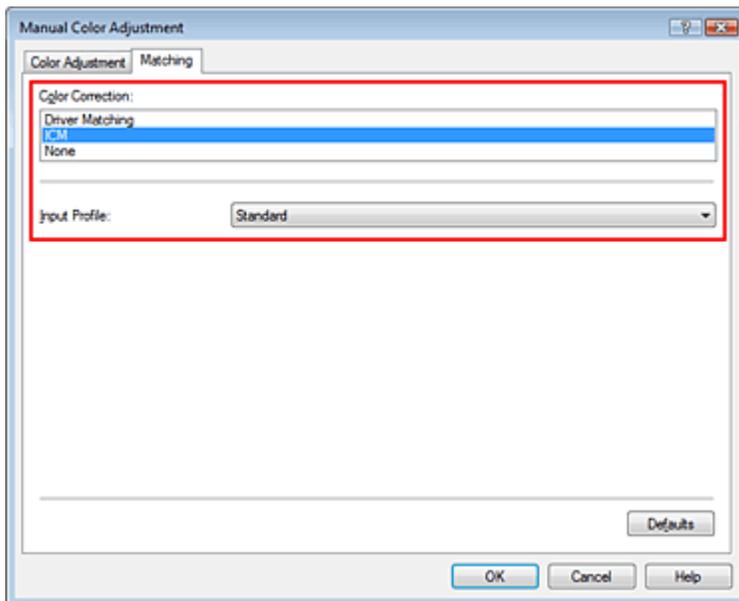

Select High, Standard, or Fast that matches your purpose for Print Quality.

4. Select the manual color adjustment

Select Manual for Color/Intensity, and click Set....
Manual Color Adjustment dialog box opens.

5. Select color correction

Click Matching tab, and select ICM for Color Correction.

6. Select the input profile

Select an Input Profile that matches the color space of the image data.

- **For sRGB data or data without an input ICC profile:**
Select Standard.
- **For Adobe RGB data:**

Select Adobe RGB (1998).

Important

- When the application software specifies an input profile, the input profile setting of the printer driver becomes invalid.
- When no input ICC profiles are installed on your computer, Adobe RGB (1998) is not displayed. You can install ICC profiles from the Setup CD-ROM that accompanies the machine.

7. Set the other items

If necessary, click Color Adjustment tab, and adjust the color balance of Cyan, Magenta, Yellow, and adjust Brightness, Intensity, and Contrast settings, and then click OK.

8. Complete the setup

Click OK on the Main tab.

When you execute print, the data is printed with the color space of the selected image data.

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Changing the Print Quality and Correcting Image Data > Adjusting Color Balance

Adjusting Color Balance

You can adjust the color tints when printing.

Since this function adjusts color balance of the output by changing the ink ratios of each color, it changes the total color balance of the document. Use the application software if you want to change the color balance significantly. Use the printer driver only when you want to adjust the color balance slightly.

The following sample shows the case when color balance is used to intensify cyan and to diminish yellow so that the overall colors are more uniform.

No adjustment

Adjust Color Balance

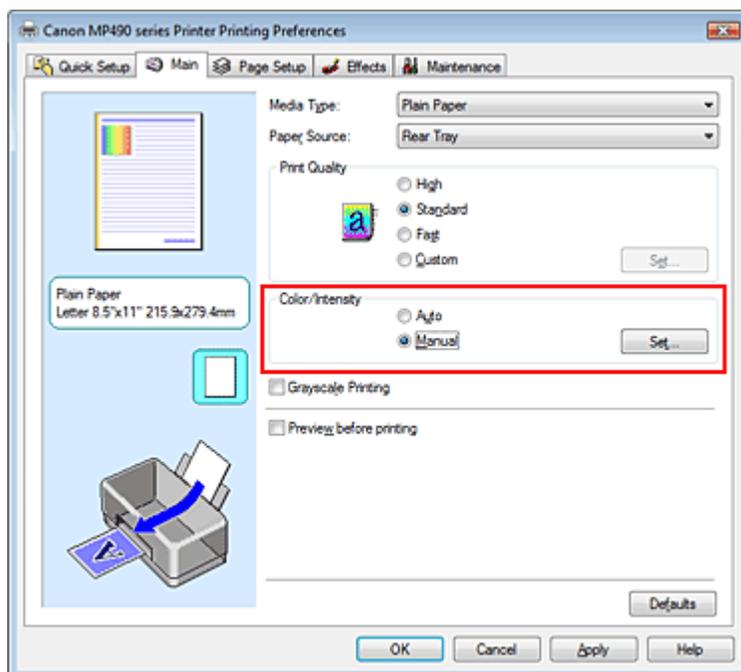

The procedure for adjusting color balance is as follows:

You can also set color balance on the Quick Setup tab by choosing Photo Printing under Commonly Used Settings, and then choosing Color/Intensity Manual Adjustment under Additional Features.

1. Open the printer driver setup window

2. Select the manual color adjustment

On the Main tab, select Manual for Color/Intensity, and click Set....

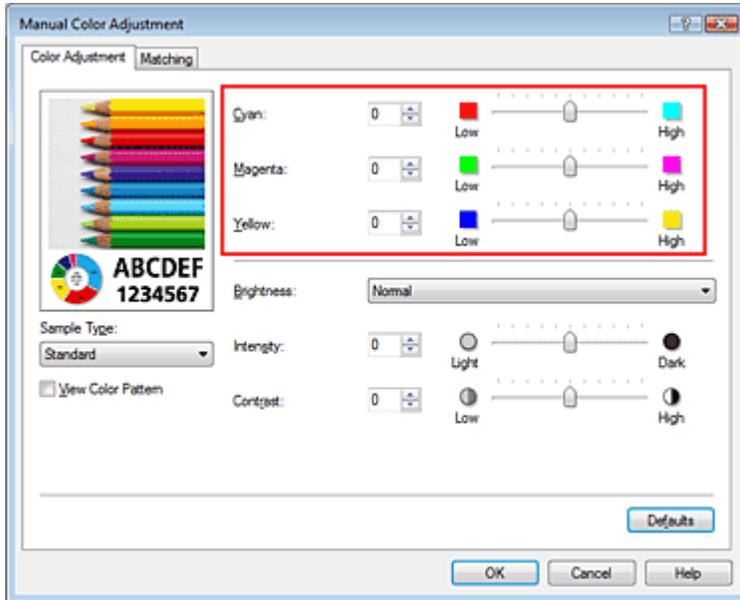

The Manual Color Adjustment dialog box opens.

3. Adjust color balance

There are individual sliders for Cyan, Magenta, and Yellow. Each color becomes stronger when the corresponding slider is moved to the right, and becomes weaker when the corresponding slider is

moved to the left. For example, when cyan becomes weaker, the color red becomes stronger. You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50. After adjusting each color, click OK.

Important

- Adjust the slider gradually.

4. Complete the setup

Click OK on the Main tab.

When you execute print, the document is printed with the adjusted color balance.

Important

- When the Grayscale Printing check box on the Main tab is checked, Cyan, Magenta, and Yellow appear grayed out and are unavailable.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Changing the Print Quality and Correcting Image Data > Adjusting Brightness

Adjusting Brightness

You can change the brightness of the overall image data during printing.

This function does not change pure white or pure black but it changes the brightness of the intermediate colors.

The following sample shows the print result when the brightness specification is changed.

Light is selected

Normal is selected

Dark is selected

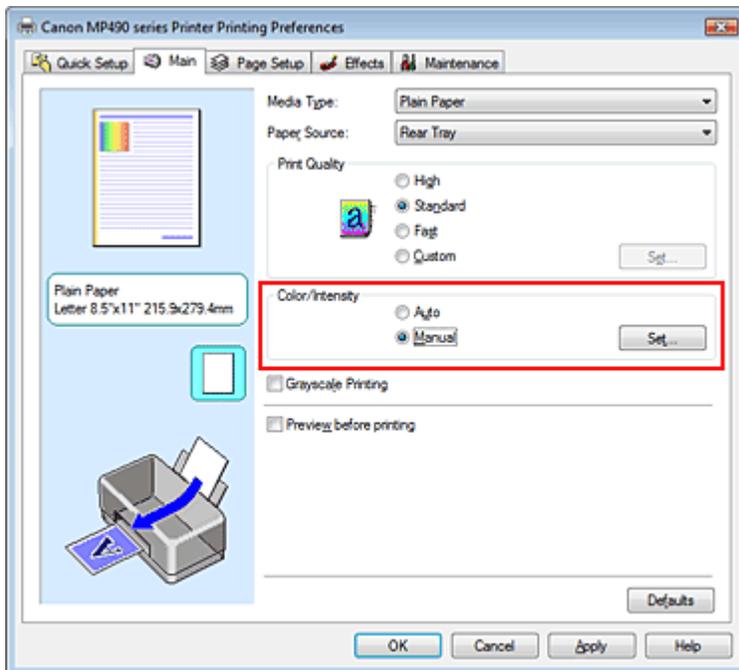

The procedure for adjusting brightness is as follows:

You can also set brightness on the Quick Setup tab by choosing Photo Printing under Commonly Used Settings, and then choosing Color/Intensity Manual Adjustment under Additional Features.

1. Open the printer driver setup window

2. Select the manual color adjustment

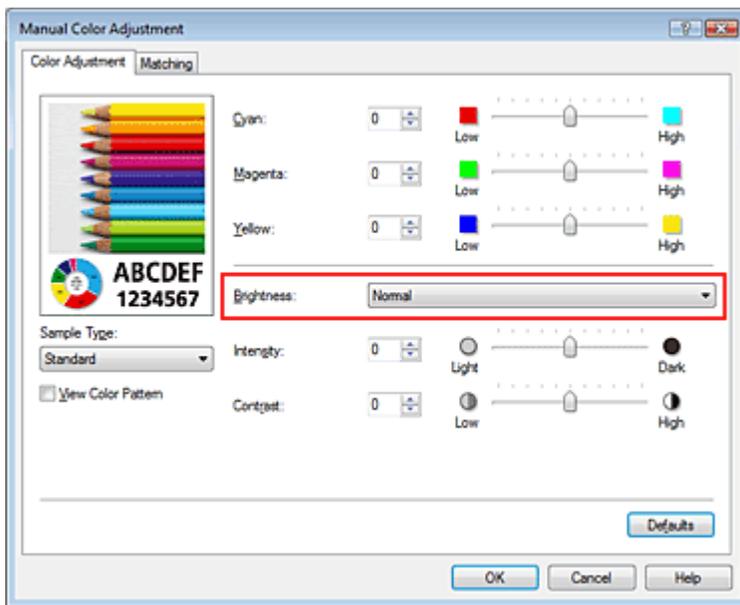

On the Main tab, select Manual for Color/Intensity, and click Set....

The Manual Color Adjustment dialog box opens.

3. Specify the brightness

Select Light, Normal, or Dark for Brightness, and click OK.

4. Complete the setup

Click OK on the Main tab.

When you execute print, the data is printed at the specified brightness.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Changing the Print Quality and Correcting Image Data > Adjusting Intensity

Adjusting Intensity

You can dilute (brighten) or intensify (darken) the colors of the overall image data during printing. When you want to sharpen the print results, you should intensify the colors. The following sample shows the case when the intensity is increased so that all colors become more intense when the image data is printed.

No adjustment

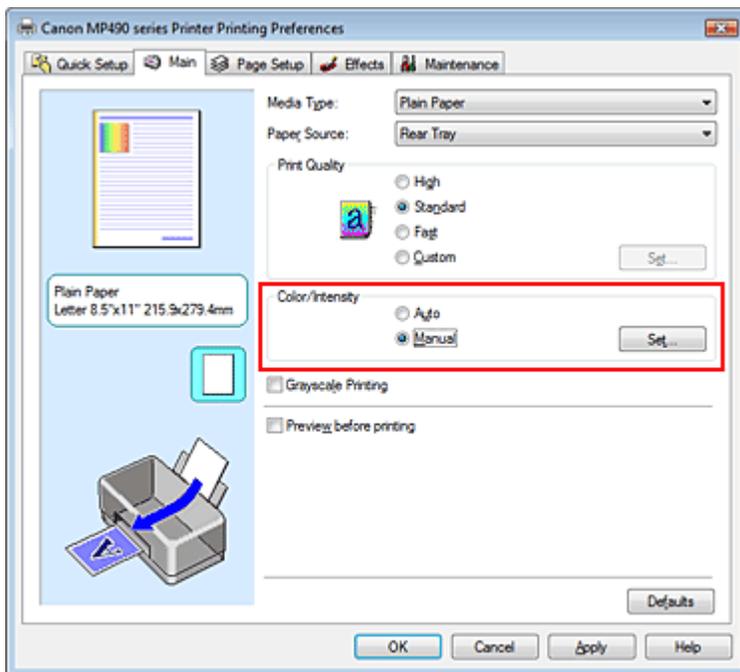

Higher Intensity

The procedure for adjusting intensity is as follows:

You can also set intensity on the Quick Setup tab by choosing Photo Printing under Commonly Used Settings, and then choosing Color/Intensity Manual Adjustment under Additional Features.

1. Open the **printer driver setup window**
2. Select the manual color adjustment

Select Manual for Color/Intensity on the Main tab, and click Set...

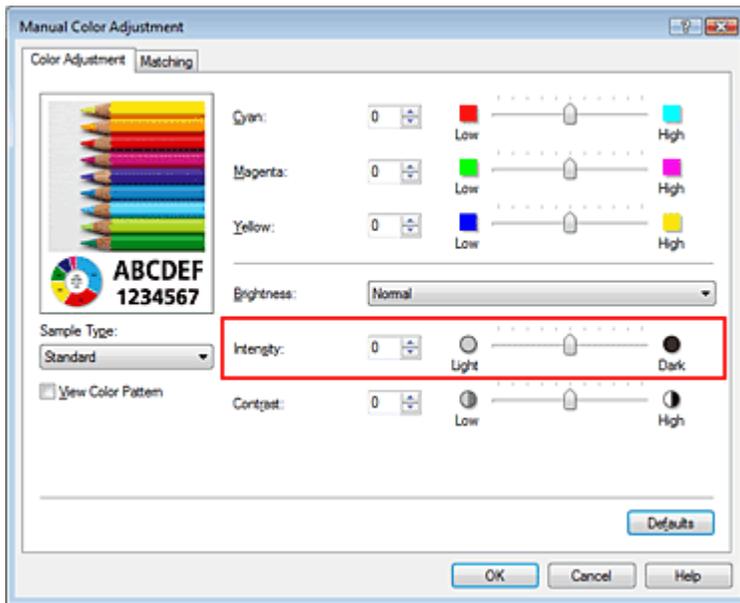

The Manual Color Adjustment dialog box opens.

3. Adjust intensity

Moving the Intensity slider to the right intensifies (darkens) the colors. Moving the slider to the left dilutes (brightens) the colors.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

After adjusting each color, click OK.

Important

- Adjust the slider gradually.

4. Complete the setup

Click OK on the Main tab.

When you execute print, the image data is printed with the adjusted intensity.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Changing the Print Quality and Correcting Image Data > Simulating an Illustration

Simulating an Illustration

With the Simulate Illustration function, you can print full-color or 256-color image data so that it looks like a hand-drawn illustration. This function adds different effects to the original profile and colors.

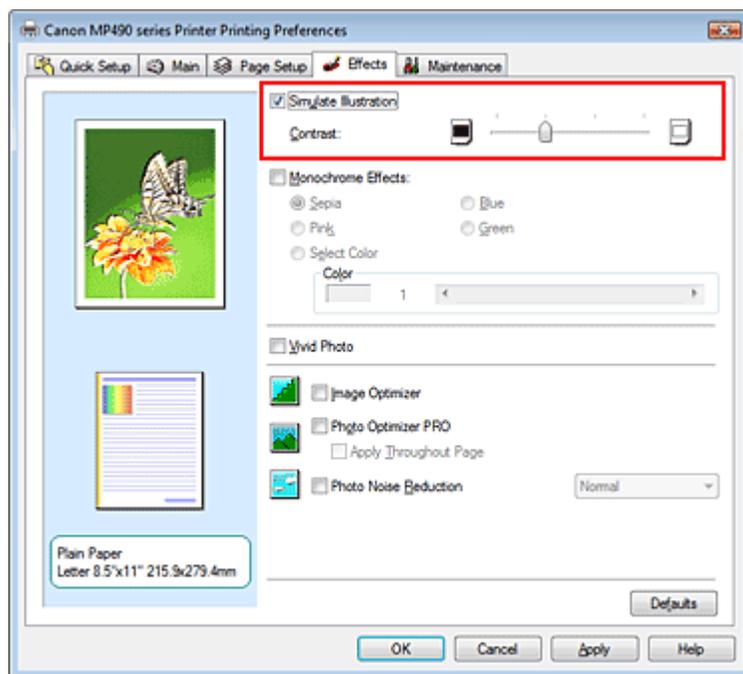

The procedure for performing Simulate Illustration is as follows:

1. Open the **printer driver setup window**
2. Set the Simulate Illustration

If necessary, check the Simulate Illustration check box on the Effects tab, and adjust the Contrast. Moving the slider to the right lightens the image data and moving the slider to the left darkens the image data.

The current settings are displayed in the settings preview on the left side of the printer driver.

3. Complete the setup

Click OK.

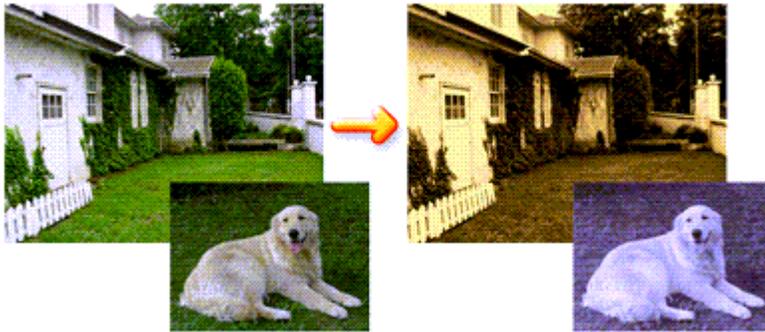

When you execute print, the image will be printed so that it looks hand-drawn.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Changing the Print Quality and Correcting Image Data > Representing Image Data with a Single Color

Representing Image Data with a Single Color

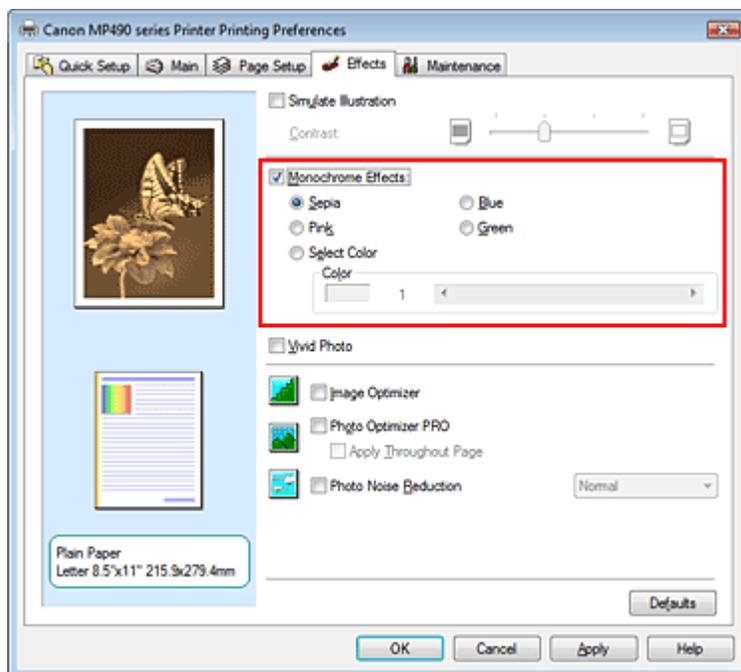

With the Monochrome Effects function, you can benefit from coloring effects such as changing a photograph to a sepia tone image.

The procedure for performing Monochrome Effects is as follows:

1. Open the **printer driver setup window**
2. Set Monochrome Effects

Check the Monochrome Effects check box on the Effects tab and select your desired color. When you use Select Color, move the Color slider to specify the color you want. The current settings are displayed in the settings preview on the left side of the printer driver.

3. Complete the setup

Click OK.

When you execute print, the image will be printed with a single color.

Important

- When the Grayscale Printing check box on the Main tab is checked, Monochrome Effects appears

grayed out and is unavailable.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Changing the Print Quality and Correcting Image Data > Presenting Image Data with Vivid Colors

Presenting Image Data with Vivid Colors

The Vivid Photo function allows you to print image data with vivid colors. The vivid photo function emphasizes the colors in background sceneries while maintaining the human skin color natural. By using this function, you can make vivid hues appear even more vivid.

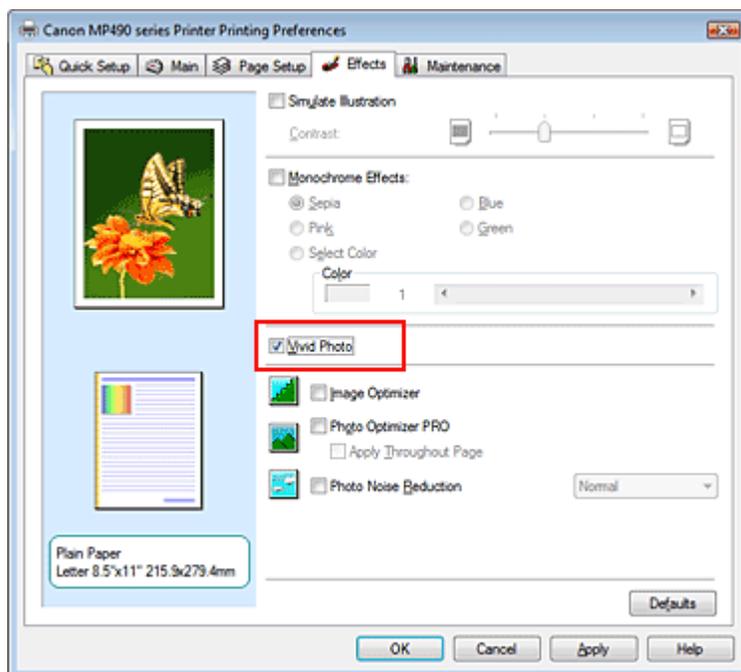

The procedure for performing Vivid Photo is as follows:

You can also set vivid photos on the Quick Setup tab by choosing Photo Printing under Commonly Used Settings, and then choosing Additional Features.

1. Open the printer driver setup window

2. Set Vivid Photo

Check the Vivid Photo check box on the Effects tab.

3. Complete the setup

Click OK.

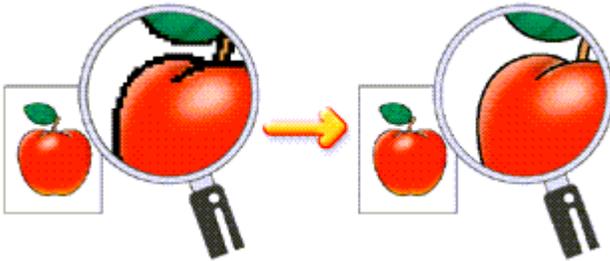

When you execute print, the image will be printed with vivid colors.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Changing the Print Quality and Correcting Image Data > Smoothing Jagged Outlines

Smoothing Jagged Outlines

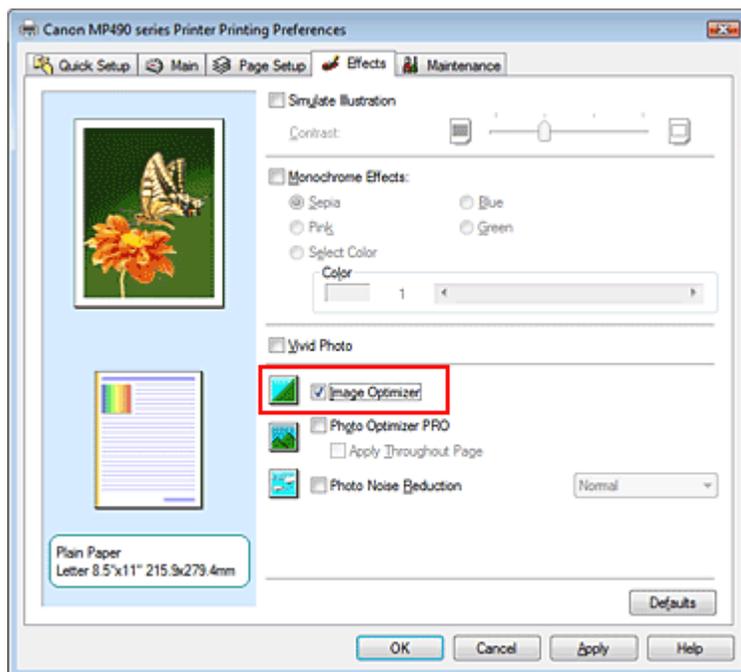

The Image Optimizer function allows you to smooth jagged outlines in photos and graphics that have been enlarged with your application. This feature is especially useful when printing low-resolution images from Web pages.

The procedure for performing Image Optimizer is as follows:

1. Open the **printer driver setup window**
2. Set image optimizer

Check the Image Optimizer check box on the Effects tab.

3. Complete the setup

Click OK.

The photos and graphics will be printed with jagged outlines smoothed.

Note

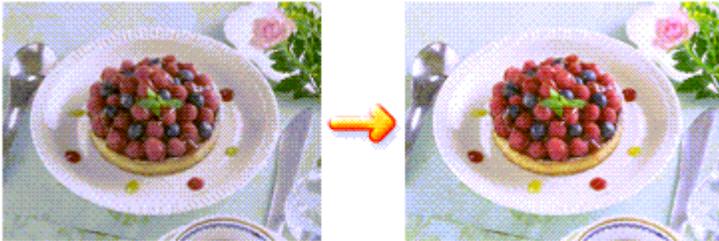

- Depending on application software or resolution of image data, the image optimizer may have no discernible effects.
- It may take longer to complete printing when the image optimizer is used.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Changing the Print Quality and Correcting Image Data > Changing Color Properties to Improve Coloration

Changing Color Properties to Improve Coloration

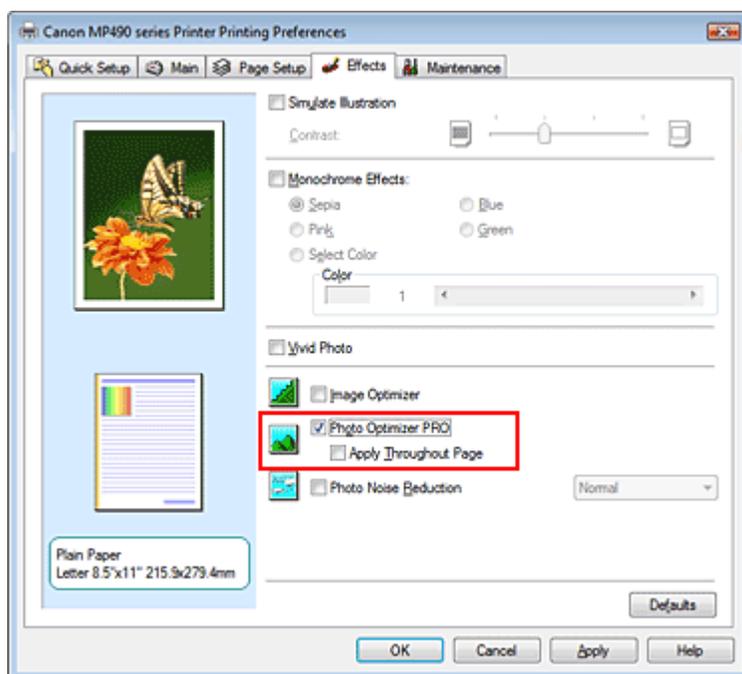

The Photo Optimizer PRO function corrects colors of digital camera images or scanned images. It is specially designed to compensate for color shift, overexposure, and underexposure.

The procedure for performing Photo Optimizer PRO is as follows:

1. Open the **printer driver setup window**
2. Set Photo Optimizer PRO

Check the Photo Optimizer PRO check box on the Effects tab.

Normally there is no need to check the Apply Throughout Page check box. Images within each page are optimized on an image-by-image basis.

Note

- Check the Apply Throughout Page check box when printing image data that has been processed, such as being cropped or rotated. In this case the entire page will be treated as a single image to be optimized.

3. Complete the setup

Click OK.

When you execute print, the images will be printed with color compensation.

 **Important**

- Photo Optimizer PRO does not function when:
 - Background is set in the Stamp/Background dialog box on the Page Setup tab.
 - Define Stamp... is selected in the Stamp/Background dialog box on the Page Setup tab, and the bitmapped stamp is configured.

 **Note**

- Depending on images, the Photo Optimizer PRO may have no discernible effect.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Changing the Print Quality and Correcting Image Data > Reducing Photo Noise

Reducing Photo Noise

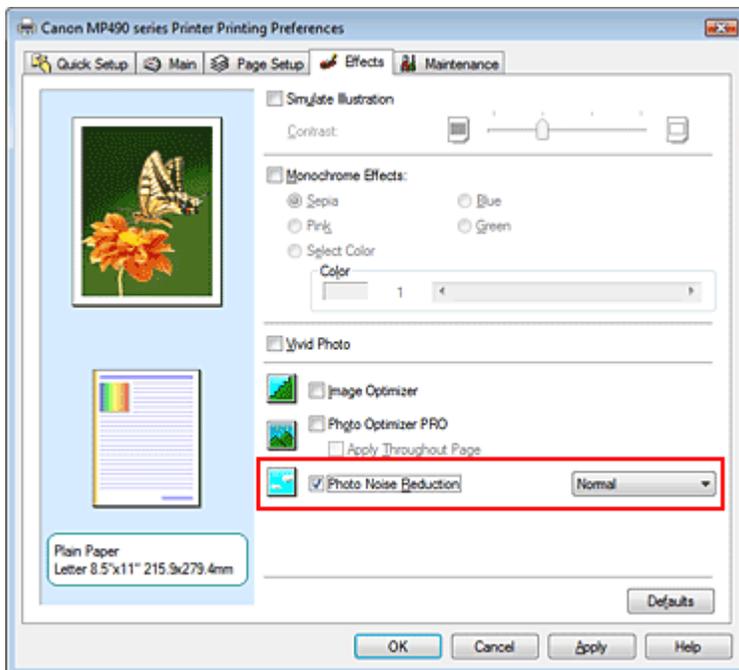

With the Photo Noise Reduction function, you can reduce the digital camera noise and improve the image quality of the digital print.

The procedure for performing Photo Noise Reduction is as follows:

1. Open the [printer driver setup window](#)
2. Set Photo Noise Reduction

Check the Photo Noise Reduction check box on the Effects tab and select Normal or Strong for the level.

3. Complete the setup

Click OK.

When you execute print, the image will be printed with the digital camera noise being reduced.

Note

- It is recommended to select Normal for most cases. Select Strong if you have selected Normal and the noise still bothers you.

- Depending on application software or resolution of image data, effects of digital camera noise reduction may not be obvious.
 - When this function is used for other than photos taken by digital cameras, image may be distorted.

Canon IJ Printer Driver

The Canon IJ printer driver is software that is installed on your computer for printing data on this machine.

The Canon IJ printer driver converts the print data created by your Windows application into data that your printer can understand and sends the converted data to the printer.

Because different models support different print data formats, you need a Canon IJ printer driver for the specific model you are using.

How to Use Printer Driver Help

You can display the Help describing the driver setting items through the printing preferences screen of the Canon IJ printer driver.

- **To view all descriptions of a tab...**

Click the Help button on each tab. A dialog box opens, displaying a description of each item on the tab.

You can also click the link found in the description of an item to display a description of the linked dialog box.

- **To see a description for each item...**

Right-click the item you want to learn about and then click What's This?.

Alternatively, when the  Help button is found at the right end of the title bar, click that button, and then click the item you want to learn about.

A description of the item is displayed.

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Overview of the Printer Driver > Canon IJ Printer Driver > How to Open the Printer Driver Setup Window

How to Open the Printer Driver Setup Window

The printer driver setup window can be displayed through the application software in use or the Start menu of the Windows.

Note

- This guide mainly describes operations on the Windows Vista. Operations may differ depending on versions of the Windows.

Open the Printer Driver Setup Window through the Application Software

Follow the procedure below to configure printing profile when printing.

1. Select the command you perform printing on the application software in use

In general, select Print on the File menu to open the Print dialog box.

2. Select your model name and click Preferences (or Properties)

The printer driver setup window appears.

Note

- Depending on application software you use, command names or menu names may vary and there may be more steps. For details, refer to the user's manual of your application software.

Open the Printer Driver Setup Window through the Start Menu

Follow the procedure below to perform maintenance operations such as print head cleaning, or to configure printing profile that are common for all application software.

1. Select items from the Start menu as shown below:

- In Windows Vista, select the Start menu -> Control Panel -> Hardware and Sound -> Printers.
- In Windows XP, select the start menu -> Control Panel -> Printers and Other Hardware -> Printers and Faxes.
- In Windows 2000, select the Start menu -> Settings -> Printers.

2. Right-click your model name icon, and then select Printing Preferences... from the displayed menu

The printer driver setup window appears.

Important

- Opening the printer driver setup window through Properties displays such tabs regarding the Windows functions as the Ports (or Advanced) tab. Those tabs do not appear when opening through Printing Preferences... or application software. For tabs regarding Windows functions, refer to the user's manual for the Windows.

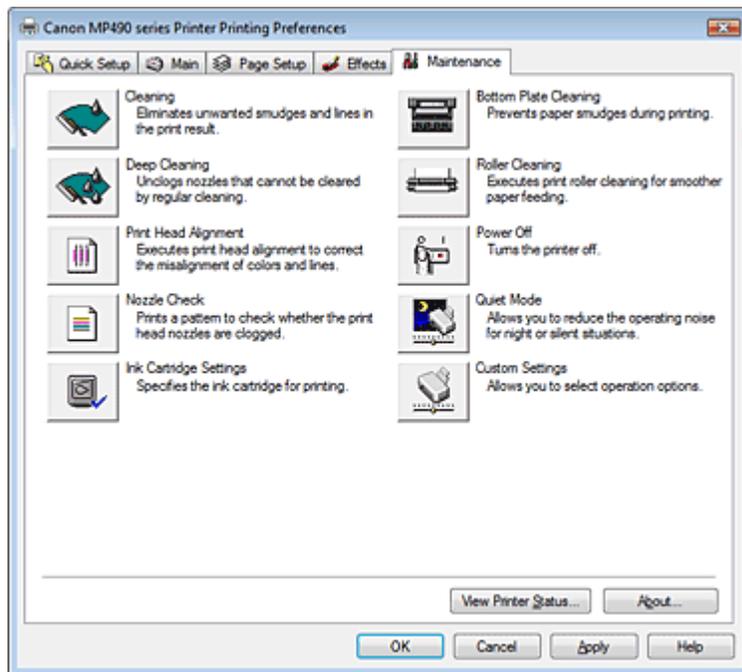

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Overview of the Printer Driver > Canon IJ Printer Driver > Maintenance Tab

Maintenance Tab

The Maintenance tab allows you to perform machine maintenance or change the settings of the machine.

Features

- ➔ Cleaning the Print Heads
- ➔ Cleaning the Paper Feed Rollers
- ➔ Aligning the Print Head Position
- ➔ Checking the Print Head Nozzles
- ➔ Cleaning Inside the Machine

Advanced Guide

Advanced Guide > Printing from a Computer > Printing with Other Application Software > Overview of the Printer Driver > Canon IJ Status Monitor

Canon IJ Status Monitor

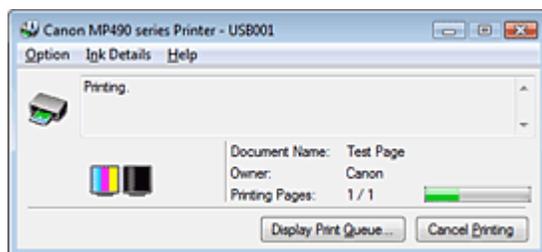

The Canon IJ Status Monitor is an application software that shows the status of the printer and the progress of printing on the Windows screen. You will know the status of the printer with graphics, icons, and messages.

Launching the Canon IJ Status Monitor

The Canon IJ Status Monitor launches automatically when data is sent to the printer. When launched, the Canon IJ Status Monitor appears as a button on the task bar.

Click the status monitor button displayed on the task bar. The Canon IJ Status Monitor appears.

Note

- To open the Canon IJ Status Monitor when the printer is not printing, open the [printer driver setup window](#) and click View Printer Status... on the Maintenance tab.

When Errors Occur

The Canon IJ Status Monitor is automatically displayed if an error occurs (e.g., if the printer runs out of paper or if the ink is low).

In such cases, take the appropriate action as described.

Advanced Guide

[Advanced Guide](#) > [Printing from a Computer](#) > [Printing with Other Application Software](#) > [Overview of the Printer Driver](#)
> [Canon IJ Preview](#)

Canon IJ Preview

The Canon IJ Preview is an application software that displays what the print result will look like before a document is actually printed.

The preview reflects the information that is set within the printer driver and allows you to check the document layout, print order, and number of pages. You can also change the media type settings.

When you want to display a preview before printing, open the [printer driver setup window](#) , click the Quick Setup tab or the Main tab, and check the Preview before printing check box.

When you do not want to display a preview before printing, uncheck the check box.

Printing Template Forms Such As Lined Paper or Graph Paper

You can print a template form such as lined paper, graph paper, or check list, etc. on A4, B5, or Letter-sized plain paper.

Printing template forms

1. Make sure that the machine is turned on.
2. Load A4, B5, or Letter-sized plain paper.
3. Press the **Menu** button.
4. Use the ▲ ▼ button to select Template print, then press the **OK** button.
5. Use the ◀ ▶ button to select the template you want to print, then press the **OK** button.

The following templates are available:

- **Notebook paper**

You can select three line spacing formats.

- Notebook paper 1: 8 mm spacing
- Notebook paper 2: 7 mm spacing
- Notebook paper 3: 6 mm spacing

- **Graph paper**

You can select two square sizes.

- Graph paper 1: Graph 5 mm
- Graph paper 2: Graph 3 mm

- **Checklist**

You can print a notepad with checkboxes.

- **Staff paper**

You can print staff paper with 10 or 12 staves.

- Staff paper 1: Staff paper 10 staves
- Staff paper 2: Staff paper 12 staves

- **Handwriting paper**

You can print handwriting paper.

- **Weekly schedule**

You can print a weekly schedule form.

- **Monthly schedule**

You can print a monthly schedule form.

Note

- You cannot print Graph paper on B5 sized paper.
-

6. Use the ▲ ▼ button to specify the number of copies, and ◀ ▶ button to specify the paper size.

7. Press the **OK** button to start printing.

The machine starts template printing.

Reducing or Enlarging a Copy

1. Make sure that the machine is turned on.
2. Press the **Menu** button, then press the **OK** button to select Copy if another mode has been selected.

Note

- Removing the memory card in the Card Slot returns to the copy mode.

3. Load paper.
4. Load the original on the Platen Glass.
5. Press the  button.
The paper setting screen is displayed.
6. Press the  button to select 100%.
7. Use the   button to select the reducing/enlarging method.

You can select the following reducing/enlarging methods.

Fit to page/115% B5-A4/141% A5-A4/400% MAX/25% MIN/70% A4-A5/86% A4-B5

Note

- You can select Fit to page when Standard copy or Borderless copy is selected.
- When Fit to page is selected, copied images are automatically reduced or enlarged in the lengthwise/widthwise direction to fit the page size you select.
- Select 100% if you do not reduce or enlarge a copy.

8. Press the **OK** button.
The LCD returns to the copy mode screen.
9. Use the   button to specify the number of copies.

Note

- Pressing the **Back** or **Stop** button returns the number of copies to 1.

10. Press the **Color** button for color copying, or the **Black** button for black & white copying.

The machine starts Fit to Page copying.

Remove the original on the Platen Glass after copying is complete.

Important

- Do not open the Document Cover or remove the original from the Platen Glass until copying is complete.

Note

- To cancel copying, press the **Stop** button.

Advanced Guide

Advanced Guide > Printing Using the Operation Panel of the Machine > Printing from a Memory Card > Printing Photographs Saved on a Memory Card > Setting Items

Setting Items

Pressing the  button displays the setting items after specifying the photo to print and the number of copies.

Note

- Depending on the functions, some setting items cannot be specified in combination.

Setting tab 1

1. Page size

Select the page size of the loaded paper.

2. Media type

Select the media type of the loaded paper.

3. Print quality

Adjust print quality according to the original.

4. Layout

Select the layout and whether to print with bordered or borderless.

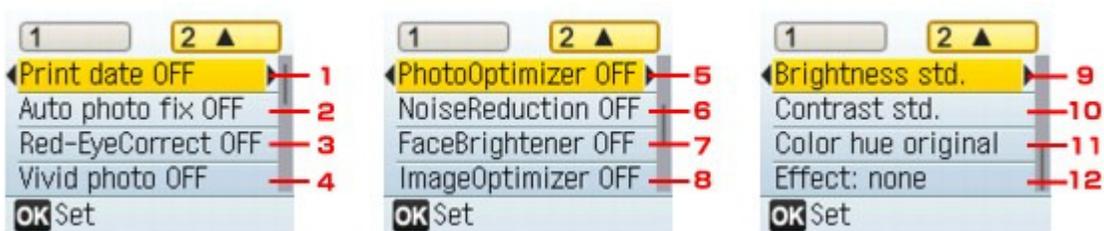

You can select the following layouts.

Borderless/Bordered/Borderless half side/Bordered half side/Bordered x2/Bordered x4/
Bordered x8

Note

- When you select Plain paper for the media type, the photo will be printed with bordered even if you select a layout with borderless.

Setting tab 2

1. Print date

Activate/deactivate to print the shooting date on a photo.

 **Note**

- The shooting date is printed according to Date display in Device settings.

2. Auto photo fix

When Auto photo fix ON is selected, the scene or person's face of a shot photo is recognized and the most suitable correction for each photo is made automatically. It makes a darkened face by backlight brighter to print. It also analyzes a scene such as scenery, night scene, person, etc. and corrects each scene with the most suitable color, brightness, or contrasts automatically to print.

 **Note**

- As a default, Auto photo fix ON is applied when photos on a memory card are printed. When Auto photo fix ON is applied, you can specify only (3) Red-Eye correction below.
- If the print result with Auto photo fix ON selected is not satisfactory, select Auto photo fix OFF, then specify (4) to (12) advanced setting items below.

3. Red-Eye correction

Corrects red eyes in portraits caused by flash photography. Depending on the type of the photo, red eyes may not be corrected or parts other than the eyes may be corrected.

 **Note**

- This setting is available even if Auto photo fix ON is selected.

4. Vivid photo

Makes green and blue more lively.

5. Photo optimizer pro

Automatically optimizes brightness and tone of a photo.

6. Noise reduction

Reduces the noise on blue areas like the sky as well as on black areas.

7. Face brightener

Brightens a darkened face on the photo taken against the light.

8. Image optimizer

Corrects and smoothes the jagged contours for printing.

9. Brightness

Adjust brightness.

10. Contrast

Adjust contrast.

11. Color hue

Adjust color hue.
For example, you can increase red or yellow to adjust the skin tone.

12. Effects

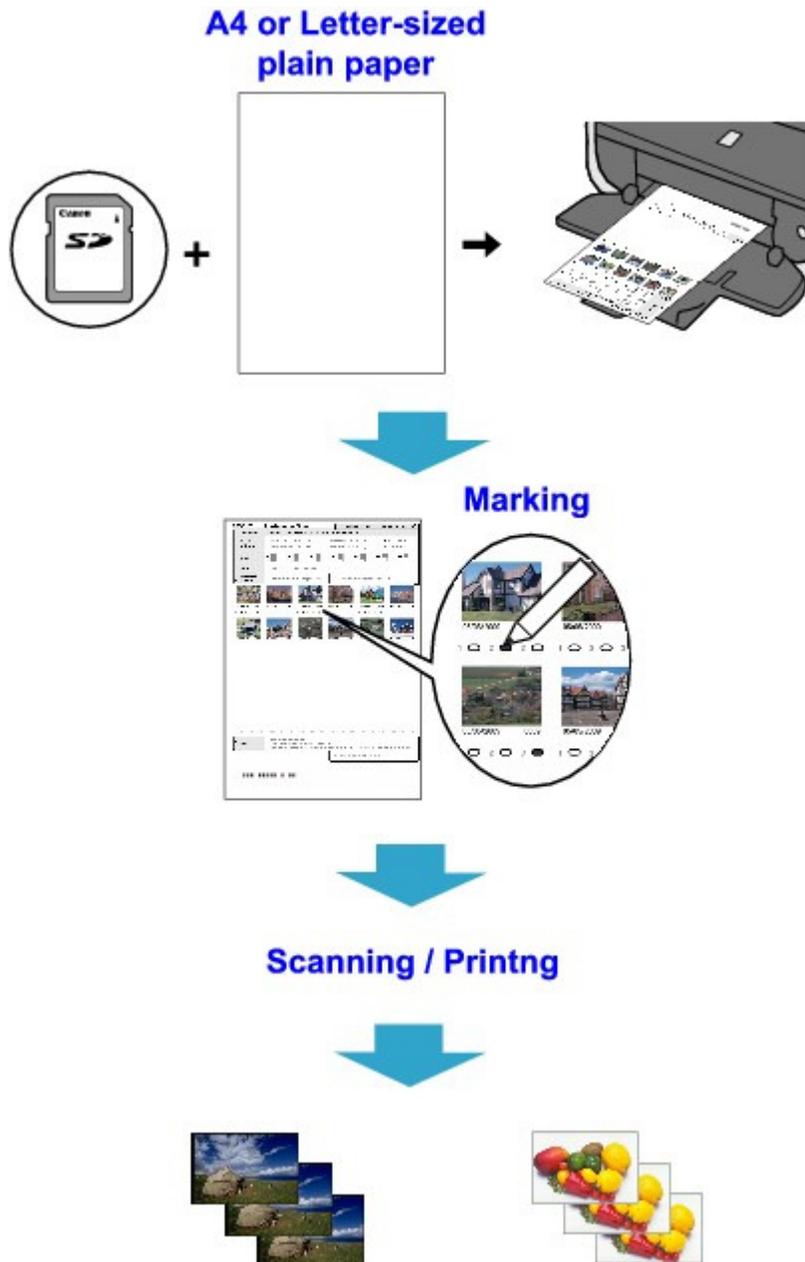

Applies special effects to the photo, such as printing in sepia tones or with a sketch illustration like effect.

Advanced Guide

Advanced Guide > Printing Using the Operation Panel of the Machine > Printing from a Memory Card > Printing Photographs Saved on a Memory Card > Printing by Using the Photo Index Sheet

Printing by Using the Photo Index Sheet

Photo Index Sheet is an A4 or Letter-sized plain paper on which thumbnail images of photos saved on a memory card are printed. Print out a Photo Index Sheet, mark the images that you want to print, scan the sheet in, and the machine then prints the selected images. You can also specify other settings, such as the paper size and the media type, by using this sheet; you do not have to perform settings by using the Operation Panel on the machine.

1. Make sure that the machine is turned on.
2. Load A4 or Letter-sized plain paper.
3. Insert a memory card into the Card Slot.

 **Note**

- For information on how to insert a memory card, refer to [Printing from a Memory Card](#).

4. Press the **Menu** button.
5. Use the **▲▼** button to select Photo Index Sheet, then press the **OK** button.
6. Confirm that Photo Index Sheet print is selected, then press the **OK** button.
7. Make sure that the paper is loaded, then press the **OK** button.

The Photo Index Sheet(s) will be printed.

 **Important**

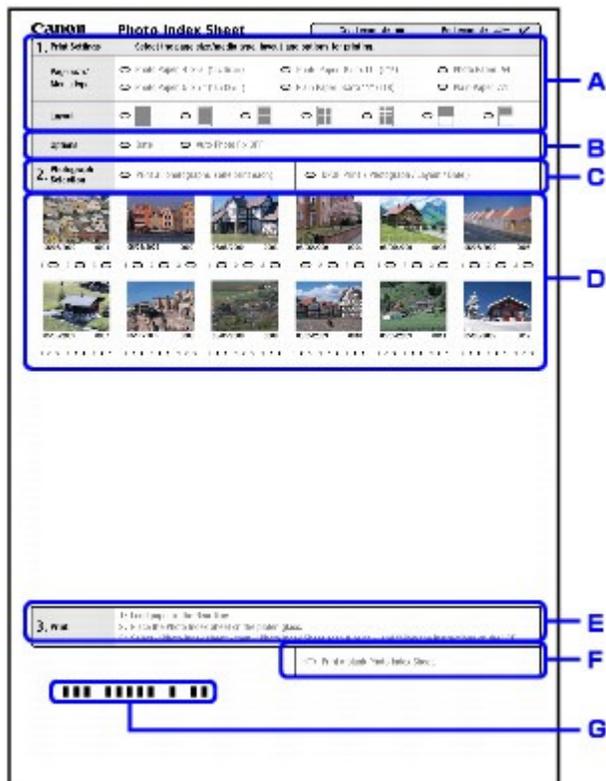

- Do not remove the memory card until printing the Photo Index Sheet(s) is complete.

 **Note**

- If 31 or more images are on the memory card, two or more Photo Index Sheets are printed.

8. Fill in the appropriate circles in the Photo Index Sheet.

Fill in the appropriate circles () with a dark pencil or a black ink pen to select the photos to print and their print options.

- A. Select the page size and other printing formats.
- B. Select "Date"/"Auto Photo Fix OFF" as necessary.
- C. Fill this circle to print a copy of all photographs or to print according to DPOF settings.
 * If you filled this circle, any other circles you filled for the number of copies to print for each photograph will be disregarded, and one copy each of all photographs will be printed.
 *For details about DPOF print, see [DPOF Print by Using the Photo Index Sheet](#) .
- D. Select the number of copies (fill in a circle under each photograph to print).
- E. Confirm and follow the described printing procedure.

F. Fill in this circle to print the same Photo Index Sheet again.

* If you fill in this circle, all other filled settings will be disregarded.

G. Be careful not to make the bar code dirty.

If the bar code is dirty or has wrinkles, the machine may not scan the Photo Index Sheet properly.

Important

- If there are two or more Photo Index Sheets, fill in marks on each sheet.
- If the filled circles on the Photo Index Sheet are not dark or vast enough, the machine may not scan the Photo Index Sheet properly.

9. Load paper on the Rear Tray.

Make sure that the page size and media type of the loaded paper match those specified on the Photo Index Sheet.

Note

- When printing images using the Photo Index Sheet, you can select 4" x 6" (101.6 x 152.4 mm), 5" x 7" (127 x 177.8 mm), 8.5" x 11" (Letter), or A4 for the page size.

10. Make sure that Photo Index Sheet scan & print is selected, then press the **OK** button.

11. Place the Photo Index Sheet face-down on the Platen Glass, then press the **OK** button.

When placing the Photo Index Sheet, place the front side down, align the upper left corner of it with the alignment mark as shown in the figure below, then close the Document Cover.

The Photo Index Sheet is scanned and the specified photos will be printed.

Important

- If Failed to scan Photo Index Sheet. is displayed on the LCD, press the **OK** button and confirm the following:
 - The Platen Glass and the Photo Index Sheet are not dirty
 - The Photo Index Sheet is placed in the correct position with its front side facing down
 - You have filled in all the necessary circles on the sheet
 - Only one option is selected for items that do not accept two or more selections
 - Is the circle for the number of copies to print for each photograph filled when you print with DPOF print?
- Do not remove the memory card while printing is in progress.

Note

- To cancel printing, press the **Stop** button.
- To continue to print photographs using subsequent Photo Index Sheets, repeat the procedure from step 10.
- If the memory card has been removed and then reinserted before printing with the Photo Index Sheet, it may take some time before printing starts.

[Page top](#) ↑

Advanced Guide

Advanced Guide > Printing Using the Operation Panel of the Machine > Printing from a Memory Card > Setting Up the Card Slot as the Memory Card Drive of the Computer

Setting Up the Card Slot as the Memory Card Drive of the Computer

The Card Slot of the machine can also be used as the memory card drive of the computer.

Important

- When Read/write attribute under Device settings is set to Writable from PC using the Operation Panel of the machine, you cannot print photos on a memory card using the Operation Panel of the machine. After using the Card Slot as the memory card drive of the computer, remove the memory card, be sure to set Read/write attribute to Not writable from PC. When you turned off the machine, Writable from PC will be canceled and the setting is returned to Not writable from PC when you turn on the machine next time.

1. Make sure that the memory card is not set.

If the memory card is set, remove it from the Card Slot. For details, refer to [Printing from a Memory Card](#).

2. Press the **Menu** button.

3. Use the ▲ ▼ button to select Device settings, then press the **OK** button.

4. Use the ▲ ▼ button to select Read/write attribute, then press the **OK** button.

5. Specify the read/write attribute.

Not writable from PC

The Card Slot is used only for reading. Be sure to select this mode when printing photos from a memory card.

Writable from PC

The Card Slot is used as the memory card drive of the computer. Photo data can be written into the memory card.

Important

- If you use the Card Slot as the memory card drive of the computer, you need to perform a "safe removal" operation on your computer before physically removing the memory card from your machine.
 - In Windows, right-click the  Removable Disk icon and click Eject. If Eject is not displayed on the screen, confirm that the **Access** lamp is not flashing and remove the memory card.
 - On a Macintosh, drag the  Mount drive icon into the Trash.

Learn how to place documents on the machine's Platen. Place documents correctly according to the type of document to be scanned. Otherwise, documents may not be scanned correctly.

Important

- Do not place objects on the Document Cover. The objects may fall into the machine when the Document Cover is opened. This may damage the machine.

Placing Documents

Place documents as described below to allow the machine to detect the document type or size automatically.

Important

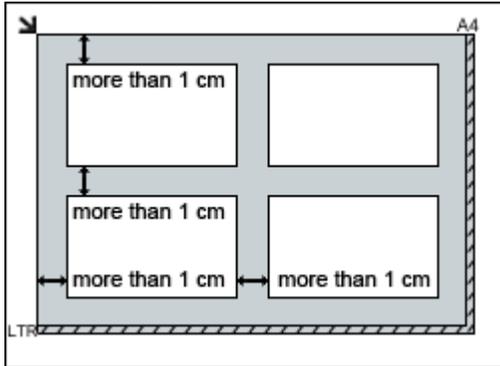

- When scanning by specifying the document type or size in MP Navigator EX or ScanGear (scanner driver), align an upper corner of the document with the corner at the arrow (alignment mark) of the Platen.
- Photos that have been cut to various shapes and documents smaller than 1.18 inches (3 cm) square cannot be cropped accurately when scanning.
- Reflective CD/DVD labels may not be scanned properly.
- Close the Document Cover when scanning.

When Scanning Photos, Postcards, Business Cards or CD/DVD	When Scanning Magazines, Newspapers or Text Documents
<div data-bbox="142 1108 646 1327" data-label="Image"> </div> <p data-bbox="116 1352 418 1381">Placing a Single Document</p> <p data-bbox="116 1392 651 1539">Place the document face-down on the Platen, with 3/8 inches (1 cm) or more space between the edges of the Platen and the document. Portions placed on the diagonally striped area cannot be scanned.</p> <div data-bbox="116 1541 617 1906" data-label="Image"> </div> <div data-bbox="116 1934 292 1980"> <h3>Important</h3> </div> <ul data-bbox="133 1990 620 2020" style="list-style-type: none"> Large documents (such as A4 size photos) 	<div data-bbox="766 1108 1143 1327" data-label="Image"> </div> <p data-bbox="677 1341 1222 1488">Place the document face-down on the Platen and align an upper corner of the document with the corner at the arrow (alignment mark) of the Platen. Portions placed on the diagonally striped area cannot be scanned.</p> <div data-bbox="677 1491 1182 1856" data-label="Image"> </div>

that cannot be placed away from the edges/arrow (alignment mark) of the Platen may be saved as PDF files. To save in a format other than PDF, scan by specifying the file format.

Placing Multiple Documents

Allow 3/8 inches (1 cm) or more space between the edges of the Platen and documents, and between documents. Portions placed on the diagonally striped area cannot be scanned.

Note

- You can place up to 12 documents.
- Positions of slanted documents (10 degrees or less) are corrected automatically.

Advanced Guide

Advanced Guide > Scanning > Saving Scanned Data on the Memory Card Using the Operation Panel of the Machine > Saving Scanned Data on the Memory Card Using the Operation Panel of the Machine

Saving Scanned Data on the Memory Card Using the Operation Panel of the Machine

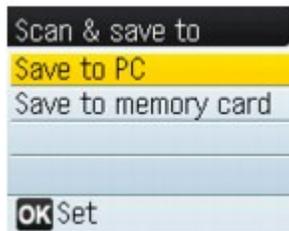

You can save scanned data on the memory card using the Operation Panel.

Important

- Do not remove the memory card from the machine under the following conditions:
 - While scanning is in progress
 - Before saving the scanned data
- Scanned data saved on the memory card drive cannot be printed in the memory card mode.
- For safety reasons, we recommend storing the scanned data saved on a memory card to another media periodically to avoid unexpected accidents.
- We assume no responsibility for damage or loss of data for whatever reasons even within the warranty period.

1. Make sure that the machine is turned on.
2. Press the **Menu** button.
3. Use the **▲▼** button to select Scan, then press the **OK** button.

The Scan & save to screen is displayed.

4. Use the **▲▼** button to select Save to memory card, then press the **OK** button.
5. Insert the memory card into the Card Slot.
For how to insert the memory card into the Card Slot or information on the types of the memory card compatible with the machine, refer to [Printing from a Memory Card](#).
6. Select the data format, then press the **OK** button.
Select PDF or JPEG.
7. Load the original on the Platen Glass following the instruction on the LCD.

Note

- Refer to [Loading Paper / Originals](#) for how to load the original on the Platen Glass.
- The size of scanned data will be A4, regardless of the size of the original.

8. Press the **OK** button.

The machine starts scanning and scanned data is saved on the memory card.

Remove the original on the Platen Glass after scanning is complete.

To remove the memory card after scanning is complete, refer to [Printing from a Memory Card](#).

 **Note**

- You can scan images continuously only when selecting PDF. Continue scanning following the confirmation screen. You can save up to 100 pages of images in one PDF file.
 - If the memory card becomes full while scanning images is in progress, only the images already scanned can be saved.
 - You can save up to 2000 files of scanned data in both PDF and JPEG data format.
 - The folder and file name of scanned data saved on the memory card is as follows:
 - Folder name: (file extension: PDF): CANON_SC\DOCUMENT\0001
 - Folder name: (file extension: JPG): CANON_SC\IMAGE\0001
 - File name: Running numbers, starting from SCN_0001
 - File date: 01/01/2009
-

Saving Scanned Data to PC Using the Operation Panel of the Machine

You can save scanned data to PC using the Operation Panel of the machine.

Before saving scanned data to PC, confirm the following:

- **The necessary application software (MP Drivers and MP Navigator EX) are installed.**

If the application software (MP Drivers and MP Navigator EX) are not yet installed, insert the *Setup CD-ROM* into the computer's disc drive, then perform Custom Install and select MP Drivers and MP Navigator EX.

- **The machine is connected to a computer correctly.**

Make sure that the machine is connected to the computer correctly.

Do not plug or unplug the USB cable when scanning images with the machine, or when the computer is in the sleep or standby mode.

- **The operation after scanning the original is specified in MP Navigator EX.**

MP Navigator EX enables you to specify the response resulting from pressing the **Color** or **Black** button on the machine. You can specify the response individually for each event. For details, refer to [Selecting a Response to Commands from the Operation Panel Using MP Navigator EX](#).

1. **Macintosh** Set the starting application.

If you are using Mac OS X v.10.5.x or Mac OS X v.10.4.x:

This operation is not necessary.

If you are using Mac OS X v.10.3.9:

You need to set MP Navigator EX as the starting application software in Image Capture under Applications of Mac OS X.

Select Applications on the Go menu, then double-click the Image Capture icon. Click Options at the lower left of the scanner window, select MP Navigator EX 3 in Application to launch when the scanner button is pressed:, then click OK. To quit Image Capture, select Quit Image Capture on the Image Capture menu.

Important

- If Options is not displayed, select Preferences on the Image Capture menu, click Scanner, and click Use TWAIN software whenever possible to clear the option. Then quit Image Capture and restart it.

2. Make sure that the machine is turned on.

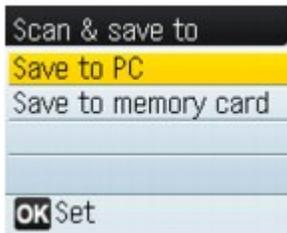

Note

- Refer to [Placing Documents](#) for how to load the original on the Platen Glass.

3. Press the **Menu** button.

4. Use the **▲ ▼** button to select Scan, then press the **OK** button.

The screen for selecting to which you save the data is displayed.

5. Use the ▲ ▼ button to select Save to PC, then press the **OK** button.
6. Load the original on the Platen Glass following the instruction on the LCD.

Note

- Options for scan operations can be specified in MP Navigator EX. For details, refer to [Selecting a Response to Commands from the Operation Panel Using MP Navigator EX](#) .

7. Press the **OK** button.

The settings configured by MP Navigator EX are applied when scanning.

8.  To specify MP Navigator EX 3.0

If you are using Windows Vista:

The program selection screen may be displayed after pressing the **Color** or **Black** button. In this case, select MP Navigator EX Ver3.0 and click OK.

You can set MP Navigator EX to launch whenever pressing the **Color** or **Black** button. For details, see [For Windows Users](#) .

If you are using Windows XP:

The program selection screen may be displayed after pressing the **Color** or **Black** button for the first time. In this case, specify MP Navigator EX Ver3.0 as the application software to use, select Always use this program for this action, then click OK. From the next time, MP Navigator EX is automatically started.

Important

- If the position or size of an image is not scanned correctly depending on the type of the original, refer to [Scanning Photos and Documents](#) and change Document Type and Document Size settings of MP Navigator EX to match the original being scanned.

• **If You Want to Edit or Print the Scanned Images**

MP Navigator EX enables you to edit the scanned images, such as optimizing or trimming.

You can also start application software from MP Navigator EX to edit or print the scanned images.

➔ [Let's Try Scanning](#)

• **If You Want to Scan Originals with Advanced Settings**

ScanGear enables you to scan originals with advanced settings such as the resolution.

➔ [Scanning with Advanced Settings Using ScanGear \(Scanner Driver\)](#)

Note

- You can use a TWAIN- or WIA- (Windows Vista and Windows XP only) compliant application software and the Control Panel (Windows Vista and Windows XP only) to scan originals with this machine.
For details, refer to [Other Scanning Methods](#) .

MP Navigator EX

What Is MP Navigator EX (Supplied Scanner Software)?

MP Navigator EX is an application that enables you to easily scan photos and documents. It is suitable even for beginners.

Important

- MP Navigator EX may not start from the Operation Panel of the machine. In that case, restart the computer.
- Use the default display font size of the OS. Otherwise, software screens may not appear correctly.

What You Can Do with This Software

This software allows you to scan multiple documents at one time, or scan images larger than the Platen. You can also save scanned images, attach them to e-mail or print them using the supplied applications.

Screens

Main Menus

There are two types of MP Navigator EX Main Menu: Navigation Mode screen and One-click Mode screen.

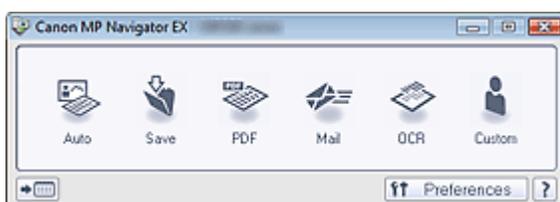

Navigation Mode Screen

You can start various tasks from the Navigation Mode screen, including simple scanning, scanning using ScanGear (scanner driver), and enhancing/correcting images.

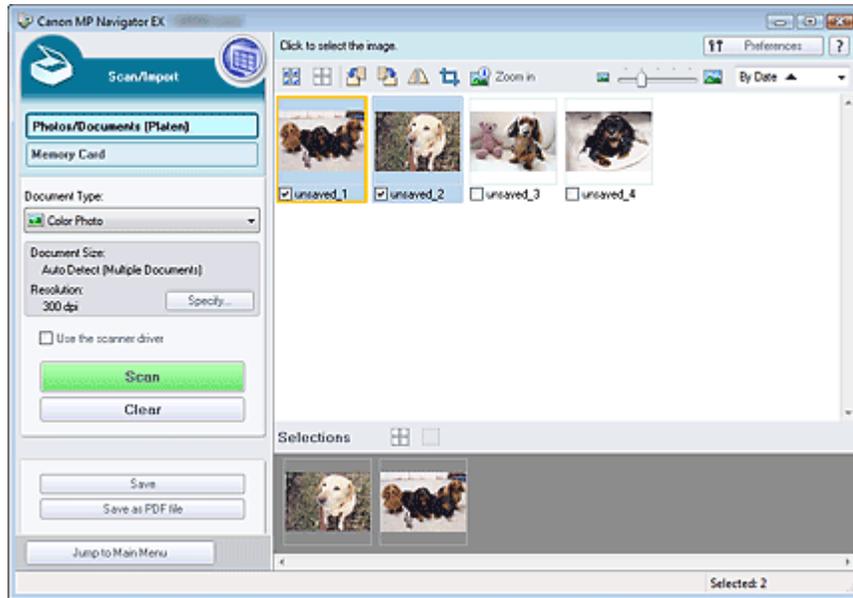

One-click Mode Screen

You can complete from scanning to saving, etc. at one time by simply clicking the corresponding icon in the One-click Mode screen.

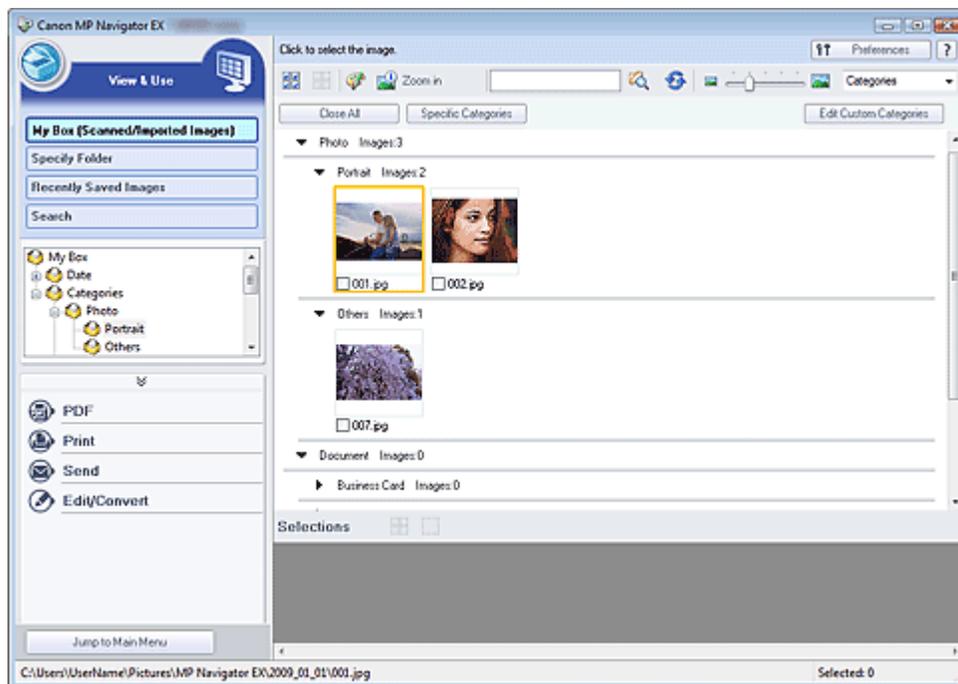

Scan/Import Window

Use the Scan/Import window to scan photos and documents, or import images saved on memory cards.

View & Use Window

Use the View & Use window to select what you want to do with the scanned images.

MP Navigator EX

Starting MP Navigator EX

Starting MP Navigator EX

1. Double-click  Canon MP Navigator EX 3.0 icon on the desktop.
MP Navigator EX starts.

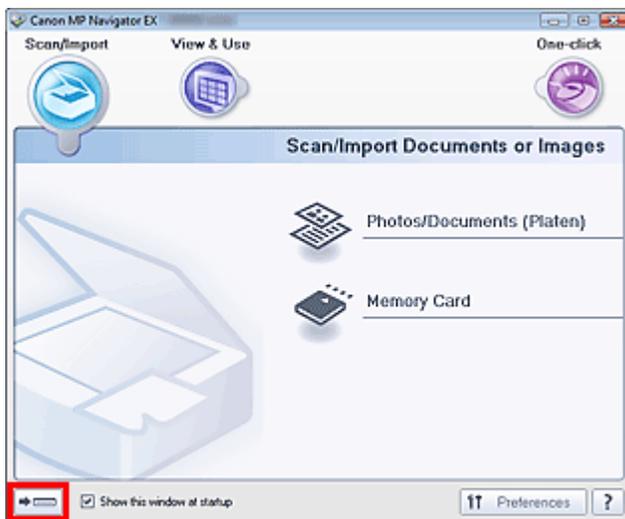

Note

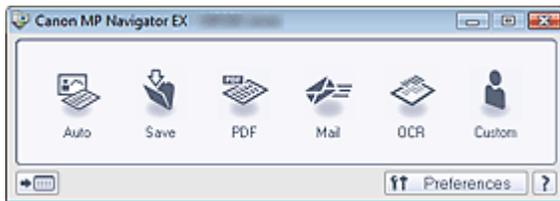

- Alternatively, from the Start menu, select (All) Programs > Canon Utilities > MP Navigator EX 3.0 > MP Navigator EX 3.0.

Starting One-click Mode

1. Click  (Switch Mode) at the bottom left of the screen.

The One-click Mode screen appears.

Note

- Select the Show this window at startup checkbox in the Navigation Mode screen to always open the Navigation Mode screen at startup. If this checkbox is not selected, the last used screen appears at startup.

[Page top](#)

Advanced Guide

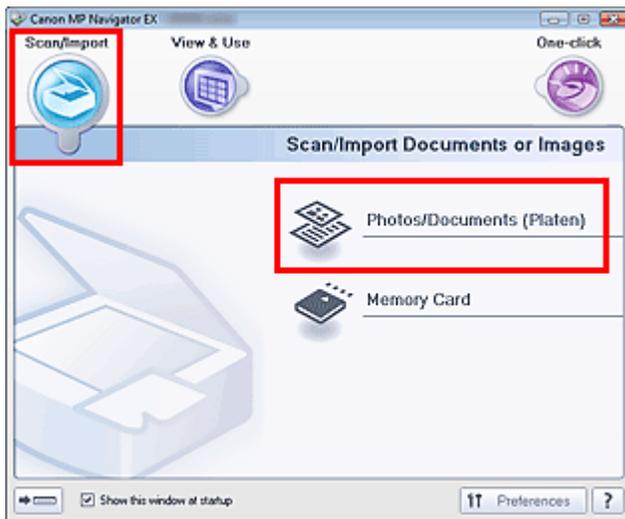

Advanced Guide > Scanning > Scanning with the Bundled Application Software > Let's Try Scanning > Scanning Photos and Documents

MP Navigator EX

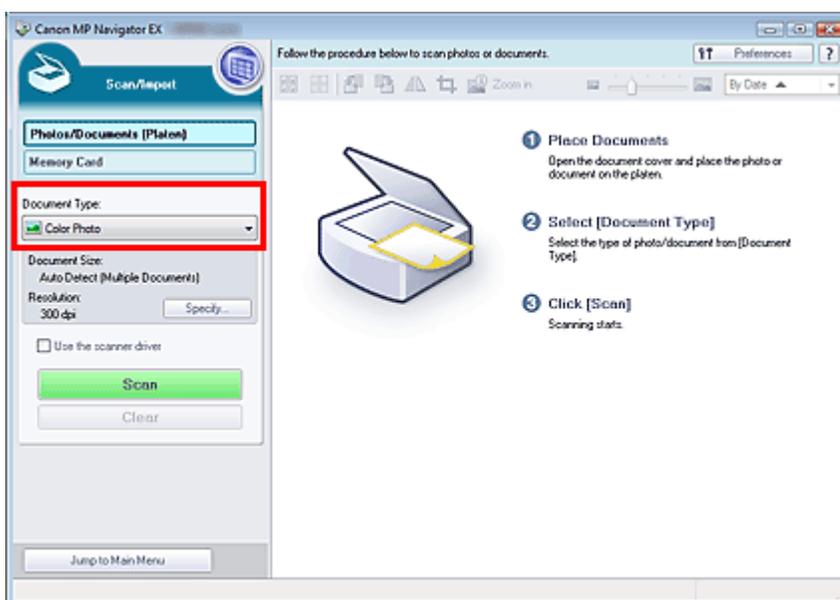

Scanning Photos and Documents

Scan photos and documents placed on the Platen.

1. Start MP Navigator EX and open the Navigation Mode screen.
 - ➔ Starting MP Navigator EX
2. Point to Scan/Import and click Photos/Documents (Platen).

3. Place the document on the Platen, then select Document Type.
 - ➔ Placing Documents

Note

- When you select Magazine(Color), the Descreen function will be enabled and scanning takes longer than usual. To disable the Descreen function, deselect the Descreen checkbox in the

- Scan Settings dialog box.
- Select Text(OCR) to extract the text in the image and convert to editable text data using MP Navigator EX.
- Color scanning is not available for Text(OCR). To scan in color, use OCR in One-click and scan with Color Mode set to Color.

4. Click Specify... to set the document size and scanning resolution as required.

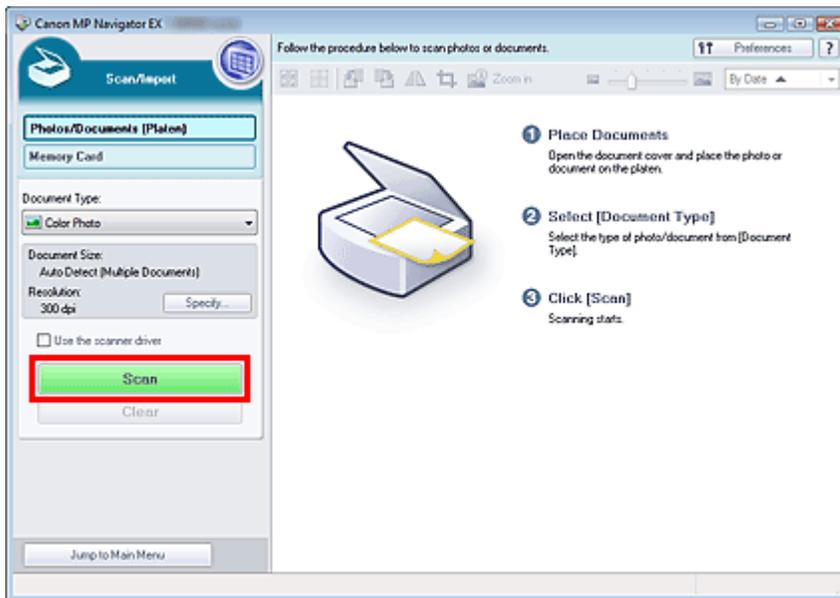

When setting is completed, click OK.

➔ Scan Settings Dialog Box (Photos/Documents)

Important

- When scanning a large document (such as an A4 size photo), align its corner with the corner at the arrow (alignment mark) of the platen and specify the document size in the Scan Settings dialog box.

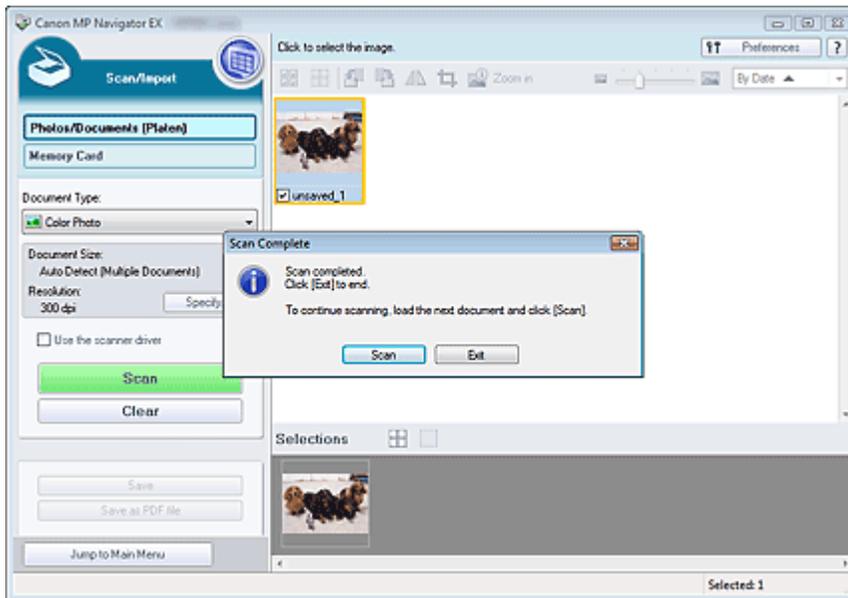

5. Click Scan.

Scanning starts.

When scanning is completed, the Scan Complete dialog box opens. Select Scan or Exit. Select Scan to scan the next document, or select Exit to end.

The scanned images appear in the Thumbnail window.

6. Edit the scanned images as required.

Use Edit Tools to rotate images, select a part of an image, etc.

See the Edit Tools in "Photos/Documents (Platen) Screen (Scan/Import Window) " for details.

Note

- First select images to edit. (Selected images are outlined in orange.) Drag the mouse or use Shift + arrow keys to select multiple images.

7. Save the scanned images.

➔ Saving

➔ Saving as PDF Files

2. Start MP Navigator EX and open the Navigation Mode screen.
 - ➔ [Starting MP Navigator EX](#)
3. Point to Scan/Import and click Photos/Documents (Platen).

4. Select Document Type according to the document to be scanned.

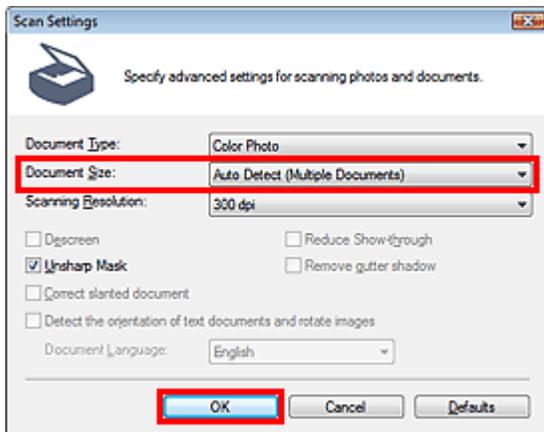

5. Click Specify....

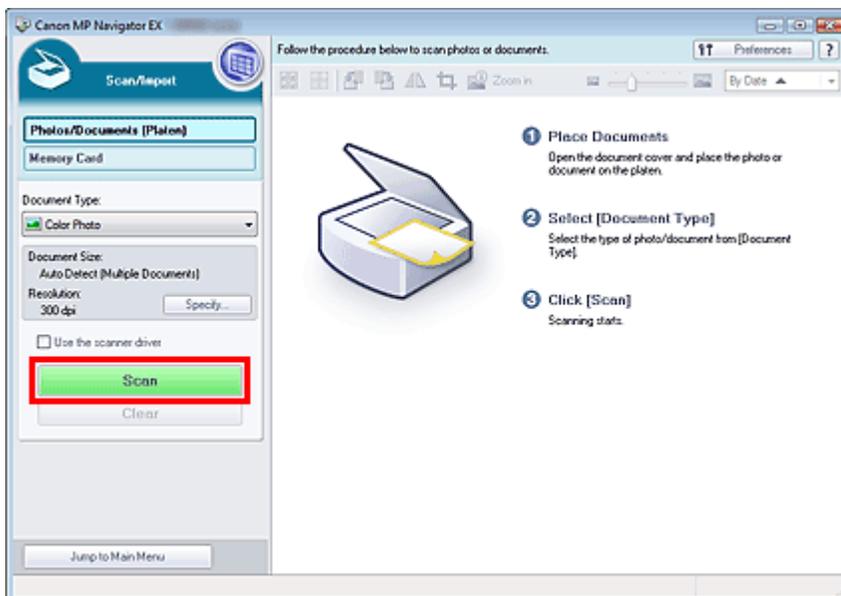

Select Auto Detect (Multiple Documents) for Document Size.

When setting is completed, click OK.

➔ Scan Settings Dialog Box (Photos/Documents)

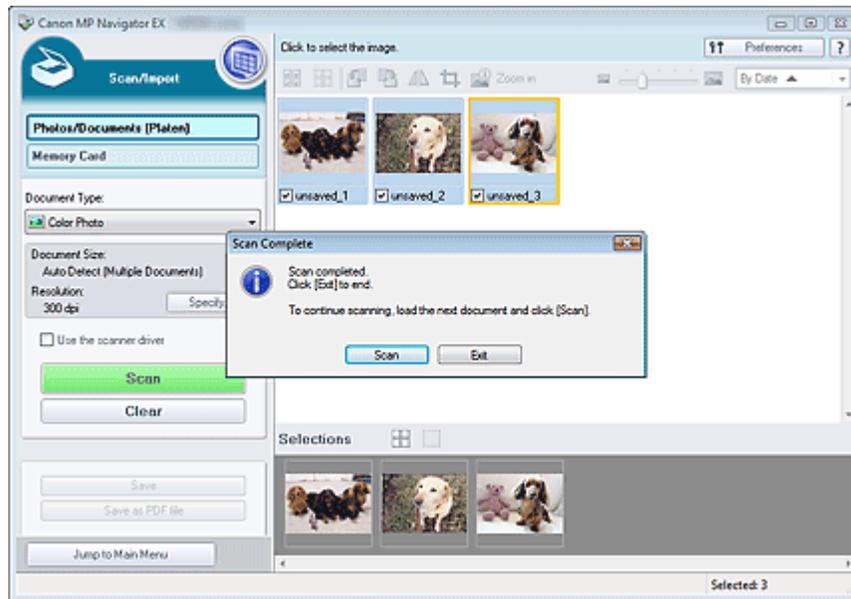

6. Click Scan.

Multiple documents are scanned at one time.

When scanning is completed, the Scan Complete dialog box opens. Select Scan or Exit. Select Scan to scan the next document, or select Exit to end.

The scanned images appear in the Thumbnail window.

7. Edit the scanned images as required.

Use Edit Tools to rotate images, select a part of an image, etc.

See the Edit Tools in "Photos/Documents (Platen) Screen (Scan/Import Window) " for details.

Note

- First select images to edit. (Selected images are outlined in orange.) Drag the mouse or use Shift + arrow keys to select multiple images.

8. Save the scanned images.

➔ Saving

➔ Saving as PDF Files

Note

- If you want to preview the images before scanning, use ScanGear (scanner driver).
 - ➔ Scanning Multiple Documents at One Time with ScanGear (Scanner Driver)

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > Let's Try Scanning > Scanning Images Larger than the Platen (Stitch Assist)

MP Navigator EX

Scanning Images Larger than the Platen (Stitch Assist)

Stitch Assist allows you to scan the left and right halves of a large document separately and combine the scanned images back into one image. You can scan documents that are up to twice as large as the Platen.

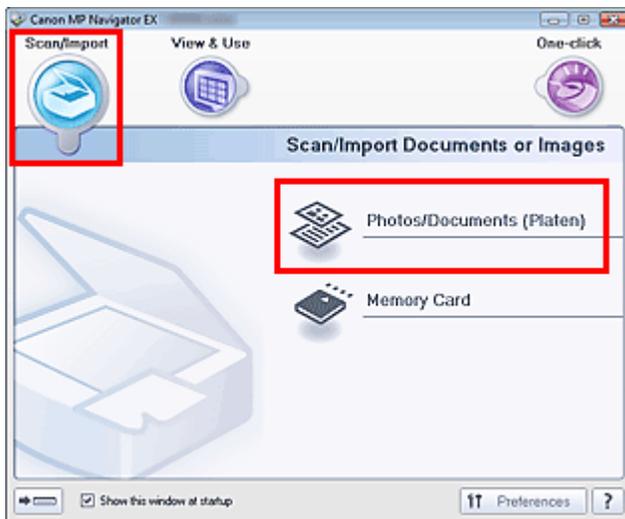

1. Start MP Navigator EX and open the Navigation Mode screen.

➔ Starting MP Navigator EX

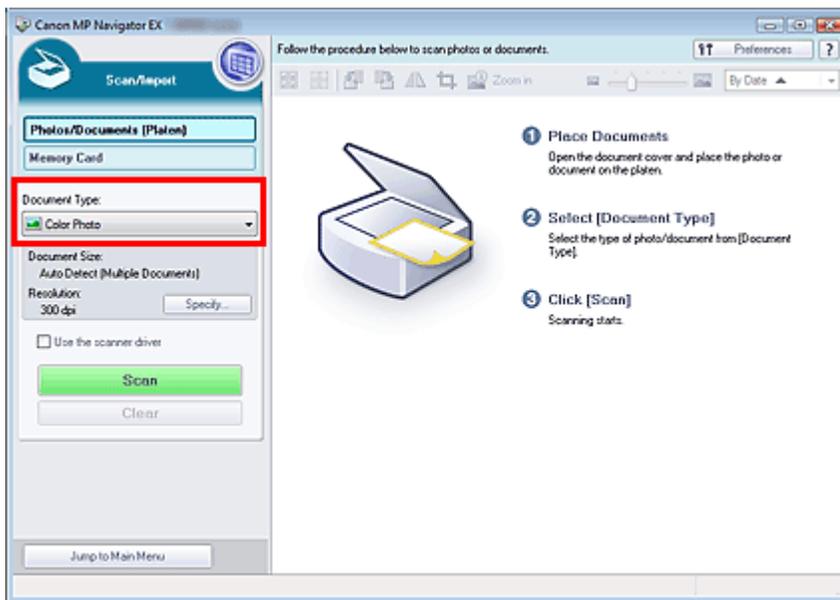

Note

- You can complete from scanning to saving, etc. at one time by simply clicking the corresponding icon in the One-click Mode screen. Stitch Assist is available from the One-click Mode screen as well, by changing the document size. Click the corresponding icon and select Stitch Assist for Document Size. Then skip ahead to Step 5.

2. Point to Scan/Import and click Photos/Documents (Platen).

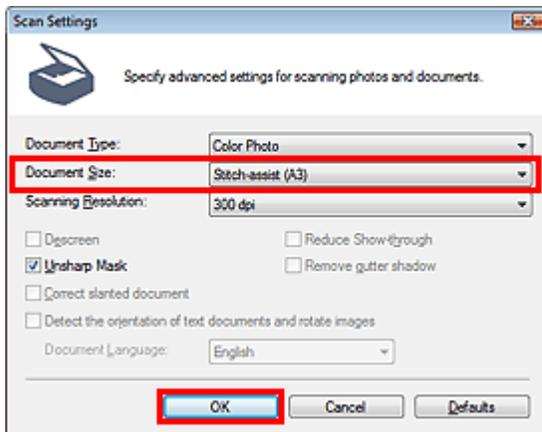

3. Select Document Type according to the document to be scanned.

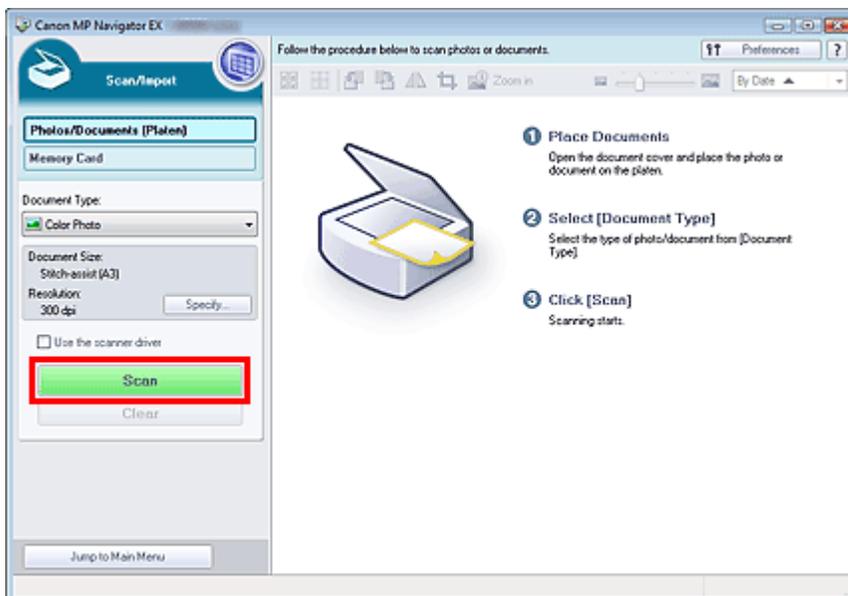

4. Click Specify....

Select Stitch Assist for Document Size, then specify the scanning resolution as required. When setting is completed, click OK.

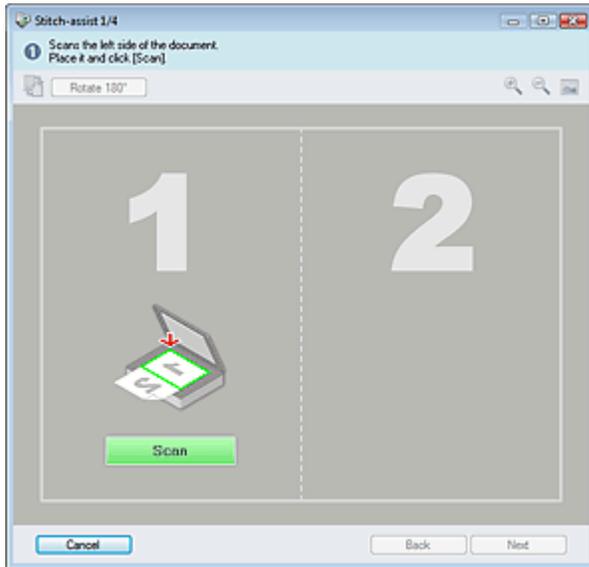

➔ Scan Settings Dialog Box (Photos/Documents)

5. Click Scan.

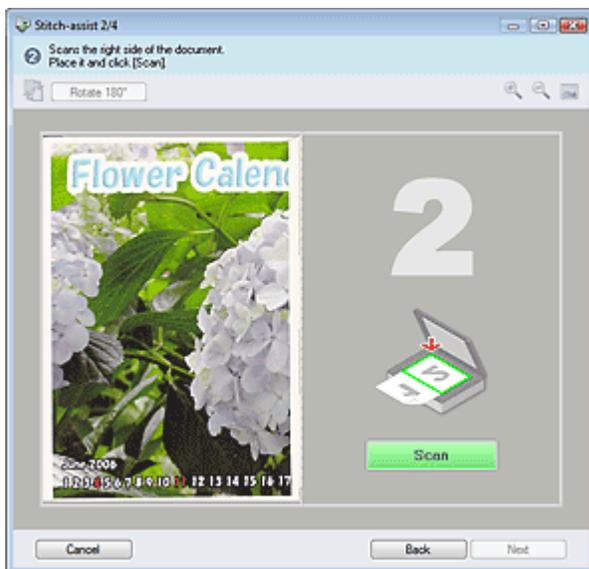

The Stitch-assist window opens.

6. Place the left half of the document face-down on the Platen.

7. Click Scan.

The left half of the document is scanned and appears in the Stitch-assist window.

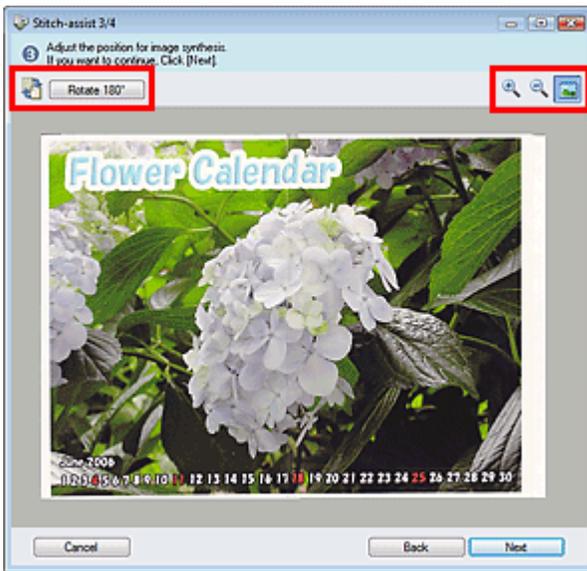

8. Place the right half of the document face-down on the Platen.

9. Click Scan.

The right half of the document is scanned.

10. Adjust the scanned image as required.

Use the icons to swap the left and right halves, rotate the image 180 degrees or enlarge/reduce the image.

- 
(Swap Left & Right)
 Swaps the left and right halves.

Important

- This function is not available while the image is enlarged/reduced.

- 
Rotate 180°
 Rotates right half of the image 180 degrees.

Important

- This function is not available while the image is enlarged/reduced.

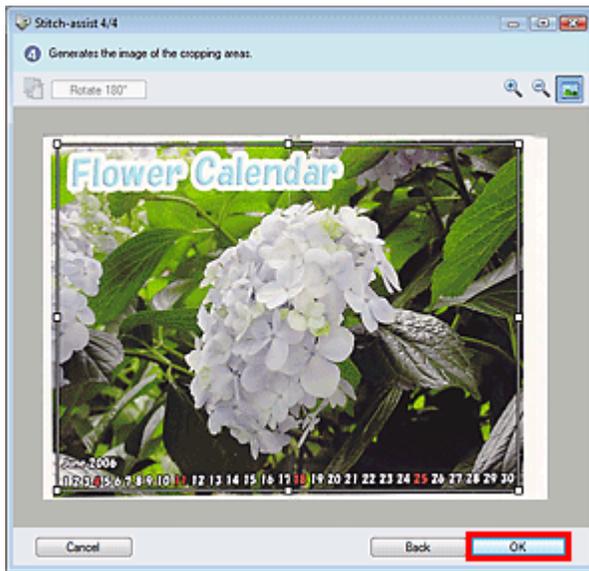

- 
(Enlarge)
 Enlarges the displayed image.
- 
(Reduce)
 Reduces the displayed image.
- 
(Full-screen)
 Enlarges/reduces the image to display it full-screen.

Note

- Enlarge/Reduce does not affect the actual size of the scanned image.
- When the document is scanned upside down, the image displayed in the Stitch-assist window will also be upside down. Click Rotate 180° to rotate the image to the correct orientation.
- You can drag the right half of the image from right to left or up and down to adjust the position.
- If the left and right halves do not match due to a slanted document, place the document correctly and click Back, then scan again.

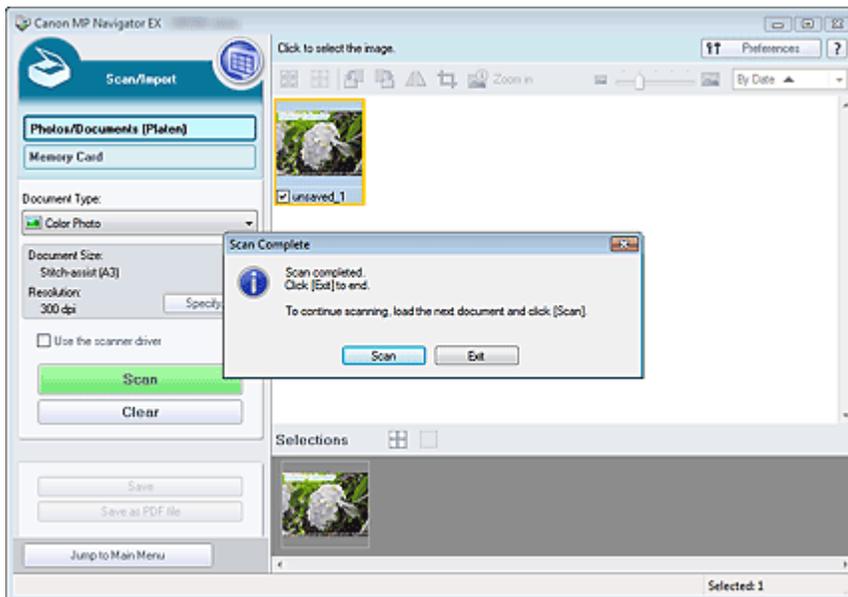

11. Click Next.

12. Drag the mouse to specify the area to be saved, then click OK.

The combined image appears in the Thumbnail window.

When scanning is completed, the Scan Complete dialog box opens. Select Scan or Exit. Select Scan to scan the next document, or select Exit to end.

13. Save the scanned images.

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > Useful MP Navigator EX Functions > Correcting/Enhancing Images Automatically

MP Navigator EX

Correcting/Enhancing Images Automatically

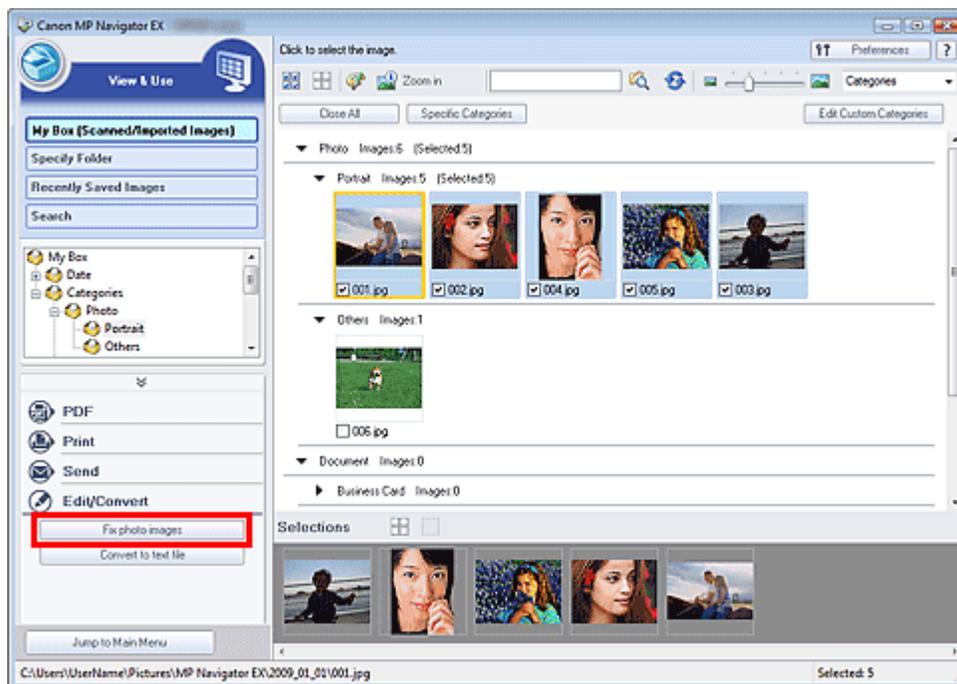

MP Navigator EX will analyze and correct/enhance scanned images automatically.

1. Scan documents into MP Navigator EX and save them, then open the View & Use window from the Navigation Mode screen and select the photos you want to correct/enhance.

Note

- See "Let's Try Scanning" to scan images into MP Navigator EX.
- You can also select images saved on a memory card or computer.
 - ➔ Importing Images Saved on a Memory Card
 - ➔ Opening Images Saved on a Computer

2. Click Edit/Convert, then click Fix photo images on the list.

The Correct/Enhance Images window opens.

Note

- The Correct/Enhance Images window can also be opened by clicking  (Image Correction/Enhancement) on the Toolbar or in the Zoom in dialog box. In that case, only the target image (outlined in orange) can be corrected/enhanced.
- See "Correct/Enhance Images Window" for details on the Correct/Enhance Images window.

3. Select the image you want to correct/enhance from the thumbnail list.

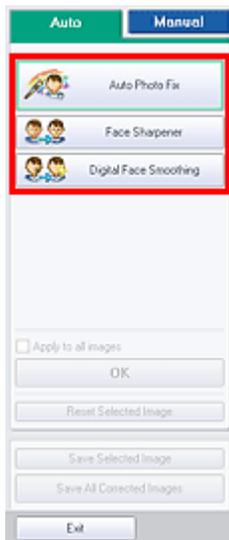

The selected image appears in Preview.

Note

- If you selected only one image in the View & Use window, the thumbnail list does not appear and only the preview image appears.

4. Make sure that Auto is selected.
5. Click Auto Photo Fix, Face Sharpener or Digital Face Smoothing.

Important

- Once image is corrected with Auto Photo Fix and saved, it cannot be corrected again with Auto Photo Fix. Auto Photo Fix may not be available for images edited using an application, digital camera, etc. manufactured by other companies.

Note

- The Face Sharpener and Digital Face Smoothing effect levels can be changed using the slider that appears by clicking the corresponding buttons.
- When you apply Auto Photo Fix, dark backlit photos will be corrected automatically. If the image is not corrected enough using Auto Photo Fix, it is recommended that you apply Face Brightener on the Manual tab.

➔ [Correcting/Enhancing Images Manually](#)

6. Click OK.

The entire image is corrected/enhanced automatically and  (Correct/Enhance) appears on the upper left of the thumbnail and preview image.

Note

- Click Reset Selected Image to undo the correction/enhancement.
 - Select the Apply to all images checkbox to correct/enhance all selected images.
-

7. Click Save Selected Image or Save All Corrected Images.

You can save corrected/enhanced images as new files.

Note

- To save only the images you like, select them and click Save Selected Image. To save all images, click Save All Corrected Images.
 - The file format of corrected/enhanced images is JPEG/Exif.
 - Adobe RGB images are saved as sRGB images.
-

8. Click Exit.

Important

- The corrections/enhancements will be lost if you exit before saving corrected/enhanced images.

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > Useful MP Navigator EX Functions > Correcting/Enhancing Images Manually

MP Navigator EX

Correcting/Enhancing Images Manually

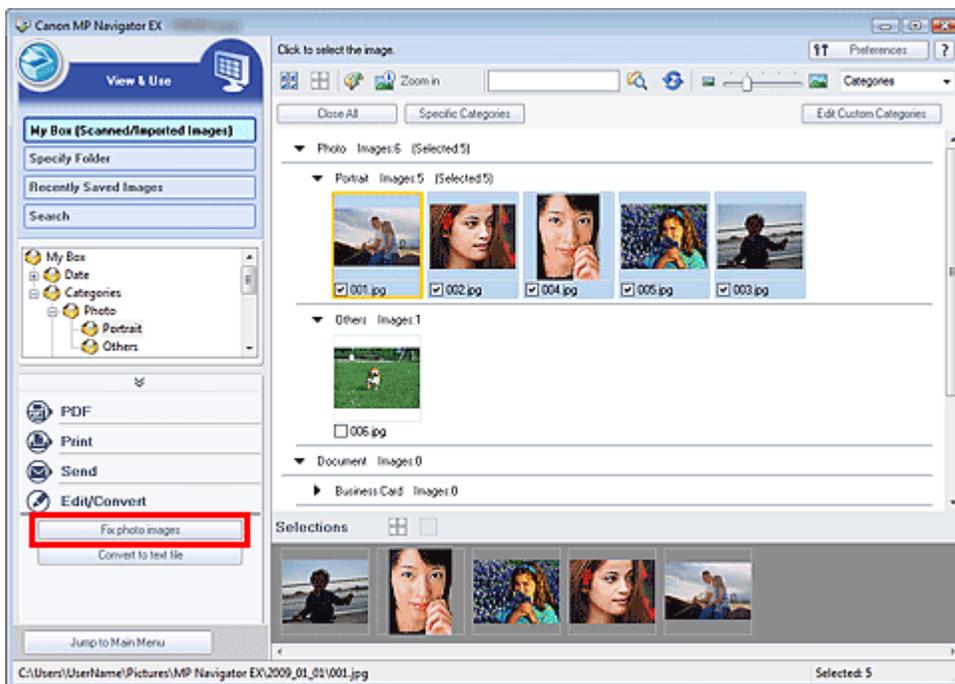

You can correct/enhance scanned images manually.

1. Scan documents into MP Navigator EX and save them, then open the View & Use window from the Navigation Mode screen and select the photos you want to correct/enhance.

Note

- See "Let's Try Scanning" to scan images into MP Navigator EX.
- You can also select images saved on a memory card or computer.
 - ➔ Importing Images Saved on a Memory Card
 - ➔ Opening Images Saved on a Computer

2. Click Edit/Convert, then click Fix photo images on the list.

The Correct/Enhance Images window opens.

- See "Starting MP Navigator EX" to start MP Navigator EX.

Quick Search

In  (Text box) on the Toolbar, enter a word or phrase included in the file name, Exif information or PDF text of the image you want to search for, then click  (Search button). For Exif information, text in Maker, Model, Description and User Comment is searched.

Advanced Search

Click Search on the left of the screen to open search options. Enter information of the image you want to search for, then click Start Search.

- **Search in**

If you know where to look for, select the drive, folder or network from Specify Folder.

- **File Name**

If you know the file name, enter it.

- **A word or phrase in the file**

Enter a word or phrase included in the items selected in More Advanced Options.

Important

- For PDF files, you can only search for those created with MP Navigator EX. You cannot search PDF files created or edited in other applications. Also, searching PDF files is available only when keyword search is set. For details of creating PDF files that enables keyword search, see "[PDF Settings Dialog Box.](#)"
- Password-protected PDF files cannot be searched.

- **Category**

You can search for images by category.

- **Modified Date**

To search for images that have been updated in a specific time period, enter the first and last dates of the period.

- **Shooting Date**

To search for images captured in a specific time period, enter the first and last dates of the period.

Note

- Captured date is the date and time of data creation, which are included in the document's Exif information.

- **More Advanced Options**

- **A word or phrase in the file**

In A word or phrase in the file, select the items to search. If you select the Exif information

checkbox, text in Maker, Model, Description and User Comment is searched. If you select the PDF text checkbox, text in PDF files is searched.

Important

- Text in password-protected PDF files cannot be searched.

- **Search subfolders**

Select this checkbox to search subfolders.

- **Case sensitive**

Select this checkbox to match case.

- **Match all criteria**

Searches for files that meet all the specified criteria.

- **Match any criteria**

Searches for files that meet any of the specified criteria.

- **Start Search**

Starts search.

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > Useful MP Navigator EX Functions > Classifying Images into Categories

MP Navigator EX

Classifying Images into Categories

Display images scanned with MP Navigator EX by category. You can classify unclassified images automatically, and also create custom categories. You can drag and drop an image to move it from one category to another.

Note

- If you have classified the images in MP Navigator EX 2.0 or later and then upgrade MP Navigator EX to the latest version, the classification information on the second latest version is transferred upon initial startup. After the initial startup, the classification information cannot be transferred.

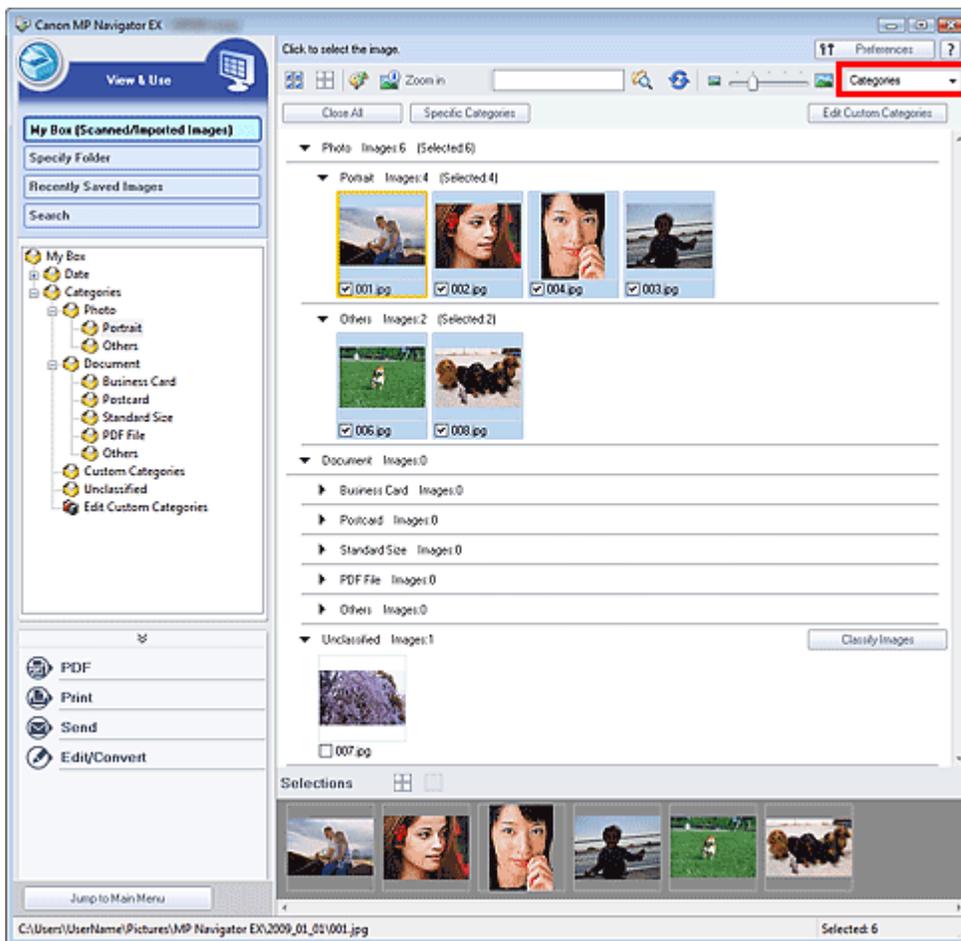

1. Scan documents into MP Navigator EX and save them, then open the View & Use window from the Navigation Mode screen.

Note

- See "[Let's Try Scanning](#)" to scan images into MP Navigator EX.
- You can also select images saved on a memory card or computer.
 - ➔ [Importing Images Saved on a Memory Card](#)
 - ➔ [Opening Images Saved on a Computer](#)

2. In (Sort by), select Categories.

Images are automatically sorted by category and appear in the Thumbnail window.

Images are sorted into the following categories.

Photos: Portrait, Others

Documents: Business Card, Postcard, Standard Size, PDF File, Others

Custom categories: Displays your custom categories.

To create custom categories, see "[Creating Custom Categories](#)."

Unclassified: Displays images that have not yet been classified.

Note

- Click Classify Images to classify images displayed in Unclassified automatically. Click Cancel to stop.
- Classification may take time if there are many images to classify.

Important

- Even if you classify images saved in removable media such as USB flash drive and external hard disk, the classification information will be deleted once you remove the media. From the next time, the images are classified to Unclassified.
- Images cannot be classified when Recently Saved Images is selected in the View & Use window.

Note

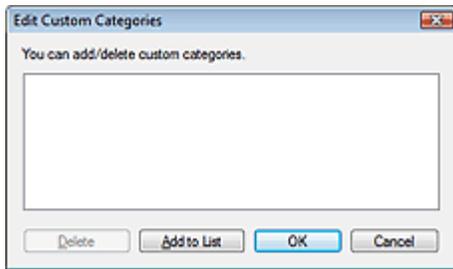

- Some images may not be detected correctly and thus may be classified into wrong categories. In that case, drag and drop the image to the correct category.
- Images saved in network folders may not be classified.
- You can search for images by category. See "[Searching Images](#)" for details.

Creating Custom Categories

- In the View & Use window, sort images by category and click Edit Custom

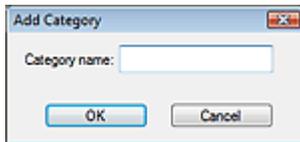

Categories.

The Edit Custom Categories dialog box opens.

2. Click Add to List.

The Add Category dialog box opens.

3. Enter Category name and click OK.

Note

- You can create up to 20 custom categories.
- Up to 50 single-byte characters can be used for a category name.
- Double-click a created category to open the Change Category Name dialog box in which you can change the category name.
- Select a custom category and click Delete to delete it.

MP Navigator EX

Saving as PDF Files

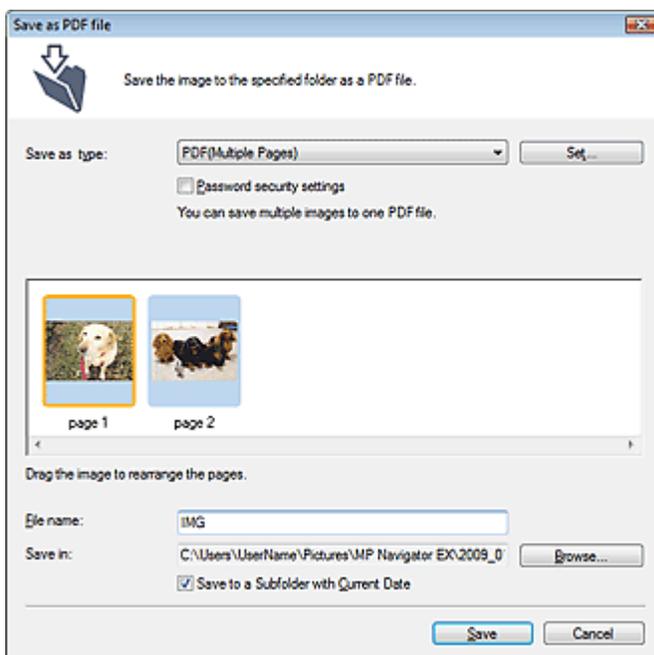

Save images scanned with MP Navigator EX as PDF files.

1. Select the checkboxes of the images you want to save, then click Save as PDF file.

2. In the Save as PDF file dialog box, specify the save settings. Specify the file type, file name and destination folder.

➔ Save as PDF file Dialog Box

Select from the following PDF file types:

- PDF

Save each of the selected images as a separate PDF file.

- **PDF(Multiple Pages)**

Save multiple images in one PDF file.

Note

- PDF(Multiple Pages) is displayed when multiple images are selected.
-

- **PDF(Add Page)**

Add the scanned images to a PDF file. The images are added to the end of the PDF file. You cannot rearrange the pages of the PDF file to which the images are added.

Important

- Images can only be added to PDF files created with MP Navigator EX. You cannot specify PDF files created with other applications. PDF files edited in other applications cannot be specified as well.
 - If a password-protected PDF file is edited, the passwords will be deleted. Reset the passwords.
-

Note

- By default, the following folders are specified as the destination folders.
Windows Vista: MP Navigator EX folder in Pictures folder
Windows XP: MP Navigator EX folder in My Pictures folder
Windows 2000: MP Navigator EX folder in My Pictures folder
 - You can set passwords for PDF files.
➔ [Setting Passwords for PDF Files](#)
-

3. Click Save.

Scanned images are saved according to the settings.

To further use/edit the scanned images on MP Navigator EX, click Open saved location in the Save Complete dialog box.

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > Utilizing Images in MP Navigator EX > Creating/Editing PDF Files

MP Navigator EX

Creating/Editing PDF Files

Create/edit PDF files using MP Navigator EX. After scanning documents and saving them, open the View & Use window to create PDF files and add/delete pages, rearrange the page order, etc.

Important

- You can create or edit up to 99 pages using MP Navigator EX.

Note

- See "Let's Try Scanning" to scan images into MP Navigator EX.
- You can also select images saved on a memory card or computer.
 - ➔ Importing Images Saved on a Memory Card
 - ➔ Opening Images Saved on a Computer

Creating/Editing PDF Files with MP Navigator EX

- Select images and click PDF.

Note

- You can select PDF, JPEG, TIFF and BMP files.

- Click Create/Edit PDF file on the list.

Important

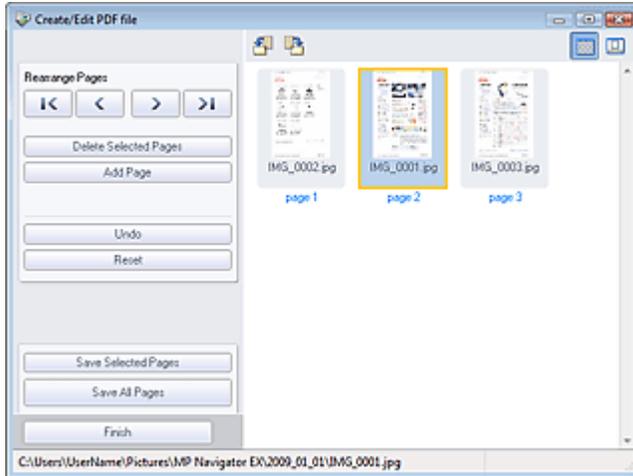

- For PDF files, you can only edit those created with MP Navigator EX. You cannot edit PDF files created with other applications. PDF files edited in other applications cannot be edited as well.

Note

- If a password-protected PDF file is selected, you will be prompted to enter the password.
 ➔ [Opening/Editing Password-protected PDF Files](#)

3. Add/delete pages as required.

To add an existing file, click Add Page and select the file. To delete a page, select it and click Delete Selected Pages.

Note

- You can add PDF, JPEG, TIFF and BMP files.
- When adding a password-protected PDF file, you will be prompted to enter the password.

4. Rearrange the page order as required.

Use the icons to rearrange the order. Alternatively, drag and drop the thumbnail to the target location.

Note

- See "[Create/Edit PDF file Window](#)" for details on the Create/Edit PDF file window.

5. Click Save Selected Pages or Save All Pages.

The Save as PDF file dialog box opens.

➔ [Save as PDF file Dialog Box](#)

Important

- You cannot save images scanned at 10501 pixels or more in the vertical and horizontal directions.
- If a password-protected PDF file is edited, the passwords will be deleted. Reset the passwords in the Save as PDF file dialog box.
 ➔ [Setting Passwords for PDF Files](#)

6. Specify the save settings in the Save as PDF file dialog box, then click Save.

Images are saved according to the settings.

Opening PDF Files in an Application

You can open PDF files created with MP Navigator EX in an associated application and edit or print them.

1. Select PDF files and click PDF.

Important

- For PDF files, you can only select those created with MP Navigator EX. You cannot select PDF files created with other applications. PDF files edited in other applications cannot be selected as well.

2. Click Open PDF file on the list.

The application associated with the .pdf file extension by the operating system starts.

Important

- Password-protected PDF files cannot be opened in applications not supporting PDF security.
- Files may not open if an application that can be associated with PDF files is not installed.

3. Use the application to edit/print the file.

For details, refer to the application's manual.

Important

- In some applications, the commands (print, edit, etc.) restricted by Permissions Password may differ from those in MP Navigator EX.

[Page top](#)[↕]

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > Utilizing Images in MP Navigator EX > Printing Documents

MP Navigator EX

Printing Documents

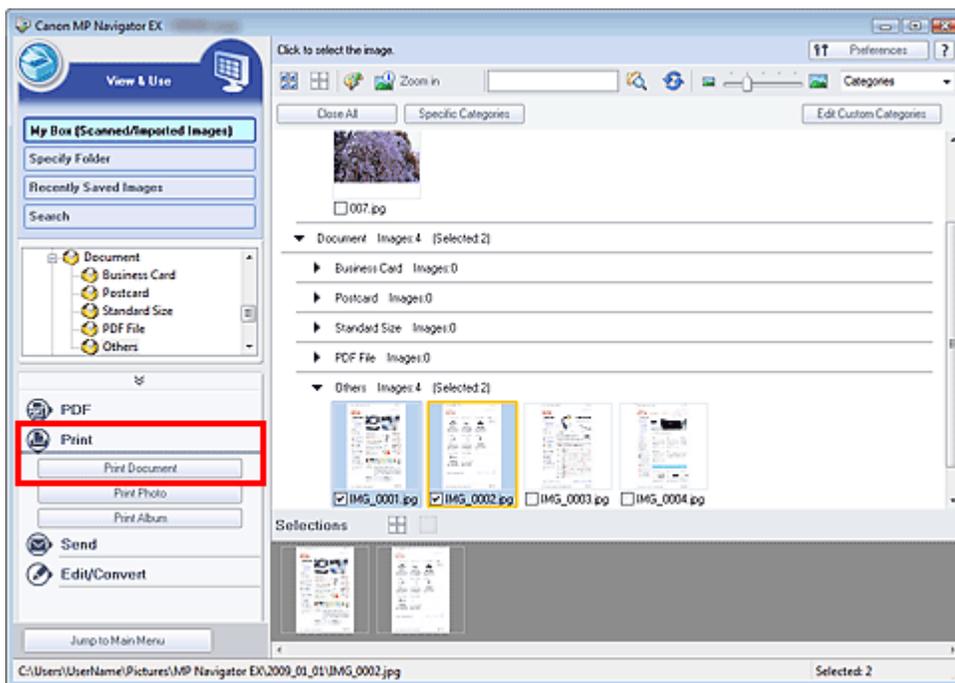

You can print multiple scanned images at one time, print at specific quality, etc. using MP Navigator EX.

1. Scan documents into MP Navigator EX and save them, then open the View & Use window from the Navigation Mode screen and select images.

Note

- See "Let's Try Scanning" to scan images into MP Navigator EX.
- You can also select images saved on a memory card or computer.
 - ➔ Importing Images Saved on a Memory Card
 - ➔ Opening Images Saved on a Computer

2. Click Print, then click Print Document on the list.

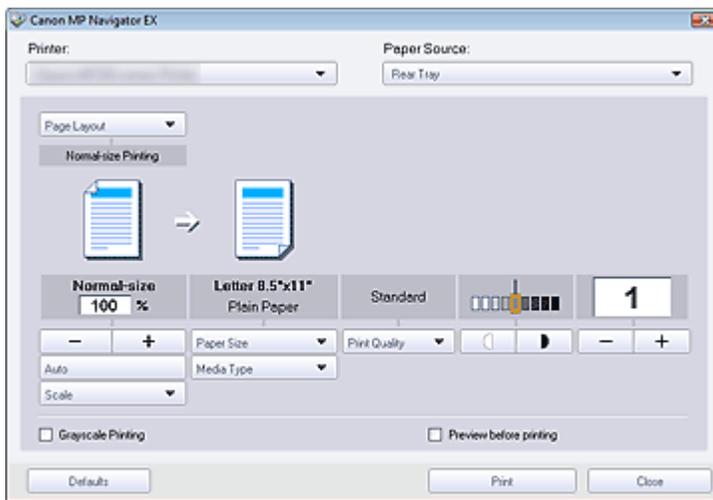

Important

- If a password-protected PDF file is selected, you will be prompted to enter the password.
 - ➔ Opening/Editing Password-protected PDF Files

3. Specify print settings as required.

In the displayed dialog box, specify print count, quality, scale, etc.

- ➔ Print Document Dialog Box

Important

- At normal-size (100%), some images may be printed small or with some portions cropped. In that case, select Auto to resize the print in proportion to the paper size.

4. Click Print.

Printing starts.

Note

- When printing a multiple-page PDF file via Print Document, printing may take time depending on your computer. In that case, follow these steps and change settings.
 - From the Start menu, select Control Panel.
 - Click Printers.
 - Right-click the icon of your printer and click Properties.
The printer properties dialog box opens.
 - Click the Advanced tab.
 - Select Spool print documents so program finishes printing faster.
 - Select Start printing after last page is spooled.
 - After printing, return the setting on the Advanced tab to Start printing immediately.
- To cancel while spooling, click Cancel. To cancel while printing, click Cancel Printing in the confirmation window for the printer status. To open a confirmation window for the printer status, click printer icon on the taskbar.

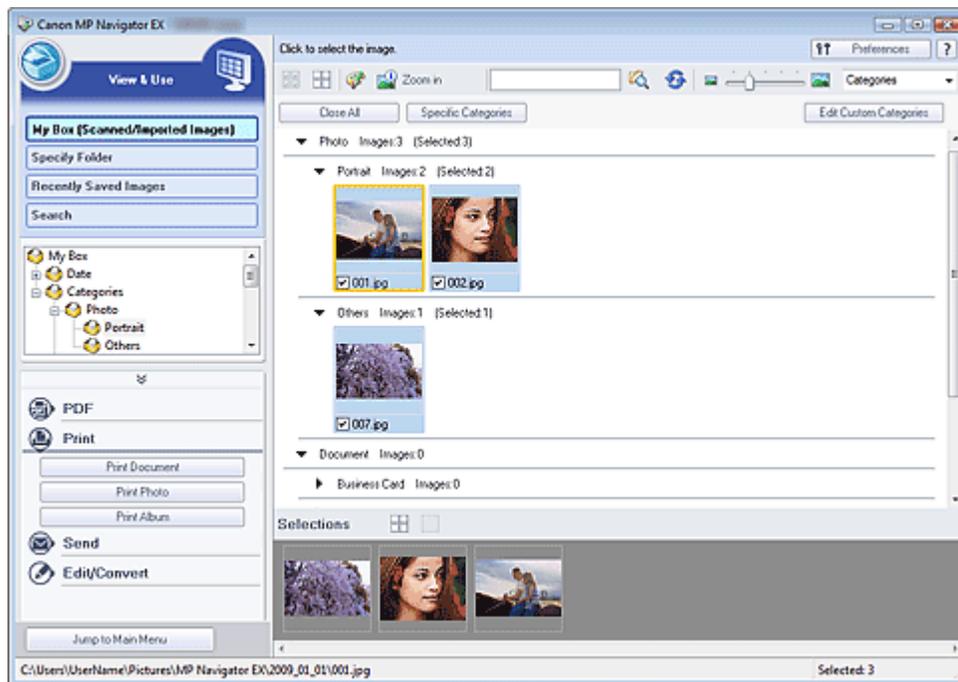

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > Utilizing Images in MP Navigator EX > Printing Photos

MP Navigator EX

Printing Photos

You can print photos using MP Navigator EX or an application that accompanies the machine. After scanning documents and saving them, open the View & Use window to select how you want to print the photos.

Note

- See "Let's Try Scanning" to scan images into MP Navigator EX.
- You can also select images saved on a memory card or computer.
 - ➡ Importing Images Saved on a Memory Card
 - ➡ Opening Images Saved on a Computer

When Printing Photos Using Easy-PhotoPrint EX

You can use Easy-PhotoPrint EX to print scanned photos at high quality or to layout and print images.

1. Select images and click Print.
2. Click Print Photo or Print Album on the list.
Easy-PhotoPrint EX starts. See "Printing Photos" for details.

Note

- If Easy-PhotoPrint EX is not installed, print with MP Navigator EX.

When Printing Photos Using MP Navigator EX

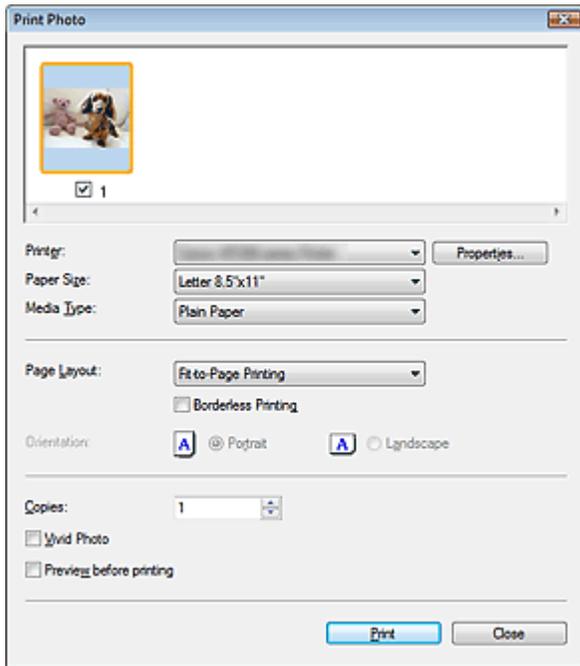

1. Select images and click Print.

2. Click Print Photo on the list.

3. Specify print settings as required.

In the displayed dialog box, specify paper size, print count, etc.

➔ Print Photo Dialog Box

4. Click Print.

Printing starts.

Note

- To cancel while spooling, click Cancel. To cancel while printing, click Cancel Printing in the confirmation window for the printer status. To open a confirmation window for the printer status, click printer icon on the taskbar.

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > Utilizing Images in MP Navigator EX > Sending via E-mail

MP Navigator EX

Sending via E-mail

Send scanned images via e-mail.

Important

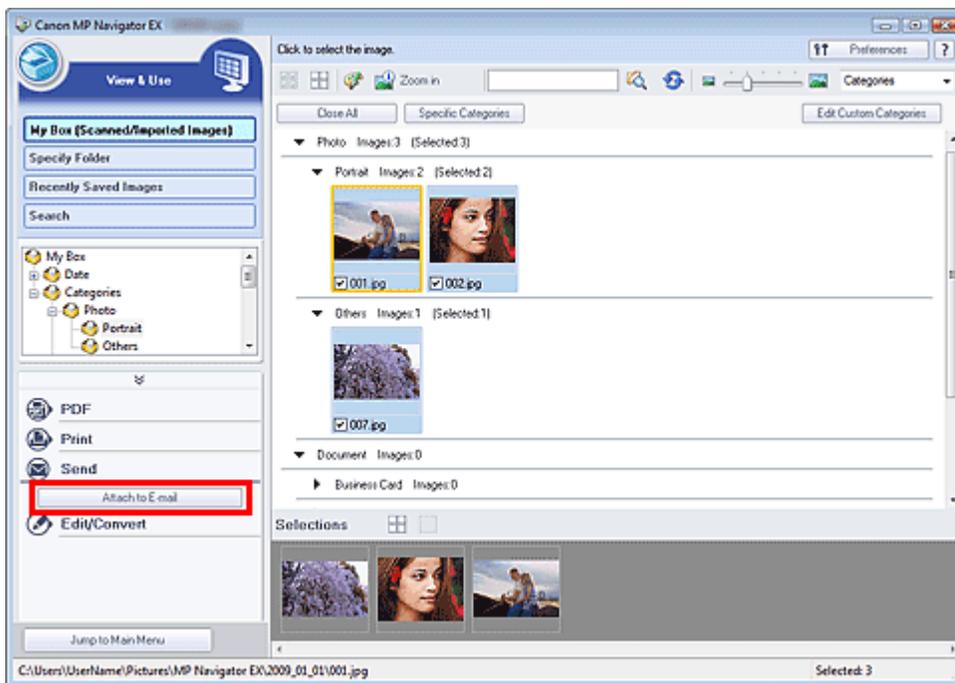

- MP Navigator EX is compatible with the following e-mail software programs:
 - Windows Mail (Windows Vista)
 - Outlook Express (Windows XP/Windows 2000)
 - Microsoft Outlook
 (If an e-mail software program does not operate properly, check that the program's MAPI is enabled. To enable MAPI, refer to the manual of the e-mail software program.)

1. Scan documents into MP Navigator EX and save them, then open the View & Use window from the Navigation Mode screen and select images.

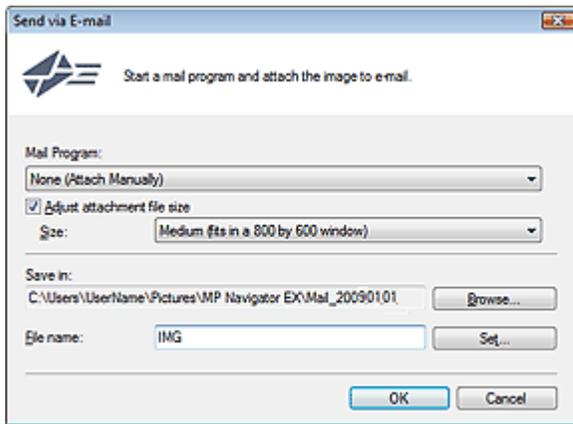

Note

- See "Let's Try Scanning" to scan images into MP Navigator EX.
- You can also select images saved on a memory card or computer.
 - ➔ Importing Images Saved on a Memory Card
 - ➔ Opening Images Saved on a Computer

2. Click Send, then click Attach to E-mail on the list.

3. Set save options as required.
 - Specify the destination folder and file name.
 - ➔ Send via E-mail Dialog Box

Note

- You can select a compression type when sending JPEG images via e-mail. Click Set... to open a dialog box and select a compression type from High(Low Compression), Standard or Low(High Compression).

4. Click OK.

Files are saved according to the settings, and the e-mail software program starts.

5. Specify the recipient, enter the subject and message, then send e-mail.

For details, refer to the manual of the e-mail software program.

[Page top](#)

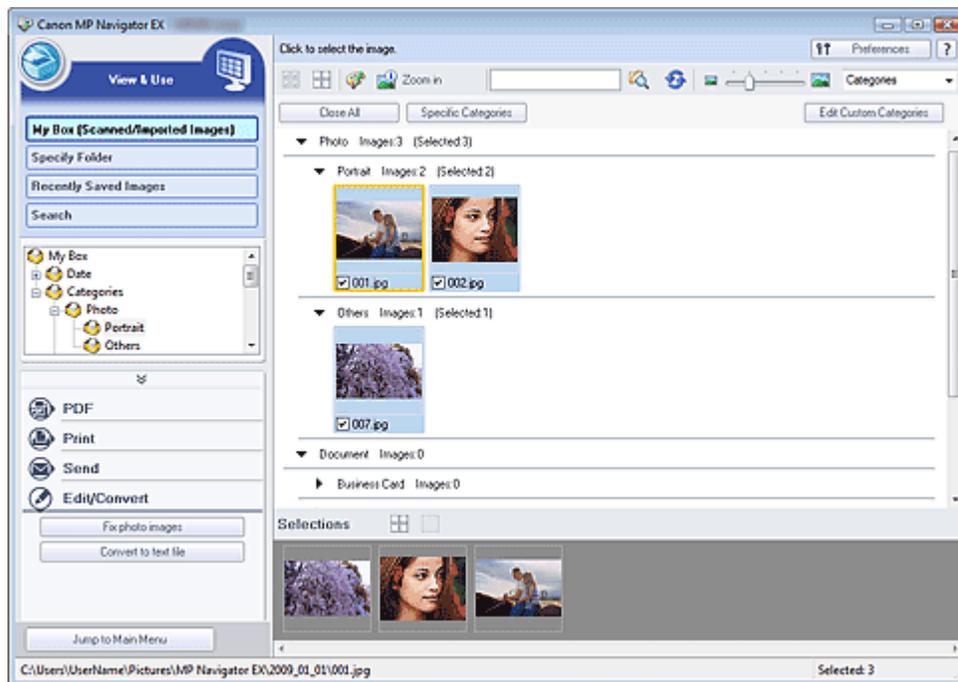

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > Utilizing Images in MP Navigator EX > Editing Files

MP Navigator EX

Editing Files

You can edit images or convert them to text using MP Navigator EX or an application that accompanies the machine. After scanning documents and saving them, open the View & Use window to select what you want to do with the images.

Note

- See "Let's Try Scanning" to scan images into MP Navigator EX.
- You can also select images saved on a memory card or computer.
 - ➡ Importing Images Saved on a Memory Card
 - ➡ Opening Images Saved on a Computer

Correcting Photo Images

You can correct/enhance images in the Correct/Enhance Images window.

1. Select images and click Edit/Convert.
2. Click Fix photo images on the list.
The Correct/Enhance Images window opens.
3. Correct/enhance images in the Correct/Enhance Images window.

Note

- See "Correct/Enhance Images Window" for details on the Correct/Enhance Images window.
- See the corresponding sections below for correcting/enhancing images.
 - ➡ Correcting/Enhancing Images Automatically
 - ➡ Correcting/Enhancing Images Manually

Converting Documents to Text

Scan text in scanned magazines and newspapers and display it in Notepad (included with Windows).

Important

- PDF files cannot be converted to text.

1. Select images and click Edit/Convert.

2. Click Convert to text file on the list.

Notepad (included with Windows) starts and editable text appears.

Note

- Only text written in languages that can be selected on the General tab can be extracted to Notepad (included with Windows). Click Set... on the General tab and specify the language according to the language of the document to be scanned.
When scanning multiple documents, you can collect the extracted text into one file.
[→ General Tab](#)
- Text displayed in Notepad (included with Windows) is for guidance only. Text in the image of the following types of documents may not be detected correctly.
 - Documents containing text with font size outside the range of 8 points to 40 points (at 300 dpi)
 - Slanted documents
 - Documents placed upside down or documents with text in the wrong orientation (rotated characters)
 - Documents containing special fonts, effects, italics, or hand-written text
 - Documents with narrow line spacing
 - Documents with colors in the background of text
 - Documents containing multiple languages

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > Utilizing Images in MP Navigator EX > Setting Passwords for PDF Files

MP Navigator EX

Setting Passwords for PDF Files

Set passwords for opening, editing and printing PDF files.

You can set two passwords: one for opening the file and one for editing/printing it.

Important

- In Windows 2000, Internet Explorer 5.5 Service Pack 2 or later is required to use this function.
- You will not be able to open/edit the file if you forget the password. Record your passwords in a safe place for future reference.
- Password-protected PDF files cannot be opened in applications not supporting PDF security.
- In some applications, the commands (print, edit, etc.) restricted by Permissions Password may differ from those in MP Navigator EX.
- Password-protected PDF files cannot be searched by text from the [View & Use Window](#).

1. Scan documents into MP Navigator EX, then click Save as PDF file.
Alternatively, edit existing files in the Create/Edit PDF file window, then click Save Selected Pages or Save All Pages.

The Save as PDF file dialog box opens.

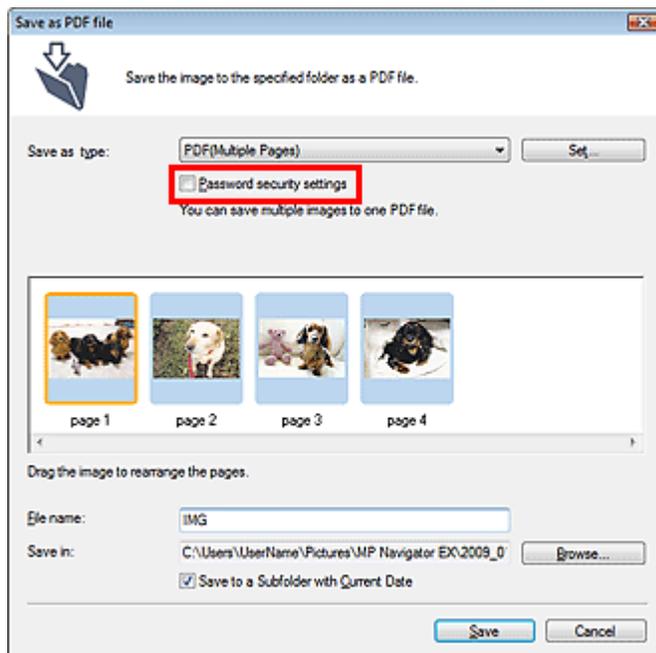

Important

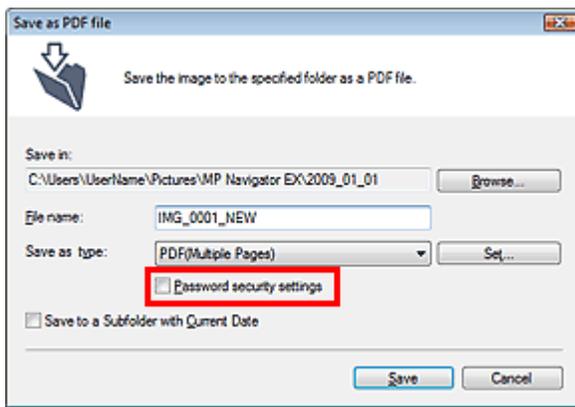

- Passwords cannot be set when images are automatically saved after scanning, such as when scanning from the One-click Mode screen or scanning using the Operation Panel of the machine.

Note

- See "[Let's Try Scanning](#)" to scan images.
- See "[Creating/Editing PDF Files](#)" to create PDF files from existing images or to edit files.

2. Select the Password security settings checkbox.

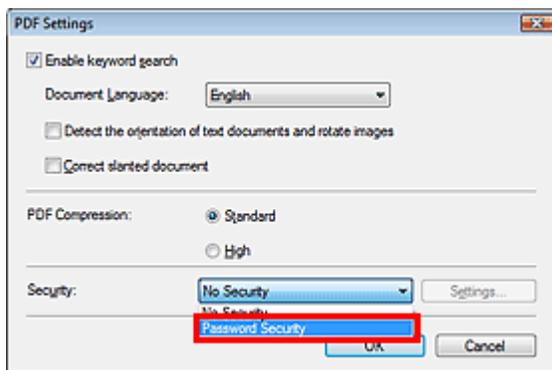

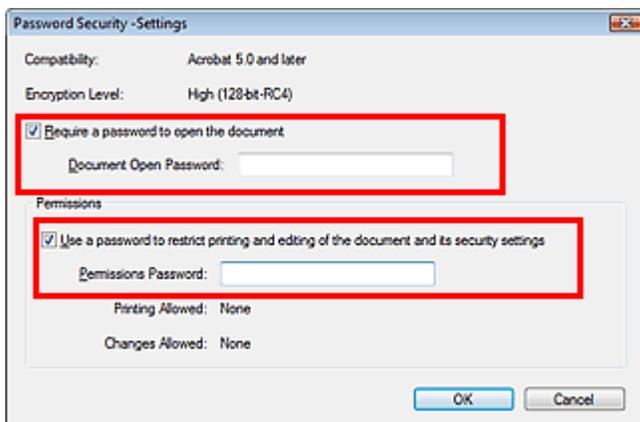

The Password Security -Settings dialog box opens.

Note

- You can also open the Password Security -Settings dialog box by clicking Set..., then selecting Password Security for Security in the PDF Settings dialog box.

- Select the Require a password to open the document or Use a password to restrict printing and editing of the document and its security settings checkbox, then enter a password.

Important

- Up to 32 single-byte alphanumeric characters can be used for the password. Passwords are case sensitive.
- Select both checkboxes to set both Document Open Password and Permissions Password. You cannot use the same password for both.

- Click OK.

The Confirm Document Open Password or Confirm Permissions Password dialog box opens.

Document Open Password

Permissions Password

5. Re-enter the password and click OK.

The Save as PDF file dialog box returns.

Important

- If you close the Save as PDF file dialog box without clicking Save, the settings in the Password Security -Settings dialog box will be deleted.
- Passwords are deleted once the file is edited. Reset the passwords when saving edited files.

Note

- If you set the passwords via the PDF Settings dialog box, the PDF Settings dialog box returns. Click OK. The Save as PDF file dialog box returns.

6. Click Save.

Files are saved according to the settings.

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > Utilizing Images in MP Navigator EX > Opening/Editing Password-protected PDF Files

MP Navigator EX

Opening/Editing Password-protected PDF Files

Enter a password to open or edit/print password-protected PDF files.

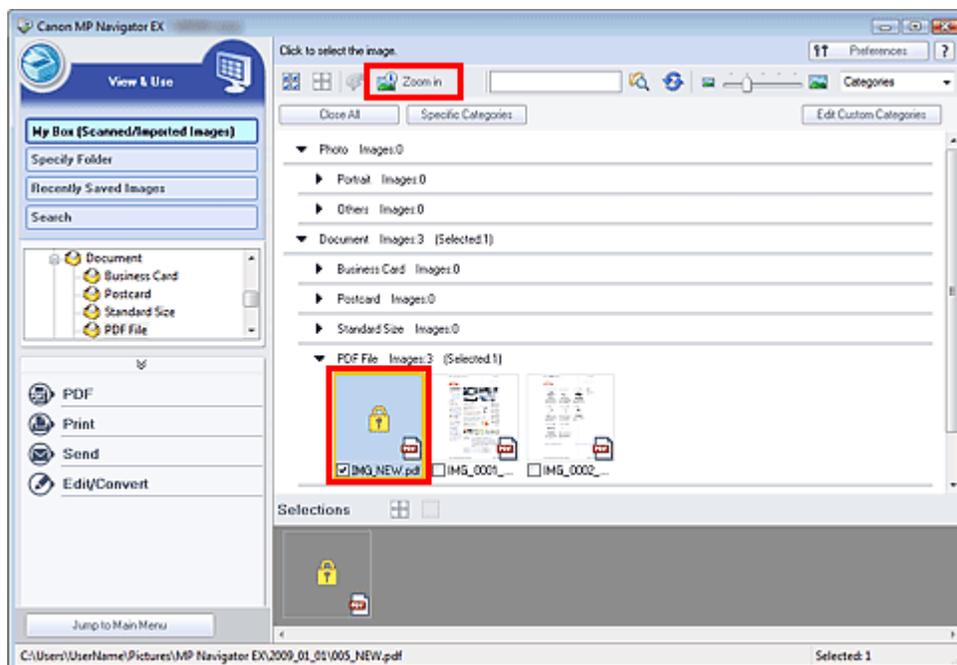

Password entry method varies by operation. The following procedures are examples only.

Important

- You can open, edit or print only PDF files whose passwords were set with MP Navigator EX. You cannot edit PDF files edited in other applications or whose passwords were set with other applications. Only MP Navigator EX version 1.1 and 2.0 or later supports opening, editing and printing password-protected PDF files.
- In Windows 2000, Internet Explorer 5.5 Service Pack 2 or later is required to open, edit or print password-protected PDF files.
- Passwords are case sensitive.
- You can create or edit up to 99 pages using MP Navigator EX.

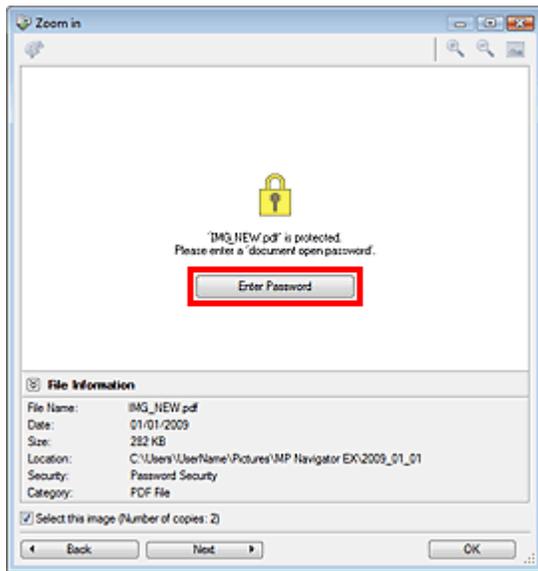

Entering a Password to Open a File

1. In the View & Use window, select the PDF file you want to open and click  Zoom in.
Alternatively, double-click the PDF file.

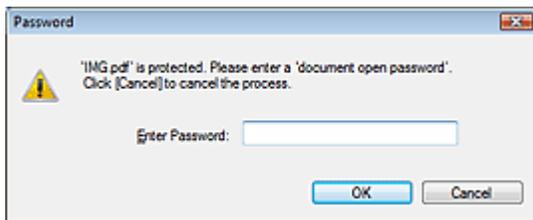

Note

- Only the Document Open Password will be required. The Permissions Password will not be required.
- If the Zoom in dialog box with a lock icon opens, click Enter Password.

2. The Password dialog box opens. Enter the password and click OK.

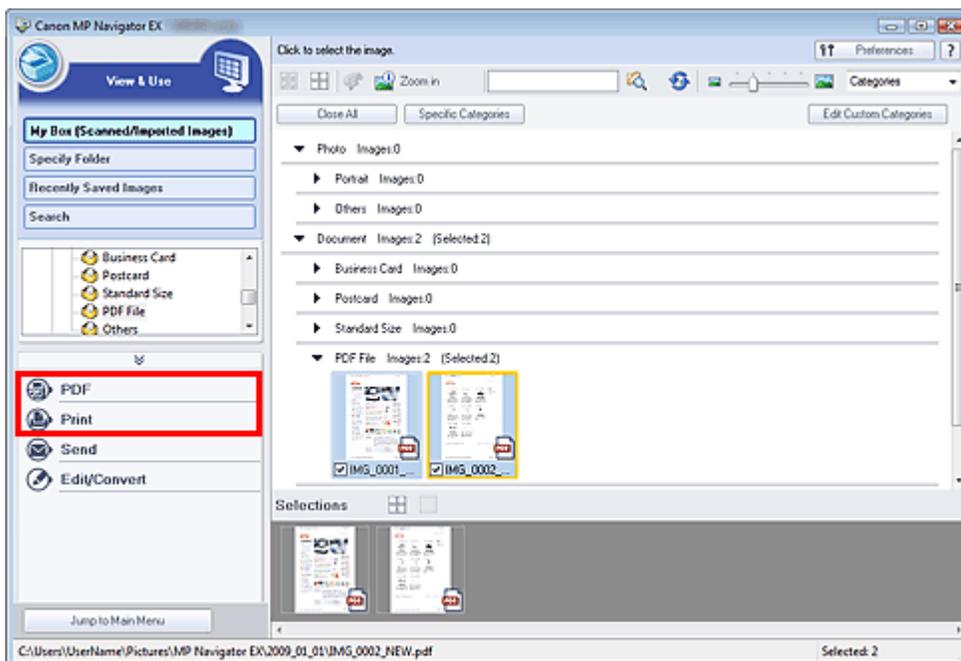

The PDF file opens in the Zoom in dialog box.

Note

- To reopen the file after closing the Zoom in dialog box, re-enter the password.

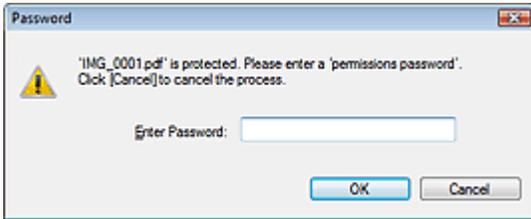

Entering a Password (Permissions Password) to Edit or Print a File

1. In the View & Use window, select PDF files and click PDF or Print.

2. To create a PDF file or edit the file, select Create/Edit PDF file on the list. To print the file, click Print Document.

In the Password dialog box, you will be prompted to enter a password.

Note

- If the Document Open Password is set as well, the Document Open Password will be required, then the Permissions Password will be required.

3. Enter the password and click OK.

The corresponding dialog box opens.

Important

- If a password-protected PDF file is edited, the passwords will be deleted. Reset the passwords.

[Page top](#) 

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > Scan Settings Dialog Box (Photos/Documents)

MP Navigator EX

Scan Settings Dialog Box (Photos/Documents)

The Scan Settings dialog box opens when you click Specify... in the Scan/Import window.

In the Scan Settings dialog box, you can make advanced scan settings.

- **Document Type**

Select the type of document to be scanned.

Scanning photos: Color Photo or Black and White Photo

Scanning text documents: Color Document, Black and White Document or Text(OCR)

Scanning magazines: Magazine(Color)

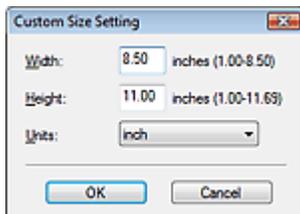

Important

- To scan correctly, select a document type that matches the document to be scanned.

- **Document Size**

Select the size of the document to be scanned.

When you select Custom, a screen in which you can specify the document size appears. Select a Units, then enter the Width and Height and click OK.

Important

- When you select Auto Detect, the image may not be scanned at the correct position and size. In that case, change the size to the actual document size (A4, Letter, etc.) and align a corner of the document with the corner at the arrow (alignment mark) of the Platen.
- You cannot select Auto Detect (Multiple Documents) or Auto Detect when Document Type is Text(OCR).

- **Scanning Resolution**

Select the resolution at which to scan documents.

➔ Resolution

Note

- The following scanning resolutions can be specified when Document Type is Text(OCR).
300 dpi / 400 dpi

• Descreen

Select this checkbox to reduce moire patterns.

Printed photos and pictures are displayed as a collection of fine dots. "Moire" is a phenomenon where uneven gradation or a stripe pattern appears when such photos or pictures printed with fine dots are scanned. Descreen is the function for reducing this moire effect.

Important

- You cannot select this checkbox when Document Type is Color Photo, Black and White Photo or Text(OCR).

Note

- Scanning takes longer than usual when you enable Descreen.

• Reduce Show-through

Select this checkbox to sharpen text in a document or reduce show-through in newspapers.

Important

- You cannot select this checkbox when Document Type is Color Photo, Black and White Photo or Text(OCR).

Note

- Select this checkbox when Document Type is text document and show-through is apparent in the scanned image.

• Unsharp Mask

Select this checkbox to emphasize the outline of the subjects and sharpen the image.

Important

- You cannot select this checkbox when Document Type is Text(OCR).

• Remove gutter shadow

Select this checkbox to correct shadows that appear between pages when scanning open booklets.

Important

- You cannot select this checkbox when Document Size is Auto Detect, Auto Detect (Multiple Documents) or Stitch Assist.
- Align the document correctly with the alignment mark on the Platen.

Note

- Use ScanGear's Advanced Mode tab to correct gutter shadows when scanning non-standard size documents or when custom cropping frames are set.
For details, see Gutter Shadow Correction in " [Image Settings](#) " (ScanGear's Advanced Mode tab).

• Correct slanted document

Select this checkbox to detect the scanned text and correct the angle (within -0.1 to -10 degrees or +0.1 to +10 degrees) of the document.

Important

- You cannot select this checkbox when Document Type is Color Photo or Black and White Photo.
- You cannot select this checkbox when Document Size is Stitch Assist.
- The inclination of the following types of documents may not be corrected, as the text cannot be detected correctly.
 - Documents in which the text lines are inclined more than 10 degrees or the angles vary by line
 - Documents containing both vertical and horizontal text
 - Documents with extremely large or small fonts

- Documents with small amount of text
- Documents containing figures/images or hand-written text
- Documents containing both vertical and horizontal lines (tables)

Note

- Scanning takes longer than usual when you enable Correct slanted document.
-

- **Detect the orientation of text documents and rotate images**

Select this checkbox to detect the orientation of the document from the scanned text and rotate the scanned image to the correct orientation. Select the language of the document to be scanned in Document Language.

Important

- You cannot select this checkbox when Document Type is Color Photo or Black and White Photo.
- You cannot select this checkbox when Document Size is Stitch Assist.
- This function may not work properly depending on the document language. Only text documents written in languages that can be selected from Document Language are supported.
- The orientation of the following types of documents may not be corrected, as the text cannot be detected correctly. In that case, select the scanned image in the Thumbnail window of the " [Photos/Documents \(Platen\) Screen \(Scan/Import Window\)](#) " and rotate it with Edit Tools.
 - Resolution is outside the range of 300 dpi to 600 dpi
 - Font size is outside the range of 8 points to 48 points
 - Documents containing special fonts, effects, italics, or hand-written text
 - Documents with patterned backgrounds

Note

- Scanning takes longer than usual when you enable Detect the orientation of text documents and rotate images.
-

- **Document Language**

Select the language of the document to be scanned.

Important

- You cannot select this checkbox when Document Type is Color Photo or Black and White Photo.
 - You cannot select this checkbox when Document Size is Stitch Assist.
-

- **Defaults**

Restores the default settings.

Advanced Guide

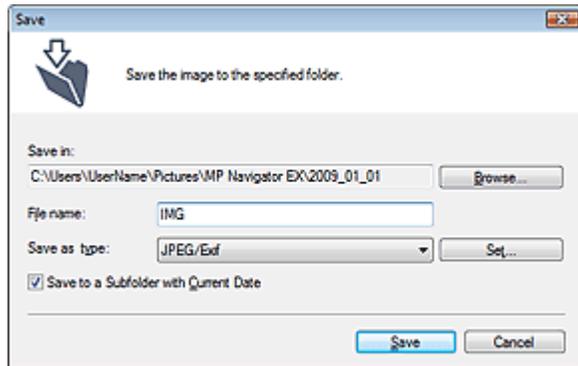

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > Save Dialog Box

MP Navigator EX

Save Dialog Box

The Save dialog box opens when you click Save in the Scan/Import window.

In the Save dialog box, you can make settings for saving images to a computer.

- **Save in**

Displays the folder in which to save the scanned images. To change the folder, click Browse... to specify another one.

The following folders are specified by default.

Windows Vista: MP Navigator EX folder in Pictures folder

Windows XP: MP Navigator EX folder in My Pictures folder

Windows 2000: MP Navigator EX folder in My Pictures folder

Important

- When saving to a memory card, enable writing on the Card Slot of the machine. For details on how to enable writing, refer to "[Setting Up the Card Slot as the Memory Card Drive of the Computer.](#)"

- **File name**

Enter the file name of the image to be saved (up to 64 characters). When saving multiple files, 4 digits are appended to each file name.

- **Save as type**

Select a file type to save the scanned images.

Select JPEG/Exif, TIFF or BMP.

Important

- You cannot select JPEG/Exif when Document Type is Text(OCR).

- **Set...**

When Save as type is JPEG/Exif

You can specify a compression type for JPEG files. Select High(Low Compression), Standard or Low(High Compression).

- **Save to a Subfolder with Current Date**

Select this checkbox to create a subfolder in the folder specified in Save in with the current date and save scanned files in it. A subfolder with a name such as "2009_01_01" (Year_Month_Date) will be created.

If this checkbox is not selected, files are saved directly in the folder specified in Save in.

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > Save as PDF file Dialog Box

MP Navigator EX

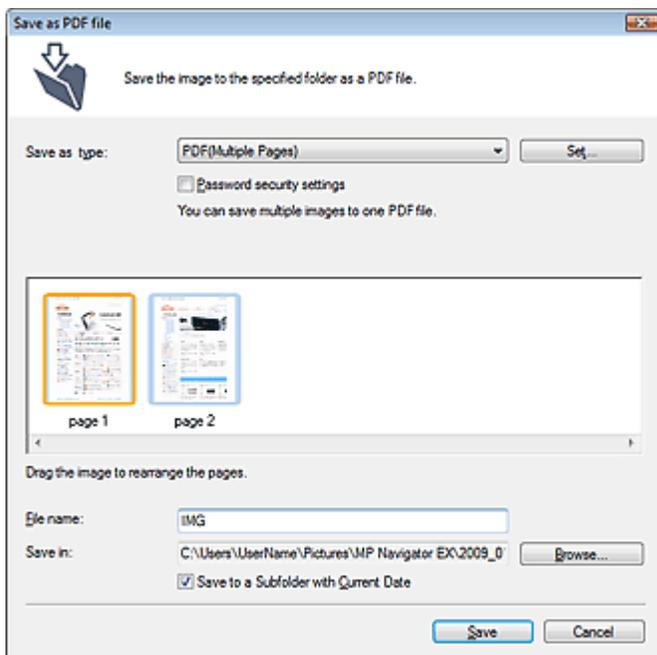

Save as PDF file Dialog Box

In the Save as PDF file dialog box, you can make advanced settings for saving scanned images as PDF files. You can save multiple documents as one PDF file or add pages to a PDF file created with MP Navigator EX.

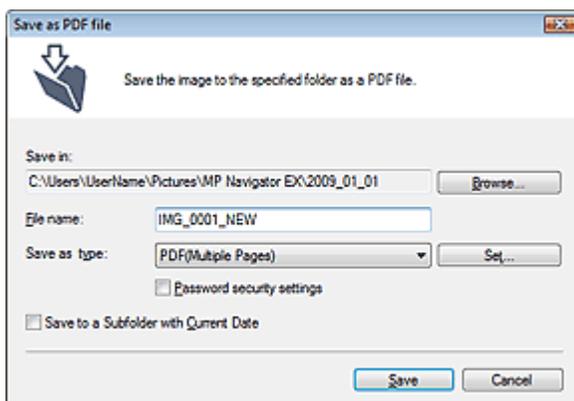

Important

- You cannot save images scanned at 10501 pixels or more in the vertical and horizontal directions.

Dialog box that opens when Save as PDF file in the Scan/Import window is clicked

Dialog box that opens when Save Selected Pages or Save All Pages is clicked in the Create/Edit PDF file window

- Save as type**
 Select a PDF file type to save the scanned images.

- **PDF**

Save each of the selected images as a separate PDF file.

- **PDF(Multiple Pages)**

Save multiple images in one PDF file.

Note

- PDF(Multiple Pages) is displayed when multiple images are selected.

- **PDF(Add Page)**

Add the scanned images to a PDF file. The images are added to the end of the PDF file. You cannot rearrange the pages of the PDF file to which the images are added.

Important

- Images can only be added to PDF files created with MP Navigator EX. You cannot specify PDF files created with other applications. PDF files edited in other applications cannot be specified as well.
- If a password-protected PDF file is edited, the passwords will be deleted. Reset the passwords.
➔ [Setting Passwords for PDF Files](#)

- **Set...**

Make advanced settings for creating PDF files. See "[PDF Settings Dialog Box](#)" for details.

- **Password security settings**

Select this checkbox to open the Password Security -Settings dialog box in which you can set passwords for opening, editing and printing created PDF files.

➔ [Setting Passwords for PDF Files](#)

- **Add to**

This is displayed when you select PDF(Add Page) for Save as type and specify the PDF file to which images are added. To change the file, click Browse... to specify another one.

Important

- Images can only be added to PDF files created with MP Navigator EX. You cannot specify PDF files created with other applications. PDF files edited in other applications cannot be specified as well.

- **File name**

Enter the file name of the image to be saved (up to 64 characters). When saving multiple files, 4 digits are appended to each file name.

- **Save in**

Displays the folder in which to save the PDF files. To change the folder, click Browse... to specify another one.

The following folders are specified by default.

Windows Vista: MP Navigator EX folder in Pictures folder

Windows XP: MP Navigator EX folder in My Pictures folder

Windows 2000: MP Navigator EX folder in My Pictures folder

- **Save to a Subfolder with Current Date**

Select this checkbox to create a subfolder in the folder specified in Save in with the current date and save scanned files in it. A subfolder with a name such as "2009_01_01" (Year_Month_Date) will be created.

If this checkbox is not selected, files are saved directly in the folder specified in Save in.

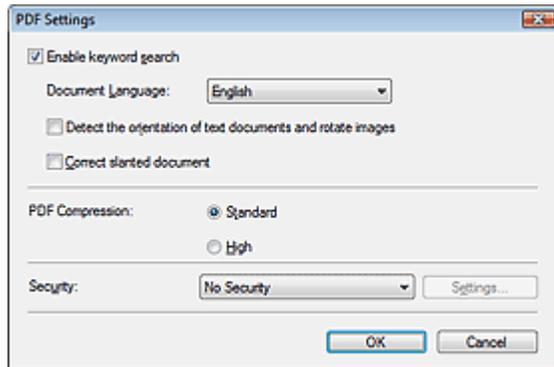

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > PDF Settings Dialog Box

MP Navigator EX

PDF Settings Dialog Box

In the PDF Settings dialog box, you can specify the PDF compression type and other advanced settings for creating PDF files.

- **Enable keyword search**

Select this checkbox to convert characters in a document to text data. This will enable an easy search by keyword.

- **Document Language**

Select the language of the document to be scanned.

- **Detect the orientation of text documents and rotate images**

Select this checkbox to detect the orientation of the document from the scanned text and rotate the scanned image to the correct orientation.

Important

- This function may not work properly depending on the document language. Only text documents written in languages that can be selected from Document Language are supported.
- The orientation of the following types of documents may not be corrected, as the text cannot be detected correctly.
 - Resolution is outside the range of 300 dpi to 600 dpi
 - Font size is outside the range of 8 points to 48 points
 - Documents containing special fonts, effects, italics, or hand-written text
 - Documents with patterned backgrounds

- **Correct slanted document**

Select this checkbox to detect the scanned text and correct the angle (within -0.1 to -10 degrees or +0.1 to +10 degrees) of the document.

Important

- The inclination of the following types of documents may not be corrected, as the text cannot be detected correctly.
 - Documents in which the text lines are inclined more than 10 degrees or the angles vary by line
 - Documents containing both vertical and horizontal text
 - Documents with extremely large or small fonts
 - Documents with small amount of text
 - Documents containing figures/images or hand-written text
 - Documents containing both vertical and horizontal lines (tables)

- **PDF Compression**

Select a compression type for saving.

- **Standard**

It is recommended that you normally select this setting.

- **High**

Compresses the file size when saving, allowing you to reduce the load on your network/server.

 **Important**

- Highly compressed PDF images may degrade if you repeatedly save them with high compression.

 **Note**

- The following images can be compressed with high efficiency.
 - Images with resolutions within the range of 75 dpi to 600 dpi.

- **Security**

Set passwords for opening, editing and printing the created PDF files.

 **Important**

- In Windows 2000, Internet Explorer 5.5 Service Pack 2 or later is required to use this function.
- This function is not available when images are automatically saved after scanning, such as when scanning from the One-click Mode screen or scanning using the Operation Panel of the machine.

 **Note**

- Select Password Security and set passwords in the Password Security -Settings dialog box.
 - ➔ [Setting Passwords for PDF Files](#)

Allows you to correct the target image (outlined in orange). Click this button to open the Correct/Enhance Images window in which you can correct/enhance images and also adjust the brightness, contrast, etc.

➔ [Correct/Enhance Images Window](#)

Important

- Image correction/enhancement cannot be applied to PDF files or black and white binary files.

-  **Zoom in**

Enlarges the target image (outlined in orange). You can also enlarge the image by double-clicking it. You can check all pages when you select a PDF file.

You can also check file information such as file name, date, size and security setting. A lock icon appears for PDF files with Document Open Password set.

➔ [Opening/Editing Password-protected PDF Files](#)

-  **(Search)**

Enter a word or phrase included in the file name, Exif information or PDF text of the image you

want to search for, then click  (Search button). For Exif information, text in Maker, Model, Description and User Comment is searched.

Note

- Search images in My Box (Scanned/Imported Images), Recently Saved Images or a selected folder and its subfolders.

-  **(Refresh)**

Refreshes the Thumbnail window contents.

-  **(Display Size)**

Changes the size of images in the Thumbnail window.

- (Sort by)**

Sorts the images in the Thumbnail window by category, date (ascending or descending) or name (ascending or descending).

Images can be sorted by category only when My Box (Scanned/Imported Images) or Specify Folder is displayed.

Thumbnail Window

- Thumbnail Window**

Scanned images are displayed.

When you select the checkbox of an image, the image appears in the Selected Images area.

Selecting an image and clicking the file name highlights the file name, allowing you to rename it.

Drag and drop an image to do the following things.

- Move from one category to another within the Thumbnail window
- Move to a category folder displayed in My Box (Scanned/Imported Images)
- Copy to a folder displayed in Specify Folder

Important

- In Windows 2000, Internet Explorer 5.5 Service Pack 2 or later is required to open password-protected PDF files.
- You cannot change the extension (.jpg, .pdf, etc.) when renaming a file.
- You cannot move or copy images to the date folders displayed in tree view in My Box (Scanned/Imported Images) or Recently Saved Images.

Note

- A lock icon appears for PDF files with Document Open Password set.
- Thumbnails may appear as "?" in the following cases.
 - Opening unsupported images
 - File size is too large and there is not enough memory to display the image
 - The file is corrupted

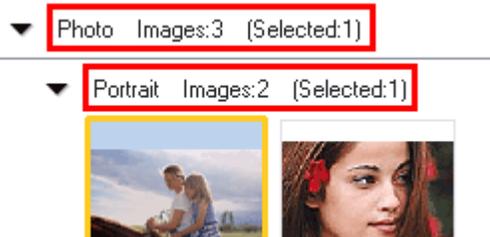

When Images are Sorted by Categories

Scanned images are displayed by category.

Note

- Some images may not be detected correctly and thus may be classified into wrong categories. In that case, drag and drop an image and move it from one category to another.

● Category name Images: N (Selected: n)

● Category name

The following categories are provided.

Photos: Portrait, Others

Documents: Business Card, Postcard, Standard Size, PDF File, Others

Custom categories: Displays your custom categories.

Unclassified: Displays images that have not yet been classified.

● Images: N

The number of images classified into the category is displayed.

● (Selected: n)

The number of images with the checkbox selected is displayed.

Note

- This portion is displayed only when one or more images are selected.

● Close All / Open All

-  **Close All**

Hides all images.

-  **Open All**

Displays all images.

Note

- Immediately after opening the View & Use window or sorting images, all images appear and Close All is displayed.
- Click Close All to change to Open All.

● Specific Categories / All Categories

You can narrow down the categories to display only those containing images. If you narrow down the categories, more images are displayed in the Thumbnail List area, allowing you to find or move images easily.

This button is displayed only when My Box (Scanned/Imported Images) or Specify Folder is displayed.

-  **Specific Categories**

Displays categories containing images, along with the contained images.

-  **All Categories**

Displays all categories and images.

Note

- Click Specific Categories to change to All Categories.
-

-  **Edit Custom Categories**

When My Box (Scanned/Imported Images) or Specify Folder is displayed, the Edit Custom Categories dialog box opens.

In the Edit Custom Categories dialog box, you can add/delete categories displayed in Custom Categories.

See "[Classifying Images into Categories](#)" for details.

-  **Classify Images**

Images imported from hard disks or memory cards appear in Unclassified. Click Classify Images to classify them automatically.

This button is displayed only when My Box (Scanned/Imported Images) or Specify Folder is displayed.

Note

- Classification may take time if there are many images to classify.
-

Selected Images Area

-  **(Cancel All)**

Cancels the selection of all images in the Selected Images area.

-  **(Cancel Selection)**

Cancels the selection of the target image (outlined in orange) in the Selected Images area.

- **Selected Images Area**

Images selected in the Thumbnail window are displayed.

Print Document Dialog Box

Click Print in the View & Use window, then click Print Document on the list to open the Print Document dialog box.

In the Print Document dialog box, you can make advanced settings for printing multiple scanned images at one time.

Note

- The setting items in the Print Document dialog box vary by printer.

- **Printer**
Select the printer to use.
- **Paper Source**
Select paper source.
- **Page Layout**
Select a print type.
 - **Normal-size Printing**
Print one image per sheet.
 - **Scaled Printing**
Print images at the selected scale (enlarged or reduced).
 - **Fit-to-Page Printing**
Print an image at the paper size (enlarged or reduced).
 - **Borderless Printing**
Print the image on an entire sheet of paper without margins.
 - **Page Layout Printing (2 on 1)**
Layout and print two images on a sheet of paper.
 - **Page Layout Printing (4 on 1)**
Layout and print four images on a sheet of paper.
- **Enlarge/Reduce**
Enlarge or reduce images to print.

-  (Enlarge/Reduce)

Print a reduced or enlarged image by specifying a scale in increments of 1%.

- **Auto**

Scale is adjusted automatically according to the detected paper width and the selected paper size. Image may be printed rotated 90 degrees depending on its size.

- **Scale**

Select a scale from the list.

Important

- At normal-size (100%), some images may be printed small or with some portions cropped. In that case, select Auto to resize the print in proportion to the paper size.

- **Paper Size**

Select the size of paper for printing. Match the size to the size of the paper set in the machine.

Note

- Selectable paper sizes depend on the selected printer.

- **Media Type**

Select the type of paper for printing. Print quality may be fixed depending on the paper type.

Note

- Selectable paper types depend on the selected printer.

- **Print Quality**

Select the print quality.

- **Density**

Click  (Density adjustment) to select the print density.

- **Copies**

Click  (Copy setting) to select the number of copies to be printed.

- **Grayscale Printing**

Select this checkbox to print the document in black and white.

- **Preview before printing**

Select this checkbox to display the print result before printing.

- **Defaults**

Restores the default settings.

- **Print**

Start printing with the specified settings.

Note

- To cancel while spooling, click Cancel. To cancel while printing, click Cancel Printing in the confirmation window for the printer status. To open a confirmation window for the printer status, click printer icon on the taskbar.

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > Print Photo Dialog Box

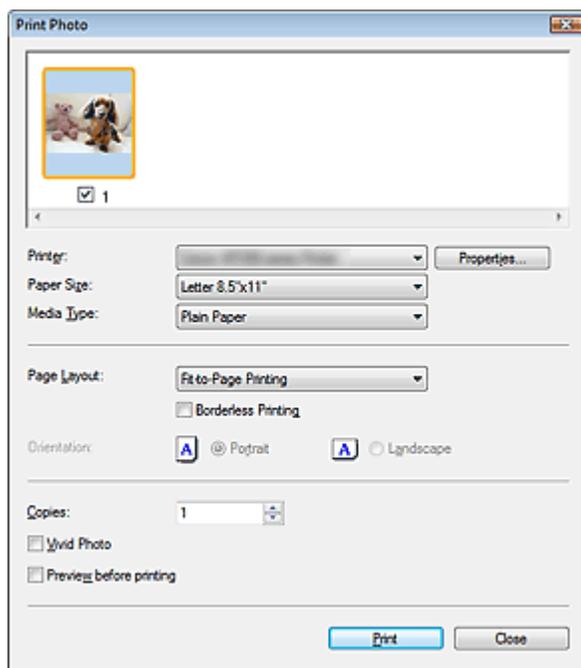

MP Navigator EX

Print Photo Dialog Box

Click Print in the View & Use window, then click Print Photo on the list to open the Print Photo dialog box.

Important

- The Print Photo dialog box will not open if Easy-PhotoPrint EX is installed. Easy-PhotoPrint EX starts instead.
- PDF files cannot be printed.

Note

- Double-click an image to display it in a different window.

• Printer

Select the printer to use.

• Properties...

Displays the selected printer's advanced setting screen.

• Paper Size

Select the size of paper for printing. Match the size to the size of the paper set in the machine.

• Media Type

Select the type of paper for printing. Print quality may be fixed depending on the paper type.

• Page Layout

Select a print type.

• Normal-size Printing

Print one image per sheet.

• Fit-to-Page Printing

Print an image at the paper size (enlarged or reduced).

• Borderless Printing

Select this checkbox to print the image on an entire sheet of paper without margins.

Important

- Page Layout setting will be disabled when you select Borderless Printing.
- This setting is only available with printers that support borderless printing.

• Orientation

Specify the print orientation.

Important

- This setting is available only when Page Layout is Normal-size Printing. For others, the image is automatically rotated according to the aspect ratio of the paper.

• Copies

Specify the number of copies to print.

• Vivid Photo

Select this checkbox to print the image in vivid colors.

• Preview before printing

Select this checkbox to display the print result before printing.

• Print

Starts printing.

Note

- Only the images in the Thumbnail window with the checkbox selected are printed.

• Close

Closes the dialog box without printing the photo.

[Page top](#)[↕]

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > Send via E-mail Dialog Box

MP Navigator EX

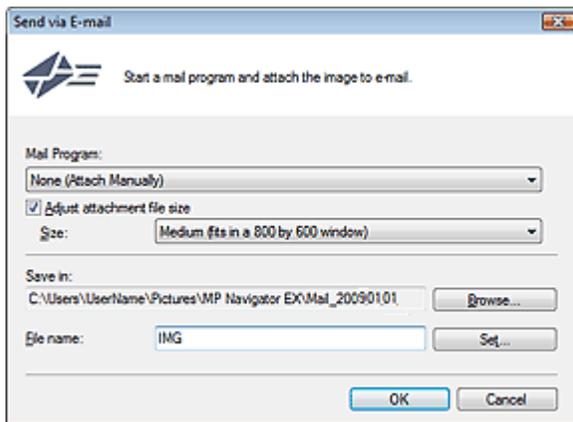

Send via E-mail Dialog Box

Click Send in the View & Use window, then click Attach to E-mail on the list to open the Send via E-mail dialog box.

In the Send via E-mail dialog box, you can make advanced settings for attaching images to e-mail.

Important

- MP Navigator EX is compatible with the following e-mail software programs:
 - Windows Mail (Windows Vista)
 - Outlook Express (Windows XP/Windows 2000)
 - Microsoft Outlook(If an e-mail software program does not operate properly, check that the program's MAPI is enabled. To enable MAPI, refer to the manual of the e-mail software program.)

• Mail Program

The e-mail software program set up via Preferences in the Navigation Mode screen is displayed. Select the e-mail software program you want to use.

• Adjust attachment file size

When Save as type is JPEG, selecting this checkbox allows you to resize the images. Select a size from Size.

• Save in

Displays the folder in which to save the images. To change the folder, click Browse... to specify another one. If resized, the resized images are saved.

The following folders are specified by default.

Windows Vista: MP Navigator EX folder in Pictures folder
Windows XP: MP Navigator EX folder in My Pictures folder
Windows 2000: MP Navigator EX folder in My Pictures folder

• File name

Enter the file name of the image to be attached (up to 64 characters). When saving multiple files, 4 digits are appended to each file name.

• Set...

You can specify a compression type for JPEG files. Select High(Low Compression), Standard or Low(High Compression).

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > Correct/Enhance Images Window

MP Navigator EX

Correct/Enhance Images Window

Click  (Image Correction/Enhancement) in the View & Use window or click Fix photo images in the Task Button area to open the Correct/Enhance Images window.

In the Correct/Enhance Images window, you can make advanced settings including image correction/enhancement and brightness/contrast adjustment.

You can also display the source image and corrected image side by side for comparison.

Important

- Image correction/enhancement cannot be applied to PDF files or black and white binary files.

Note

- The Correct/Enhance Images window can also be opened by clicking  (Image Correction/Enhancement) in the Zoom in dialog box.
- It may take a while to correct large images.
- See "View & Use Window" for details on the View & Use window.

(1) Task Area

(2) Toolbar

Task Area

Available tasks and settings vary between the Auto and Manual tabs.

Click Auto or Manual to open the corresponding tab.

Auto Tab

Use the functions in the Auto tab to apply corrections and enhancements to the entire image.

See "Correcting/Enhancing Images Automatically " for details.

- **Auto Photo Fix**

Applies automatic corrections suitable for photos.

- **Prioritize Exif Info**

Select this checkbox to apply corrections primarily based on the settings made at the time of shooting.

Deselect this checkbox to apply corrections based on the image analysis results. It is recommended that you normally select this setting.

Note

- Exif is a standard format for embedding various shooting data in digital camera images (JPEG).

- **Face Sharpener**

Sharpens out-of-focus faces.

You can adjust the effect level using the slider.

- **Digital Face Smoothing**

Enhances skin beautifully by removing blemishes and wrinkles.

You can adjust the effect level using the slider.

- **Apply to all images**

Applies the correction to all images displayed in the thumbnail list.

- **OK**

Applies the selected effect to the selected image or all images.

- **Reset Selected Image**

Cancels all corrections and enhancements applied to the selected image.

- **Save Selected Image**

Saves the corrected images selected.

- **Save All Corrected Images**

Saves all the corrected images displayed in the thumbnail list.

- **Exit**

Closes the Correct/Enhance Images window.

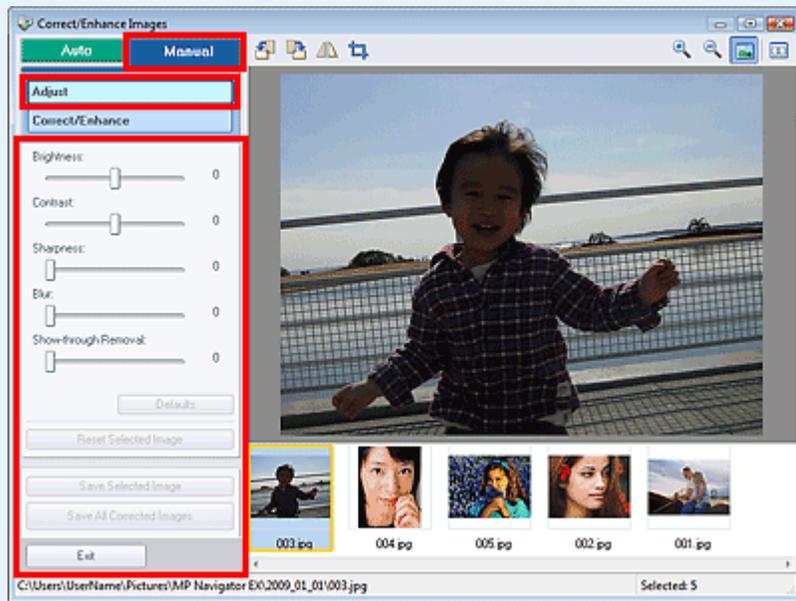

Manual Tab

Use Adjust to adjust brightness and contrast, or to sharpen the entire image.

Use Correct/Enhance to correct/enhance specific areas.

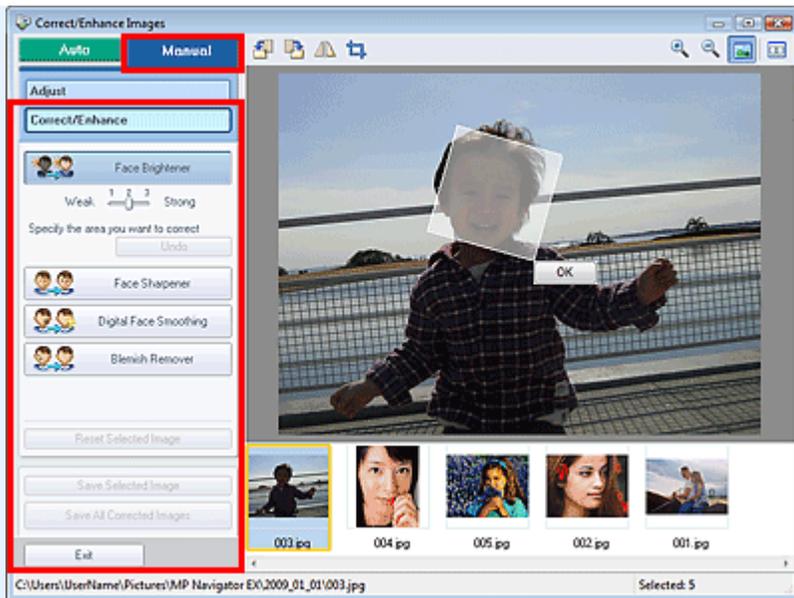

See "[Correcting/Enhancing Images Manually](#)" for details.

Adjustment

- **Brightness**
Adjusts the overall image brightness.
Move the slider to the left to darken and right to brighten the image.
- **Contrast**
Adjusts the contrast of the image. Adjust the contrast when the image is flat due to lack of contrast.
Move the slider to the left to decrease and right to increase the contrast of the image.
- **Sharpness**
Emphasizes the outline of the subjects to sharpen the image. Adjust the sharpness when the photo is out of focus or text is blurred.
Move the slider to the right to sharpen the image.
- **Blur**
Blurs the outline of the subjects to soften the image.
Move the slider to the right to soften the image.
- **Show-through Removal**
Removes show-through of text from the reverse side or removes the base color. Adjust the show-through level to prevent text on the reverse side of thin document or the base color of the document from appearing on the image.
Move the slider to the right to increase the show-through removal effect.
- **Defaults**
Resets all adjustments (brightness, contrast, sharpness, blur, and show-through removal).
- **Reset Selected Image**
Cancels all corrections, enhancements and adjustments applied to the selected image.
- **Save Selected Image**
Saves the corrected images selected.
- **Save All Corrected Images**
Saves all the corrected images displayed in the thumbnail list.
- **Exit**
Closes the Correct/Enhance Images window.

Correction/Enhancement

- **Face Brightener**
Corrects the entire image so that the selected facial area is brightened. You can adjust the effect level using the slider.
- **Face Sharpener**
Corrects the entire image to sharpen the face. You can specify the area you want to apply the effect to. You can adjust the effect level using the slider.
- **Digital Face Smoothing**
Enhances skin beautifully by removing blemishes and wrinkles. You can specify the area you want to apply the effect to. You can adjust the effect level using the slider.
- **Blemish Remover**
Removes moles. You can specify the area you want to apply the effect to.
- **OK**
Applies the selected effect to the specified area.
- **Undo**
Cancels the latest correction.
- **Reset Selected Image**
Cancels all corrections, enhancements and adjustments applied to the selected image.
- **Save Selected Image**
Saves the corrected images selected.
- **Save All Corrected Images**
Saves all the corrected images displayed in the thumbnail list.
- **Exit**
Closes the Correct/Enhance Images window.

Toolbar

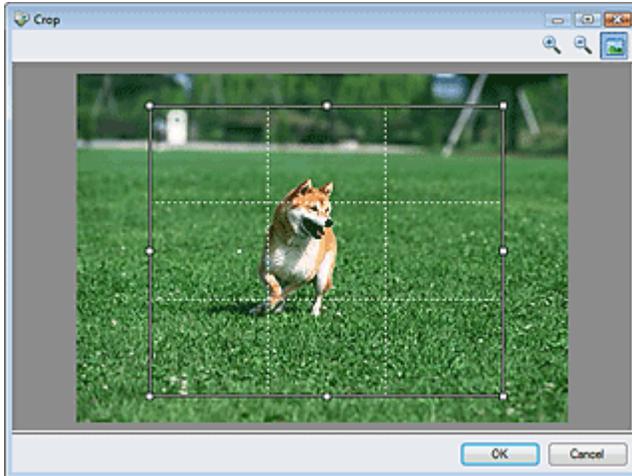

- **Toolbar**
 -  **(Rotate Left)**
Rotates the image 90 degrees counter-clockwise.
 -  **(Rotate Right)**
Rotates the image 90 degrees clockwise.

-  **(Invert)**

Inverts the image horizontally.

-  **(Trimming)**

Trimming is the act of selecting the area you want to keep in a photo and discarding the rest. In the displayed window, drag the white frame to specify the trimming area. Move the cursor inside the white frame and drag to move the trimming area.

Note

- Place the main subjects along the broken white lines or at the intersections to create a balanced image.

-  **(Enlarge)**

Enlarges the displayed image.

-  **(Reduce)**

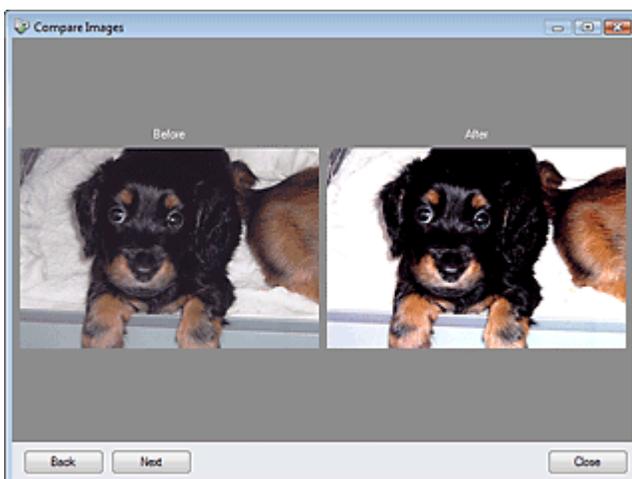

Reduces the displayed image.

-  **(Full-screen)**

Enlarges/reduces the image to display it full-screen.

-  **(Compare)**

Opens the source image for comparison. The source image appears on the left and the corrected image appears on the right.

Advanced Guide

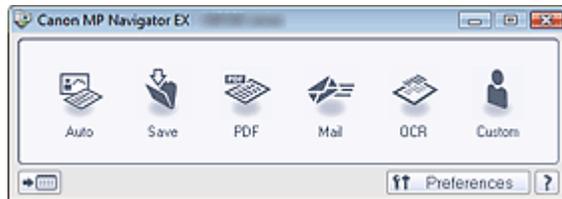

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > One-click Mode Screen

MP Navigator EX

One-click Mode Screen

Click  (Switch Mode) at the bottom left of the Navigation Mode screen to display the One-click Mode screen.

You can complete from scanning to saving, etc. at one time by simply clicking the corresponding icon.

- **Auto**

Scan documents by automatically detecting the document type. File format is automatically set. Files are saved to a computer. You can apply Auto Photo Fix as required.

When you click this icon, the Auto Scan dialog box opens and you can specify the save settings.

➔ [Auto Scan Dialog Box](#)

- **Save**

Scan documents or photos and save them to a computer. The document type can be detected automatically.

When you click this icon, the Save dialog box opens and you can specify the scan/save settings.

➔ [Save Dialog Box \(One-click Mode Screen\)](#)

- **PDF**

Scan documents and save them as PDF files.

When you click this icon, the PDF dialog box opens and you can specify the scan/save and application settings.

➔ [PDF Dialog Box](#)

- **Mail**

Scan documents or photos and attach them to e-mail.

When you click this icon, the Mail dialog box opens and you can specify the scan/save and e-mail software program settings.

➔ [Mail Dialog Box](#)

- **OCR**

Scan text documents then extract text in the image and display it in Notepad (included with Windows).

When you click this icon, the OCR dialog box opens and you can specify the scan/save settings.

➔ [OCR Dialog Box](#)

Note

- For further procedures, refer to the application's manual.

- **Custom**

Scan documents and open them in a specified application. Document type is automatically detected.

When you click this icon, the Custom dialog box opens and you can specify the scan/save and application settings.

➔ [Custom Dialog Box](#)

Note

- For further procedures, refer to the application's manual.

-  **(Switch Mode)**

Switches to Navigation Mode. The Navigation Mode screen appears.

➔ [Custom Scan with One-click Tab](#)

-  Preferences **Preferences**

The Preferences dialog box opens. In the Preferences dialog box, you can make advanced settings to MP Navigator EX functions.

➔ [Preferences Dialog Box](#)

-  **(Guide)**

Opens this guide.

Important

- The following restrictions apply when you scan with Document Type set to Auto Mode in the Save or Custom dialog box.
When you want to convert text in the scanned image to text data, specify Document Type (do not select Auto Mode).

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > Auto Scan Dialog Box

MP Navigator EX

Auto Scan Dialog Box

Click Auto Scan on the Custom Scan with One-click tab or click Auto in the One-click Mode screen to open the Auto Scan dialog box.

Important

- The following types of documents cannot be scanned correctly. In that case, click another icon in One-click Mode or on the Custom Scan with One-click tab and specify the document type or size.
 - Documents other than photos, postcards, business cards, magazines, newspapers, text documents and CD/DVD
 - A4 size photos
 - Text documents smaller than 2L (5 inches x 7 inches) (127 mm x 178 mm), such as paperback pages with the spine cut off
 - Documents printed on thin white paper
 - Long narrow documents such as panoramic photos
- Reflective CD/DVD labels may not be scanned properly.
- Place documents correctly according to the type of document to be scanned. Otherwise, documents may not be scanned correctly. See "[Placing Documents](#)" for details on how to place documents.

Note

- To reduce moire, click another icon in One-click Mode or on the Custom Scan with One-click tab and set Document Type to Magazine.

Scan Settings

● Enable Auto Photo Fix

Select this checkbox to analyze the photo image and apply suitable corrections automatically. This function is available when Auto or JPEG/Exif is selected for Save as type in Save Settings.

Important

- When Save as type is Auto, the base color tone of the following types of documents may change from the source since they are corrected as photos. In that case, deselect the checkbox and scan.
 - Postcards and business cards

- Text documents may not be scanned correctly since they may be corrected as photos depending on how you place the document. In that case, deselect the checkbox and scan.

Note

- If you select a format other than JPEG/Exif for Save as type and then select this checkbox, a message appears and Save as type will be set to Auto.

Save Settings

- **File name**

Enter the file name of the image to be saved (up to 64 characters). When saving multiple files, 4 digits are appended to each file name.

- **Save as type**

Select a file type to save the scanned images.
Select Auto, JPEG/Exif, TIFF, BMP or PDF.

Important

- When Save as type is Auto, the file format may differ depending on how you place the document.
See "[Placing Documents](#)" for details on how to place documents.
- Large documents (such as A4 size photos) that cannot be placed away from the edges/arrow (alignment mark) of the Platen may not be saved in the correct file format when Save as type is Auto. In that case, select a file format suitable for the document to be scanned.
- Images cannot be added to password-protected PDF files.

Note

- When Auto is selected, files are saved in the following formats according to the document type.
Photos, postcards, CD/DVD and business cards: JPEG
Magazines, newspapers and text documents: PDF
You can change the file format from Set....

- **Set...**

When Save as type is Auto

You can specify the file format in which to save images. Select a file format for Document and Photo each.

When Save as type is JPEG/Exif

You can specify a compression type for JPEG files. Select High(Low Compression), Standard or Low(High Compression).

When Save as type is PDF

Make advanced settings for creating PDF files. See "[PDF Settings Dialog Box](#)" for details.

- **Save in**

Displays the folder in which to save the scanned images. To change the folder, click Browse... to specify another one.

The following folders are specified by default.

Windows Vista: MP Navigator EX folder in Pictures folder

Windows XP: MP Navigator EX folder in My Pictures folder

Windows 2000: MP Navigator EX folder in My Pictures folder

- **Save to a Subfolder with Current Date**

Select this checkbox to create a subfolder in the folder specified in Save in with the current date and save scanned files in it. A subfolder with a name such as "2009_01_01" (Year_Month_Date) will be created.

If this checkbox is not selected, files are saved directly in the folder specified in Save in.

- **Start scanning by clicking the one-click button**

Select this checkbox to start scanning when you click an icon.

- **Apply**

Saves and applies the specified settings.

Click Cancel instead of Apply to cancel the specified settings.

- **Cancel**

Cancels the specified settings. The current screen closes.

- **Defaults**

Returns all settings in the screen to their defaults.

- **Scan**

Scans and saves documents with the specified settings.

When Save as type is Auto, a confirmation appears. Click Open Manual to open this guide (if it is installed).

- Reflective CD/DVD labels may not be scanned properly.
- Place documents correctly according to the type of document to be scanned. Otherwise, documents may not be scanned correctly. See "[Placing Documents](#)" for details on how to place documents.

Note

- To reduce moire, set Document Type to Magazine.

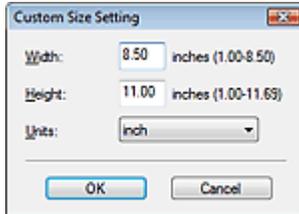

- **Color Mode**

Select how to scan the document.

- **Document Size**

Select the size of the document to be scanned.

When you select Custom, a screen in which you can specify the document size appears. Select a Units, then enter the Width and Height and click OK.

Important

- When you select Auto Detect, the image may not be scanned at the correct position and size. In that case, change the size to the actual document size (A4, Letter, etc.) and align a corner of the document with the corner at the arrow (alignment mark) of the Platen.

- **Resolution**

Select the resolution at which to scan documents.

➔ [Resolution](#)

- **Use the scanner driver**

Select this checkbox to display the ScanGear (scanner driver) screen and make advanced scan settings.

Color Mode, Document Size, Resolution and other settings in the Save dialog box will be disabled. Specify these settings in the ScanGear (scanner driver) screen.

- **Specify...**

Click to open the Scan Settings dialog box in which you can make advanced scan settings.

➔ [Scan Settings Dialog Box](#)

Save Settings

- **Automatically save the image to your computer after scanning it**

Select this to save the images to your computer as specified after scanning them.

The File name, Save as type and Save in settings will be displayed.

Important

- If you select this function, you will not be able to set passwords for PDF files.

- **File name**

Enter the file name of the image to be saved (up to 64 characters). When saving multiple files, 4 digits are appended to each file name.

- **Save as type**

Select a file type to save the scanned images.

Select Auto, JPEG/Exif, TIFF or BMP. Auto is displayed when Document Type is Auto Mode. When saving as PDF files, select PDF, PDF(Multiple Pages) or PDF(Add Page).

Important

- When Document Type is Auto Mode and Save as type is Auto, the file format may differ depending on how you place the document.
See "[Placing Documents](#)" for details on how to place documents.
- Large documents (such as A4 size photos) that cannot be placed away from the edges/arrow (alignment mark) of the Platen may not be saved in the correct file format when Save as type is

Auto. In that case, select a file format suitable for the document to be scanned.

- Images cannot be added to password-protected PDF files.
- You cannot select JPEG/Exif when Color Mode is Black and White.

Note

- When Auto is selected, files are saved in the following formats according to the document type.
Photos, postcards, CD/DVD and business cards: JPEG
Magazines, newspapers and text documents: PDF
You can change the file format from Set....
Images saved as PDF files may not open depending on the application. In that case, select an option other than Auto in Save as type.
- If you select JPEG/Exif when Document Type is not Auto Mode , the Save the JPEG/Exif file in AdobeRGB checkbox will be selectable.

• Set...

When Save as type is Auto

You can specify the file format in which to save images. Select a file format for Document and Photo each.

When Save as type is JPEG/Exif

You can specify a compression type for JPEG files. Select High(Low Compression), Standard or Low(High Compression).

When Save as type is PDF, PDF(Multiple Pages) or PDF(Add Page)

Make advanced settings for creating PDF files. See "[PDF Settings Dialog Box](#)" for details.

• Save in

Displays the folder in which to save the scanned images. To change the folder, click Browse... to specify another one.

The following folders are specified by default.

Windows Vista: MP Navigator EX folder in Pictures folder

Windows XP: MP Navigator EX folder in My Pictures folder

Windows 2000: MP Navigator EX folder in My Pictures folder

• Save to a Subfolder with Current Date

Select this checkbox to create a subfolder in the folder specified in Save in with the current date and save scanned files in it. A subfolder with a name such as "2009_01_01" (Year_Month_Date) will be created.

If this checkbox is not selected, files are saved directly in the folder specified in Save in.

• Save the JPEG/Exif file in AdobeRGB

Select this checkbox to save the images in colors that correspond to Adobe RGB.

Important

- This function is available only when Save as type is JPEG/Exif and Document Type is not Auto Mode.
- This function is not available if the Adobe RGB profile is not installed.

Note

- You cannot select this setting if the Use the scanner driver checkbox is selected.
- When you save an image with the Save the JPEG/Exif file in AdobeRGB checkbox selected, an underscore is added to the beginning of the file name. (Example: _Image0001.jpg)

• Open the save dialog box after scanning the image (Input Exif information)

Select this to open the Save dialog box after scanning the images and specify the save settings such as destination folder, file name and Exif information.

 Save Dialog Box

Note

- To set passwords for PDF files, select Open the save dialog box after scanning the image

(Input Exif information). After scanning, you can set the passwords in the Save dialog box.

➡ [Setting Passwords for PDF Files](#)

Application Settings

- **Open with**

You can select whether to open the View & Use window or Explorer after saving the images.

- **Start scanning by clicking the one-click button**

Select this checkbox to start scanning when you click an icon.

- **Apply**

Saves and applies the specified settings.

Click Cancel instead of Apply to cancel the specified settings.

- **Cancel**

Cancels the specified settings. The current screen closes.

- **Defaults**

Returns all settings in the screen to their defaults.

- **Scan**

Scans and saves documents with the specified settings.

When Save as type is Auto, a confirmation appears. Click Open Manual to open this guide (if it is installed).

[Page top](#)↕

Advanced Guide

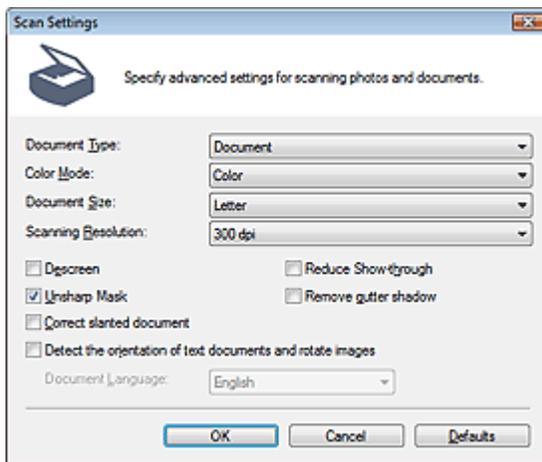

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > Scan Settings Dialog Box

MP Navigator EX

Scan Settings Dialog Box

Make advanced settings for scanning with one-click or scanning using the Operation Panel of the machine.

The Scan Settings dialog box opens when you click Specify... in a dialog box for making scan settings.

Note

- The displayed items vary by document type and how the screen was opened.

• Document Type

Select the type of document to be scanned. When Auto Mode or Auto Scan is selected, the document type is automatically detected.

In that case, Color Mode, Document Size, etc. are automatically set as well.

Important

- To scan correctly, select a document type that matches the document to be scanned.
- When opened from the Scanner Button Settings tab in the Preferences dialog box, the Document Type specified in the Scanner Button Settings tab is displayed and cannot be changed in this dialog box.

• Color Mode

Select how to scan the document.

• Color

This mode renders the image in 256 levels (8 bit) of R(ed), G(reen), and B(lue).

• Grayscale

This mode renders the image in 256 levels (8 bit) of black and white.

• Black and White

This mode renders the image in black and white. The contrast in the image is divided at certain levels (threshold level) into black and white and is rendered in two colors.

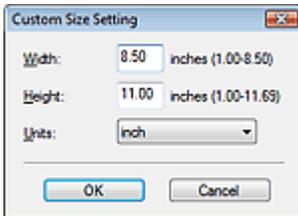

Note

- Color Mode is not displayed in the Scan Settings dialog box opened from the Scanner Button Settings tab of the Preferences dialog box.

• Document Size

Select the size of the document to be scanned.

When you select Custom, a screen in which you can specify the document size appears. Select a Units, then enter the Width and Height and click OK.

Important

- When you select Auto Detect, the image may not be scanned at the correct position and size. In that case, change the size to the actual document size (A4, Letter, etc.) and align a corner of the document with the corner at the arrow (alignment mark) of the Platen.

• Scanning Resolution

Select the resolution at which to scan documents.

→ Resolution

• Descreen

Select this checkbox to reduce moire patterns.

Printed photos and pictures are displayed as a collection of fine dots. "Moire" is a phenomenon where uneven gradation or a stripe pattern appears when such photos or pictures printed with fine dots are scanned. Descreen is the function for reducing this moire effect.

Note

- Scanning takes longer than usual when you enable Descreen.

• Reduce Show-through

Select this checkbox to sharpen text in a document or reduce show-through in newspapers.

Note

- Select this checkbox when Document Type is text document and show-through is apparent in the scanned image.

• Unsharp Mask

Select this checkbox to emphasize the outline of the subjects and sharpen the image.

• Remove gutter shadow

Select this checkbox to correct shadows that appear between pages when scanning open booklets.

Important

- You cannot select this checkbox when Document Size is Auto Detect, Auto Detect (Multiple Documents) or Stitch Assist.
- Align the document correctly with the alignment mark on the Platen.

Note

- Use ScanGear's Advanced Mode tab to correct gutter shadows when scanning non-standard size documents or when custom cropping frames are set. For details, see Gutter Shadow Correction in "Image Settings" (ScanGear's Advanced Mode tab).

• Correct slanted document

Select this checkbox to detect the scanned text and correct the angle (within -0.1 to -10 degrees or +0.1 to +10 degrees) of the document.

Important

- You cannot select this checkbox when Document Size is Stitch Assist.
- The inclination of the following types of documents may not be corrected, as the text cannot be detected correctly.

- Documents in which the text lines are inclined more than 10 degrees or the angles vary by line
- Documents containing both vertical and horizontal text
- Documents with extremely large or small fonts
- Documents with small amount of text
- Documents containing figures/images or hand-written text
- Documents containing both vertical and horizontal lines (tables)

Note

- Scanning takes longer than usual when you enable Correct slanted document.

• **Enable Auto Photo Fix (When scanning with Auto Scan using the Operation Panel)**

Select this checkbox to analyze the photo image and apply suitable corrections automatically. This function is available when Auto or JPEG/Exif is selected for Save as type in Save Settings on the Scanner Button Settings tab of the Preferences dialog box.

Important

- When Save as type is Auto, the base color tone of the following types of documents may change from the source since they are corrected as photos. In that case, deselect the checkbox and scan.
 - Postcards and business cards
- Text documents may not be scanned correctly since they may be corrected as photos depending on how you place the document. In that case, deselect the checkbox and scan.

Note

- If you select a format other than JPEG/Exif for Save as type and then select this checkbox, a message appears and Save as type will be set to Auto.

• **Detect the orientation of text documents and rotate images**

Select this checkbox to detect the orientation of the document from the scanned text and rotate the scanned image to the correct orientation. Select the language of the document to be scanned in Document Language.

Important

- You cannot select this checkbox when Document Size is Stitch Assist.
- This function may not work properly depending on the document language. Only text documents written in languages that can be selected from Document Language are supported.
- The orientation of the following types of documents may not be corrected, as the text cannot be detected correctly.
 - Resolution is outside the range of 300 dpi to 600 dpi
 - Font size is outside the range of 8 points to 48 points
 - Documents containing special fonts, effects, italics, or hand-written text
 - Documents with patterned backgrounds

Note

- Scanning takes longer than usual when you enable Detect the orientation of text documents and rotate images.

• **Document Language**

Select the language of the document to be scanned.

Important

- You cannot select this checkbox when Document Size is Stitch Assist.

• **Defaults**

Restores the default settings.

Advanced Guide

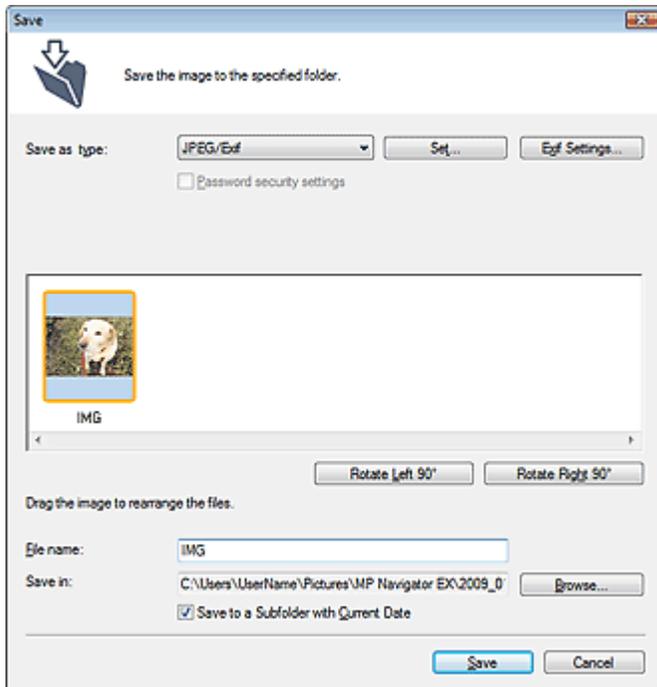

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > Save Dialog Box

MP Navigator EX

Save Dialog Box

The Save dialog box opens when you scan from Save to PC on the Custom Scan with One-click tab or from Save in the One-click Mode screen after selecting Open the save dialog box after scanning the image (Input Exif information).

You can specify the file type and destination while viewing the thumbnails.

- **Save as type**

Select a file type to save the scanned images.

Select JPEG/Exif, TIFF, BMP, PDF, PDF(Multiple Pages) or PDF(Add Page).

- **PDF**

Save each of the selected images as a separate PDF file.

- **PDF(Multiple Pages)**

Save multiple images in one PDF file.

Note

- PDF(Multiple Pages) is displayed when multiple images are scanned.

- **PDF(Add Page)**

Add the scanned images to a PDF file. The images are added to the end of the PDF file. You cannot rearrange the pages of the PDF file to which the images are added.

Important

- Images can only be added to PDF files created with MP Navigator EX. You cannot specify PDF files created with other applications. PDF files edited in other applications cannot be specified as well.
 - If a password-protected PDF file is edited, the passwords will be deleted. Reset the passwords.
➔ [Setting Passwords for PDF Files](#)

 **Important**

- PDF, PDF(Multiple Pages) and PDF(Add Page) cannot be selected for images scanned using the Operation Panel of the machine.
- You cannot select JPEG/Exif when Color Mode is Black and White.

• Set...**When Save as type is JPEG/Exif**

You can specify a compression type for JPEG files. Select High(Low Compression), Standard or Low(High Compression).

When Save as type is PDF, PDF(Multiple Pages) or PDF(Add Page)

Make advanced settings for creating PDF files. See "[PDF Settings Dialog Box](#)" for details.

• Exif Settings...

When Save as type is JPEG/Exif, you can input Exif information into the file to be saved.

➔ [Exif Settings Dialog Box](#)

• Password security settings

Select this checkbox to open the Password Security -Settings dialog box in which you can set passwords for opening, editing and printing created PDF files.

➔ [Setting Passwords for PDF Files](#)

 **Note**

- This function is available only when Save as type is PDF, PDF(Multiple Pages) or PDF(Add Page).

• Add to

This is displayed when you select PDF(Add Page) for Save as type and specify the PDF file to which images are added. To change the file, click Browse... to specify another one.

 **Important**

- Images can only be added to PDF files created with MP Navigator EX. You cannot specify PDF files created with other applications. PDF files edited in other applications cannot be specified as well.

• Rotate Left 90°/Rotate Right 90°

Rotates scanned images 90 degrees counter-clockwise or clockwise.

Select the image you want to rotate and click Rotate Left 90° or Rotate Right 90°.

• File name

Enter the file name of the image to be saved (up to 64 characters). When saving multiple files, 4 digits are appended to each file name.

• Save in

Displays the folder in which to save the scanned images. To change the folder, click Browse... to specify another one.

The following folders are specified by default.

Windows Vista: MP Navigator EX folder in Pictures folder

Windows XP: MP Navigator EX folder in My Pictures folder

Windows 2000: MP Navigator EX folder in My Pictures folder

• Save to a Subfolder with Current Date

Select this checkbox to create a subfolder in the folder specified in Save in with the current date and save scanned files in it. A subfolder with a name such as "2009_01_01" (Year_Month_Date) will be created.

If this checkbox is not selected, files are saved directly in the folder specified in Save in.

Advanced Guide

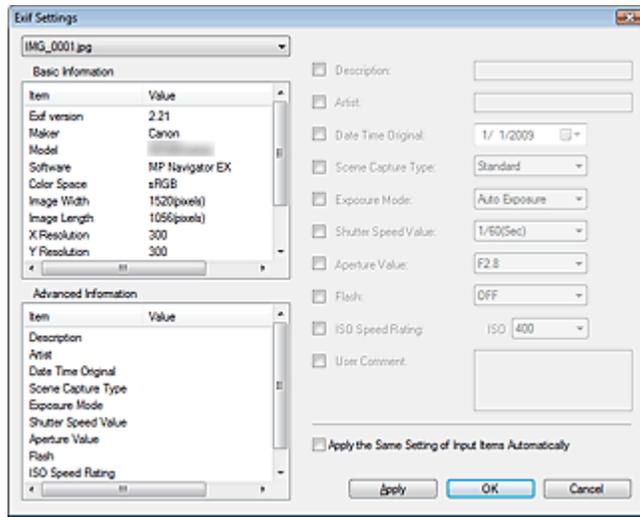

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > Exif Settings Dialog Box

MP Navigator EX

Exif Settings Dialog Box

You can input Exif information into a file to be saved. Exif is a standard format for embedding various shooting data in digital camera images (JPEG). Embedding Exif information into scanned images allows you to organize and print them along with digital camera images.

The Exif Settings dialog box can be opened when Save as type is JPEG/Exif.

- **Basic Information**

Displays the information obtained automatically from the machine or software.

- **Advanced Information**

Displays the information specified on the right side of the screen.

- **Advanced Information Settings Area**

You can input Exif information such as the title and shooting data. Select the checkbox of the items you want to specify, and select or enter information.

- **Apply the Same Setting of Input Items Automatically**

Select this checkbox to automatically display the information you specified for the previous image.

- **Apply**

After specifying all the information you need, click Apply to embed it into the image. The information appears in Advanced Information.

- **OK**

Embeds the specified information into the image and closes the screen. The specified information is saved.

- **Cancel**

Cancels the settings and closes the screen. Information is embedded when Cancel is clicked after clicking Apply.

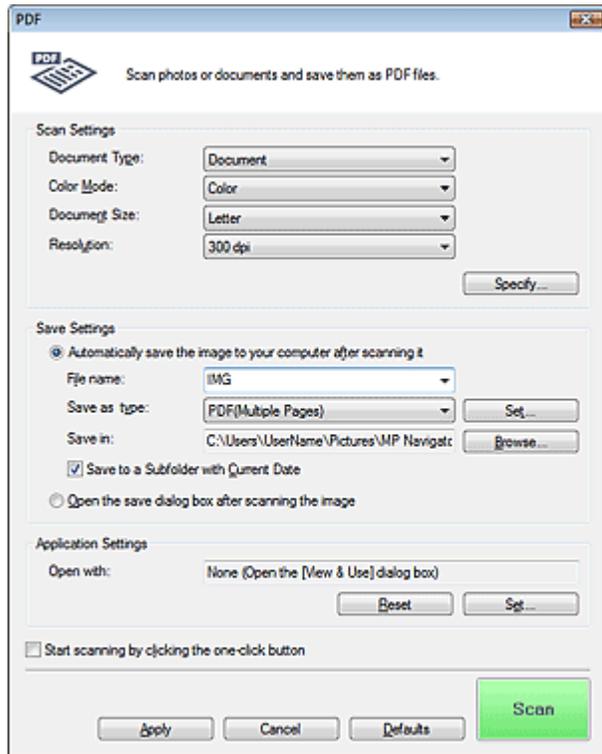

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > PDF Dialog Box

MP Navigator EX

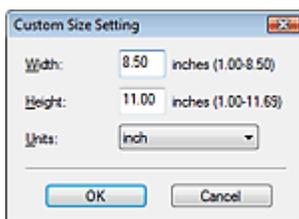

PDF Dialog Box

Click Save as PDF file on the Custom Scan with One-click tab or click PDF in the One-click Mode screen to open the PDF dialog box.

Scan Settings

- Document Type**
 Select the type of document to be scanned.
- Color Mode**
 Select how to scan the document.
- Document Size**
 Select the size of the document to be scanned.
 When you select Custom, a screen in which you can specify the document size appears. Select a Units, then enter the Width and Height and click OK.

Important

- When you select Auto Detect, the image may not be scanned at the correct position and size. In that case, change the size to the actual document size (A4, Letter, etc.) and align a corner of the

document with the corner at the arrow (alignment mark) of the Platen.

- **Resolution**

Select the resolution at which to scan documents.

➔ [Resolution](#)

- **Specify...**

Click to open the Scan Settings dialog box in which you can make advanced scan settings.

➔ [Scan Settings Dialog Box](#)

Save Settings

- **Automatically save the image to your computer after scanning it**

Select this to save the images to your computer as specified after scanning them.

The File name, Save as type and Save in settings will be displayed.

Important

- If you select this function, you will not be able to set passwords for PDF files.

- **File name**

Enter the file name of the image to be saved (up to 64 characters). When saving multiple files, 4 digits are appended to each file name.

- **Save as type**

Select a file type to save the scanned images.

Select PDF, PDF(Multiple Pages) or PDF(Add Page).

- **PDF**

Save each of the selected images as a separate PDF file.

- **PDF(Multiple Pages)**

Save multiple images in one PDF file.

- **PDF(Add Page)**

Add the scanned images to a PDF file. The images are added to the end of the PDF file. You cannot rearrange the pages of the PDF file to which the images are added.

Important

- Images cannot be added to password-protected PDF files.

Note

- Click Set... to open the PDF Settings dialog box in which you can specify the PDF compression type and other advanced settings for creating PDF files.

➔ [PDF Settings Dialog Box](#)

- See "[Creating/Editing PDF Files](#)" to delete or rearrange the pages of saved PDF files.

- **Save in**

Displays the folder in which to save the scanned images. To change the folder, click Browse... to specify another one.

The following folders are specified by default.

Windows Vista: MP Navigator EX folder in Pictures folder

Windows XP: MP Navigator EX folder in My Pictures folder

Windows 2000: MP Navigator EX folder in My Pictures folder

- **Save to a Subfolder with Current Date**

Select this checkbox to create a subfolder in the folder specified in Save in with the current date and save scanned files in it. A subfolder with a name such as "2009_01_01" (Year_Month_Date) will be created.

If this checkbox is not selected, files are saved directly in the folder specified in Save in.

- **Open the save dialog box after scanning the image**

Select this to open the Save as PDF file dialog box after scanning the images and specify the save

settings such as destination folder and file name.

➔ [Save as PDF file Dialog Box](#)

Note

- To set passwords for PDF files, select Open the save dialog box after scanning the image. After scanning, you can set the passwords in the Save as PDF file dialog box.

➔ [Setting Passwords for PDF Files](#)

Application Settings

- **Open with**

Specify an application with which to open scanned images. Drag and drop the icon of an application that supports the file format displayed in Save as type. The specified application starts after images are scanned.

Important

- Depending on the specified application, the images may not appear correctly or the application may not start.

- **Reset**

Cancels the application setting.

- **Set...**

Allows you to select an application to start.

- **Start scanning by clicking the one-click button**

Select this checkbox to start scanning when you click an icon.

- **Apply**

Saves and applies the specified settings.

Click Cancel instead of Apply to cancel the specified settings.

- **Cancel**

Cancels the specified settings. The current screen closes.

- **Defaults**

Returns all settings in the screen to their defaults.

- **Scan**

Scans and saves documents as PDF files with the specified settings.

[Page top](#) ↕

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > Save as PDF file Dialog Box

MP Navigator EX

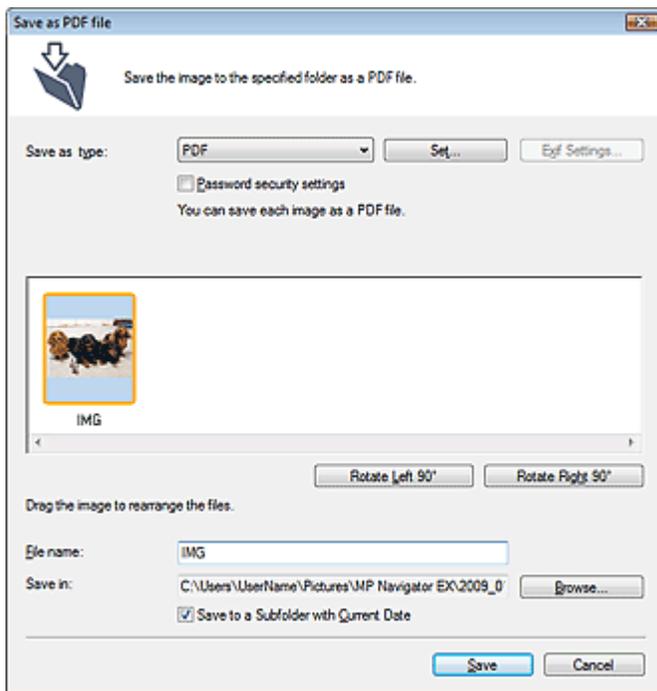

Save as PDF file Dialog Box

The Save as PDF file dialog box opens when you scan from Save as PDF file on the Custom Scan with One-click tab or from PDF in the One-click Mode screen after selecting Open the save dialog box after scanning the image.

In the Save as PDF file dialog box, you can make settings for saving images to a computer.

Important

- You cannot save images scanned at 10501 pixels or more in the vertical and horizontal directions.

• Save as type

Select a PDF file type to save the scanned images.

- PDF**
 Save each of the selected images as a separate PDF file.
- PDF(Multiple Pages)**
 Save multiple images in one PDF file.

Note

- PDF(Multiple Pages) is displayed when multiple images are scanned.

• PDF(Add Page)

Add the scanned images to a PDF file. The images are added to the end of the PDF file. You cannot rearrange the pages of the PDF file to which the images are added.

Important

- Images can only be added to PDF files created with MP Navigator EX. You cannot specify PDF files created with other applications. PDF files edited in other applications cannot be specified as well.

- PDF(Add Page) cannot be selected for images scanned using the Operation Panel of the machine.
- If a password-protected PDF file is edited, the passwords will be deleted. Reset the passwords.
➔ [Setting Passwords for PDF Files](#)

- **Set...**

Make advanced settings for creating PDF files. See "[PDF Settings Dialog Box](#)" for details.

- **Password security settings**

Select this checkbox to open the Password Security -Settings dialog box in which you can set passwords for opening, editing and printing created PDF files.

➔ [Setting Passwords for PDF Files](#)

- **Rotate Left 90°/Rotate Right 90°**

Rotates scanned images 90 degrees counter-clockwise or clockwise.

Select the image you want to rotate and click Rotate Left 90° or Rotate Right 90°.

- **File name**

Enter the file name of the image to be saved (up to 64 characters). When saving multiple files, 4 digits are appended to each file name.

- **Save in**

Displays the folder in which to save the PDF files. To change the folder, click Browse... to specify another one.

The following folders are specified by default.

Windows Vista: MP Navigator EX folder in Pictures folder

Windows XP: MP Navigator EX folder in My Pictures folder

Windows 2000: MP Navigator EX folder in My Pictures folder

- **Save to a Subfolder with Current Date**

Select this checkbox to create a subfolder in the folder specified in Save in with the current date and save scanned files in it. A subfolder with a name such as "2009_01_01" (Year_Month_Date) will be created.

If this checkbox is not selected, files are saved directly in the folder specified in Save in.

Select the resolution at which to scan documents.

➔ [Resolution](#)

- **Use the scanner driver**

Select this checkbox to display the ScanGear (scanner driver) screen and make advanced scan settings.

Color Mode, Document Size, Resolution and other settings in the Mail dialog box will be disabled.

Specify these settings in the ScanGear (scanner driver) screen.

- **Specify...**

Click to open the Scan Settings dialog box in which you can make advanced scan settings.

➔ [Scan Settings Dialog Box](#)

Save Settings

- **File Size**

Select a size from Small (fits in a 640 by 480 window), Medium (fits in a 800 by 600 window), Large (fits in a 1024 by 768 window) and Original.

- **File name**

Enter the file name of the image to be saved (up to 64 characters). When saving multiple files, 4 digits are appended to each file name.

- **Save as type**

Select a file type to save the scanned images.

Select JPEG/Exif, PDF or PDF(Multiple Pages).

Important

- You cannot set passwords for PDF files.
- You cannot select JPEG/Exif when Color Mode is Black and White.

- **Set...**

When Save as type is JPEG/Exif

You can specify a compression type for JPEG files. Select High(Low Compression), Standard or Low(High Compression).

When Save as type is PDF or PDF(Multiple Pages)

Make advanced settings for creating PDF files. See "[PDF Settings Dialog Box](#)" for details.

- **Save in**

Displays the folder in which to save the scanned images. To change the folder, click Browse... to specify another one.

The following folders are specified by default.

Windows Vista: MP Navigator EX folder in Pictures folder

Windows XP: MP Navigator EX folder in My Pictures folder

Windows 2000: MP Navigator EX folder in My Pictures folder

- **Save to a Subfolder with Current Date**

Select this checkbox to create a subfolder in the folder specified in Save in with the current date and save scanned files in it. A subfolder with a name such as "2009_01_01" (Year_Month_Date) will be created.

If this checkbox is not selected, files are saved directly in the folder specified in Save in.

Attachment Settings

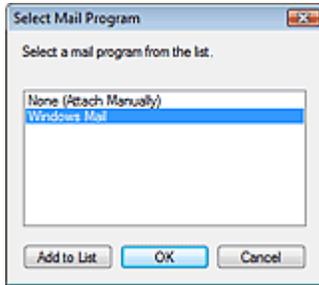

- **Mail Program**

Specify an e-mail software program.

Note

- Select Add... to open the Select Mail Program dialog box in which you can select an e-mail software program. If the e-mail software program you want to use is not listed, click Add to List and select it.

- **Start scanning by clicking the one-click button**

Select this checkbox to start scanning when you click an icon.

- **Apply**

Saves and applies the specified settings.

Click Cancel instead of Apply to cancel the specified settings.

- **Cancel**

Cancels the specified settings. The current screen closes.

- **Defaults**

Returns all settings in the screen to their defaults.

- **Scan**

Scans documents with the specified settings.

When scanning is completed, the e-mail software program starts automatically and a new message screen appears with the image attached.

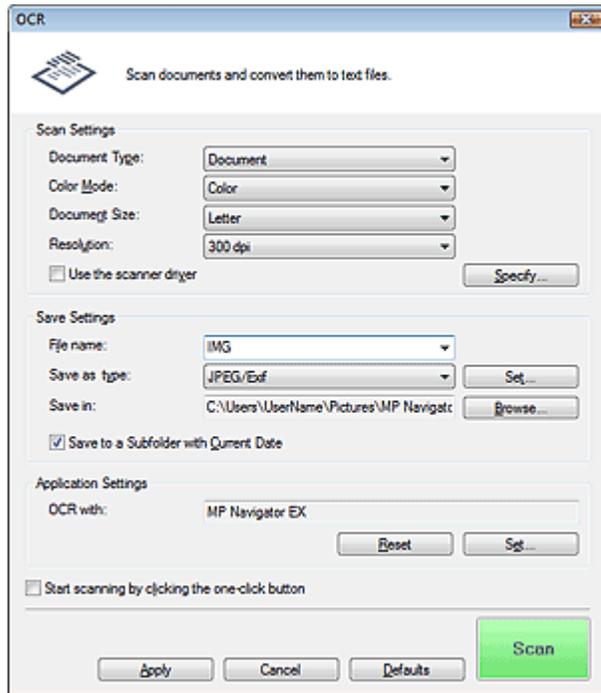

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > OCR Dialog Box

MP Navigator EX

OCR Dialog Box

Click OCR on the Custom Scan with One-click tab or in the One-click Mode screen to open the OCR dialog box.

Scan Settings

- **Document Type**

Select the type of document to be scanned.

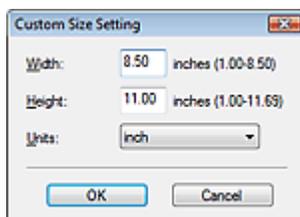

- **Color Mode**

Select how to scan the document.

- **Document Size**

Select the size of the document to be scanned.

When you select Custom, a screen in which you can specify the document size appears. Select a Units, then enter the Width and Height and click OK.

- **Resolution**

Select the resolution at which to scan documents.

➔ Resolution

- **Use the scanner driver**

Select this checkbox to display the ScanGear (scanner driver) screen and make advanced scan

settings.

Color Mode, Document Size, Resolution and other settings in the OCR dialog box will be disabled. Specify these settings in the ScanGear (scanner driver) screen.

- **Specify...**

Click to open the Scan Settings dialog box in which you can make advanced scan settings.

➔ [Scan Settings Dialog Box](#)

Note

- When scanning slanted documents, select the Correct slanted document checkbox to improve the text recognition accuracy.

Save Settings

- **File name**

Enter the file name of the image to be saved (up to 64 characters). When saving multiple files, 4 digits are appended to each file name.

- **Save as type**

Select a file type to save the scanned images.

Select JPEG/Exif, TIFF or BMP.

Important

- You cannot select JPEG/Exif when Color Mode is Black and White.

- **Set...**

When Save as type is JPEG/Exif

You can specify a compression type for JPEG files. Select High(Low Compression), Standard or Low(High Compression).

- **Save in**

Displays the folder in which to save the scanned images. To change the folder, click Browse... to specify another one.

The following folders are specified by default.

Windows Vista: MP Navigator EX folder in Pictures folder

Windows XP: MP Navigator EX folder in My Pictures folder

Windows 2000: MP Navigator EX folder in My Pictures folder

- **Save to a Subfolder with Current Date**

Select this checkbox to create a subfolder in the folder specified in Save in with the current date and save scanned files in it. A subfolder with a name such as "2009_01_01" (Year_Month_Date) will be created.

If this checkbox is not selected, files are saved directly in the folder specified in Save in.

Application Settings

- **OCR with**

Specify an OCR application.

When MP Navigator EX is specified, after the image is scanned, the text in the image is extracted and appears in Notepad (included with Windows).

Note

- Only text written in languages that can be selected on the General tab can be extracted to Notepad (included with Windows). Click Set... on the General tab and specify the language according to the language of the document to be scanned.
When scanning multiple documents, you can collect the extracted text into one file.
➔ [General Tab](#)
- Text displayed in Notepad (included with Windows) is for guidance only. Text in the image of the following types of documents may not be detected correctly.
 - Documents containing text with font size outside the range of 8 points to 40 points (at 300 dpi)

- Slanted documents
 - Documents placed upside down or documents with text in the wrong orientation (rotated characters)
 - Documents containing special fonts, effects, italics, or hand-written text
 - Documents with narrow line spacing
 - Documents with colors in the background of text
 - Documents containing multiple languages
-

- **Reset**

Cancels the application setting.

- **Set...**

Allows you to select an application.

Important

- Depending on the specified application, the text may not be extracted correctly or the application may not start.

- **Start scanning by clicking the one-click button**

Select this checkbox to start scanning when you click an icon.

- **Apply**

Saves and applies the specified settings.
Click Cancel instead of Apply to cancel the specified settings.

- **Cancel**

Cancels the specified settings. The current screen closes.

- **Defaults**

Returns all settings in the screen to their defaults.

- **Scan**

Scans documents with the specified settings.

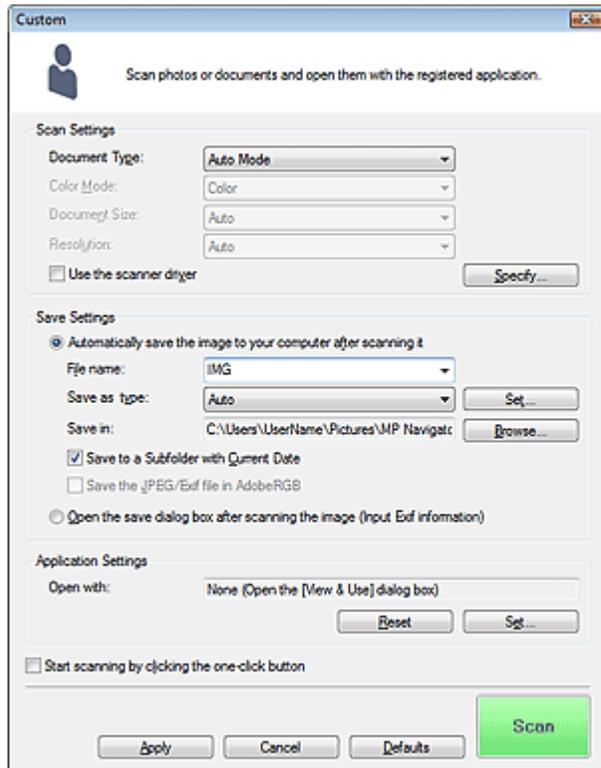

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > Custom Dialog Box

MP Navigator EX

Custom Dialog Box

Click Custom on the Custom Scan with One-click tab or in the One-click Mode screen to open the Custom dialog box.

Scan Settings

- **Document Type**

Select the type of document to be scanned. When Auto Mode is selected, the document type is automatically detected. In that case, Color Mode, Document Size and Resolution are automatically set as well.

Important

- The following types of documents cannot be scanned correctly with Auto Mode. In that case, specify the document type or size.
 - Documents other than photos, postcards, business cards, magazines, newspapers, text documents and CD/DVD
 - A4 size photos
 - Text documents smaller than 2L (5 inches x 7 inches) (127 mm x 178 mm), such as paperback pages with the spine cut off
 - Documents printed on thin white paper
 - Long narrow documents such as panoramic photos
- Reflective CD/DVD labels may not be scanned properly.
- Place documents correctly according to the type of document to be scanned. Otherwise, documents may not be scanned correctly. See "[Placing Documents](#)" for details on how to place documents.

Note

- To reduce moire, set Document Type to Magazine.

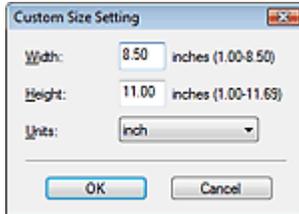

- **Color Mode**

Select how to scan the document.

- **Document Size**

Select the size of the document to be scanned.

When you select Custom, a screen in which you can specify the document size appears. Select a Units, then enter the Width and Height and click OK.

Important

- When you select Auto Detect, the image may not be scanned at the correct position and size. In that case, change the size to the actual document size (A4, Letter, etc.) and align a corner of the document with the corner at the arrow (alignment mark) of the Platen.

- **Resolution**

Select the resolution at which to scan documents.

➔ [Resolution](#)

- **Use the scanner driver**

Select this checkbox to display the ScanGear (scanner driver) screen and make advanced scan settings.

Color Mode, Document Size, Resolution and other settings in the Custom dialog box will be disabled. Specify these settings in the ScanGear (scanner driver) screen.

- **Specify...**

Click to open the Scan Settings dialog box in which you can make advanced scan settings.

➔ [Scan Settings Dialog Box](#)

Save Settings

- **Automatically save the image to your computer after scanning it**

Select this to save the images to your computer as specified after scanning them.

The File name, Save as type and Save in settings will be displayed.

Important

- If you select this function, you will not be able to set passwords for PDF files.

Note

- If an application to start is specified in Application Settings, the scanned image opens in the specified application.

- **File name**

Enter the file name of the image to be saved (up to 64 characters). When saving multiple files, 4 digits are appended to each file name.

- **Save as type**

Select a file type to save the scanned images.

Select Auto, JPEG/Exif, TIFF or BMP. Auto is displayed and selected by default when Document Type is Auto Mode.

Important

- When Document Type is Auto Mode and Save as type is Auto, the file format may differ

depending on how you place the document.

See "[Placing Documents](#)" for details on how to place documents.

- Large documents (such as A4 size photos) that cannot be placed away from the edges/arrow (alignment mark) of the Platen may not be saved in the correct file format when Save as type is Auto. In that case, select a file format suitable for the document to be scanned.
- You cannot select JPEG/Exif when Color Mode is Black and White.

Note

- When Auto is selected, files are saved in the following formats according to the document type.
Photos, postcards, CD/DVD and business cards: JPEG
Magazines, newspapers and text documents: PDF
You can change the file format from Set...
Images saved as PDF files may not open depending on the application. In that case, select an option other than Auto in Save as type.
- If you select JPEG/Exif when Document Type is not Auto Mode , the Save the JPEG/Exif file in AdobeRGB checkbox will be selectable.

● Set...

When Save as type is Auto

You can specify the file format in which to save images. Select a file format for Document and Photo each.

When Save as type is JPEG/Exif

You can specify a compression type for JPEG files. Select High(Low Compression), Standard or Low(High Compression).

● Save in

Displays the folder in which to save the scanned images. To change the folder, click Browse... to specify another one.

The following folders are specified by default.

Windows Vista: MP Navigator EX folder in Pictures folder

Windows XP: MP Navigator EX folder in My Pictures folder

Windows 2000: MP Navigator EX folder in My Pictures folder

● Save to a Subfolder with Current Date

Select this checkbox to create a subfolder in the folder specified in Save in with the current date and save scanned files in it. A subfolder with a name such as "2009_01_01" (Year_Month_Date) will be created.

If this checkbox is not selected, files are saved directly in the folder specified in Save in.

● Save the JPEG/Exif file in AdobeRGB

Select this checkbox to save the images in colors that correspond to Adobe RGB.

Important

- This function is available only when Save as type is JPEG/Exif and Document Type is not Auto Mode.
- This function is not available if the Adobe RGB profile is not installed.

Note

- You cannot select this setting if the Use the scanner driver checkbox is selected.
- When you save an image with the Save the JPEG/Exif file in AdobeRGB checkbox selected, an underscore is added to the beginning of the file name. (Example: _Image0001.jpg)

● Open the save dialog box after scanning the image (Input Exif information)

Select this to open the Save dialog box after scanning the images and specify the save settings such as destination folder, file name and Exif information.

➡ [Save Dialog Box](#)

Application Settings

- **Open with**

Specify an application with which to open scanned images. Drag and drop the icon of an application that supports the file format displayed in Save as type. The specified application starts after images are scanned.

 **Important**

- Depending on the specified application, the images may not appear correctly or the application may not start.

- **Reset**

Cancels the application setting.

- **Set...**

Allows you to select an application to start.

- **Start scanning by clicking the one-click button**

Select this checkbox to start scanning when you click an icon.

- **Apply**

Saves and applies the specified settings.

Click Cancel instead of Apply to cancel the specified settings.

- **Cancel**

Cancels the specified settings. The current screen closes.

- **Defaults**

Returns all settings in the screen to their defaults.

- **Scan**

Scans and saves documents with the specified settings.

When Save as type is Auto, a confirmation appears. Click Open Manual to open this guide (if it is installed).

Advanced Guide

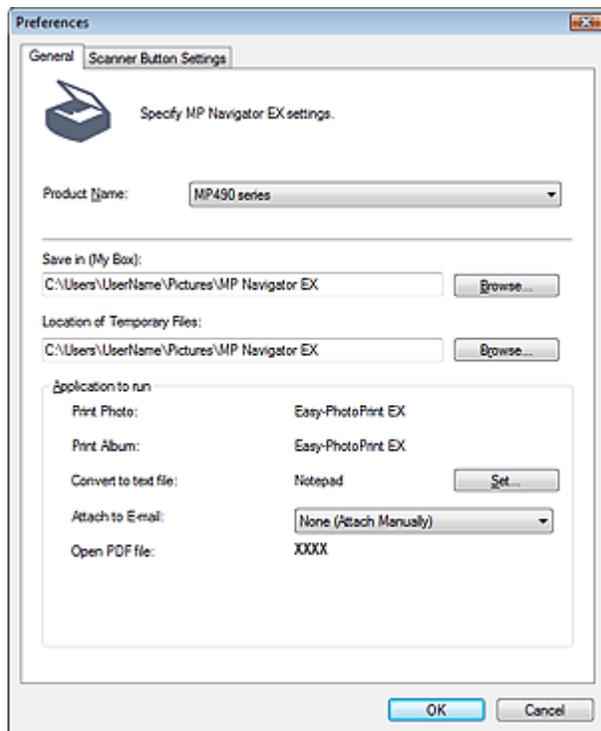

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > Preferences Dialog Box

MP Navigator EX

Preferences Dialog Box

Click Preferences to open the Preferences dialog box.

In the Preferences dialog box, you can make advanced settings to MP Navigator EX functions via the General and Scanner Button Settings tabs.

Note

- See the corresponding sections below for details on each tab.
 - ➔ General Tab
 - ➔ Scanner Button Settings Tab (Save)

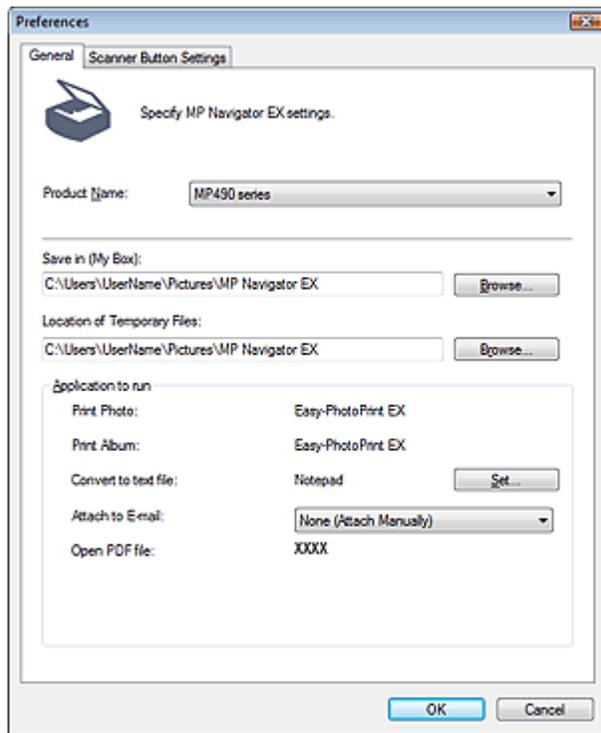

Advanced Guide

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > General Tab

MP Navigator EX

General Tab

On the General tab, you can specify general MP Navigator EX settings.

- **Product Name**

Displays the product name of the machine that MP Navigator EX is currently configured to use. If the displayed product is not the one you want to use, select the desired product from the list.

- **Save in (My Box)**

Displays the folder in which to save scanned documents. To change the folder, click Browse... to specify another one.

The following folders are specified by default.

Windows Vista: MP Navigator EX folder in Pictures folder
 Windows XP: MP Navigator EX folder in My Pictures folder
 Windows 2000: MP Navigator EX folder in My Pictures folder

- **Location of Temporary Files**

Displays the folder in which to save images temporarily. To change the folder, click Browse... to specify another one.

Important

- An error may occur if you set the destination to the root directory of the drive on which the operating system is installed. Be sure to specify a folder.
- An error may occur if you set the destination to a network folder. Be sure to specify a local folder.

- **Application to run**

Displays the applications that can be started via MP Navigator EX. Install the applications from the *Setup CD-ROM* that accompanies the machine.

For Attach to E-mail, you can select an e-mail software program to start.

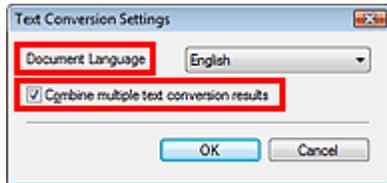

For Open PDF file, the application associated with the .pdf file extension by the operating system is displayed.

Important

- You can change which items are installed during installation from the *Setup CD-ROM* by selecting Custom Install. If you choose not to install some applications with Custom Install, the corresponding MP Navigator EX functions will be unavailable. To use those functions, install the corresponding applications.

Note

- For Convert to text file, Notepad (included with Windows) is displayed. Click Set... to open a dialog box, then specify Document Language and how to scan multiple documents.

- Document Language
Specify the language according to the language of the document to be scanned. Only text written in languages that can be selected in the Document Language can be extracted to Notepad.
- Combine multiple text conversion results
When scanning multiple documents, select the checkbox to collect the conversion results (text) into one file. This checkbox is selected by default.
When the checkbox is selected, you can scan up to 99 pages at one time.
Deselect the checkbox to display each conversion result (text) in a separate file.
When the checkbox is not selected, you can scan up to 10 pages at one time.

Advanced Guide

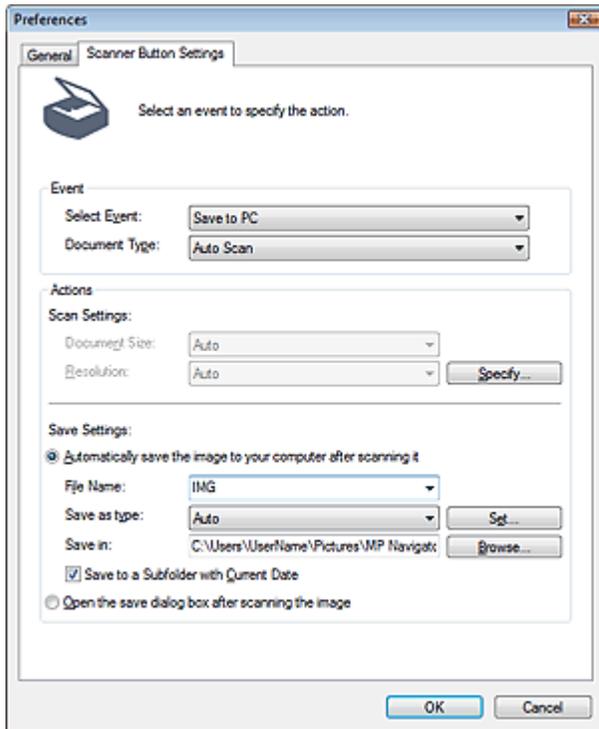

Advanced Guide > Scanning > Scanning with the Bundled Application Software > MP Navigator EX Screens > Scanner Button Settings Tab (Save)

MP Navigator EX

Scanner Button Settings Tab (Save)

On the Scanner Button Settings tab, you can specify the following settings.

You can specify how to respond when scanning using the Operation Panel of the machine.

Event

- **Select Event**

Save to PC is set.

- **Document Type**

Auto Scan is set. The document type is automatically detected.

Important

- The following types of documents cannot be scanned correctly with Auto Scan. In that case, specify the document type or size in MP Navigator EX.
See "[Scanning Photos and Documents](#)" to scan images using MP Navigator EX.
 - Documents other than photos, postcards, business cards, magazines, newspapers, text documents and CD/DVD
 - A4 size photos
 - Text documents smaller than 2L (5 inches x 7 inches) (127 mm x 178 mm), such as paperback pages with the spine cut off
 - Documents printed on thin white paper
 - Long narrow documents such as panoramic photos
- Reflective CD/DVD labels may not be scanned properly.
- Place documents correctly according to the type of document to be scanned. Otherwise, documents may not be scanned correctly.
See "[Placing Documents](#)" for details on how to place documents.

Actions

Scan Settings

- **Document Size**
This setting is automatically set.
- **Resolution**
This setting is automatically set.
- **Specify...**
Click to open the Scan Settings dialog box in which you can make advanced scan settings.
➔ [Scan Settings Dialog Box](#)

Save Settings

- **Automatically save the image to your computer after scanning it**
Select this to save the images to your computer as specified after scanning them.
The File Name, Save as type and Save in settings will be displayed.

Important

- If you select this function, you will not be able to set passwords for PDF files.

- **File Name**
Enter the file name of the image to be saved (up to 64 characters).
- **Save as type**
Select a file type to save the scanned images.
Select Auto, JPEG/Exif, TIFF or BMP. Auto is displayed by default.

Important

- When Document Type is Auto Scan and Save as type is Auto, the file format may differ depending on how you place the document.
See "[Placing Documents](#)" for details on how to place documents.
- Large documents (such as A4 size photos) that cannot be placed away from the edges/arrow (alignment mark) of the Platen may not be saved in the correct file format when Save as type is Auto. In that case, select a file format suitable for the document to be scanned.

Note

- If you select the Enable Auto Photo Fix checkbox in the Scan Settings dialog box and then select a format other than JPEG/Exif for Save as type, a message appears and the Enable Auto Photo Fix checkbox will be deselected.
- When Auto is selected, files are saved in the following formats according to the document type.
Photos, postcards, CD/DVD and business cards: JPEG
Magazines, newspapers and text documents: PDF
You can change the file format from Set...

- **Set...**

When Save as type is Auto

You can specify the file format in which to save images. Select a file format for saving Document and Photo each.

When Save as type is JPEG/Exif

You can specify a compression type for JPEG files. Select High(Low Compression), Standard or Low(High Compression).

- **Save in**
Displays the folder in which to save the scanned images. To change the folder, click Browse...

to specify another one.

The following folders are specified by default.

Windows Vista: MP Navigator EX folder in Pictures folder

Windows XP: MP Navigator EX folder in My Pictures folder

Windows 2000: MP Navigator EX folder in My Pictures folder

- **Save to a Subfolder with Current Date**

Select this checkbox to create a subfolder in the folder specified in Save in with the current date and save scanned files in it. A subfolder with a name such as "2009_01_01" (Year_Month_Date) will be created.

If this checkbox is not selected, files are saved directly in the folder specified in Save in.

- **Open the save dialog box after scanning the image**

Select this to open the save dialog box after scanning the images and specify the save settings such as destination folder, file name and Exif information.

Note

- See "[Save Dialog Box](#)" for details.

MP Navigator EX

Importing Images Saved on a Memory Card

You can import images (including PDF files created via scanning using the Operation Panel) saved on a memory card, and save them to a computer or print them using MP Navigator EX. You can also attach them to e-mail, or edit them using an application that accompanies the machine.

When saving PDF files, you can select whether to enable keyword search, and also specify the compression type and other advanced settings.

Important

- Do not remove or insert memory cards while they are being accessed or the Access Lamp of the machine is flashing.
- The machine can only detect one memory card at a time. Do not simultaneously insert multiple memory cards.
- When switching to another memory card of the same type or inserting another memory card in a different Card Slot, make sure that the Access Lamp of the machine is not flashing, then remove the memory card. Then, insert another memory card.
- The machine's Card Slot (memory card) may become inaccessible. In that case, restart the machine or turn it off and reconnect the USB cable.

1. Insert a memory card containing images/PDF files into the machine's Card Slot.

For details on how to insert a memory card into the machine, refer to the on-screen manual: *Basic Guide*.

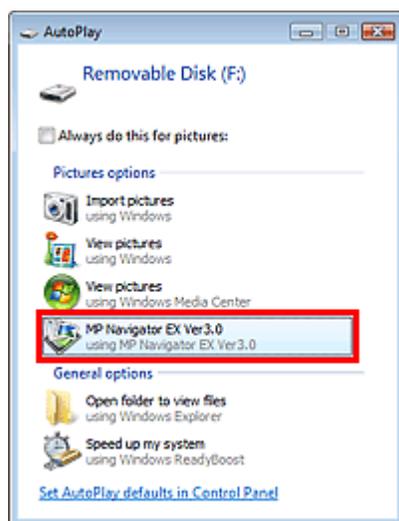

2. Start MP Navigator EX as follows.

➔ Windows Vista/Windows XP

➔ Windows 2000

• Windows Vista/Windows XP

The program selection screen appears. Click MP Navigator EX Ver3.0.

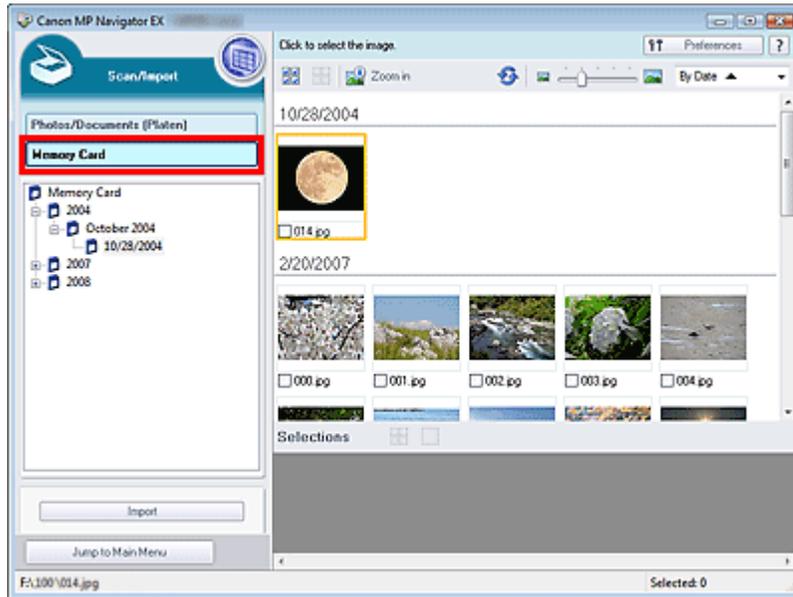

Note

- If you want to start MP Navigator EX every time a memory card is inserted into the machine, follow these steps.
Windows Vista:
Select the Always do this for pictures checkbox and click MP Navigator EX Ver3.0.

Windows XP:

Select MP Navigator EX Ver3.0, then select the Always do the selected action. checkbox and click OK.

The Memory Card screen of the Scan/Import window appears, and the images and PDF files saved on the memory card appear in the Thumbnail window.

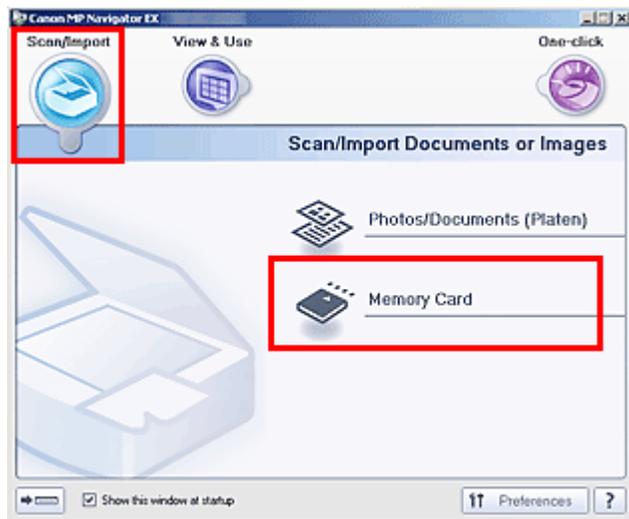

Note

- See "[Memory Card Screen \(Scan/Import Window\)](#)" for details on the Memory Card screen (Scan/Import window).

Windows 2000

Start MP Navigator EX and open the Navigation Mode screen.

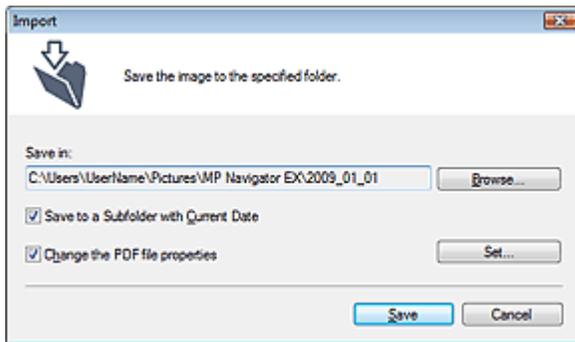

➔ [Starting MP Navigator EX](#)

Point to Scan/Import and click Memory Card. The Memory Card screen of the Scan/Import window appears, and the images and PDF files saved on the memory card appear in the Thumbnail window.

3. Select the checkboxes of the images and PDF files you want to import, then click Import.

The Import dialog box opens. Specify the folder in which to save the imported files.

- **Save in**

Displays the folder in which to save the imported images and PDF files. To change the folder, click **Browse...** to specify another one.

The following folders are specified by default.

Windows Vista: MP Navigator EX folder in Pictures folder

Windows XP: MP Navigator EX folder in My Pictures folder

Windows 2000: MP Navigator EX folder in My Pictures folder

- **Save to a Subfolder with Current Date**

Select this checkbox to create a subfolder in the folder specified in **Save in** with the current date and save imported files in it. A subfolder with a name such as "2009_01_01" (Year_Month_Date) will be created.

If this checkbox is not selected, files are saved directly in the folder specified in **Save in**.

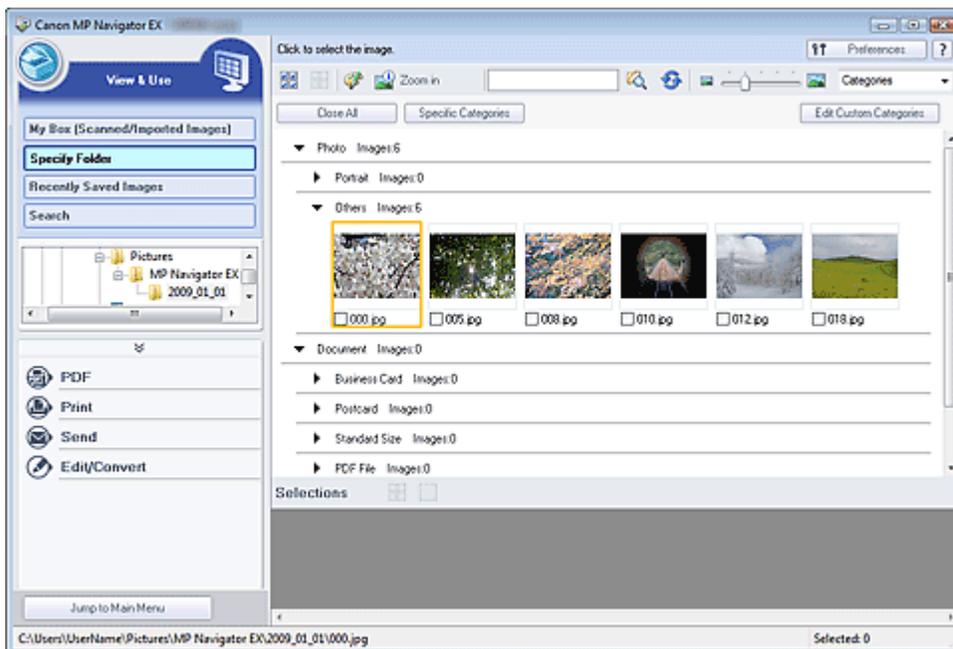

- **Change the PDF file properties**

This option is displayed when the memory card contains a PDF file.

Select this checkbox to change the PDF file settings. You can also change the settings of PDF files created via scanning using the Operation Panel. Click **Set...** to open a dialog box in which you can specify advanced settings. See "[PDF Settings Dialog Box](#)" for details.

4. Click **Save**.

The imported images and PDF files appear in the **View & Use** window.

See the corresponding sections below for details on using the imported images and PDF files.

ScanGear

What Is ScanGear (Scanner Driver)?

ScanGear (scanner driver) is software required for scanning documents. It enables you to specify the output size and make image corrections when scanning.

ScanGear (scanner driver) can be started from MP Navigator EX or from other applications that are compatible with a standard interface called TWAIN. (ScanGear (scanner driver) is a TWAIN-compatible driver.)

What You Can Do with This Software

This software enables you to preview scan results or set document type and output size, etc. when scanning documents. It is useful when you want to scan in a specific color tone, as it allows you to make various corrections and adjust brightness, contrast, etc.

Screens

There are three modes: Basic Mode, Advanced Mode and Auto Scan Mode.

Switch modes by clicking a tab on the upper right of the screen.

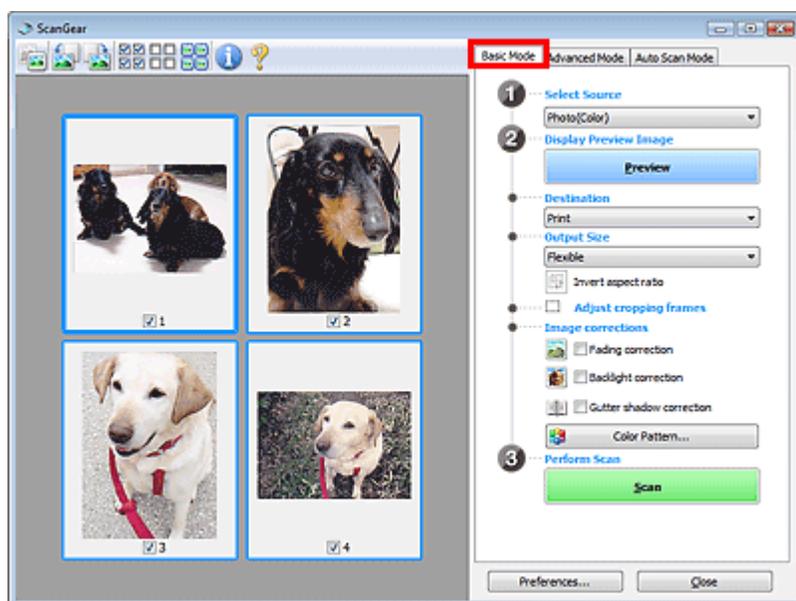

Note

- ScanGear (scanner driver) starts in the last used mode.
- Settings are not retained when you switch between modes.

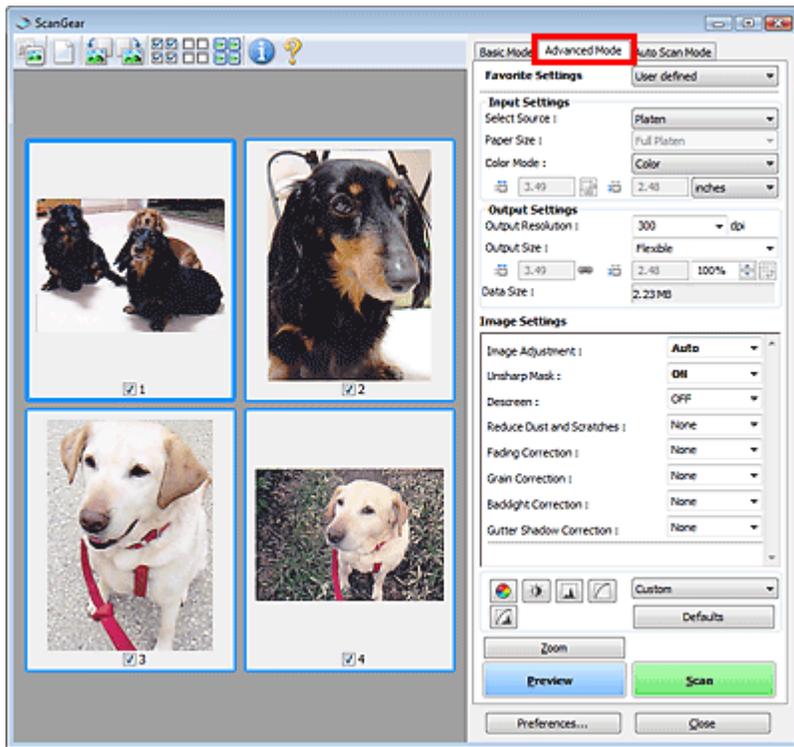

Basic Mode

Use Basic Mode to scan easily by following three simple on-screen steps (1 , 2 and 3).

Advanced Mode

Use Advanced Mode to specify color mode, output resolution, image brightness, color tone, etc. when scanning.

Auto Scan Mode

Use Auto Scan Mode to scan easily by simply placing the document on the Platen and clicking Scan.

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > Scanning with Advanced Settings Using ScanGear (Scanner Driver) > Starting ScanGear (Scanner Driver)

ScanGear

Starting ScanGear (Scanner Driver)

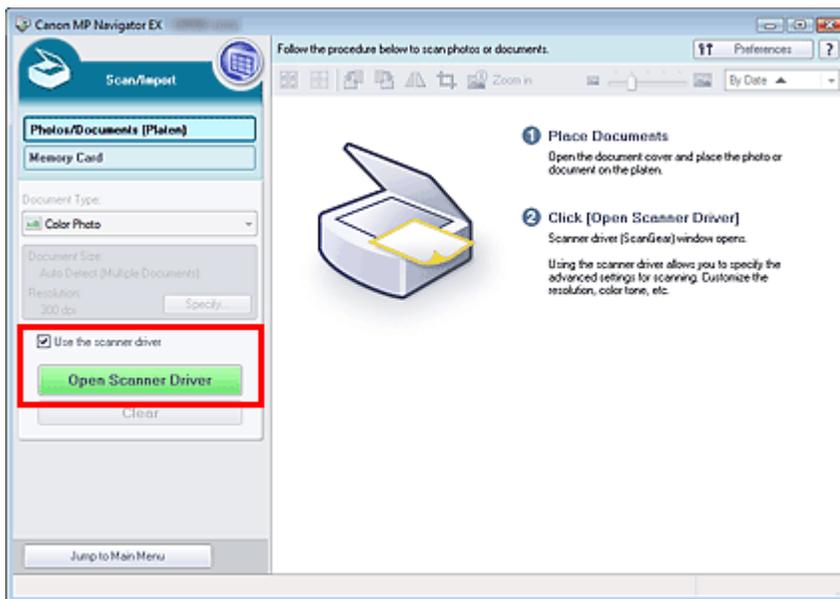

Use ScanGear (scanner driver) to make image corrections and color adjustments when scanning. ScanGear (scanner driver) can be started from MP Navigator EX or an application.

Starting from MP Navigator EX

Navigation Mode Screen

Follow these steps to start ScanGear (scanner driver) from the Navigation Mode screen of MP Navigator EX.

1. Start MP Navigator EX and open the Navigation Mode screen.
➔ Starting MP Navigator EX
2. Point to Scan/Import and click Photos/Documents (Platen).
The Scan/Import window opens.
3. Select the Use the scanner driver checkbox, then click Open Scanner Driver.

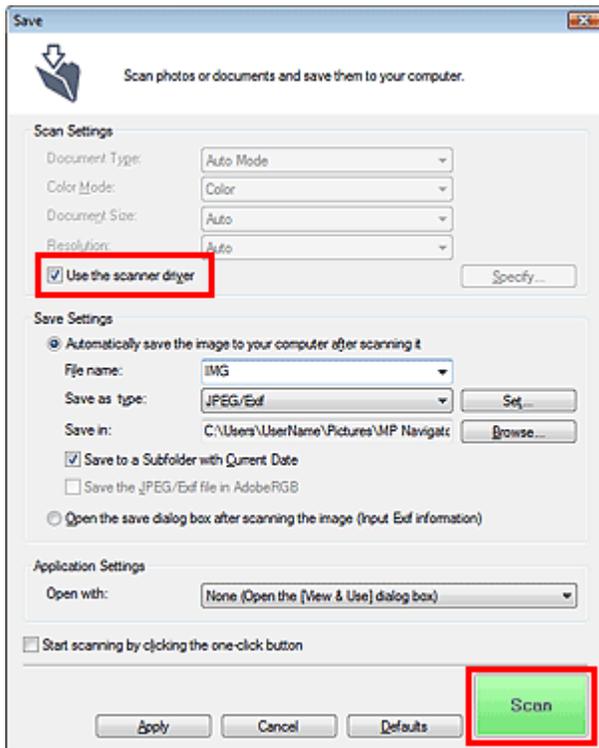

The ScanGear (scanner driver) screen appears.

One-click Mode Screen

Follow these steps to start ScanGear (scanner driver) from the One-click Mode screen of MP Navigator EX.

1. Start MP Navigator EX and open the One-click Mode screen.
➔ Starting MP Navigator EX
2. Click the corresponding icon.
The corresponding dialog box opens.

3. Select the Use the scanner driver checkbox in Scan Settings, then click Scan.

The ScanGear (scanner driver) screen appears.

Important

- Use the scanner driver is not displayed in the PDF dialog box or Auto Scan dialog box.

Starting from an Application

Follow these steps (example) to start ScanGear (scanner driver) from an application.

The procedure varies depending on the application. For details, refer to the application's manual.

1. Start the application.
2. On the File menu of the application, select Select Source and select the machine.
3. Select the command to scan a document (Scan/Import, Acquire image, etc.).

The ScanGear (scanner driver) screen appears.

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > Scanning with Advanced Settings Using ScanGear (Scanner Driver) > Scanning in Basic Mode

ScanGear

Scanning in Basic Mode

In Basic Mode, you can scan easily by following the on-screen steps.

This section explains how to scan a single document.

See "Scanning Multiple Documents at One Time with ScanGear (Scanner Driver) " to scan multiple documents at one time.

Important

- The following types of documents may not be cropped correctly. In that case, click  (Thumbnail) on the Toolbar to switch to whole image view and scan.
 - Photos that have a whitish border
 - Documents printed on white paper, hand-written text, business cards, etc.
 - Thin documents
 - Thick documents
- The following types of documents cannot be cropped correctly.
 - Documents smaller than 1.18 inches (3 cm) square
 - Photos that have been cut to various shapes

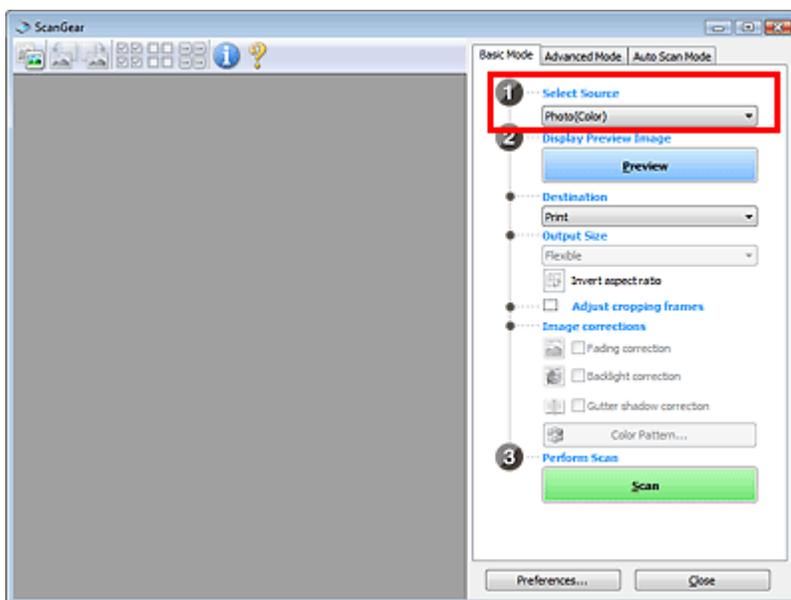

1. Place the document on the Platen, then start ScanGear (scanner driver).

➔ Starting ScanGear (Scanner Driver)

Important

- Place the document face-down on the Platen and align an upper corner of the document with the corner at the arrow (alignment mark) of the Platen.

2. Set Select Source according to the document placed on the Platen.

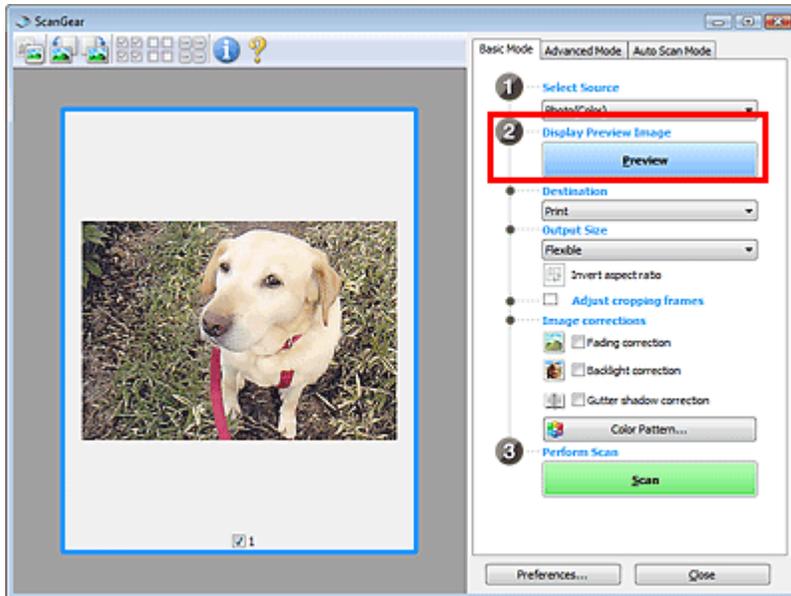

Note

- To scan magazines containing many color photos, select Magazine(Color).

3. Click Preview.

Preview image appears in the Preview area.

**Note**

- Colors are adjusted based on the document type selected in Select Source.

4. Set Destination.**5. Set Output Size.**

Output size options vary by the items selected in Destination.

6. Adjust the scan area (cropping frame) as required.

Adjust the size and position of the cropping frame (scan area) on the preview image.

➔ [Adjusting Cropping Frames](#)

7. Set Image corrections as required.**8. Click Scan.**

Scanning starts.

Note

- Click  (Information) to open a dialog box in which you can check the current scan settings (document type, etc.).
- ScanGear's response after scanning can be specified in Status of ScanGear dialog after scanning on the Scan tab of the Preferences dialog box.

ScanGear

Scanning Multiple Documents at One Time with ScanGear (Scanner Driver)

You can scan two or more photos (small documents) on the Platen at one time in Basic Mode and Advanced Mode of ScanGear (scanner driver).

This section explains how to scan multiple documents from the Basic Mode tab.

Important

- To scan multiple documents as a single image, scan in whole image view.
- The following types of documents may not be cropped correctly. In that case, adjust the cropping frames (scan areas) in whole image view and scan.
 - Photos that have a whitish border
 - Documents printed on white paper, hand-written text, business cards, etc.
 - Thin documents
 - Thick documents
- ➔ [Scanning Multiple Documents in Whole Image View](#)
- The following types of documents cannot be cropped correctly.
 - Documents smaller than 1.18 inches (3 cm) square
 - Photos that have been cut to various shapes

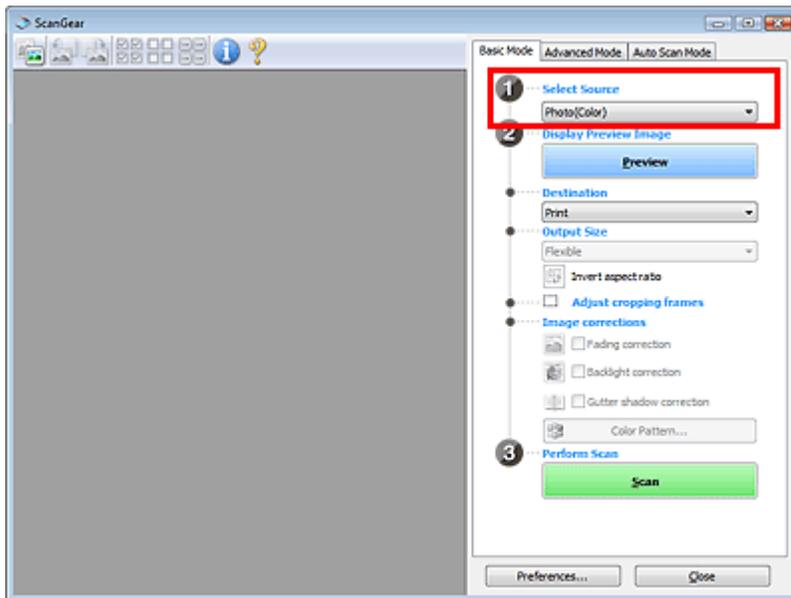

Note

- See "[Scanning in Auto Scan Mode](#)" to scan easily by automatically detecting the document type.
- You can also scan multiple documents at one time from the Advanced Mode tab. Use the Advanced Mode tab to make advanced scan settings such as the color mode, output resolution, image brightness and color tone.
- See the corresponding sections below for details on the Basic Mode tab and Advanced Mode tab.
 - ➔ [Basic Mode Tab](#)
 - ➔ [Advanced Mode Tab](#)

1. Place the document on the Platen, then start ScanGear (scanner driver).

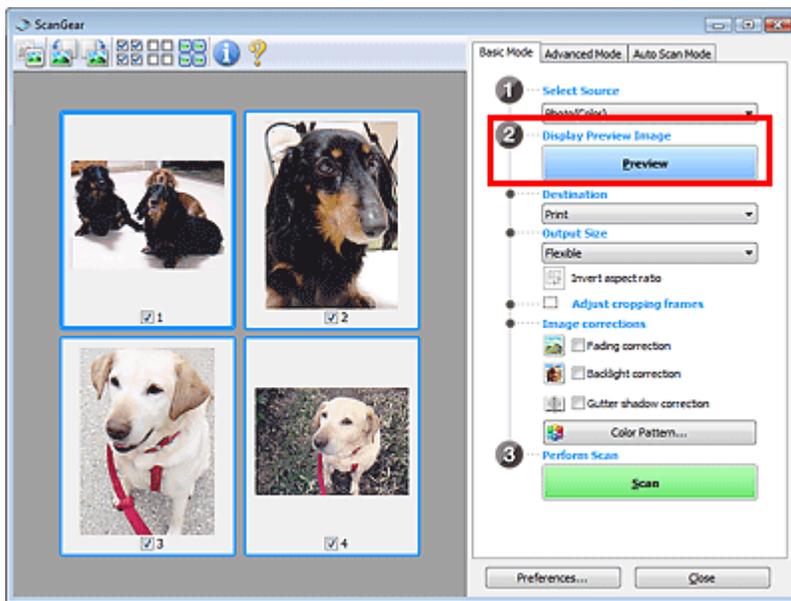

- ➔ [Placing Documents](#)
- ➔ [Starting ScanGear \(Scanner Driver\)](#)

2. Set Select Source according to the document placed on the Platen.

3. Click Preview.

Thumbnails of the preview images appear in the Preview area. Images are cropped (scan areas are specified) automatically according to the document size.

4. Set Destination.

5. Set Output Size.

6. Adjust the scan areas (cropping frames) and set Image corrections as required.

Note

- You can correct each image separately. Select the frame you want to correct.
- In thumbnail view, you can only create one cropping frame (scan area) per image. To create multiple cropping frames in an image, scan in whole image view.
 - ➔ [Scanning Multiple Documents in Whole Image View](#)

7. Select the images you want to scan.

Select the checkboxes of the images you want to scan.

- Click Scan.

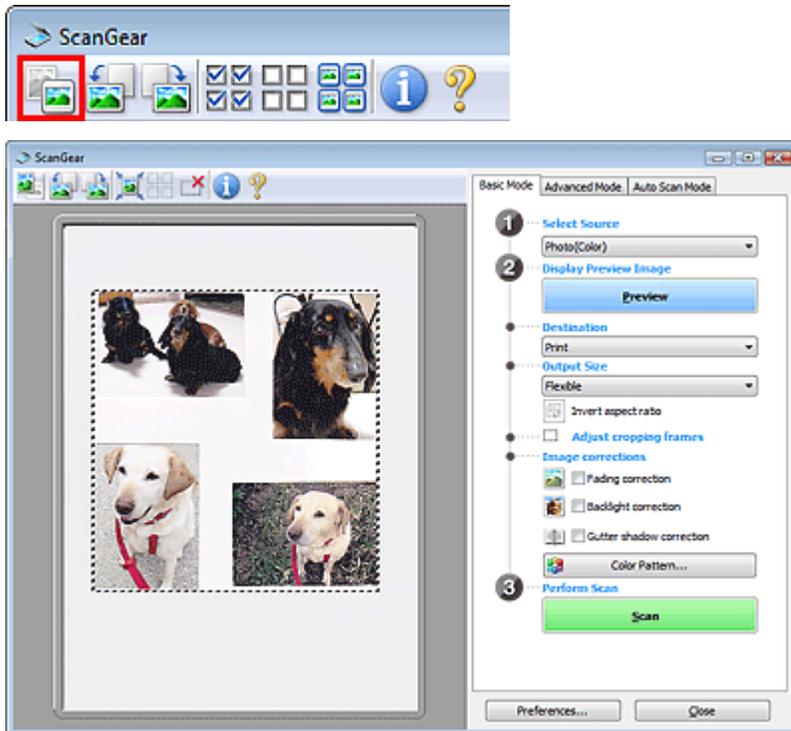

Scanning Multiple Documents in Whole Image View

Follow these steps if thumbnails are not displayed correctly when previewed or if you want to scan multiple documents as a single image.

Note

- Positions of slanted documents are not corrected in whole image view.

- After previewing images, click  (Thumbnail) on the Toolbar. Switch to whole image view.

Note

- When the whole image is displayed, the icon changes to  (Whole Image).

- Adjust the scan areas (cropping frames).

Adjust the size and position of the cropping frame (scan area) on the preview image. You can also create two or more cropping frames.

If an area is not specified, the document will be scanned at the document size (Auto Crop). If an area is specified, only the portion in the specified area will be scanned.

➔ [Adjusting Cropping Frames](#)

- Set Destination.
- Set Output Size.
- Set Image corrections as required.
- Click Scan.

Areas framed by broken lines are scanned.

 **Note**

- ScanGear's response after scanning can be specified in Status of ScanGear dialog after scanning on the Scan tab of the Preferences dialog box.

[Page top](#)↑

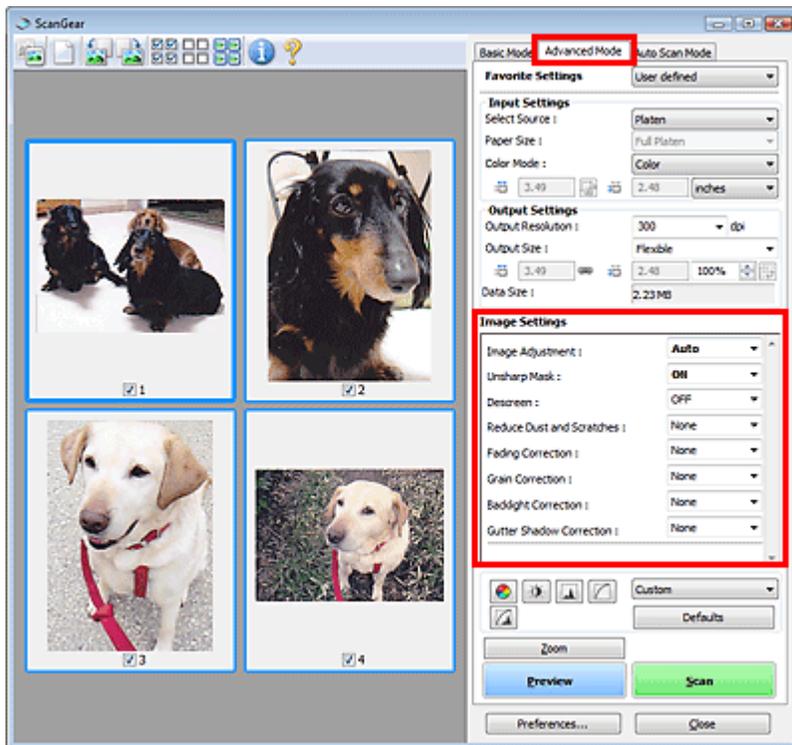

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > Correcting Images and Adjusting Colors with ScanGear (Scanner Driver) > Correcting Images (Unsharp Mask, Reduce Dust and Scratches, Fading Correction, etc.)

ScanGear

Correcting Images (Unsharp Mask, Reduce Dust and Scratches, Fading Correction, etc.)

The Image Settings functions in Advanced Mode tab of ScanGear (scanner driver) allow you to enhance the outline of the subjects, reduce dust/scratches and correct faded colors when scanning images.

Setting Items

Click  (Arrow) of a function and select an item from the pull-down menu.

Important

- Do not apply these functions to images without moire, dust/scratches or faded colors. The color tone may be adversely affected.
- See "Image Settings" for details and precautions on each function.

Note

- See "Scanning in Advanced Mode" to start ScanGear (scanner driver) in Advanced Mode tab and scan.

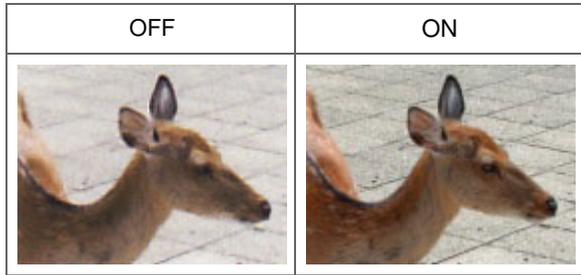

Adjusting the image brightness and color tone

Set Image Adjustment to Auto, Photo, Magazine, Newspaper or Document according to the document type.

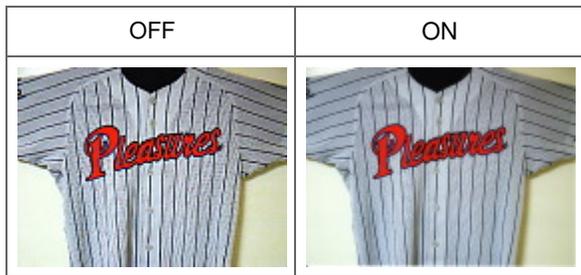

Sharpening slightly out-of-focus images

Set Unsharp Mask to ON.

Reducing gradations and stripe patterns

Set Descreen to ON.

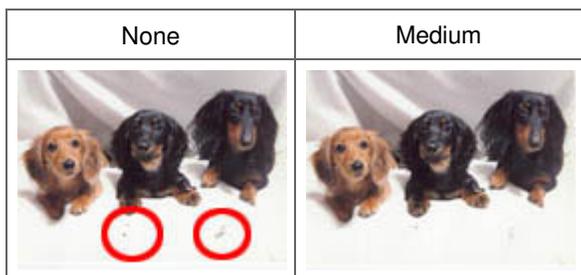

Note

- "Moiré" is a phenomenon where uneven gradation or a stripe pattern appears when such photos or pictures printed with fine dots are scanned. Descreen is the function for reducing this moiré effect.

Reducing dust and scratches

Set Reduce Dust and Scratches to Low, Medium or High according to the degree of dust and scratches.

Correcting photos that have faded with time or due to colorcast

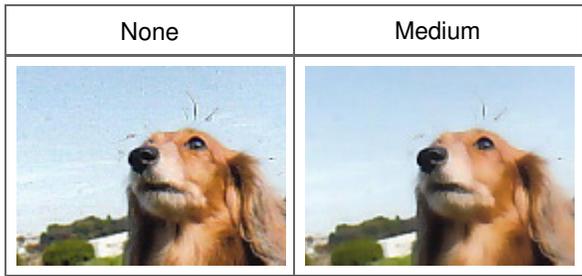

Set Fading Correction to Low, Medium or High according to the degree of fading or colorcast.

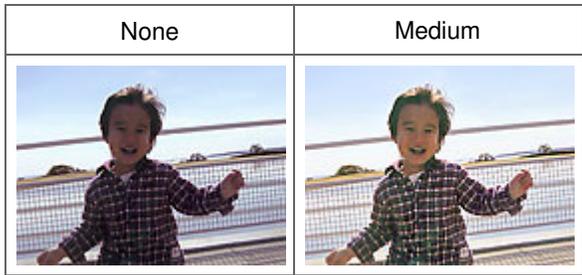

Reducing graininess

Set Grain Correction to Low, Medium or High according to the degree of graininess.

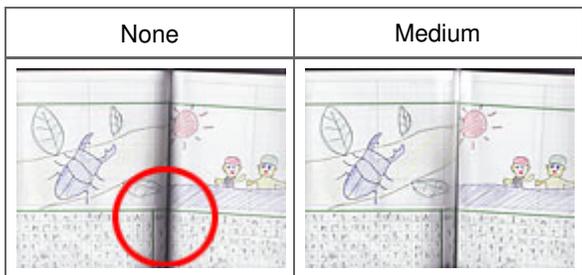

Correcting backlit images

Set Backlight Correction to Low, Medium or High according to the degree of backlight.

Correcting shadows that appear between pages when scanning open booklets

Set Gutter Shadow Correction to Low, Medium or High according to the degree of shadows.

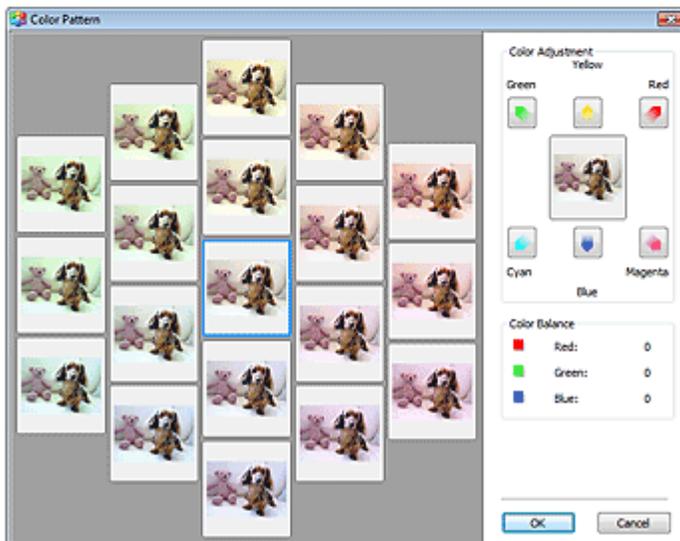

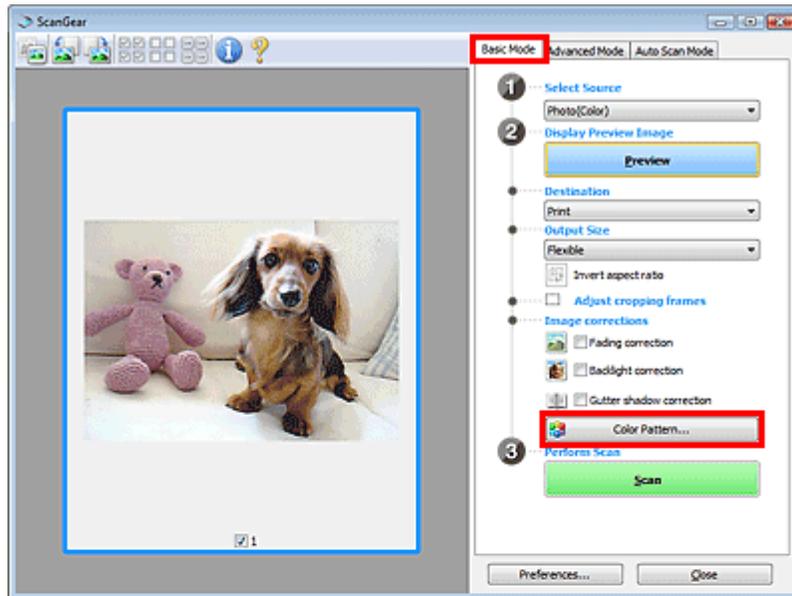

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > Correcting Images and Adjusting Colors with ScanGear (Scanner Driver) > Adjusting Colors Using a Color Pattern

ScanGear

Adjusting Colors Using a Color Pattern

You can preview color changes and reproduce natural colors by using the Color Pattern function in ScanGear's Basic Mode tab.

Color Adjustment

Correct colors that have faded with time or due to colorcast. Colorcast is a phenomenon where a specific color affects the entire picture due to the weather or ambient strong colors.

Click an arrow in Color Adjustment to emphasize the corresponding color.

Cyan & red, magenta & green and yellow & blue are complementary color pairs (each pair produces a shade of gray when mixed). You can reproduce the natural colors of the scene by reducing the cast color and increasing the complementary color.

It is recommended that you find a portion in the image where it should be white, and adjust the colors so that the portion turns white.

Preview image appears in the center. Preview image colors change as you adjust them.

Below is an example of correcting a bluish image.

Since Blue and Green are too strong, click the Yellow and Magenta arrows to correct.

Note

- Color adjustments are applied only to the scan area (cropping frame) or the frame selected in thumbnail view.
You can select multiple frames or cropping frames by clicking them while pressing the Ctrl key.
- You can also select a color tone from the color pattern displayed on the left of the Color Pattern screen.
- You can also use this function to add a specific tint to an image. Increase the magenta to add a warm tint, and increase the blue to add a cool tint.

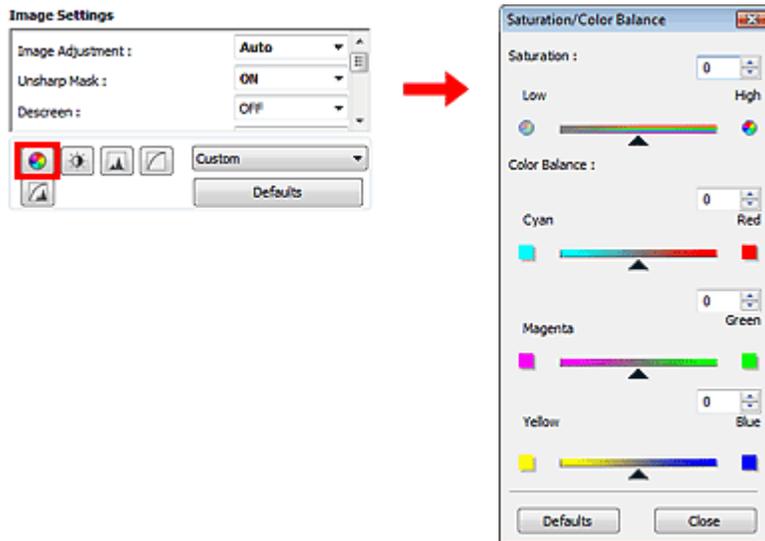

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > Correcting Images and Adjusting Colors with ScanGear (Scanner Driver) > Adjusting Saturation and Color Balance

ScanGear

Adjusting Saturation and Color Balance

In ScanGear's Advanced Mode tab, click  (Saturation/Color Balance).

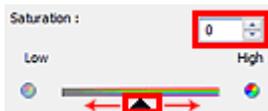

Note

- Click Defaults to reset all adjustments in the current window.

Saturation

Adjust the image's saturation (vividness). You can brighten colors that have faded with time, etc.

Move  (slider) under Saturation to the left to decrease the saturation (darken the image), and to the right to increase the saturation (brighten the image). You can also enter a value (-127 to 127).

Note

- The natural color tone of the original image may be lost if you increase saturation too much.

Color Balance

Adjust images that have a colorcast. Colorcast is a phenomenon where a specific color affects the entire picture due to the weather or ambient strong colors.

Move ▲ (slider) under Color Balance to the left or right to emphasize the corresponding color.

Cyan & Red

Magenta & Green

Yellow & Blue

These are complementary color pairs (each pair produces a shade of gray when mixed). You can reproduce the natural colors of the scene by reducing the cast color and increasing the complementary color.

It is usually difficult to correct the image completely by adjusting only one color pair. It is recommended that you find a portion in the image where it should be white, and adjust all three color pairs so that the portion turns white.

You can also enter a value (-127 to 127).

Below is an example of an image in which the "Cyan & Red" pair has been adjusted.

Cyan is increased	Red is increased
	

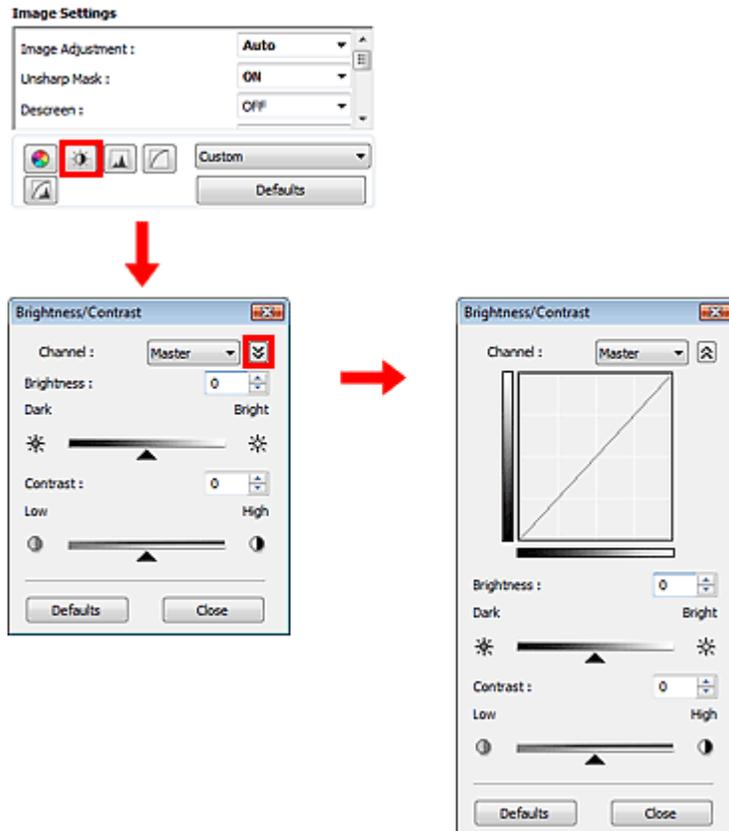

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > Correcting Images and Adjusting Colors with ScanGear (Scanner Driver) > Adjusting Brightness and Contrast

ScanGear

Adjusting Brightness and Contrast

In ScanGear's Advanced Mode tab, click  (Brightness/Contrast).

Note

- Click  (Down arrow) to switch to detailed view. Click  (Up arrow) to return to the previous view.
- Click Defaults to reset all adjustments in the current window.

Channel

Each dot of an image is a mixture of Red, Green and Blue in various proportions (gradation). These colors can be adjusted individually as a "channel."

- **Master**
Adjust the Red, Green and Blue combined.
- **Red**
Adjust the Red channel.
- **Green**
Adjust the Green channel.
- **Blue**
Adjust the Blue channel.

Note

- Only Grayscale will be displayed in Channel when Color Mode is Grayscale.

Brightness

Adjust the image brightness. Move ▲ (slider) under Brightness to the left to darken and right to brighten the image. You can also enter a value (-127 to 127).

Note

- Highlights may be lost if you brighten the image too much, and shadows may be lost if you darken the image too much.

Contrast

"Contrast" is the degree of difference between the brighter and darker parts of an image. Increasing contrast will increase the difference, thus sharpening the image. Decreasing contrast will decrease the difference, thus softening the image.

Move ▲ (slider) under Contrast to the left to decrease and right to increase the contrast of the image. You can also enter a value (-127 to 127).

Note

- Increasing the contrast is effective in adding a three-dimensional feel to soft images. However, shadows and highlights may be lost if you increase the contrast too much.

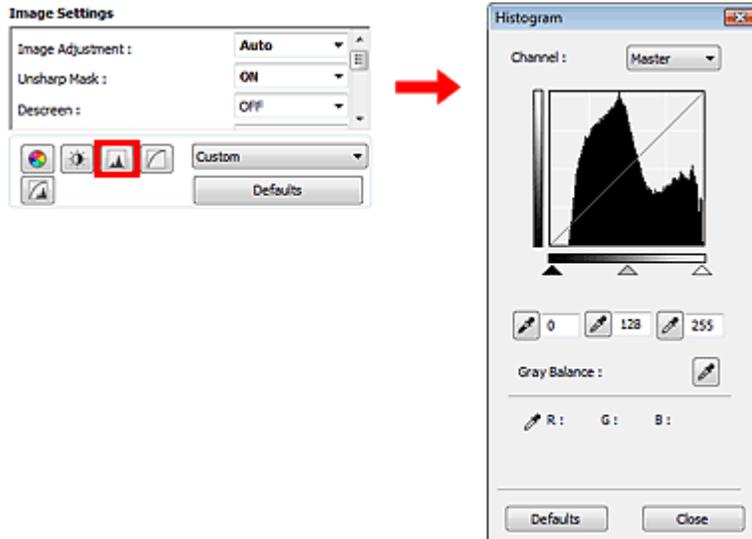

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > Correcting Images and Adjusting Colors with ScanGear (Scanner Driver) > Adjusting Histogram

ScanGear

Adjusting Histogram

In ScanGear's Advanced Mode tab, click  (Histogram).

Note

- Click Defaults to reset all adjustments in the current window.

Channel

Each dot of an image is a mixture of Red, Green and Blue in various proportions (gradation). These colors can be adjusted individually as a "channel."

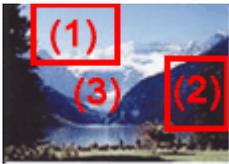

- Master**
 Adjust the Red, Green and Blue combined.
- Red**
 Adjust the Red channel.
- Green**
 Adjust the Green channel.
- Blue**
 Adjust the Blue channel.

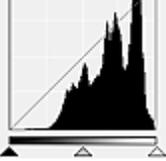

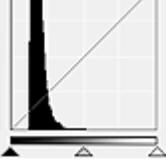

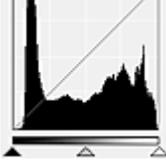

Note

- Only Grayscale will be displayed in Channel when Color Mode is Grayscale.

Reading Histograms

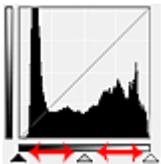

You can open Histogram of a specified area for each Channel. The higher the Histogram peak, the more data is distributed to that level.

(1) Bright area	(2) Dark area	(3) Whole image
		
<p>More data is distributed to the highlight side.</p>	<p>More data is distributed to the shadow side.</p>	<p>Data is widely distributed between the highlight and shadow.</p>

Adjusting Histograms (Using the Slider)

Select a Channel, then move ▲ (Black-point Slider) or △ (White-point Slider) to specify the level to be set as the shadow or highlight.

- All parts to the left of ▲ (Black-point Slider) will be black (level 0).
- The parts at △ (Mid-point Slider) will turn to the color exactly between the black-point and white-point.
- All parts to the right of △ (White-point Slider) will turn white (level 255).

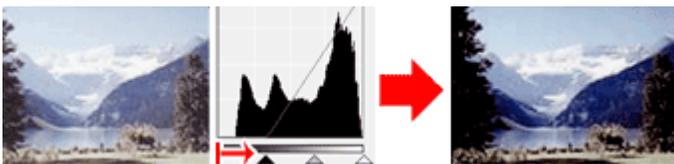

Image Adjustment is Auto by default. Adjustments shown below are automatically performed.

Moving the Black-point and White-point Sliders

Move the Black-point Slider or White-point Slider to adjust brightness.

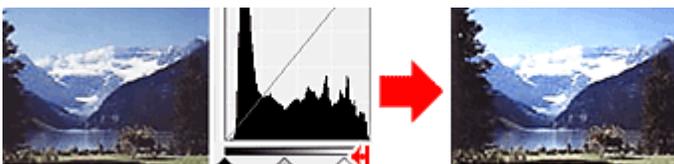

Images with more data distributed to the highlight side

Move the Black-point Slider toward the highlight side.

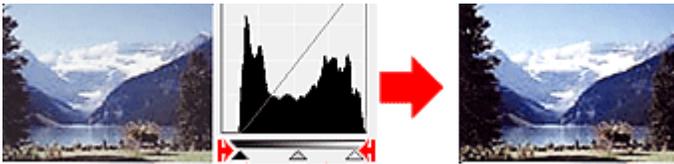

Images with more data distributed to the shadow side

Move the White-point Slider toward the shadow side.

Images with widely distributed data

Move the Black-point Slider toward the highlight side, and White-point Slider toward the shadow side.

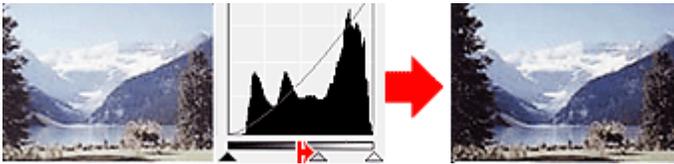

Moving the Mid-point Slider

Move the Mid-point Slider to specify the level to be set as the middle of the tonal range.

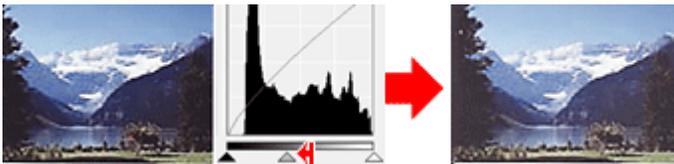

Images with more data distributed to the highlight side

Move the Mid-point Slider toward the highlight side.

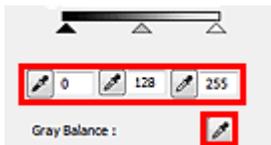

Images with more data distributed to the shadow side

Move the Mid-point Slider toward the shadow side.

Adjusting Histograms (Using the Droppers)

When you select a Channel and click the Black-point, Mid-point or White-point Dropper, the mouse pointer on the preview image changes to a dropper. Click a Dropper displayed below the histogram to change the setting.

- The point clicked with  (Black-point Dropper) will be the darkest point. You can also enter a value (0 to 245).
- The point clicked with  (Mid-point Dropper) will be the middle of the tonal range. You can also enter a value (5 to 250).
- The point clicked with  (White-point Dropper) will be the brightest point. You can also enter a value (10 to 255).
- Click  (Dropper) for Gray Balance and click the area you want to adjust the color in the preview image.

The clicked point will be set as the achromatic color reference, and the rest of the image is adjusted accordingly. For instance, if snow in a photo appears bluish, click the bluish part to adjust the whole image and reproduce natural colors.

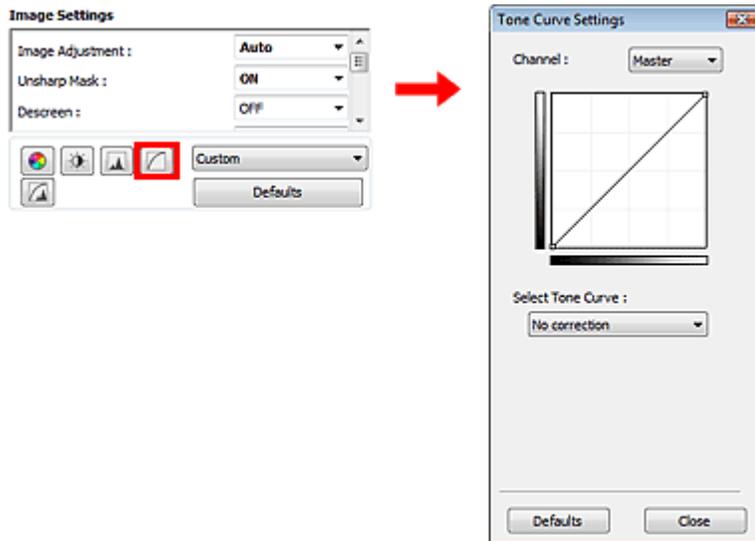

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > Correcting Images and Adjusting Colors with ScanGear (Scanner Driver) > Adjusting Tone Curve

ScanGear

Adjusting Tone Curve

In ScanGear's Advanced Mode tab, click  (Tone Curve Settings).

Note

- Click Defaults to reset all adjustments in the current window.

Channel

Each dot of an image is a mixture of Red, Green and Blue in various proportions (gradation). These colors can be adjusted individually as a "channel."

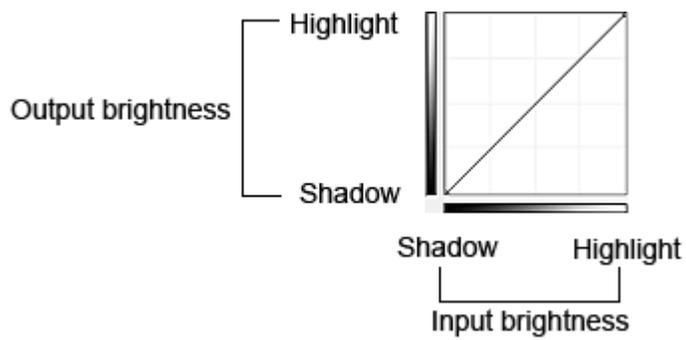

- Master**
 Adjust the Red, Green and Blue combined.
- Red**
 Adjust the Red channel.
- Green**
 Adjust the Green channel.
- Blue**
 Adjust the Blue channel.

Note

- Only Grayscale will be displayed in Channel when Color Mode is Grayscale.

Reading Tone Curves

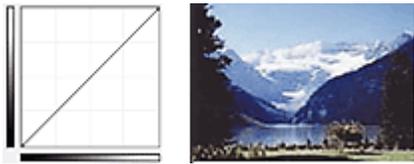

With ScanGear (scanner driver), scanning images via a scanner is the input, and displaying to a monitor is the output. "Tone Curve" shows the balance of tone input and output for each Channel.

Adjusting Tone Curve

In Select Tone Curve, select a tone curve from No correction, Overexposure, Underexposure, High contrast, Reverse the negative/positive image and Edit custom curve.

No correction (No adjustment)

Overexposure (Convex curve)

The midtone data of the input side is stretched toward the highlight of the output side, resulting in a bright-toned image when viewed on a monitor.

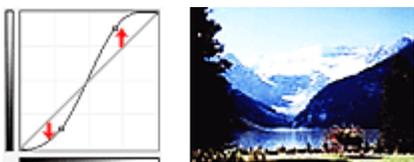

Underexposure (Concave curve)

The midtone data of the input side is stretched toward the shadow of the output side, resulting in a dark-toned image when viewed on a monitor.

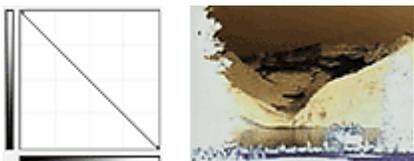

High contrast (S curve)

The highlight and shadow of the input side are enhanced, resulting in a high-contrast image.

Reverse the negative/positive image (Downward-sloping line)

The input and output sides are reversed, resulting in a negative-positive inverted image.

Edit custom curve

You can drag specific points on the Tone Curve to freely adjust the brightness of the corresponding areas.

[Page top](#)↑

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > Correcting Images and Adjusting Colors with ScanGear (Scanner Driver) > Setting Threshold

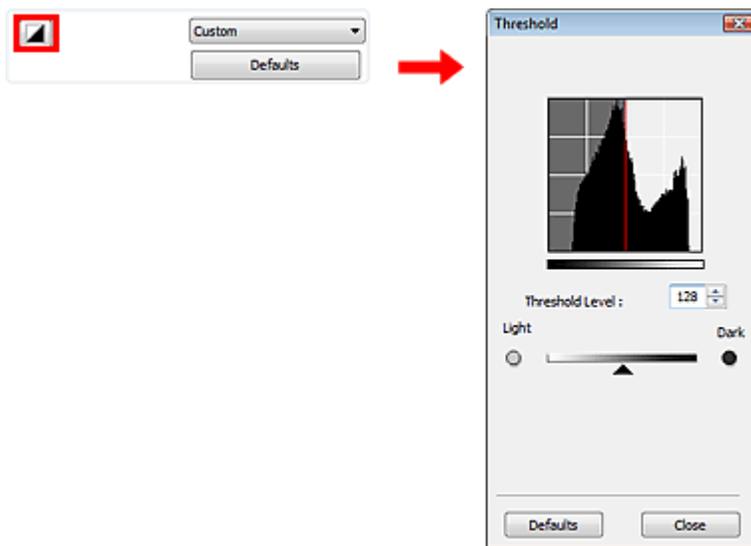

ScanGear

Setting Threshold

The brightness of color and grayscale images is expressed in a value between 0 and 255. However, in creating black and white images, all colors are mapped to either black (0) or white (255). "Threshold" is the borderline value that determines a color as black or white. By adjusting the threshold level, you can sharpen text in a document or reduce show-through in newspapers.

This function is available when Color Mode is Black and White.

In ScanGear's Advanced Mode tab, click  (Threshold).

Note

- Click Defaults to reset all adjustments in the current window.

Adjusting Threshold

Move  (slider) to the right to increase the threshold value and thus increase the black areas. Move the slider to the left to decrease the value and thus increase the white areas. You can also enter a value (0 to 255).

ScanGear (Scanner Driver) Screens

The following sections describe ScanGear's screens and functions, and how to use ScanGear (scanner driver).

- ➔ Basic Mode Tab
- ➔ Advanced Mode Tab
 - Input Settings
 - Output Settings
 - Image Settings
 - Color Adjustment Buttons
- ➔ Auto Scan Mode Tab
- ➔ Preferences Dialog Box
 - Scanner Tab
 - Preview Tab
 - Scan Tab
 - Color Settings Tab

[Page top](#)↑

Advanced Guide

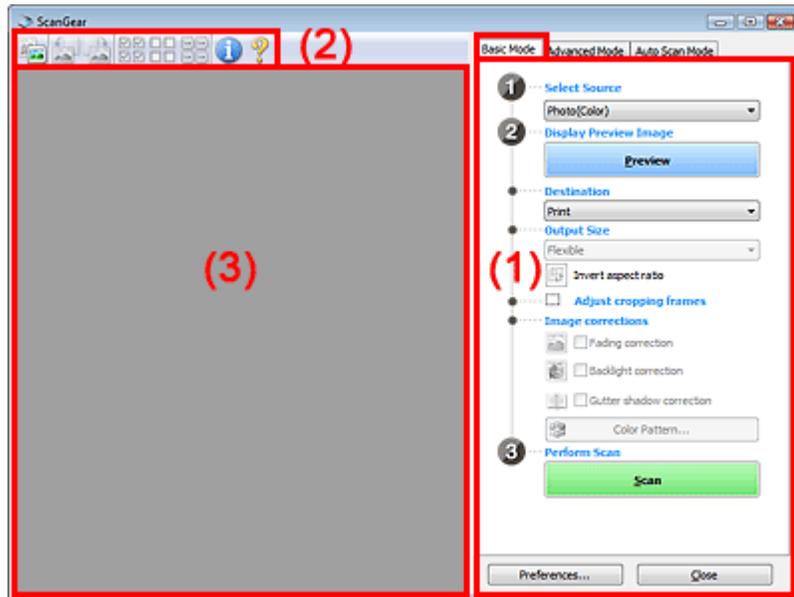

Advanced Guide > Scanning > Scanning with Other Application Software > ScanGear (Scanner Driver) Screens > Basic Mode Tab

ScanGear

Basic Mode Tab

This mode allows you to scan easily by following the on-screen steps.

This section describes the settings and functions available in Basic Mode.

(1) Settings and Operation Buttons

(2) Toolbar

(3) Preview Area

Note

- The displayed items vary by document type and how the screen was opened.

Settings and Operation Buttons

- **Select Source**
 - **Photo(Color)**
Scan color photos.
 - **Magazine(Color)**
Scan color magazines.
 - **Newspaper(Grayscale)**
Scan text and line drawings in black and white.
 - **Document(Grayscale)**
Scan documents and photos in black and white.
Select this mode to create high-resolution black and white images.

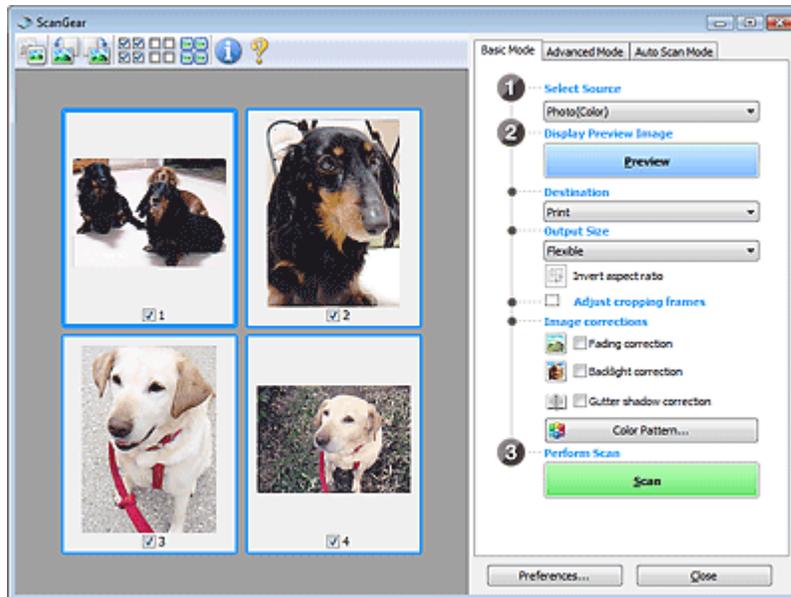

Note

- When you select a document type, colors are adjusted based on the Unsharp Mask function or document type.
- If you select Magazine(Color), the Descreen function will be active.

- **Display Preview Image**

- **Preview**

Performs a trial scan.

Note

- When using the machine for the first time, scanner calibration starts automatically. Wait a while until the preview image appears.

- **Destination**

Select what you want to do with the scanned image.

- **Print**

Select this to print the scanned image on a printer.

- **Image display**

Select this to view the scanned image on a monitor.

- **OCR**

Select this to use the scanned image with OCR software.

OCR software is software that converts text scanned as an image into text data that can be edited in word processors and other programs.

- **Output Size**

Select an output size.

Output size options vary by the item selected in Destination.

- **Flexible**

Allows you to freely adjust the cropping frames.

In thumbnail view

Drag the mouse over a thumbnail to display a cropping frame. When a cropping frame is displayed, the portion within the cropping frame will be scanned. When no cropping frame is displayed, each frame is scanned individually.

In whole image view

When no cropping frame is displayed, the entire Preview area will be scanned. When a cropping frame is displayed, the portion within the cropping frame will be scanned.

- **Paper Size (L, A4, etc.)**

Select an output paper size. The portion within the cropping frame will be scanned at the size of the selected paper size. You can drag the cropping frame to enlarge/reduce it while maintaining the aspect ratio.

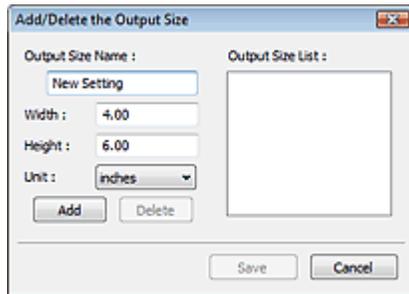

- **Monitor Size (1024 x 768 pixels, etc.)**

Select an output size in pixels.

A cropping frame of the selected monitor size will be displayed and the portion within the cropping frame will be scanned. You can drag the cropping frame to enlarge/reduce it while maintaining the aspect ratio.

- **Add/Delete...**

Opens the Add/Delete the Output Size dialog box, in which you can specify custom output sizes. You can select this option when Destination is Print or Image display.

In the Add/Delete the Output Size dialog box, you can specify multiple output sizes and save them at one time. Saved items will be registered to the Output Size list and can be selected, along with the predefined items.

Add

To add a size, enter Output Size Name, Width and Height, then click Add. For Unit, you can select mm or inches when Destination is Print but you can only select pixels when Destination is Image display. The name of the added size appears in Output Size List. Click Save to save the items listed in Output Size List.

Delete

To delete an item, select it in Output Size List and click Delete. Click Save to save the items listed in Output Size List.

Important

- You cannot delete predefined output sizes such as A4 and 1024 x 768 pixels.

Note

- Save up to 10 items.
- An error message appears when you enter a value outside the setting range. Enter a value within the setting range.

Note

- Whether or how the cropping frame is initially displayed on a preview image can be specified on the Preview tab of the Preferences dialog box. See [Cropping Frame on Previewed Images in "Preview Tab."](#)

-  **Invert aspect ratio**

This button is available when Output Size is set to anything but Flexible.

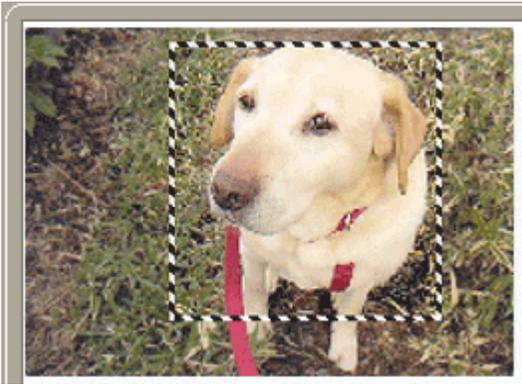

Click this button to rotate the cropping frame. Click again to return it to the original orientation.

- **Adjust cropping frames**

You can adjust the scan area within the Preview area.

If an area is not specified, the document will be scanned at the document size (Auto Crop). If an area is specified, only the portion in the cropping frame will be scanned.

➔ [Adjusting Cropping Frames](#)

- **Image corrections**

- **Fading correction**

Corrects and scans photos that have faded with time or have a colorcast.

- **Backlight correction**

Corrects photos that have been shot against light.

- **Gutter shadow correction**

Corrects shadows that appear between pages when scanning open booklets.

Important

- For precautions on using this function, see Gutter Shadow Correction in "[Image Settings](#)" (Advanced Mode tab).

- **Color Pattern...**

Allows you to adjust the image's overall color. You can correct colors that have faded due to colorcast, etc. and reproduce natural colors while previewing color changes.

➔ [Adjusting Colors Using a Color Pattern](#)

- **Perform Scan**

- **Scan**

Scanning starts.

Note

- When scanning starts, the progress will be displayed. Click Cancel to cancel the scan.

- **Preferences...**

The Preferences dialog box opens and you can make scan/preview settings.

➔ [Preferences Dialog Box](#)

- **Close**

Closes ScanGear (scanner driver).

Toolbar

- **Toolbar**

You can adjust or rotate preview images. The buttons displayed on the Toolbar vary by view.

In thumbnail view

In whole image view

-  (Thumbnail) /  (Whole image view)

Switches the view in the Preview area.

➔ [Preview Area](#)

-  (Rotate Left)

Rotates the preview image 90 degrees counter-clockwise.

- The result will be reflected in the scanned image.
- The image returns to its original state when you preview again.

-  (Rotate Right)

Rotates the preview image 90 degrees clockwise.

- The result will be reflected in the scanned image.
- The image returns to its original state when you preview again.

-  (Auto Crop)

Displays and adjusts the cropping frame automatically to the size of the document displayed in the Preview area. The scan area is reduced every time you click this button if there are cropping area within the cropping frame.

-  (Check All Frames)

This button is available when two or more frames are displayed.
Selects the checkbox of the image in thumbnail view.

-  (Uncheck All Frames)

This button is available when two or more frames are displayed.
Deselects the checkbox of the image in thumbnail view.

-  (Select All Frames)

This button is available when two or more frames are displayed.
Selects the image in thumbnail view and the image will be outlined in blue.

-  (Select All Cropping Frames)

This button is available when there are two or more cropping frames.
All cropping frames will be displayed in thick broken lines. The settings will be applied to all the cropping frames.

-  (Remove Cropping Frame)

Removes the selected cropping frame.

-  (Information)

Displays the version of ScanGear (scanner driver) and the current scan settings (document type, etc.).

-  (Open Guide)

This page appears.

Preview Area

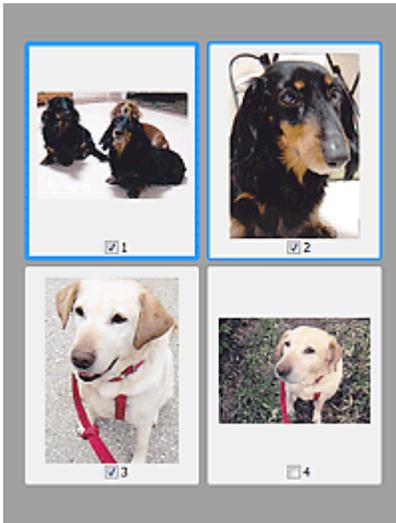

- **Preview Area**

This is where a trial image is displayed after you click Preview. You can also check the results of the settings (image corrections, color adjustments, etc.) made in " [Settings and Operation Buttons](#) ."

When (Thumbnail) is displayed on the Toolbar

Thumbnails of images cropped to the document size are displayed. Only the images with the

checkbox selected will be scanned.

Note

- When multiple images are previewed, different outlines indicate different selection status.
 - Focus Frame (thick blue outline): The displayed settings will be applied.
 - Selected Frame (thin blue outline): The settings will be applied to the Focus Frame and Selected Frames simultaneously. You can select multiple images by clicking them while pressing the Ctrl key.
 - Unselected (no outline): The settings will not be applied.
- Double-click a frame to zoom in on the image. Click   (Frame Advance) at the bottom of the screen to display the previous or next frame. Double-click the frame again to return the display to its non-magnified state.

When (Whole Image) is displayed on the Toolbar

Items on the Platen are displayed as a single image. All portions in the cropping frames will be scanned.

Note

- You can specify the scan area (cropping frame) on the displayed image. In thumbnail view, you can only create one cropping frame per image. In whole image view, you can create multiple cropping frames.

Advanced Guide

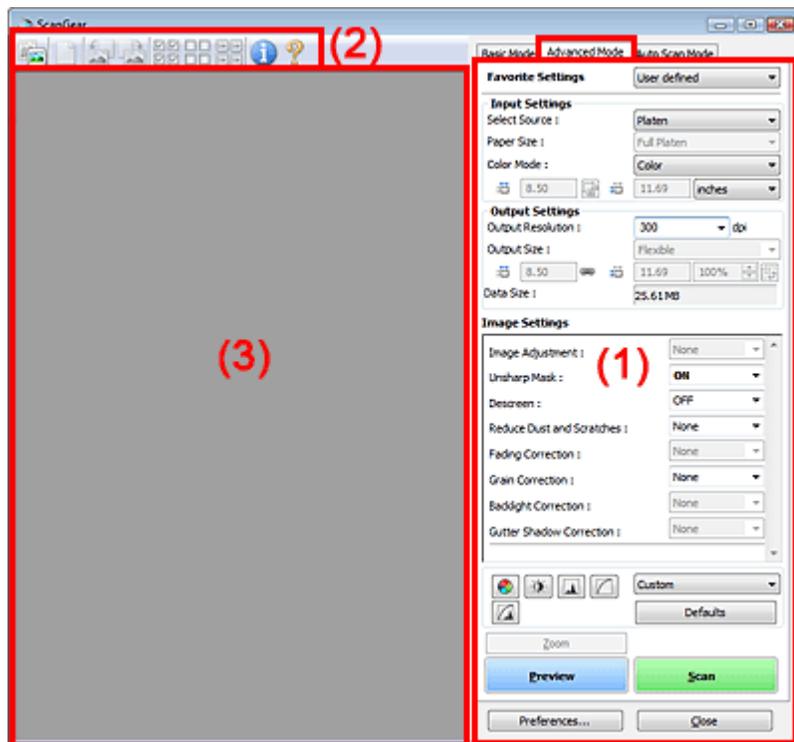

Advanced Guide > Scanning > Scanning with Other Application Software > ScanGear (Scanner Driver) Screens > Advanced Mode Tab

ScanGear

Advanced Mode Tab

This mode allows you to make advanced scan settings such as the color mode, output resolution, image brightness and color tone.

This section describes the settings and functions available in Advanced Mode.

- (1) Settings and Operation Buttons
- (2) Toolbar
- (3) Preview Area

Note

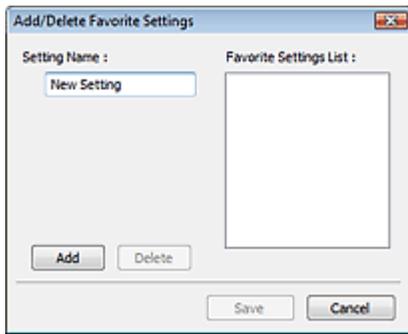

- The displayed items vary by document type and how the screen was opened.

Settings and Operation Buttons

• Favorite Settings

You can name and save a group of settings (Input Settings, Output Settings, Image Settings and Color Adjustment Buttons) on Advanced Mode tab, and load it as required. It is convenient to save a group of settings if you will be using it repeatedly. You can also use this to reload the default settings.

Select Add/Delete... from the pull-down menu and the Add/Delete Favorite Settings dialog box opens.

Enter Setting Name and click Add. The name appears in Favorite Settings List.

When you click Save, the item appears in the Favorite Settings list and can be selected, along with the predefined items.

To delete an item, select it in Favorite Settings List and click Delete. Click Save to save settings displayed in Favorite Settings List.

Note

- You can set Add/Delete... in Favorite Settings after preview.
- Save up to 10 items.

• Input Settings

Specify the input settings such as the document type and size.

➔ [Input Settings](#)

• Output Settings

Specify the output settings such as the output resolution and size.

➔ [Output Settings](#)

• Image Settings

Enable/disable various image correction functions.

➔ [Image Settings](#)

• Color Adjustment Buttons

These buttons can be used to make fine corrections to the image brightness and color tones. You can adjust the image's overall brightness or contrast, and adjust its highlight and shadow values (histogram) or balance (tone curve).

➔ [Color Adjustment Buttons](#)

• Zoom

Zooms in on an image or the portion within the cropping frame. When the image is zoomed in, Zoom changes to Undo. Click Undo to return the display to its non-magnified state.

In thumbnail view

Zooms in on the selected image. Click   (Frame Advance) at the bottom of the screen to display the previous or next frame.

Note

- You can also zoom in on an image by double-clicking the frame. Double-click the frame again to return the display to its non-magnified state.

In whole image view

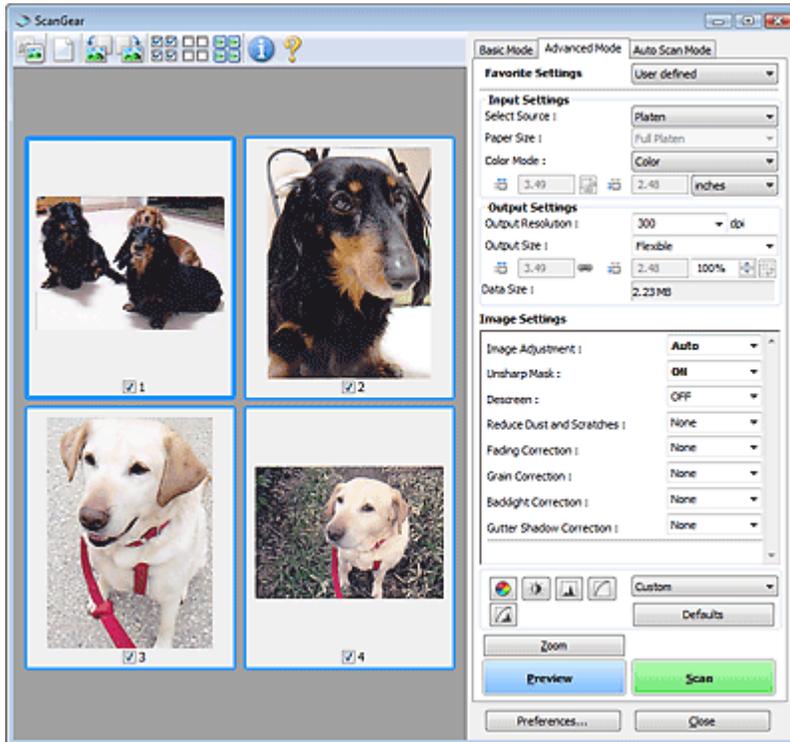

Rescans the portion within the cropping frame at higher magnification.

Note

- Zoom rescans the image and displays high-resolution image in Preview.
-  (Enlarge/Reduce) on the Toolbar zooms in on the preview image quickly. However, the resolution of the displayed image will be low.

• Preview

Performs a trial scan.

- **Scan**

Starts scanning.

Note

- When scanning starts, the progress will be displayed. Click Cancel to cancel the scan.
- When scanning is completed, a dialog box prompting you to select the next action may open. Follow the prompt to complete. For details, see Status of ScanGear dialog after scanning in "Scan Tab" (Preferences dialog box).
- It will take time to process the images if the total size of the scanned images exceeds a certain size. In that case, a warning message appears. It is recommended that you reduce the total size. To continue, scan in whole image view.

- **Preferences...**

The Preferences dialog box opens and you can make scan/preview settings.

➔ [Preferences Dialog Box](#)

- **Close**

Closes ScanGear (scanner driver).

Toolbar

- **Toolbar**

You can adjust or rotate preview images. The buttons displayed on the Toolbar vary by view.

In thumbnail view

In whole image view

-  (Thumbnail) /  (Whole image view)

Switches the view in the Preview area.

➔ Preview Area

- 
(Clear)
 Click this button to delete the preview image.
 It also resets the Toolbar and color adjustment settings.
- 
(Crop)
 Allows you to specify the scan area by dragging the mouse.
- 
(Move Image)
 If an enlarged image is too large to fit in the Preview area, you can click this button and drag the image across the screen until the part you want to see is displayed. You can also move the image using the scroll bars.
- 
(Enlarge/Reduce)
 Click this button then click on the image to enlarge it (zoom in). Right-click on the image to reduce it (zoom out).
- 
(Rotate Left)
 Rotates the preview image 90 degrees counter-clockwise.
 - The result will be reflected in the scanned image.
 - The image returns to its original state when you preview again.
- 
(Rotate Right)
 Rotates the preview image 90 degrees clockwise.
 - The result will be reflected in the scanned image.
 - The image returns to its original state when you preview again.
- 
(Auto Crop)
 Displays and adjusts the cropping frame automatically to the size of the document displayed in the Preview area. The scan area is reduced every time you click this button if there are cropping area within the cropping frame.
- 
(Check All Frames)
 This button is available when two or more frames are displayed.
 Selects the checkbox of the image in thumbnail view.
- 
(Uncheck All Frames)
 This button is available when two or more frames are displayed.
 Deselects the checkbox of the image in thumbnail view.
- 
(Select All Frames)
 This button is available when two or more frames are displayed.
 Selects the image in thumbnail view and the image will be outlined in blue.
- 
(Select All Cropping Frames)
 This button is available when there are two or more cropping frames.
 All cropping frames will be displayed in thick broken lines. The settings will be applied to all the cropping frames.
- 
(Remove Cropping Frame)
 Removes the selected cropping frame.
- 
(Information)

Displays the version of ScanGear (scanner driver) and the current scan settings (document type, etc.).

-  (Open Guide)

This page appears.

Preview Area

- **Preview Area**

This is where a trial image is displayed after you click Preview. You can also check the results of the settings (image corrections, color adjustments, etc.) made in " [Settings and Operation Buttons](#) ."

When (Thumbnail) is displayed on the Toolbar

Thumbnails of images cropped to the document size are displayed. Only the images with the checkbox selected will be scanned.

Note

- When multiple images are previewed, different outlines indicate different selection status.
 - Focus Frame (thick blue outline): The displayed settings will be applied.
 - Selected Frame (thin blue outline): The settings will be applied to the Focus Frame and Selected Frames simultaneously. You can select multiple images by clicking them while pressing the Ctrl key.
 - Unselected (no outline): The settings will not be applied.

When (Whole Image) is displayed on the Toolbar

Items on the Platen are displayed as a single image. All portions in the cropping frames will be scanned.

Note

- You can specify the scan area (cropping frame) on the displayed image. In thumbnail view, you can only create one cropping frame per image. In whole image view, you can create multiple cropping frames.
➔ [Adjusting Cropping Frames](#)

Related Topic

- ▶ [Scanning in Advanced Mode](#)

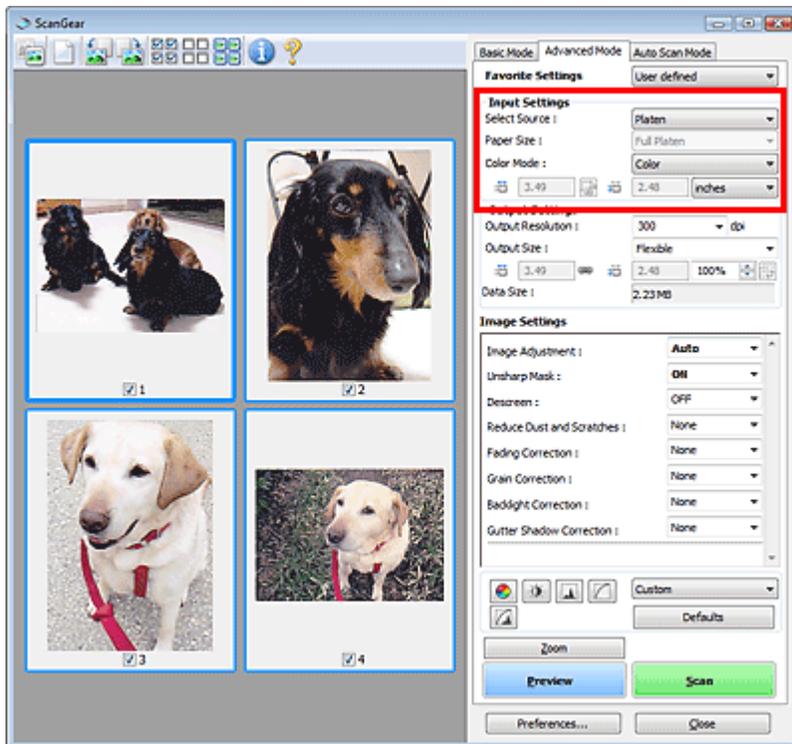

[Page top](#) 

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > ScanGear (Scanner Driver) Screens > Input Settings

ScanGear

Input Settings

Input Settings allows you to set the following items:

- **Select Source**

The type of document to be scanned is displayed.

- **Paper Size**

Select the size of the document to be scanned. This setting is available in whole film image view only. When you select a size, the Preview area size changes accordingly.

► Important

- Some applications have a limit to the amount of scan data they can receive. ScanGear (scanner driver) can scan data that is of:
 - 21000 pixels x 30000 pixels or less
- If you change Paper Size after previewing, the preview image will be deleted.

📖 Note

- If you are not sure which size you should select for Paper Size, set Paper Size to Full Platen, then measure the size of the document and enter the values into  (Width) and  (Height).

- **Color Mode**

Select how to scan the document.

- **Color**

Select this mode to scan color documents or to create color images. This mode renders the image in 256 levels (8 bit) of R(ed), G(reen), and B(lue).

- **Grayscale**

Select this mode to scan black and white photos, or to create black and white images. This mode

renders the image in 256 levels (8 bit) of black and white.

- **Black and White**

Select this mode to scan photos and documents in black and white. This mode renders the image in black and white. The contrast in the image is divided at certain levels (threshold level)

into black and white and is rendered in two colors. The threshold level can be set with (Threshold).

- **Input Size**

In thumbnail view, the cropped document size is displayed after preview.

In whole image view, the Paper Size is displayed before preview, and the cropping frame (scan area) size is displayed after preview.

You can adjust the cropping frame size by entering the values into  (Width) and  (Height).

Click  (Keep Aspect Ratio) and change it to  (Locked) to maintain the aspect ratio when you specify the cropping frame size.

Important

- Input size settings are available only when Output Size in Output Settings is Flexible. If you select a size other than Flexible, a cropping frame calculated from Output Size and Output Resolution is displayed, and its aspect ratio is fixed.

Note

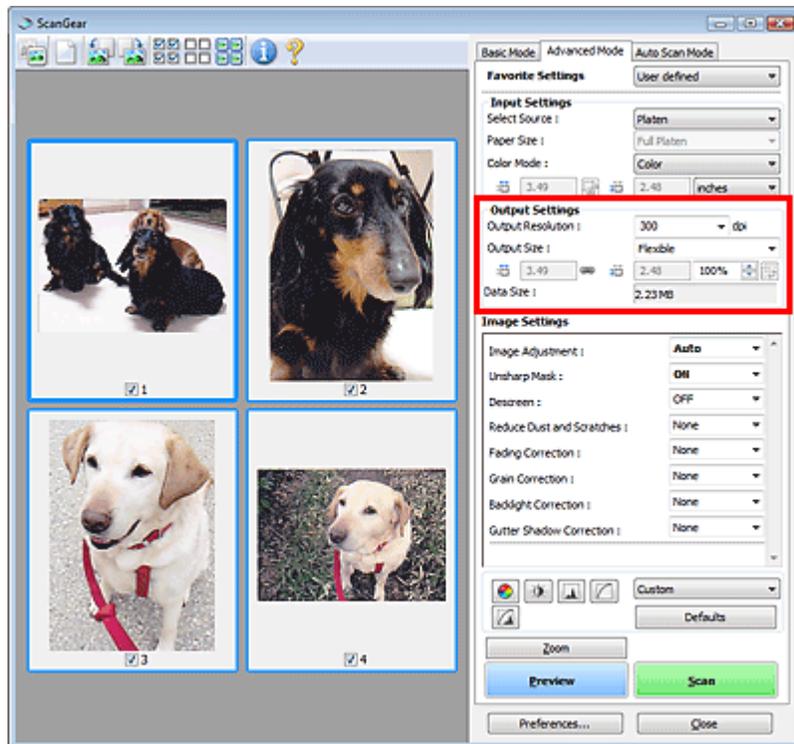

- The values you can enter will be within the range of the selected document size. The minimum size is 96 pixels x 96 pixels when Output Resolution is 600 dpi, scaled at 100%.
- When Auto Crop is performed in whole image view, the aspect ratio will not be maintained since the size will be prioritized.
- See "[Adjusting Cropping Frames](#)" for details on cropping frames.

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > ScanGear (Scanner Driver) Screens > Output Settings

ScanGear

Output Settings

Output Settings allows you to set the following items:

- **Output Resolution**

Select the resolution to scan at.

The higher the resolution (value), the more detail in your image.

Select a resolution from the options displayed by clicking the button, or enter a value within the range of 25 dpi to 19200 dpi (in 1 dpi increments).

➔ Resolution

- **Output Size**

Select an output size.

Select Flexible to set custom sizes or select a size for printing or displaying. Select Add/Delete... to set custom size and save it as a new output size option.

- **Flexible**

You can specify the output resolution and scale, and adjust the cropping frame.

In thumbnail view

Drag the mouse over a thumbnail to display a cropping frame. When a cropping frame is displayed, the portion within the cropping frame will be scanned. When no cropping frame is displayed, each frame is scanned individually.

In whole image view

When no cropping frame is displayed, the entire Preview area will be scanned. When a cropping frame is displayed, the portion within the cropping frame will be scanned.

Note

- To enlarge/reduce the scanned image, enter values into  (Width) and  (Height) in

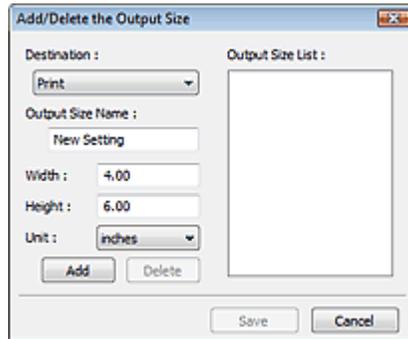

Output Settings or specify a value (by 1%) for %. The maximum value available for % depends on the Output Resolution. % can be specified for up to 19200 dpi (the maximum available output resolution).

- **Paper Size (L, etc.) & Monitor Size (1024 x 768 pixels, etc.)**

Width, height and scale cannot be specified. The preview image will be cropped according to the selected output size and resolution. The portion within the cropping frame will be scanned at the size of the selected paper/monitor size. You can drag the cropping frame to enlarge, reduce or move it while maintaining the aspect ratio.

- **Add/Delete...**

Opens the Add/Delete the Output Size dialog box, in which you can specify custom output sizes.

In the Add/Delete the Output Size dialog box, you can specify multiple output sizes and save them at one time. Saved items will be registered to the Output Size list and can be selected, along with the predefined items.

Add

To add a size, select Print or Image display for Destination, then enter Output Size Name, Width, and Height then click Add. The name of the added size appears in Output Size List. Click Save to save the items listed in Output Size List.

Delete

To delete an item, select it in Output Size List and click Delete. Click Save to save the items listed in Output Size List.

Important

- You cannot delete predefined output sizes such as A4 and 1024 x 768 pixels.

Note

- Save up to 10 items for each destination.
- An error message appears when you enter a value outside the setting range. Enter a value within the range displayed in the message.
- Unit varies by Destination. For Print, select mm or inches. For Image display, the unit is pixels.

Note

- See "[Adjusting Cropping Frames](#)" for details on cropping frames.
- Whether or how the cropping frame is initially displayed on a preview image can be specified on the Preview tab of the Preferences dialog box. See [Cropping Frame on Previewed Images in "Preview Tab."](#)

-  **(Switch Aspect Ratio)**

Click this button to rotate the cropping frame. Click again to return it to the original orientation.

- **Data Size**

An image file is created when the preview image is scanned. Its size when saved in BMP format is displayed.

Note

- When the file size exceeds a certain size, the value appears in red. In that case, a warning

message appears when you click Scan. It is recommended that you adjust the settings to reduce Data Size. To continue, scan in whole image view.

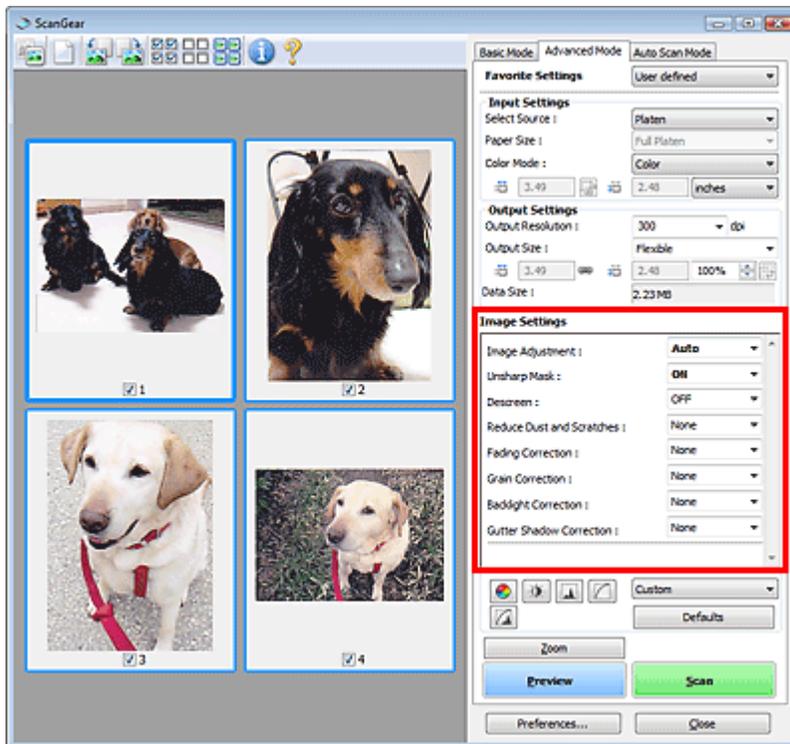

[Page top](#) ↕

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > ScanGear (Scanner Driver) Screens > Image Settings

ScanGear

Image Settings

Important

- Do not apply these functions to images without moire, dust/scratches or faded colors. The color tone may be adversely affected.
- Image correction results may not be reflected in the preview image.

Note

- Selectable settings depend on color mode settings.
- Scanning may take longer when you use Image Settings.

Image Settings allows you to set the following items:

• Image Adjustment

When Image Adjustment is set, the brightness of the specified portion of the image is optimized. Images can be adjusted according to the automatically detected document type or the specified document type. The result of the adjustment will be reflected in the entire image. This setting is Auto by default.

- None**
Image Adjustment will not be applied.
- Auto**
Applies Image Adjustment by automatically detecting the document type. It is recommended that you normally select this setting.
- Photo**
Select this to apply Image Adjustment to photos.
- Magazine**

Select this to apply Image Adjustment to magazines.

- **Newspaper**

Select this to apply Image Adjustment to newspapers.

- **Document**

Select this to apply Image Adjustment to text documents.

Important

- You can set Image Adjustment after preview.
- You can set this setting when Recommended is selected on the Color Settings tab of the Preferences dialog box.

Note

- If the image is not adjusted properly with Auto, specify the document type.
- The color tone may change from the source image due to the Image Adjustment. In that case, set Image Adjustment to None.

- **Unsharp Mask**

When this is set to ON, the outline of the subjects is emphasized to sharpen the image. This setting is ON by default.

- **Descreen**

Printed photos and pictures are displayed as a collection of fine dots. "Moire" is a phenomenon where uneven gradation or a stripe pattern appears when such photos or pictures printed with fine dots are scanned. Descreen is the function for reducing this moire effect. This setting is OFF by default.

Note

- Even if Descreen is set to ON, some moire effects may remain if Unsharp Mask is set to ON. In that case, set Unsharp Mask to OFF.
- Selecting Magazine(Color) in Select Source in Basic Mode tab has the same effect as setting Descreen to ON in Advanced Mode tab.

- **Reduce Dust and Scratches**

Scanned photos may contain white dots caused by dust or scratches. Use this function to reduce such noise. This setting is None by default.

- **None**

Dust and scratches will not be reduced.

- **Low**

Select this to reduce small dust particles and scratches. Large ones may remain.

- **Medium**

It is recommended that you normally select this setting.

- **High**

Select this to reduce small/large dust particles and scratches. Evidence of the reduction process may remain and may also remove delicate parts of the image.

Important

- This function may not be effective for some types of photos.

Note

- It is recommended that you select None when scanning printed materials.

- **Fading Correction**

Use this function to correct photos that have faded with time or have a colorcast. Colorcast is a phenomenon where a specific color affects the entire picture due to the weather or ambient strong colors. This setting is None by default.

- **None**

Fading correction will not be applied.

- **Low**

Select this to correct a small amount of fading and colorcast.

- **Medium**

It is recommended that you normally select this setting.

- **High**

Select this to correct a large amount of fading and colorcast. This can affect the tone of the image.

Important

- You can set Fading Correction after preview.
- Fading Correction may not be effective if the scan area is too small.
- You can set this setting when Recommended is selected on the Color Settings tab of the Preferences dialog box.

- **Grain Correction**

Use this function to reduce graininess (roughness) in photos taken with high-speed or sensitized film. This setting is None by default.

- **None**

Graininess will not be reduced.

- **Low**

Select this when the photo is slightly grainy.

- **Medium**

It is recommended that you normally select this setting.

- **High**

Select this when the photo is very grainy. This can affect the gradation and sharpness of the image.

Important

- Grain Correction may not be effective if the scan area is too small.

- **Backlight Correction**

Use this function to correct photos that have been shot against light. When you change the Backlight Correction setting, the result will be reflected in the preview image. This setting is None by default.

- **None**

Backlight correction will not be applied.

- **Low**

Select this to correct slightly backlit photos. This will not affect the image contrast.

- **Medium**

It is recommended that you normally select this setting.

- **High**

Select this to correct strongly backlit photos. This can affect the image contrast.

Important

- You can set Backlight Correction after preview.
- You can set this setting when Recommended is selected on the Color Settings tab of the Preferences dialog box.
- Backlight Correction may not be effective if the scan area is too small.

Note

- Noise patterns may appear when Backlight Correction is applied. Applying Grain Correction and

setting Unsharp Mask to OFF may reduce the noise patterns.

• Gutter Shadow Correction

Use this function to correct shadows that appear between pages when scanning open booklets. When you set the Gutter Shadow Correction setting in the preview image, the result will be reflected. Preview the effects before scanning, as results vary depending on the type of document and how it is pressed.

Unclear or blurred text/lines caused by curved pages are not corrected. This setting is None by default.

- **None**

Gutter shadow will not be corrected.

- **Low**

Select this when the effect level is too strong with the medium setting.

- **Medium**

It is recommended that you normally select this setting.

- **High**

Select this when the effect level is too weak with the medium setting.

▶ Important

- Do not place items that weigh 4.4 lbs (2.0 kg) or more on the Platen. Also, do not press on the document with a force exceeding 4.4 lbs (2.0 kg). If you press heavily, the scanner may not work correctly or you might break the glass.
- Align the document with the edge of the Platen. If not, the shadow will not be corrected properly.

- Shadows may not be corrected properly depending on the document. If the page background is not white, shadows may not be detected correctly or may not be detected at all.
- While scanning, press down on the spine with the same amount of pressure you used to preview the scan. If the binding part is not even, the shadow will not be corrected properly.

- How to place the document depends on your model and the document to be scanned.

📖 Note

- Cover the document with black cloth if white spots, streaks, or colored patterns appear in scan results due to ambient light entering between the document and the Platen.
- If the shadow is not corrected properly, adjust the cropping frame on the preview image.

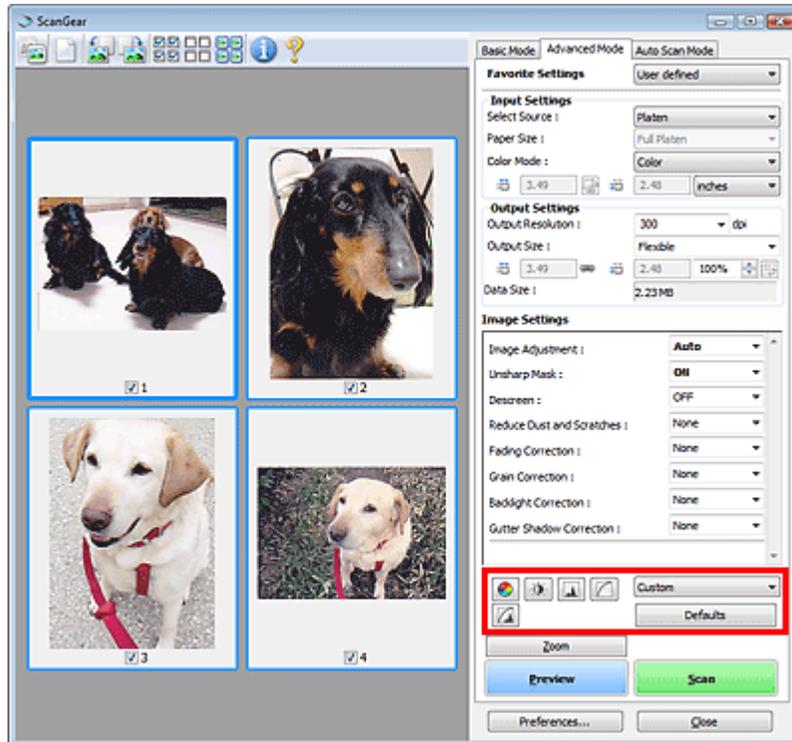

➡ [Adjusting Cropping Frames](#)

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > ScanGear (Scanner Driver) Screens > Color Adjustment Buttons

ScanGear

Color Adjustment Buttons

The Color Adjustment Buttons allow you to make fine corrections to the image brightness and color tones. You can adjust the image's overall brightness or contrast, and adjust its highlight and shadow values (histogram) or balance (tone curve).

Important

- The Color Adjustment Buttons are not available when you select Color Matching on the Color Settings tab of the Preferences dialog box.

Note

- Selectable settings depend on color mode settings.
- When you adjust the image via the Color Adjustment Buttons, the results will be reflected in the preview image.

Click a Color Adjustment Button to set the following items:

-  (Saturation/Color Balance)

Adjust the vividness and color tone of the image. Use this function to brighten colors that have faded with time or due to colorcast. Colorcast is a phenomenon where a specific color affects the entire picture due to the weather or ambient strong colors.

➔ [Adjusting Saturation and Color Balance](#)

-  (Brightness/Contrast)

Adjust the brightness and contrast of the image. If the image is too dark or too bright, or if the image quality is flat due to lack of contrast, you can adjust the levels of brightness and contrast.

➔ [Adjusting Brightness and Contrast](#)

-  **(Histogram)**

A histogram allows you to see the data concentration at each brightness level of an image. You can specify the darkest level (shadow) and brightest level (highlight) within an image, cut the levels and expand the middle of the tonal range of the image.

➔ [Adjusting Histogram](#)

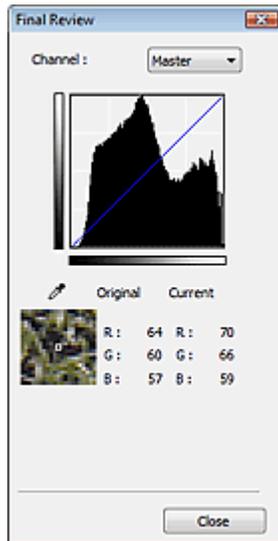

-  **(Tone Curve Settings)**

Adjust the brightness of an image by selecting the type of graph (tone curve) showing the balance of tone input and output. You can make fine adjustments to the brightness of a specific area.

➔ [Adjusting Tone Curve](#)

-  **(Final Review)**

Make a final check of color adjustments. The final synthesized tone curve and the histogram derived from the subsequent image processing will be displayed. There are no settings to make in this screen.

- For a color image, select a color in Channel to check either Red, Green or Blue, or select Master to check three colors together.
- If you place the cursor on the preview image, the portion will be enlarged and its RGB values (only L when Color Mode is Grayscale) before and after the adjustments will be displayed.

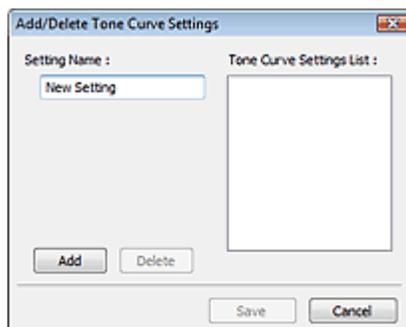

-  **(Threshold)**

Set the boundary (threshold) at which black and white are divided. By adjusting the threshold level, you can sharpen text in a document or reduce show-through in newspapers.

➔ [Setting Threshold](#)

- **Custom**

You can name and save a set of tone curve and threshold settings of the Color Adjustment Buttons. Select Add/Delete... from the pull-down menu. When Color Mode is set to anything but Black and White, the Add/Delete Tone Curve Settings dialog box opens. When Color Mode is Black and White, the Add/Delete Threshold Settings dialog box opens.

Enter Setting Name and click Add. The name appears in Tone Curve Settings List or Threshold Settings List.

Click Save to save.

You can load and apply the saved tone curve/threshold settings to a preview image. To load the settings, select the saved item from the pull-down menu.

To delete an item, select it in Tone Curve Settings List or Threshold Settings List and click Delete. Click Save to save settings displayed in Tone Curve Settings List or Threshold Settings List.

Note

- Save up to 20 items.
-

- **Defaults**

Reset all adjustments (saturation/color balance, brightness/contrast, histogram and tone curve).

Advanced Guide

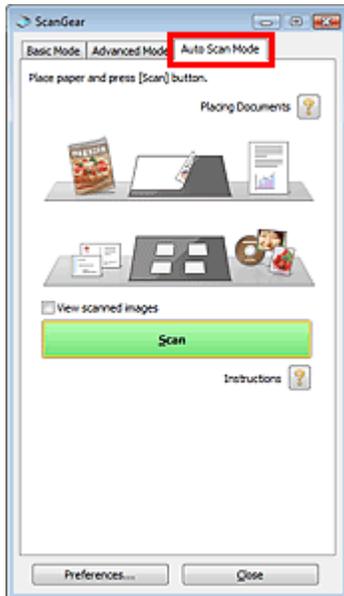

Advanced Guide > Scanning > Scanning with Other Application Software > ScanGear (Scanner Driver) Screens > Auto Scan Mode Tab

Auto Scan Mode Tab

This mode allows you to scan easily by simply placing documents on the Platen and clicking a button.

In Auto Scan Mode, documents are automatically detected. You do not need to specify cropping frames or make image corrections.

- **Supported Documents**

Photos, postcards, business cards, magazines, newspapers, text documents and CD/DVD.

Important

- The following types of documents cannot be scanned correctly. In that case, specify the document type or size on the Basic Mode tab or the Advanced Mode tab and scan again.
 - Documents other than photos, postcards, business cards, magazines, newspapers, text documents and CD/DVD
 - Text documents smaller than 2L (5 inches x 7 inches) (127 mm x 178 mm), such as paperback pages with the spine cut off
 - Documents printed on thin white paper
 - Long narrow documents such as panoramic photos
- ➔ Scanning in Basic Mode
- ➔ Scanning in Advanced Mode
- Reflective CD/DVD labels may not be scanned properly.
- Place documents correctly according to the type of document to be scanned. Otherwise, documents may not be scanned correctly. See "Placing Documents" for details on how to place documents.

Note

- Scan from the "Basic Mode Tab" or "Advanced Mode Tab" to reduce moire.

- **Placing Documents** 

"Placing Documents" appears.

- **View scanned images**

Select this checkbox to display the thumbnails of scanned images in a different window.

- **Scan**

Scanning starts.

Note

- When scanning starts, the progress will be displayed. Click Cancel to cancel the scan.
- When scanning is completed, a dialog box prompting you to select the next action may open. Follow the prompt to complete. For details, see Status of ScanGear dialog after scanning in "[Scan Tab](#)" (Preferences dialog box).

- **Instructions** 

This page appears.

- **Preferences...**

The Preferences dialog box opens and you can make scan/preview settings.

[➔ Preferences Dialog Box](#)

- **Close**

Closes ScanGear (scanner driver).

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > ScanGear (Scanner Driver) Screens > Scanner Tab

ScanGear

Scanner Tab

On the Scanner tab, you can specify the following settings.

- **Quiet Mode**

Select this checkbox to reduce scanner sound by slowing down the scanner head when previewing or scanning documents. This checkbox is not selected by default.

Note

- Scanning takes longer than usual when you enable this function.

- **Select Folder Where Temporary Files are Saved**

Displays the folder in which to save images temporarily. To change the folder, click Browse... to specify another one.

- **Sound Settings**

You can set the machine to play music during/at the end of a scan.

Select the Play Music During Scanning or Play Sound When Scanning is Completed checkbox, then click Browse... and specify a sound file.

You can specify the following files.

- MIDI file (*.mid, *.rmi, *.midi)
- Audio file (*.wav, *.aif, *.aiff)
- MP3 file (*.mp3)

- **Calibration Settings**

When you set Execute at Every Scan to ON, the scanner will be calibrated every time before previewing and scanning, to reproduce correct color tones in scanned images.

Note

- Even when Execute at Every Scan is set to OFF, the scanner may be calibrated automatically in some cases (such as immediately after you turn the machine on).
- Calibration may take time depending on your computer.

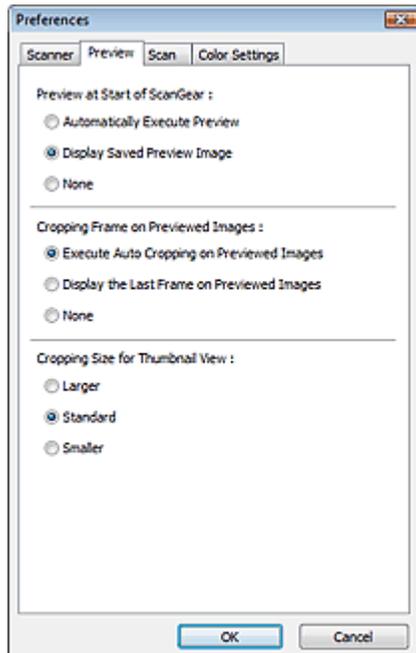

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > ScanGear (Scanner Driver) Screens > Preview Tab

ScanGear

Preview Tab

On the Preview tab, you can specify the following settings.

- **Preview at Start of ScanGear**

Select what to do with Preview when ScanGear (scanner driver) is started. Display Saved Preview Image is selected by default.

- **Automatically Execute Preview**

ScanGear (scanner driver) will automatically start previewing at startup.

- **Display Saved Preview Image**

The previously previewed image will be displayed.

The Color Adjustment Button settings, the Toolbar settings, and the Advanced Mode tab settings are also saved.

- **None**

No preview image will be displayed at startup.

Note

- Select None if you do not want to save the preview image.

- **Cropping Frame on Previewed Images**

Select how to display cropping frames after previewing images. Execute Auto Cropping on Previewed Images is selected by default.

- **Execute Auto Cropping on Previewed Images**

The cropping frame will automatically be displayed in the document size after previewing.

- **Display the Last Frame on Previewed Images**

A cropping frame of the same size as the last used cropping frame will be displayed after previewing.

- **None**

No cropping frame will be displayed after previewing.

- **Cropping Size for Thumbnail View**

Select the cropping size for thumbnails of scanned documents. Standard is selected by default.

- **Larger**

Displays 105% (in width and height) of the area displayed for the standard size.

- **Standard**

The standard size.

- **Smaller**

Displays 95% (in width and height) of the area displayed for the standard size.

Note

- When you change the Cropping Size for Thumbnail View setting, the preview images will be refreshed and cropped to the new size. As the preview images are refreshed, the color adjustments and other settings applied to them are reset.
-

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > ScanGear (Scanner Driver) Screens > Scan Tab

ScanGear

Scan Tab

On the Scan tab, you can specify the following settings.

- **Status of ScanGear dialog after scanning**

Select what to do with ScanGear (scanner driver) after scanning images. Close ScanGear automatically is selected by default.

- **Close ScanGear automatically**

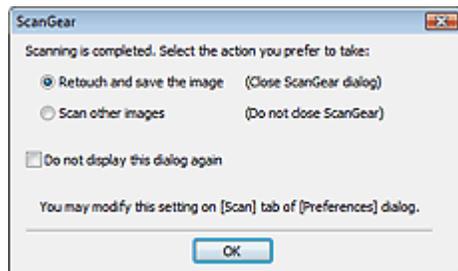

Select this to return to the original application when scanning is completed.

- **Do not close ScanGear automatically**

Select this to return to the ScanGear (scanner driver) screen for another scan when scanning is completed.

- **Display the dialog to select next action**

Select this to open a screen and select what to do when scanning is completed.

Note

- Even if Do not close ScanGear automatically or Display the dialog to select next action is set, some applications may not support it.

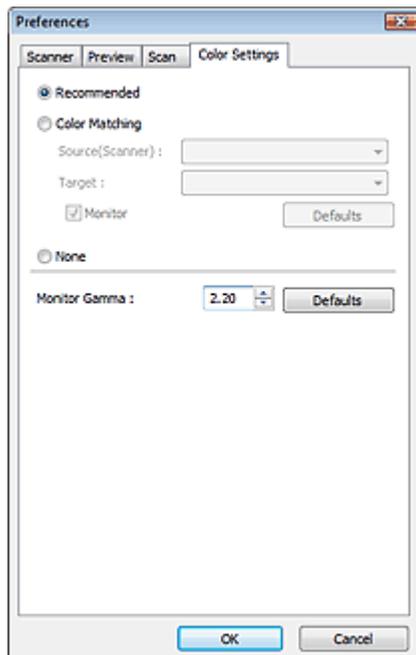

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > ScanGear (Scanner Driver) Screens > Color Settings Tab

ScanGear

Color Settings Tab

On the Color Settings tab, you can specify the following settings.

- **Color Adjustment**

Select either of the following. Recommended is selected by default.
This function is available when Color Mode is Color or Grayscale.

- **Recommended**

Select this to vividly reproduce the tone of a document on the screen. It is recommended that you normally select this setting.

- **Color Matching**

Select this to automatically match the scanner, monitor and color printer colors, thus reducing time and trouble to manually match the monitor and printer colors.

Color Adjustment Buttons will be disabled.

This function is available when Color Mode is Color.

- Source(Scanner): Select scanner profile.
- Target: Select target profile.
- Monitor: Select this to display preview image with optimum correction for monitor.
- Defaults: Returns to the default Color Matching settings.

- **None**

Select this to disable color correction provided by ScanGear (scanner driver).

Note

- Color Matching is available when ScanGear (scanner driver), monitor, color management-compliant application (such as Adobe Photoshop) and printer are set up correctly. Refer to the corresponding manual for the monitor, printer and application settings.

- **Monitor Gamma**

By setting the gamma value of a monitor, you can adjust the input data to the brightness characteristics of the monitor. Adjust the value if your monitor's gamma value does not match the

default value set in ScanGear (scanner driver), and the colors of the original image are not accurately reflected in the monitor.

Click Defaults to return to the default Monitor Gamma value (2.20).

 Note

- Refer to the manual of your monitor to check its gamma value. If it is not written in the manual, contact the manufacturer.

[Page top](#)↑

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > Appendix: Useful Information on Scanning > Adjusting Cropping Frames

Adjusting Cropping Frames

You can specify the scan area by creating a cropping frame on the image displayed in the Preview area of the ScanGear (scanner driver) screen. When you click Scan, only the portion within the cropping frame will be scanned and passed to the application.

Cropping Frame Types

(1) Focus Cropping Frame (rotating thick broken lines)

The settings in Basic Mode or Advanced Mode will be applied.

(2) Selected Cropping Frame (stationary thick broken lines)

The settings will be applied to the Focus Cropping Frame and Selected Cropping Frames simultaneously. You can select multiple cropping frames by clicking them while pressing the Ctrl key.

(3) Unselected Cropping Frame (stationary thin broken lines)

The settings will not be applied.

Note

- Focus Cropping Frame and Selected Cropping Frames are displayed in whole image view.

Initial Cropping Frame

In thumbnail view

Cropping frame is not displayed initially. Drag the mouse over a frame to create a cropping frame.

In whole image view

A cropping frame (Focus Cropping Frame) is displayed automatically around the preview image according to the document size. You can also create a cropping frame by dragging the mouse in the Preview area.

Note

- Cropping frames are set according to the document size (Auto Crop) by default. For details, see Cropping Frame on Previewed Images in " [Preview Tab](#)" (Preferences dialog box).

Adjusting a Cropping Frame

The cursor will change into  (Arrow) when it is positioned over a cropping frame. If you click and drag the mouse in the direction of the arrow, the cropping frame will expand or contract accordingly.

The cursor will change into  (Crosshair arrow) when it is positioned within a cropping frame. Click and drag the mouse to move the entire cropping frame.

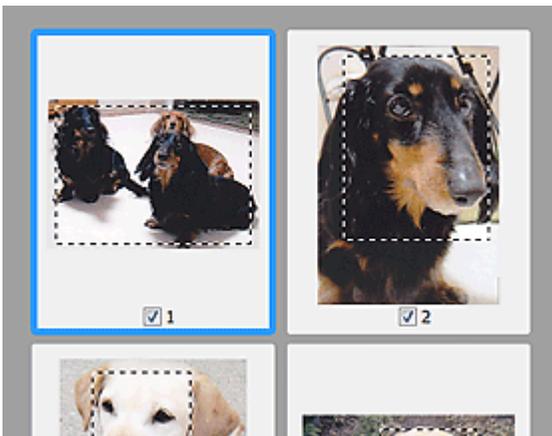

Note

- In Advanced Mode, you can specify the cropping frame size by entering the values into  (Width) and  (Height) in Input Settings.
[➔ Input Settings](#)
- You can rotate a cropping frame 90 degrees by clicking  (Switch Aspect Ratio). However,  (Switch Aspect Ratio) is not available when Output Size is Flexible.

Creating Multiple Cropping Frames

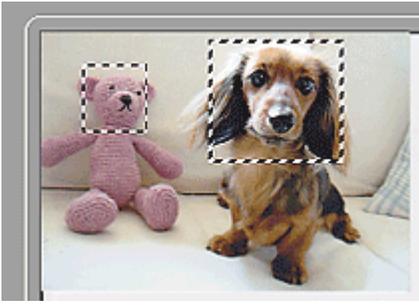

In thumbnail view

You can only create one cropping frame per image.

In whole image view

Click and drag the mouse in a space outside the existing cropping frame to create a new cropping frame in the Preview area. The new cropping frame will be the Focus Cropping Frame, and the old cropping frame will be the Unselected Cropping Frame.

You can create multiple cropping frames and apply different scan settings to each cropping frame.

You can also select multiple cropping frames by clicking them while pressing the Ctrl key.

If you select multiple cropping frames and change the settings on a tab at the right of ScanGear (scanner driver), the settings will be applied to all the selected cropping frames.

When you create a new cropping frame, it retains the settings of the latest cropping frame.

Note

- Create up to 12 cropping frames.
- Scanning takes longer than usual when multiple cropping frames are selected.

Deleting Cropping Frames

In thumbnail view

To delete a cropping frame, click an area outside the cropping frame on an image.

In whole image view

To delete a cropping frame, select it and click  (Remove Cropping Frame) on the Toolbar. Alternatively, press the Delete key.

When there are multiple cropping frames, all the selected cropping frames (Focus Cropping Frame and Selected Cropping Frames) are deleted simultaneously.

Advanced Guide

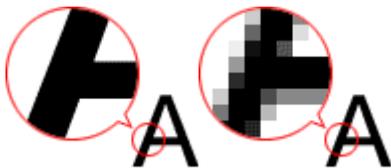

Advanced Guide > Scanning > Scanning with Other Application Software > Appendix: Useful Information on Scanning > Resolution

Resolution

What is Resolution?

The data in the image you have scanned is a collection of dots carrying information about brightness and color. The density of these dots is called "resolution", and resolution will determine the amount of detail your image contains. The unit of resolution is dots per inch (dpi). Dpi is the number of dots per square inch (2.54 cm square).

The higher the resolution (value), the more detail in your image; the lower the resolution (value), the less detail.

Setting the Resolution in MP Navigator EX

In MP Navigator EX, you can specify the resolution with Scanning Resolution in the Scan Settings dialog box.

Images for Printing

Images to be printed should be scanned at a resolution that corresponds to the resolution of the printer.

For example, if you want to print using a 600 dpi black and white printer, you should set the resolution to 600 dpi.

With a color printer, specifying the resolution at half the resolution of the printer should be fine. For example, if you want to print scanned paper/photos using a 600 dpi color printer, you should set the resolution to 300 dpi. However, with a high-resolution printer, printing takes longer than usual if you set the resolution to half the resolution of the printer.

Example of Appropriate Resolution when Printing to Scale

If you print a document at twice the size both vertically and horizontally, the resolution of the document will be reduced by half. If the resolution of the original document is 300 dpi, the resolution of the enlarged document will be 150 dpi. If you print the document with a 600 dpi color printer, the lack of detail in the image may be obvious. In that case, if you scan at the Scanning Resolution of 600 dpi, the resolution will be 300 dpi even if you double the size of document and you can print the document with sufficient quality. Conversely, if you print a document at half scale, it should be sufficient to scan at half the resolution.

When Printing Color Photos at Twice the Size

		
<p>Document resolution: 300 dpi Scanning resolution: 600 dpi Scale: 200%</p>	<p>Print at twice the size Scanning resolution/actual scanning resolution: 600 dpi</p>	<p>Printing resolution: 300 dpi</p>

Setting the Resolution in ScanGear (Scanner Driver)

In ScanGear (scanner driver), you can specify the resolution with Output Resolution in Output Settings on

the Advanced Mode tab.

Example of Appropriate Resolution when Printing to Scale

The scanning resolution is automatically set so that the value set in Output Resolution will be the resolution of the scanned image. If you set Output Resolution to 300 dpi and scan at twice the size, the document will be automatically scanned at 600 dpi, and the resolution of the scanned image will be 300 dpi. You can print the document with sufficient quality using a 600 dpi color printer.

When Printing L Size (8.9 cm x 12.7 cm) Photos at Twice the Size

		
Document resolution: 300 dpi Output resolution: 300 dpi Scale: 200%	Scan at twice the size Actual scanning resolution: 600 dpi	Image resolution/printing resolution: 300 dpi

Appropriate Resolution Settings

Set the resolution according to the use of the scanned image.

For displaying on a monitor: 150 dpi

For printing: 300 dpi

When Output Size is set to Flexible in ScanGear's Advanced Mode tab (Select Source is Platen and the scale is 100%):

Document	Use	Color Mode	Output Resolution
Color photo	Copying (Printing)	Color	300 dpi
	Creating a postcard	Color	300 dpi
	Saving to a computer	Color	75 dpi - 300 dpi
	Using on a website or attaching to e-mail	Color	75 dpi - 150 dpi
Black and white photo	Saving to a computer	Grayscale	75 dpi - 300 dpi
	Using on a website or attaching to e-mail	Grayscale	75 dpi - 300 dpi
Text document	Copying	Color, Grayscale or Black and White	300 dpi
	Attaching to e-mail	Color, Grayscale or Black and White	300 dpi

Important

- If you double the resolution, the file size quadruples. If the file is too large, the processing speed will slow down significantly, and you will experience inconvenience such as lack of memory. Set the minimum required resolution according to the use of the image.

Note

- Although you can change Output Resolution in ScanGear (scanner driver), it is recommended that you scan at the default value.

Advanced Guide

Advanced Guide > Scanning > Scanning with Other Application Software > Appendix: Useful Information on Scanning > File Formats

File Formats

You can select a file format when saving scanned images. You should specify the most suitable format according to how you want to use the image on which application.

Available file formats vary by application and computer (Windows or Macintosh).

See below for the characteristics of each image file format.

BMP (Standard File Extension: .bmp)

A standard file format for Windows.

BMP is often selected for images that are used only on Windows.

JPEG (Standard File Extension: .jpg)

A file format often used on websites and for digital camera images.

JPEG features high compression rates. JPEG images slightly degrade every time they are saved, and cannot be returned to their original state.

JPEG is not available for black and white images.

Exif (Standard File Extension: .jpg)

A file format supported by many digital cameras.

It adds information such as the date of image capture, camera model, shutter speed, shooting mode and comments to JPEG files.

The file format version must be Exif 2.2 or later in order to print on a Direct Print compatible printer.

TIFF (Standard File Extension: .tif)

A file format featuring a relatively high compatibility between various computers and applications. (Some TIFF files are incompatible.) TIFF is suitable for editing saved images.

Note

- MP Navigator EX supports the following TIFF file formats.
 - Uncompressed, black and white binary
 - Uncompressed, RGB (8 bits per channel)
 - Uncompressed, YCC (8 bits per component)
 - Uncompressed, RGB (16 bits per channel)
 - Uncompressed, YCC (16 bits per component)
 - Uncompressed, Grayscale
-

PDF (Standard File Extension: .pdf)

A file format developed by Adobe Systems. It can be used on various computers and operating systems. Therefore, PDF files can be exchanged between people who use different operating systems, fonts, etc. regardless of the differences.

Important

- Only PDF files created with MP Navigator EX are supported. PDF files created or edited in other applications are not supported.
-

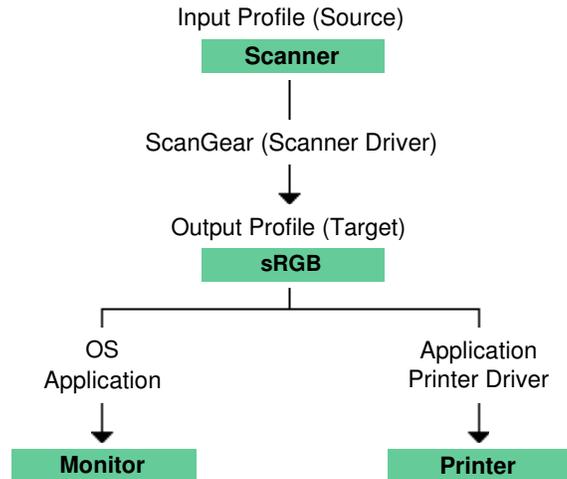

Advanced Guide

[Advanced Guide](#) > [Scanning](#) > [Scanning with Other Application Software](#) > [Appendix: Useful Information on Scanning](#) > [Color Matching](#)

Color Matching

Color Matching adjusts devices as shown below to match the colors of an image displayed on a monitor or a printed image with the colors of the original document.

Example: When sRGB is selected as the output profile (target)

ScanGear (scanner driver) converts the image's color space from the scanner's color space to sRGB.

When displaying on a monitor, the image's color space is converted from sRGB to the monitor's color space based on the operating system's monitor settings and the application's working space settings.

When printing, the image's color space is converted from sRGB to the printer's color space based on the application's print settings and the printer driver's settings.

[Advanced Guide](#) > [Scanning](#) > [Other Scanning Methods](#)

Other Scanning Methods

- ➡ [Scanning with WIA Driver](#)
- ➡ [Scanning Using the Control Panel \(Windows XP Only\)](#)

[Page top](#) ↕

Advanced Guide

Advanced Guide > Scanning > Other Scanning Methods > Scanning with WIA Driver

Scanning with WIA Driver

You can scan an image from a WIA-compliant application and use the image in that application. The procedure varies depending on the application. The following procedures are examples only. For details, refer to the application's manual.

Important

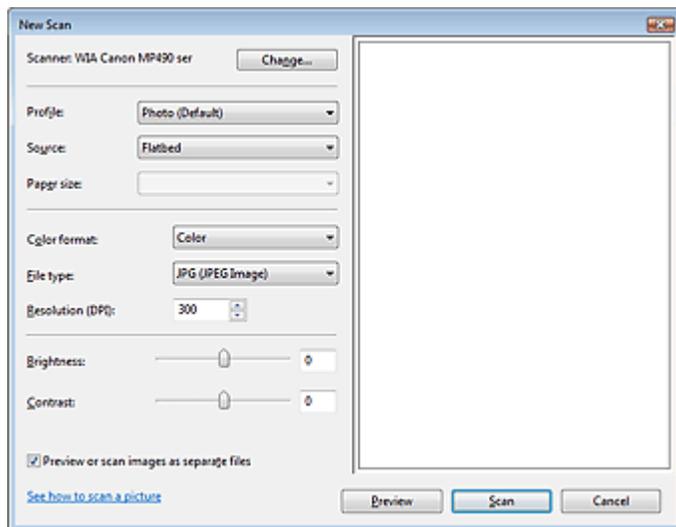

- In Windows 2000, you cannot scan using the WIA driver.

Scanning with WIA Driver 2.0

The following is an example of scanning using Windows Photo Gallery.

1. Place the document on the Platen.
 - ➔ Placing Documents
2. In File, click Import from Camera or Scanner..., then double-click WIA Canon (model name).

The scan setting screen appears.
3. Specify the settings.

- **Scanner**
The currently set product name is displayed. To change the scanner, click Change... and select the product you want to use.
- **Profile**
Select Photo (Default) or Documents according to the document to be scanned. To save a new Profile, select Add profile.... You can specify the details in the Add New Profile dialog box.
- **Source**
Select a scanner type.
- **Paper size**
This setting is not available for this machine.
- **Color format**
Select how to scan the document.

- **File type**
Select a file format from JPEG, BMP, PNG and TIFF.
- **Resolution (DPI)**
Enter the resolution. Specify a value between 50 dpi and 600 dpi. 300 dpi is set by default.
➔ [Resolution](#)
- **Brightness**
Move the slider to adjust the brightness. Move it to the left to darken and right to brighten the image. You can also enter a value (-100 to 100).
- **Contrast**
Move the slider to adjust the contrast. Moving it to the left will decrease the contrast of the image, thus softening the image. Moving it to the right will increase the contrast of the image, thus sharpening the image. You can also enter a value (-100 to 100).
- **Preview or scan images as separate files**
Select this checkbox to preview or scan multiple images as separate files.
- **See how to scan a picture**
Click to open Windows Help and Support.

4. Click Preview to preview the image.

The preview image appears on the right.

5. Click Scan.

When scanning is completed, the scanned image appears in the application.

Scanning with WIA Driver 1.0

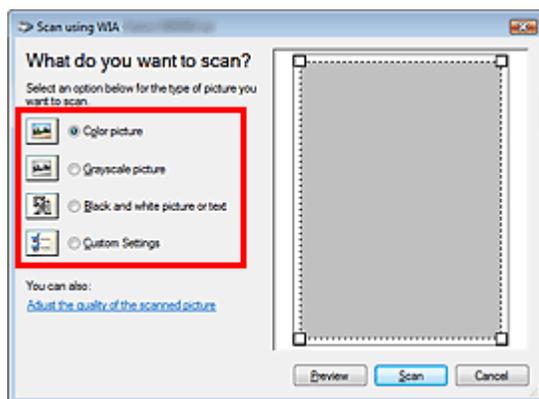

The following is an example of scanning using Paint.

1. Place the document on the Platen.

➔ [Placing Documents](#)

2. In File, click From Scanner or Camera.... (Select the command to scan a document in the application.)

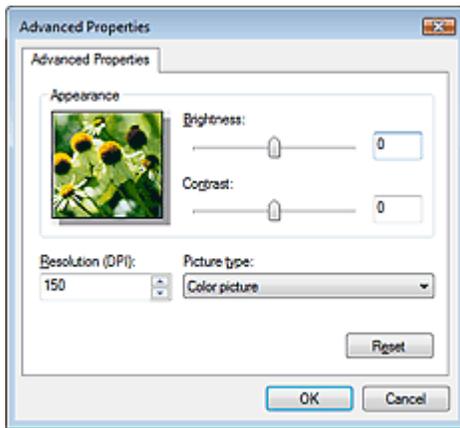

3. Select an image type according to the document to be scanned.

Note

- To scan with the values previously set in Adjust the quality of the scanned picture, select Custom Settings.

4. Click Adjust the quality of the scanned picture and set the preferences as required.

- **Brightness**

Move the slider to adjust the brightness. Move it to the left to darken and right to brighten the image. You can also enter a value (-127 to 127).

- **Contrast**

Move the slider to adjust the contrast. Moving it to the left will decrease the contrast of the image, thus softening the image. Moving it to the right will increase the contrast of the image, thus sharpening the image. You can also enter a value (-127 to 127).

- **Resolution (DPI)**

Enter the resolution. Specify a value between 50 dpi and 600 dpi.

➔ Resolution

- **Picture type**

Select the type of scan you want for your document.

- **Reset**

Click to restore the original settings.

5. Click Preview to preview the image.

The preview image appears on the right. Drag to specify the scan area.

6. Click Scan.

When scanning is completed, the scanned image appears in the application.

Advanced Guide

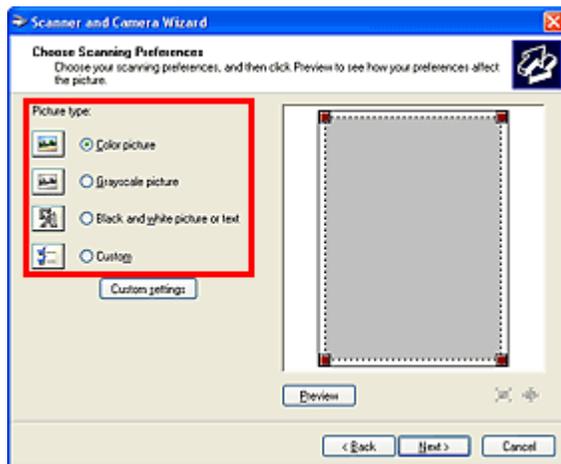

Advanced Guide > Scanning > Other Scanning Methods > Scanning Using the Control Panel (Windows XP Only)

Scanning Using the Control Panel (Windows XP Only)

You can scan images via the Control Panel of Windows XP using the WIA driver.

Windows Image Acquisition (WIA) is a driver model implemented in Windows XP. It allows you to scan documents without using an application. Scan documents from a TWAIN-compliant application to specify advanced settings for scanning.

1. From the Start menu, select Control Panel.
2. Click Printers and Other Hardware > Scanners and Cameras, then double-click WIA Canon (model name).
The Scanner and Camera Wizard dialog box opens.
3. Click Next.
4. Select Picture type according to the document to be scanned.

Note

- To scan with the values previously set in Custom Settings, select Custom.

5. Click Custom Settings to set the preferences as required.

- **Brightness**

Move the slider to adjust the brightness. Move it to the left to darken and right to brighten the image. You can also enter a value (-127 to 127).

- **Contrast**

Move the slider to adjust the contrast. Moving it to the left will decrease the contrast of the image, thus softening the image. Moving it to the right will increase the contrast of the image, thus sharpening the image. You can also enter a value (-127 to 127).

- **Resolution (DPI)**

Enter the resolution. Specify a value between 50 dpi and 600 dpi.

➔ Resolution

- **Picture type**

Select the type of scan you want for your document.

- **Reset**

Click to restore the original settings.

6. Click Preview to preview the image.

The preview image appears on the right. Drag  to specify the scan area.

7. Click Next and follow the instructions.

Cleaning the Platen Glass and Document Cover

▶ Important

- Be sure to turn off the power and disconnect the power plug before cleaning the machine.

With a clean, soft, lint-free cloth, wipe the Platen Glass (A) and the inner side of the Document Cover (white sheet) (B) gently. Be sure not to leave any residue, especially on the Platen Glass.

▶ Important

- The inner side of the Document Cover (white sheet) (B) is easily damaged, so wipe it gently.

Advanced Guide

Advanced Guide > Maintenance > Cleaning Your Machine > Cleaning the Inside of the Machine (Bottom Plate Cleaning)

Cleaning the Inside of the Machine (Bottom Plate Cleaning)

This section explains how to clean the inside of the machine. If the inside of the machine becomes dirty, printed paper may get dirty, so we recommend performing cleaning regularly.

1. Make sure that the machine is turned on.
2. Open the Paper Output Tray.
Open the Paper Output Tray gently.
3. Open the Output Tray Extension.
4. Press the **Menu** button.
5. Use the ▲▼ button to select Maintenance, then press the **OK** button.
The Maintenance screen is displayed.
6. Use the ▲▼ button to select Bottom plate cleaning, then press the **OK** button.
The confirmation screen is displayed.
7. Use the ▲▼ button to select Yes, then press the **OK** button.
8. Remove any paper from the Rear Tray, follow the on-screen instructions.
9. Fold a single sheet of A4 or Letter-sized plain paper in half widthwise, then unfold the paper, follow the on-screen instructions.
10. Load this and only this sheet of paper on the Rear Tray with the open side facing to the front, follow the on-screen instructions.

(A) Load the paper after unfolding it.

The paper cleans the inside of the machine as it feeds through the machine.

Check the folded part of the ejected paper. If it is smudged with ink, perform Bottom Plate Cleaning again.

If the problem is not resolved after performing cleaning again, the protrusions inside the machine may be stained. Clean them according to instructions.

➔ [Cleaning the Protrusions Inside the Machine](#)

Note

- When performing Bottom Plate Cleaning again, be sure to use a new sheet of paper.
-

Aligning the Print Head

➔ [Aligning the Print Head](#)

[Page top](#) ↑

Advanced Guide

Advanced Guide > Maintenance > Aligning the Print Head > Aligning the Print Head

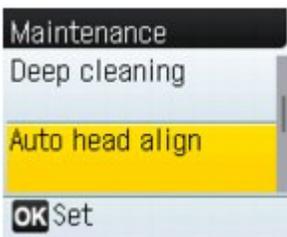

Aligning the Print Head

If printed ruled lines are misaligned or print results are otherwise unsatisfactory, adjust the print head position.

Note

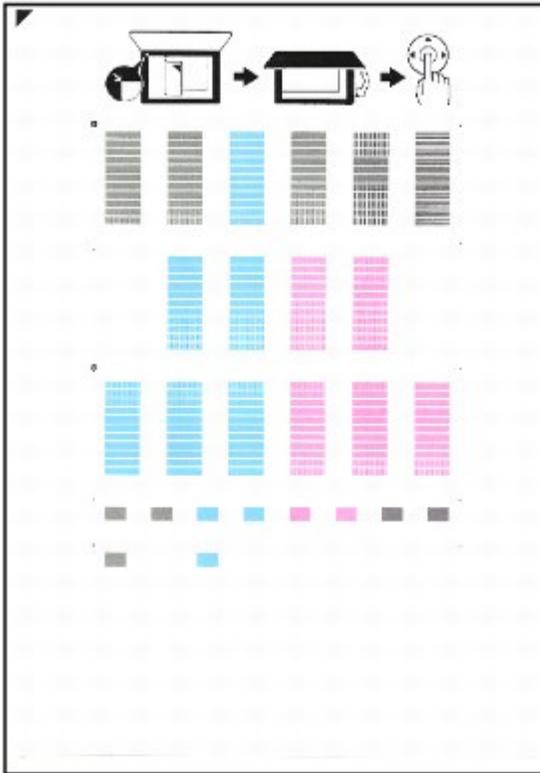

- If the remaining ink level is low, the print head alignment sheet will not be printed correctly. Replace the FINE Cartridge whose ink is low.
➔ [Routine Maintenance](#)

1. Make sure that the machine is turned on.
2. Print the print head alignment sheet.
 1. Press the **Menu** button.
 2. Use the ▲ ▼ button to select Maintenance, then press the **OK** button.
The Maintenance screen is displayed.
 3. Use the ▲ ▼ button to select Auto head align, then press the **OK** button.

The confirmation screen is displayed.

4. Use the ▲ ▼ button to select Yes, then press the **OK** button.
5. Load a sheet of A4 or Letter-sized plain paper in the Rear Tray, follow the on-screen instructions.
6. Open the Paper Output Tray gently, and open the Output Tray Extension.
7. Press the **OK** button.
The print head alignment sheet will be printed.

Important

- Do not touch any printed part on the print head alignment sheet.
- Do not dirty the print head alignment sheet. If the sheet is stained or wrinkled, the pattern may not be scanned correctly.

8. When Did the patterns print correctly? is displayed, confirm that the pattern is printed correctly, use the ▲ ▼ button to select Yes, then press the **OK** button.

3. Scan the print head alignment sheet to adjust the print head position.

1. Place the print head alignment sheet on the Platen Glass, then close the Document Cover gently.

Place the print head alignment sheet with the printed side **FACING DOWN** and align the  mark on the upper left corner of the sheet with the alignment mark ().

2. Press the **OK** button.

The print head alignment sheet is scanned and the print head position is adjusted automatically.

Remove the print head alignment sheet on the Platen Glass after the adjusting is complete.

Important

- Do not open the Document Cover or move the loaded print head alignment sheet until

scanning is complete.

- If adjusting the auto print head position has failed, Failed to scan. appears on the LCD.
➔ [An Error Message Is Displayed on the LCD](#)

Note

- If the print results are still not satisfactory after adjusting the print head position as described above, adjust the print head position manually from the computer.
➔ [Aligning the Print Head Position](#)
- Select Head alignment print to confirm the current head position adjustment values.

Performing Maintenance from a Computer

- ➔ Cleaning the Print Heads
- ➔ Cleaning the Paper Feed Rollers
- ➔ Aligning the Print Head Position
- ➔ Checking the Print Head Nozzles
- ➔ Cleaning Inside the Machine

[Page top](#) ↕

Advanced Guide

Advanced Guide > Maintenance > Performing Maintenance from a Computer > Cleaning the Print Heads

Cleaning the Print Heads

The print head cleaning function allows you to unclog clogged nozzles in the print head. Perform print head cleaning if printing is faint or a specific color fails to print, even though there is enough ink.

The procedure for cleaning the print heads is as follows:

Cleaning

1. Open the [printer driver setup window](#)

2. Click Cleaning on the Maintenance tab

The Print Head Cleaning dialog box opens. Follow the instruction shown in the dialog box. Click Initial Check Items to display the items you need to check before performing Cleaning.

3. Execute cleaning

Make sure that the machine is on and then click Execute.
Print head cleaning starts.

4. Complete cleaning

The Nozzle Check dialog box opens after the confirmation message.

5. Check the results

To check whether the print quality has improved, click Print Check Pattern. To cancel the check process, click Cancel.

If cleaning the head once does not resolve the print head problem, clean it once more.

Deep Cleaning

Deep Cleaning is more thorough than cleaning. Perform deep cleaning when two Cleaning attempts do not resolve the print head problem.

1. Open the [printer driver setup window](#)

2. Click Deep Cleaning on the Maintenance tab

The Deep Cleaning dialog box opens. Follow the instruction shown in the dialog box. Click Initial Check Items to display the items you need to check before performing Deep Cleaning.

3. Execute deep cleaning

Make sure that the machine is on and then click Execute.
Click OK when the confirmation message appears.
Print head deep cleaning starts.

4. Complete deep cleaning

The Nozzle Check dialog box opens after the confirmation message.

5. Check the results

To check whether the print quality has improved, click Print Check Pattern. To cancel the check process, click Cancel.

Important

- Cleaning consumes a small amount of ink. Deep Cleaning consumes a larger amount of ink than Cleaning. Cleaning the print heads frequently will rapidly deplete your printer's ink supply. Consequently, perform cleaning only when necessary.

Note

- If there is no sign of improvement after Deep Cleaning, switch off the machine, wait 24 hours, and then perform Deep Cleaning again. If there is still no sign of improvement, see "[Machine Moves But Ink Is Not Ejected](#)."

Advanced Guide

[Advanced Guide](#) > [Maintenance](#) > [Performing Maintenance from a Computer](#) > [Cleaning the Paper Feed Rollers](#)

Cleaning the Paper Feed Rollers

Cleans the paper feed roller. Perform feed roller cleaning when there are paper particles sticking to the paper feed roller and paper is not fed properly.

The procedure for performing the feed roller cleaning is as follows:

Roller Cleaning

1. Prepare the machine

Remove all sheets of paper from the rear tray.

2. Open the [printer driver setup window](#)

3. Click Roller Cleaning on the Maintenance tab

The confirmation message appears.

4. Execute paper feed roller cleaning

Make sure that the machine is on and click OK.
Paper feed roller cleaning starts.

5. Complete paper feed roller cleaning

After the rollers have stopped, follow the instruction in the message, load three sheets of plain paper into the rear tray, and click OK.

Paper will be ejected and feed roller cleaning will be completed.

Advanced Guide

Advanced Guide > Maintenance > Performing Maintenance from a Computer > Aligning the Print Head Position

Aligning the Print Head Position

Print head alignment corrects the installation positions of the print head and improves deviated colors and lines.

This machine supports two head alignment methods: automatic head alignment and manual head alignment.

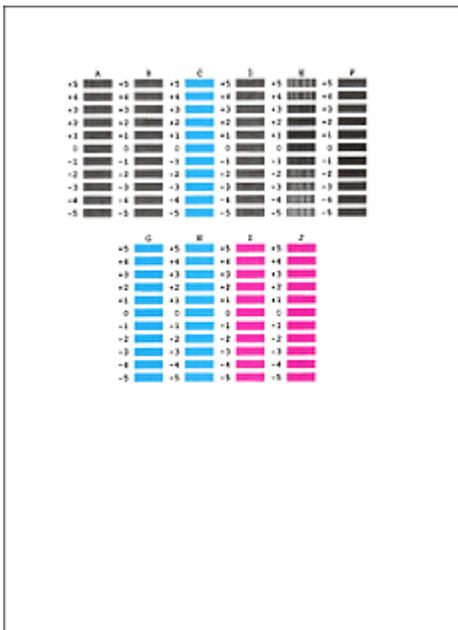

To perform automatic head alignment, refer to "Aligning the Print Head" in the manual: Basic Guide and then execute the function from the operation panel of the machine.

The procedure for performing manual print head alignment is as follows:

Print Head Alignment

- 1. Open the printer driver setup window**
- 2. Click Custom Settings on the Maintenance tab**
The Custom Settings dialog box opens.
- 3. Switch head alignment to manual**
Check the Align heads manually check box.
- 4. Transmit the settings**
Click Send, and click OK when the confirmation message appears.
- 5. Click Print Head Alignment on the Maintenance tab**
The Start Print Head Alignment dialog box opens.
- 6. Load paper in the machine**
Load three sheets of A4 size or Letter size plain paper into the rear tray.
- 7. Execute head alignment**
Make sure that the machine is on and click Align Print Head.
Follow the instruction in the message.
- 8. Check the printed pattern**
Enter the numbers of the patterns with the least amount of streaks in the associated boxes.
Clicking the patterns with the least amount of streaks in the preview window, will automatically set their numbers in the associated boxes.

When you have entered all the necessary values, click OK.

Note

- If it is difficult to pick the best pattern, pick the setting that produces the least noticeable vertical white streaks.

- (A) Less noticeable vertical white streaks
 (B) More noticeable vertical white streaks

- If it is difficult to pick the best pattern, pick the setting that produces the least noticeable horizontal white streaks.

- (A) Less noticeable horizontal white streaks
 (B) More noticeable horizontal white streaks

9. Confirm the displayed message and click OK

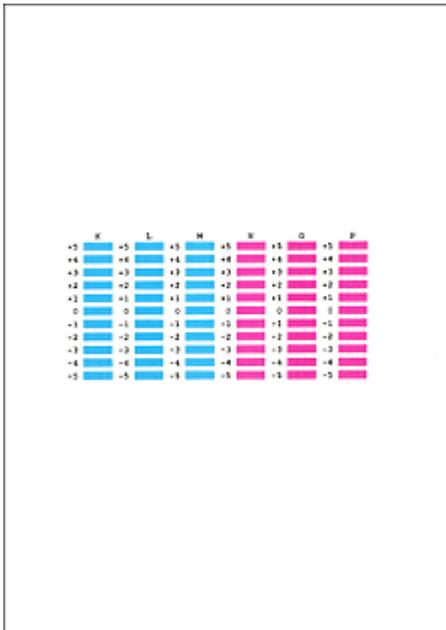

The second pattern is printed.

Important

- Do not open the Scanning Unit (Cover) while printing is in progress.

10. Check the printed pattern

Enter the numbers of the patterns with the least amount of streaks in the associated boxes. Clicking the patterns with the least amount of streaks in the preview window, will automatically set their numbers in the associated boxes.

When you have entered all the necessary values, click OK.

Note

- If it is difficult to pick the best pattern, pick the setting that produces the least noticeable vertical white streaks.

- (A) Less noticeable vertical white streaks
 (B) More noticeable vertical white streaks

11. Confirm the displayed message and click OK

The third pattern is printed.

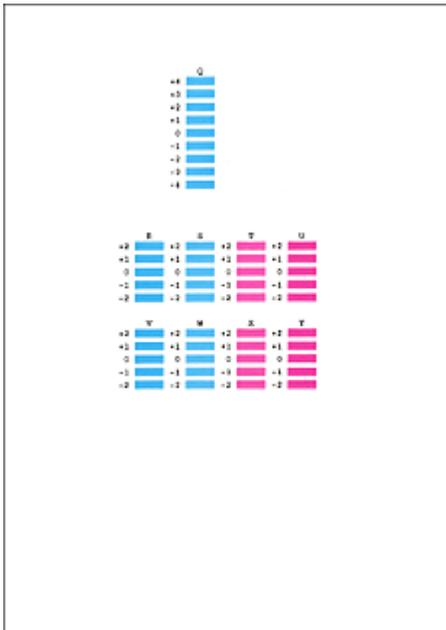

Important

- Do not open the Scanning Unit (Cover) while printing is in progress.

12. Check the printed pattern

Enter the numbers of the patterns with the least noticeable horizontal stripes in the associated boxes.

Clicking the patterns with the least noticeable horizontal stripes in the preview window, will automatically set their numbers in the associated boxes.

When you have entered all the necessary values, click OK.

Note

- If it is difficult to pick the best pattern, pick the setting that produces the least noticeable horizontal white stripes.

- (A) Less noticeable horizontal white stripes
- (B) More noticeable horizontal white stripes

Note

- To print and check the current setting, open the Start Print Head Alignment dialog box, and click Print Alignment Value.

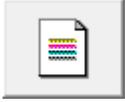

Advanced Guide

[Advanced Guide](#) > [Maintenance](#) > [Performing Maintenance from a Computer](#) > [Checking the Print Head Nozzles](#)

Checking the Print Head Nozzles

The nozzle check function allows you to check whether the print heads are working properly by printing a nozzle check pattern. Print the pattern if printing becomes faint, or if a specific color fails to print.

The procedure for printing a nozzle check pattern is as follows:

Nozzle Check

- 1. Open the printer driver setup window**
- 2. Click Nozzle Check on the Maintenance tab**

The Nozzle Check dialog box opens.
To display a list of items that you should check before printing the check pattern, click Initial Check Items.
- 3. Load paper in the machine**

Load a sheet of A4 size or Letter size plain paper into the rear tray.
- 4. Print a nozzle check pattern**

Make sure that the machine is on and click Print Check Pattern.
The nozzle check pattern is printed.
Click OK when the confirmation message appears.
The Pattern Check dialog box opens.
- 5. Check the print result**

Check the print result. When the print result is normal, click Exit.
If the print result is smudged or if there are any unprinted sections, click Cleaning to clean the print head.

[Advanced Guide](#) > [Maintenance](#) > [Performing Maintenance from a Computer](#) > [Cleaning Inside the Machine](#)

Cleaning Inside the Machine

Perform bottom plate cleaning before you execute duplex printing to prevent smudges on the back side of the paper.

Also perform bottom plate cleaning if ink smudges caused by something other than print data appear on the printed page.

For details on how to load paper into the machine, see "[Cleaning the Inside of the Machine \(Bottom Plate Cleaning\)](#)."

The procedure for performing bottom plate cleaning is as follows:

Bottom Plate Cleaning

1. Open the [printer driver setup window](#)
2. Click Bottom Plate Cleaning on the Maintenance tab
The Bottom Plate Cleaning dialog box opens.
3. Load paper in the machine
As instructed in the dialog box, fold the A4 size or Letter size plain paper in half horizontally, and then unfold the sheet.
Load the paper into the rear tray in the portrait orientation with the crest of the crease facing down.
4. Perform the bottom plate cleaning
Make sure that the machine is on and click Execute.
Bottom plate cleaning starts.

Advanced Guide

Advanced Guide > Changing the Machine Settings > Changing Machine Settings from Your Computer > Changing the Print Options

Changing the Print Options

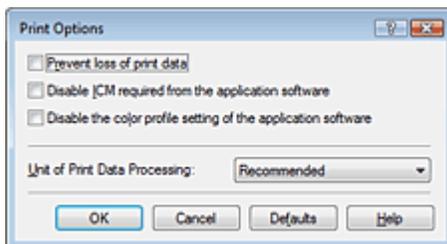

You change the detailed print driver settings for print data that is sent from an application software. Specify this option if you encounter print failures such as part of an image data being cut off.

The procedure for changing the print options is as follows:

1. Open the **printer driver setup window**
2. Click **Print Options...** on the **Page Setup** tab

The Print Options dialog box opens.

3. Change the individual settings

If necessary, change the setting of each item, and then click **OK**.

The **Page Setup** tab is displayed again.

Advanced Guide

Advanced Guide > Changing the Machine Settings > Changing Machine Settings from Your Computer > Registering a Frequently Used Printing Profile

Registering a Frequently Used Printing Profile

You can register the frequently used printing profile to Commonly Used Settings on the Quick Setup tab. Unnecessary printing profiles can be deleted at any time.

The procedure for registering a printing profile is as follows:

Registering a Printing Profile

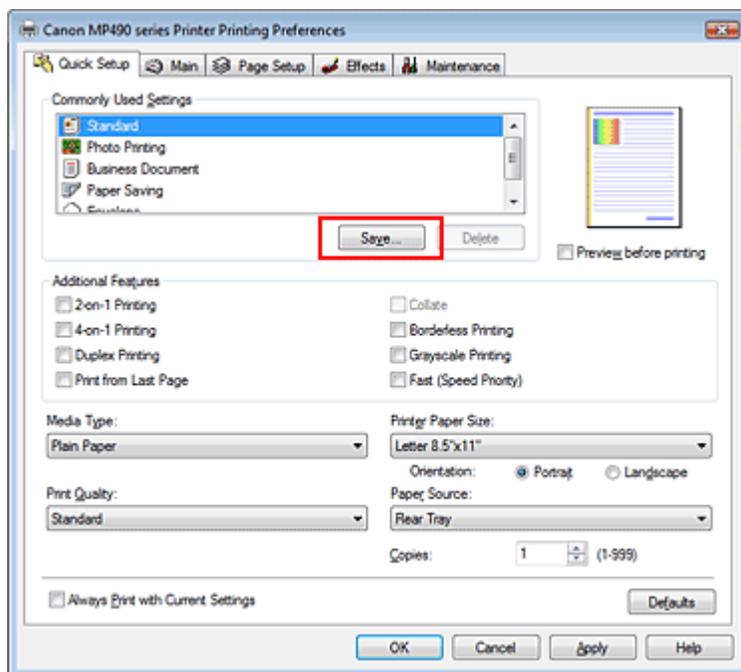

1. Open the printer driver setup window

2. Set the necessary items

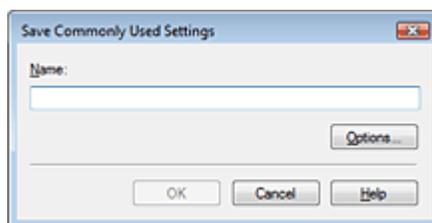

From Commonly Used Settings on the Quick Setup tab, select the printing profile to be used and if necessary, change the settings after Additional Features.

You can also set necessary items on the Main, Page Setup, and Effects tab.

3. Click Save...

The Save Commonly Used Settings dialog box opens.

4. Save the settings

Set Name, then click OK. If necessary, set the items in Options.... The printing profile is saved, and the Quick Setup tab is displayed again.

The name and icon are added to the Commonly Used Settings list.

 **Important**

- To save the page size, orientation, and number of copies that was set in each sheet, click Options..., and check each item.

 **Note**

- When you install the printer driver again or upgrade the version of the printer driver, the print settings you registered will be deleted from Commonly Used Settings. Registered print settings cannot be saved and preserved. If a profile is deleted, register the print settings again.

Deleting Unnecessary Printing Profile

1. Select the printing profile to be deleted

Select the printing profile you want to delete from the Commonly Used Settings list on the Quick Setup tab.

2. Delete the printing profile

Click Delete. When the confirmation message appears, click OK.
The selected printing profile is deleted from the Commonly Used Settings list.

 **Note**

- Printing profiles that are registered in the initial settings cannot be deleted.

Advanced Guide

Advanced Guide > Changing the Machine Settings > Changing Machine Settings from Your Computer > Setting the Ink Cartridge

Setting the Ink Cartridge

This feature enables you to specify the most appropriate ink cartridge among installed cartridges according to an intended use.

When one of the ink cartridges becomes empty and cannot be replaced immediately by a new one, you can specify the other ink cartridge that still has ink and continue printing.

The procedure for specifying the ink cartridge is as follows:

Ink Cartridge Settings

1. Open the [printer driver setup window](#)
2. Click Ink Cartridge Settings on the Maintenance tab
The Ink Cartridge Settings dialog box appears.
3. Select the ink cartridge to be used
Select the ink cartridge to be used for printing and click OK.
The specified ink cartridge will be used from the next printing.

Important

- When the following settings are specified, Black Only does not function because the machine uses the color ink cartridge to print documents.
 - Other than Plain Paper, Hagaki A, Hagaki, or Envelope is selected for Media Type on the Main tab
 - Borderless is selected from the Page Layout list on the Page Setup tab
- Do not detach an ink cartridge that is not in use. Printing cannot be performed while either ink cartridge is detached.

[Page top](#) 

Advanced Guide

[Advanced Guide](#) > [Changing the Machine Settings](#) > [Changing Machine Settings from Your Computer](#) > [Managing the Machine Power](#)

Managing the Machine Power

This function allows you to manage the machine power from the printer driver.

The procedure for managing the printer power is as follows:

Power Off

The Power Off function turns off the machine. When you use this function, you will not be able to turn the machine on from the printer driver.

1. Open the [printer driver setup window](#)
2. Execute power off

Click Power Off on the Maintenance tab. When the confirmation message appears, click OK.

The machine power switches off, and the Maintenance tab is displayed again.

[Page top](#) ↕

Advanced Guide

Advanced Guide > Changing the Machine Settings > Changing Machine Settings from Your Computer > Reducing the Machine Noise

Reducing the Machine Noise

This function allows you to reduce the operating noise of the machine. Select when you wish to reduce the operating noise of the printer at night, etc.

Using this function may lower the print speed.

The procedure for using the quiet mode is as follows:

Quiet Mode

1. Open the [printer driver setup window](#)
2. Click Quiet Mode on the Maintenance tab
The Quiet Mode dialog box opens.
3. Set the quiet mode

If necessary, specify one of the following items:

Do not use quiet mode

The operating noise of the machine is at normal volume.

Always use quiet mode

Select this option when you wish to reduce the operating noise of the machine.

Use quiet mode within specified time

The operating noise of the machine can be reduced during a specified period of time.

Set the Start time and End time when you wish the quiet mode to be activated.

Important

- The time specified in Start time and in End time must be different.

4. Transmit the settings

Make sure that the machine is on and click Send.

Click OK when the confirmation message appears.

The settings are enabled hereafter.

Note

- Depending on print quality settings, effects of the quiet mode may be less.

Advanced Guide

Advanced Guide > Changing the Machine Settings > Changing Machine Settings from Your Computer > Changing the Machine Operation Mode

Changing the Machine Operation Mode

If necessary, switch between various modes of machine operation.

The procedure for configuring settings is as follows:

Custom Settings

1. Open the [printer driver setup window](#)
2. Make sure that the machine is on, and then click Custom Settings on the Maintenance tab

The Custom Settings dialog box opens.

Note

- If the machine is off or bi-directional communication is disabled, a message may appear because the computer cannot collect the machine status. If this happens, click OK to display the most recent settings specified on your computer.

3. If necessary, complete the following settings:

Prevent paper abrasion

The machine can increase the gap between the print head and the paper during high-density printing to prevent paper abrasion.

Check this check box to use this function.

Align heads manually

The Print Head Alignment function on the Maintenance tab is normally set to automatic head alignment, but you can change it to manual head alignment. If the printing results are unsatisfactory even after you execute automatic head alignment, see "[Aligning the Print Head Position](#)," and execute manual head alignment.

Check this check box to perform the manual head alignment.

Ink Drying Wait Time

You can set the length of the machine rest time until printing of the next page begins. Moving the slider to the right increases the pause time and moving the slider to the left decreases the time.

If the paper gets stained because the next page is ejected before the ink on the printed page dries, increase the ink drying wait time.

Reducing the ink drying wait time speeds up printing.

4. Transmit the settings

Click Send, and click OK when the confirmation message appears.

The machine operates with the modified settings hereafter.

Advanced Guide

Advanced Guide > Troubleshooting > Cannot Install the MP Drivers

Cannot Install the MP Drivers

- **If the installation does not start even after the *Setup CD-ROM* is inserted into your computer's disc drive:**

Start the installation following the procedure below.

1. Click Start then Computer.

In Windows XP, click Start then My Computer.

In Windows 2000, double-click the  My Computer icon on the desktop.

2. Double-click the  CD-ROM icon on the displayed window.

If the contents of the CD-ROM are displayed, double-click MSETUP4.EXE.

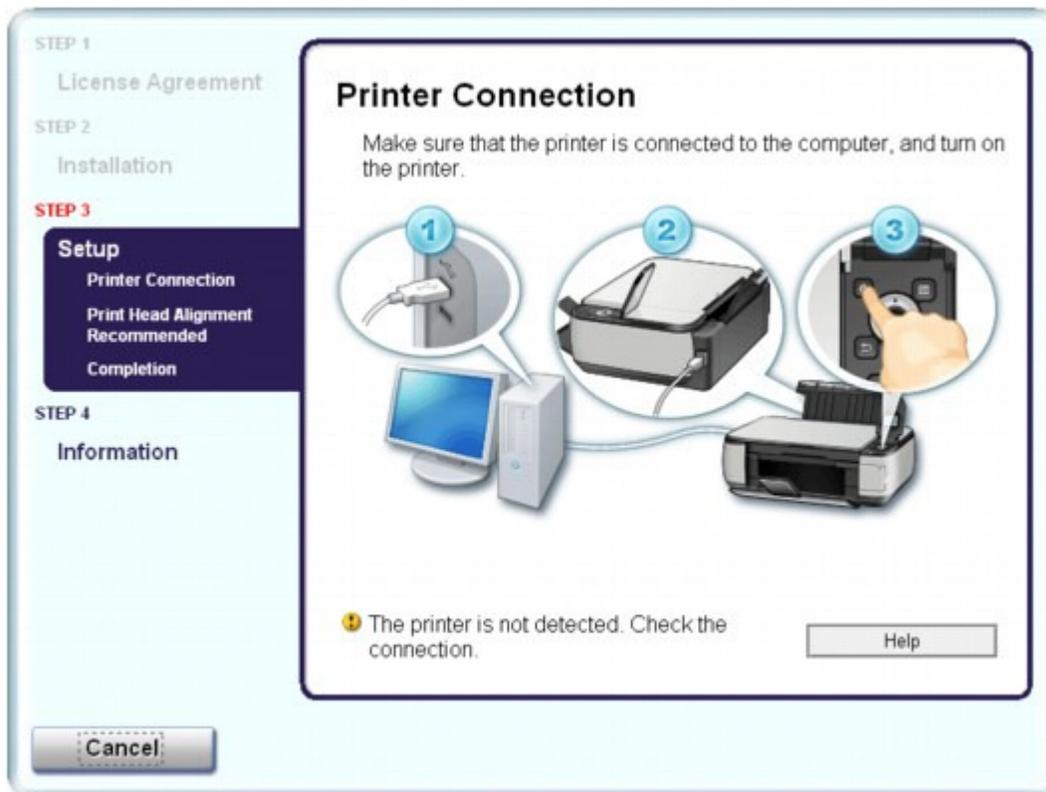

Double-click the  CD-ROM icon on your desktop to start installation.

Note

- If the CD-ROM icon is not displayed, try the following:
 - Remove the CD-ROM from your computer, then insert it again.
 - Restart your computer.
 - If the icon is still not displayed, try different discs and see if they are displayed. If other discs are displayed, there is a problem with the *Setup CD-ROM*. In this case, contact the service center.
-

- **If you are unable to proceed beyond the Printer Connection screen:**

If you are unable to proceed beyond the Printer Connection screen, make sure that the USB cable is securely plugged into the USB port of the machine and is connected to the computer, and then follow the procedure below to reinstall the MP Drivers.

Note

- In Windows Vista, The printer is not detected. Check the connection. may be displayed depending on the computer you use. In this case, wait for a while. If you still cannot proceed to the next step, follow the procedure below to reinstall the MP Drivers.

1. Click Cancel on the Printer Connection screen.
2. Click Start Over on the Installation Failure screen.
3. Click Back on the screen that appears next.
4. Click Exit on the PIXMA XXX screen, then remove the CD-ROM.
5. Turn the machine off.
6. Restart the computer.
7. Make sure that you have no application software running.
8. Insert the CD-ROM again, then perform Easy Instal to install the MP Drivers.

• In other cases:

Follow the procedure described in your setup manual to reinstall the MP Drivers.

If the MP Drivers were not installed correctly, uninstall the MP Drivers, restart your computer, and then reinstall the MP Drivers.

➔ [Deleting the Unnecessary MP Drivers](#)

If you reinstall the MP Drivers, perform Custom Install on the *Setup CD-ROM*, then select MP Drivers.

Note

- If the installer was forced to be terminated due to a Windows error, the system may be in an unstable condition and you may not be able to install the drivers. Restart your computer before reinstalling.
-

Advanced Guide

Advanced Guide > Troubleshooting > Cannot Connect to Computer Properly

Cannot Connect to Computer Properly

Printing or Scanning Speed Is Slow/Hi-Speed USB Connection Does Not Work/

"This device can perform faster" Message Is Displayed

If your system environment is not fully compatible with Hi-Speed USB, the machine will operate at a lower speed provided under USB 1.1. In this case, the machine operates properly but printing speed may slow down due to communication speed.

- **Check: Check the following to make sure that your system environment supports Hi-Speed USB connection.**
 - Does the USB port on your computer support Hi-Speed USB connection?
 - Do the USB cable, and the USB hub if you are using one, support Hi-Speed USB connection?
Be sure to use a certified Hi-Speed USB cable. We recommend that the cable is no longer than around 10 feet / 3 meters.
 - Does the operating system of your computer support Hi-Speed USB connection?
Obtain and install the latest update for your computer.
 - Does the Hi-Speed USB driver operate properly?
Obtain the latest version of the Hi-Speed USB driver compatible with your hardware and reinstall it on your computer.

Important

- For details on Hi-Speed USB of your system environment, contact the manufacturer of your computer, USB cable, or USB hub.

[Page top](#) ↑

Advanced Guide

Advanced Guide > Troubleshooting > Print Results Not Satisfactory

Print Results Not Satisfactory

If the print result is not satisfactory due to white streaks, misaligned lines, or uneven colors, confirm the paper and print quality settings first.

- **Check 1: Do the page size and media type settings match the size and type of the loaded paper?**

When these settings are incorrect, you cannot obtain a proper print result.

If you are printing a photograph or an illustration, incorrect paper type settings may reduce the quality of the printout color.

Also, if you print with an incorrect paper type setting, the printed surface may be scratched.

In borderless printing, uneven coloring may occur depending on the combination of the paper type setting and the loaded paper.

The method of confirming the paper and print quality settings differs depending on what you do with your machine.

To copy by operating the machine	Confirm by using the Operation Panel on the machine. ➔ Copying
To print from your memory card by operating the machine	Confirm by using the Operation Panel on the machine. ➔ Setting Items
To print from a computer	Confirm by using the printer driver. ➔ Printing with Easy Setup

- **Check 2: Make sure that the appropriate print quality is selected according to the media type and printing data referring to the table in**

Check 1.

Select a print quality option suitable for the paper and image for printing. If you notice blurs or uneven colors, increase the print quality setting and try printing again.

- **Check 3: If the problem is not resolved, there may be other causes.**

See also the sections below:

- ➔ Cannot Print to End of Job
- ➔ No Printing Results/Printing Is Blurred/Colors Are Wrong/White Streaks
- ➔ Colors Are Unclear
- ➔ Lines Are Misaligned
- ➔ Printed Paper Curls or Has Ink Blots
- ➔ Paper Is Smudged/Printed Surface Is Scratched
- ➔ Back of the Paper Is Smudged
- ➔ Vertical Lines Are Printed on the Sides of the Printout
- ➔ Colors Are Uneven or Streaked

Advanced Guide

[Advanced Guide](#) > [Troubleshooting](#) > [Print Results Not Satisfactory](#) > [Cannot Print to End of Job](#)

Cannot Print to End of Job

- **Check 1: Is the size of the print data extremely large?**

Click Print Options on the Page Setup sheet. Then, select the Prevent loss of print data check box in the displayed dialog.

- **Check 2: Is the space of your computer's hard disk sufficient?**

Delete unnecessary files to free disk space.

[Page top](#) ↑

Advanced Guide > Troubleshooting > Print Results Not Satisfactory > No Printing Results/Printing Is Blurred/Colors Are Wrong/White Streaks

No Printing Results/Printing Is Blurred/Colors Are Wrong/White Streaks

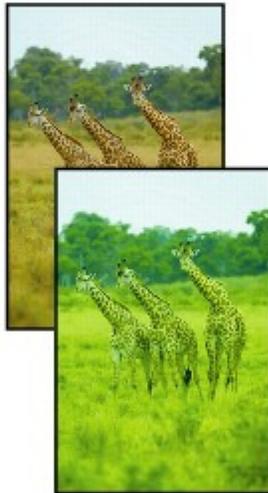

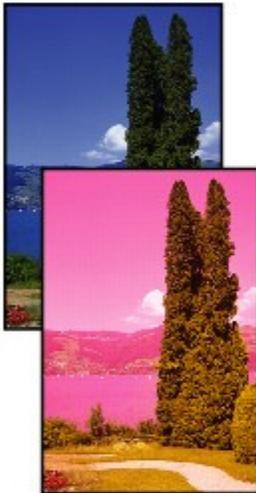

❖ No Printing Results

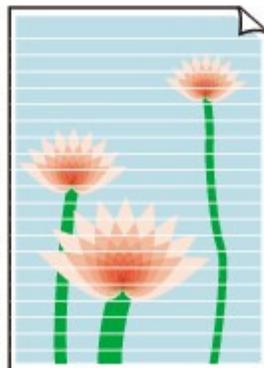

❖ Printing Is Blurred

❖ Colors Are Wrong

❖ White Streaks

- **Check 1: Did you confirm the paper and print quality settings?**

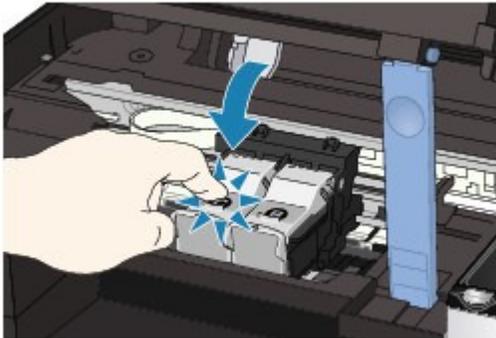

➔ [Print Results Not Satisfactory](#)

- **Check 2: Is the FINE Cartridge installed properly?**

If the Ink Cartridge Locking Cover is not closed securely, ink may not be ejected correctly.

Open the Scanning Unit (Cover), open the Ink Cartridge Locking Cover, then close the Ink Cartridge Locking Cover.

When you close the Ink Cartridge Locking Cover, push the Ink Cartridge Locking Cover until it clicks into place.

- **Check 3: Print the Nozzle Check Pattern and perform any necessary maintenance operations such as Print Head Cleaning.**

Print the Nozzle Check Pattern to determine whether the ink ejects properly from the print head nozzles.

Refer to [Routine Maintenance](#) for the Nozzle Check Pattern printing, Print Head Cleaning, and Print Head Deep Cleaning.

- If the Nozzle Check Pattern is not printed correctly:
After performing the Print Head Cleaning, print the Nozzle Check Pattern and examine the pattern.
- If the problem is not resolved after performing the Print Head Cleaning twice:
Perform the Print Head Deep Cleaning.
If the problem is not resolved after performing the Print Head Deep Cleaning, turn off the machine and perform another Print Head Deep Cleaning after 24 hours.
- If the problem is not resolved after performing the Print Head Deep Cleaning twice:
Ink may have run out. Replace the FINE Cartridge.

- **Check 4: When a FINE Cartridge runs out of ink, replace it with a new one.**

- **Check 5: When using paper with one printable surface, make sure that the paper is loaded with the printable side facing up.**

Printing on the wrong side of such paper may cause unclear prints or prints with reduced quality.

Refer to the instruction manual supplied with the paper for detailed information on the printable side.

- **Check 6: Is the Platen Glass dirty?**

Clean the Platen Glass.

➔ [Cleaning the Platen Glass and Document Cover](#)

- **When copying, see also the sections below:**

- **Check 7: Make sure that the original is properly loaded on the Platen Glass.**

➡ Loading Paper / Originals

- **Check 8: Is the original loaded with the side to be copied facing down on the Platen Glass?**
- **Check 9: Did you copy a printout done by this machine?**

Print from the memory card directly, or reprint from the computer.

If you copy a printout done by this machine, print quality may be reduced.

[Page top](#) ↑

Advanced Guide

Advanced Guide > Troubleshooting > Print Results Not Satisfactory > Colors Are Unclear

Colors Are Unclear

• Check 1: Enable color correction.

When printing photographs or other graphics, enabling color correction in the printer driver may improve color.

Select Vivid Photo in the Effects sheet in the printer properties dialog box.

Select Color Options in the pop-up menu in the Print dialog box, and then select Vivid Photo on the Color Mode.

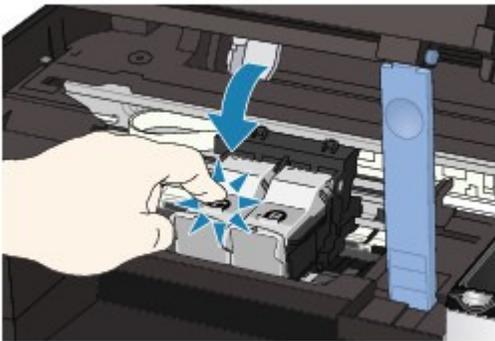

In Mac OS X v 10.4.x or Mac OS X v 10.3.9, select Special Effects in the Print dialog box, and then select Vivid Photo.

• Check 2: Is the FINE Cartridge installed properly?

If the Ink Cartridge Locking Cover is not closed securely, ink may not be ejected correctly.

Open the Scanning Unit (Cover), open the Ink Cartridge Locking Cover, then close the Ink Cartridge Locking Cover.

When you close the Ink Cartridge Locking Cover, push the Ink Cartridge Locking Cover until it clicks into place.

• Check 3: When a FINE Cartridge runs out of ink, replace it with a new one.

• Check 4: Is the Nozzle Check Pattern printed properly?

Print the Nozzle Check Pattern to determine whether the ink ejects properly from the print head nozzles.

Refer to [Routine Maintenance](#) for the Nozzle Check Pattern printing, Print Head Cleaning, and Print Head Deep Cleaning.

- If the Nozzle Check Pattern is not printed correctly:
After performing the Print Head Cleaning, print the Nozzle Check Pattern and examine the pattern.
- If the problem is not resolved after performing the Print Head Cleaning twice:
Perform the Print Head Deep Cleaning.
If the problem is not resolved after performing the Print Head Deep Cleaning, turn off the machine and perform another Print Head Deep Cleaning after 24 hours.
- If the problem is not resolved after performing the Print Head Deep Cleaning twice:
Ink may have run out. Replace the FINE Cartridge.

Note

- Printed colors may not match screen colors due to basic differences in the methods used to

produce colors. Color control settings and environmental differences can also affect how colors appear on the screen.

Advanced Guide

Advanced Guide > Troubleshooting > Print Results Not Satisfactory > Printed Paper Curls or Has Ink Blots

Printed Paper Curls or Has Ink Blots

Printed Paper Curls

Printed Paper Has Ink Blots

- **Check 1: Did you confirm the paper and print quality settings?**

➔ [Print Results Not Satisfactory](#)

- **Check 2: If the intensity is set high, reduce the Intensity setting in the printer driver and try printing again.**

If you are using plain paper to print images with high intensity, the paper may absorb too much ink and become wavy, causing paper abrasion.

Confirm the intensity using the printer driver.

➔ [Adjusting Intensity](#)

- **Check 3: Is Photo Paper used for printing photographs?**

When printing data with high color saturation such as photographs or images in deep color, we recommend using Photo Paper Plus Glossy II or other Canon speciality paper.

➔ [Loading Paper / Originals](#)

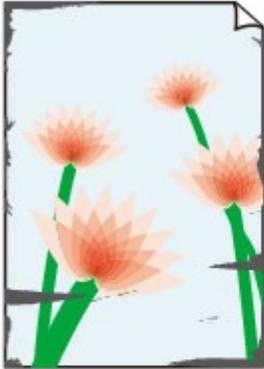

[Page top](#) ↑

Advanced Guide

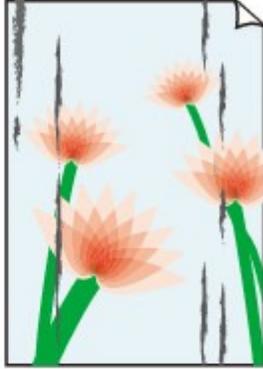

Advanced Guide > Troubleshooting > Print Results Not Satisfactory > Paper Is Smudged/Printed Surface Is Scratched

Paper Is Smudged/Printed Surface Is Scratched

▶ Paper Is Smudged

The Edges of Paper Are Smudged

Printed Surface Is Smudged

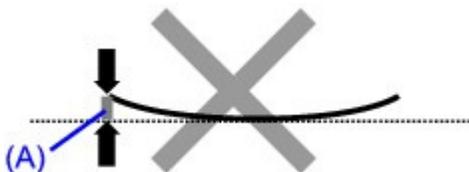

▶ Printed Surface Is Scratched

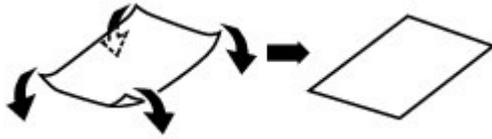

- **Check 1: Did you confirm the paper and print quality settings?**
 - ➔ [Print Results Not Satisfactory](#)

- **Check 2: Is the appropriate type of paper used? Check the followings:**
 - Check to see if the paper you are printing on is suitable for your printing purpose.
 - ➔ [Loading Paper / Originals](#)
 - When performing Borderless Printing, make sure that the paper you are using is suitable for Borderless Printing.
If the paper you are using is not suitable for Borderless Printing, the print quality may be reduced at the top and bottom edges of the paper.
 - ➔ [Printing Area](#)

- **Check 3: Load the paper after correcting its curl.**
 - **For Plain Paper**
Turn the paper over and reload it to print on the other side.
Leaving the paper loaded on the Rear Tray for a long time may cause the paper to curl. In this case, load the paper with the other side facing up. It may resolve the problem.
We recommend putting unused paper back into the package and keeping it on a level surface.
 - **For Other Paper**
If the curl on the four corners of the paper is more than 0.1 inch / 3 mm (A) in height, the paper may be smudged or may not be fed properly. In such cases, follow the procedure described below to correct the paper curl.

1. Roll up the paper in the opposite direction to the paper curl as shown below.

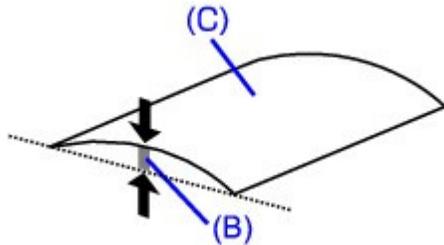

2. Check that the paper is now flat.

We recommend printing curl-corrected paper one sheet at a time.

Note

- Depending on the media type, the paper may be smudged or may not be fed properly even if it is not curled inward. In such cases, follow the procedure described below to curl the paper outward within 0.1 inch / 3 mm (B) in height before printing. This may improve the print result.

(C) Printing side

We recommend printing paper that has been curled outward one sheet at a time.

• **Check 4: If you are printing on thick paper, select the Prevent paper abrasion setting.**

Selecting the Prevent paper abrasion setting will widen the clearance between the Print Head and the loaded paper. If you notice abrasion even with the media type set correctly to match the loaded paper, set the machine to prevent paper abrasion by using the Operation Panel or the printer driver. Print speed is reduced if you are selecting the Prevent paper abrasion setting.

* Deactivate the Prevent paper abrasion setting once printing is complete. If not, this setting remains enabled for all subsequent print jobs.

• **To set by using the Operation Panel**

Press the **Menu** button, select Device settings, then set Prevent abrasion to Enable.

➔ [Changing the Machine Settings on the LCD](#)

• **To set by using the printer driver**

Windows

Open the printer properties dialog box, and in Custom Settings in the Maintenance sheet, select the Prevent paper abrasion check box, and then click Send.

To open the printer properties dialog box, see [Opening the Printer Properties Dialog Box \(Windows\)](#).

Macintosh

In the Canon IJ Printer Utility, select Custom Settings in the pop-up menu, select the Prevent paper abrasion check box, and then click Send.

To open the Canon IJ Printer Utility, see [Opening the Canon IJ Printer Utility \(Macintosh\)](#).

• **Check 5: If the intensity is set high, reduce the Intensity setting in the printer driver and try printing again.**

If you are using plain paper to print images with high intensity, the paper may absorb too much ink and become wavy, causing paper abrasion.

Reduce the Intensity setting in the printer driver and try printing again.

Windows

1. Open the printer properties dialog box.

➔ [Opening the Printer Properties Dialog Box \(Windows\)](#)

Click Here: [Printer Driver](#)

* Before clicking here to open the printer properties dialog box, quit the running application software.

2. On the Main sheet, select Manual for Color/Intensity, and then click Set.

3. Drag the Intensity slide bar on the Color Adjustment sheet to adjust the intensity.

Macintosh

1. Open the Print dialog box.

➔ [Opening the Page Setup and Print Dialog Box \(Macintosh\)](#)

2. Select Color Options in the pop-up menu.

3. Drag the Intensity slide bar to set the intensity.

- **Check 6: Is printing performed beyond the recommended printing area?**

If you are printing beyond the recommended printing area of your printing paper, the lower edge of the paper may become stained with ink.

Resize your original document in your application software.

➔ [Printing Area](#)

- **Check 7: Is the Platen Glass dirty?**

Clean the Platen Glass.

➔ [Cleaning the Platen Glass and Document Cover](#)

- **Check 8: Is inside of the machine dirty?**

When performing duplex printing, the inside of the machine may become stained with ink, causing the printout to become smudged.

Perform the Bottom Plate Cleaning to clean the inside of the machine.

➔ [Cleaning the Inside of the Machine \(Bottom Plate Cleaning\)](#)

Note

- To prevent the inside of the machine from stains, set the paper size correctly.

- **Check 9: Set Ink Drying Wait Time longer.**

Doing so gives the printed surface enough time to dry so that paper smudged and scratched are prevented.

Windows

1. Make sure that the machine is turned on.

2. Open the printer properties dialog box.

➔ [Opening the Printer Properties Dialog Box \(Windows\)](#)

3. Click the Maintenance tab and then Custom Settings.

4. Drag the Ink Drying Wait Time slide bar to set the wait time, and then click Send.
5. Confirm the message and click OK.

Macintosh

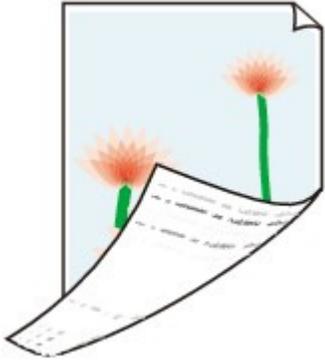

1. Make sure that the machine is turned on.
 2. Open the Canon IJ Printer Utility.
 - ➔ Opening the Canon IJ Printer Utility (Macintosh)
 3. Select Custom Settings in the pop-up menu.
 4. Drag the Ink Drying Wait Time slide bar to set the wait time, and then click Send.
 5. Confirm the message and click OK.
- **Check 10: Is the paper scratched by other loaded paper?**

Depending on the media type, the paper may be scratched by other loaded paper when feeding from the Rear Tray. In this case, load one sheet at a time.

Advanced Guide

Advanced Guide

Advanced Guide > Troubleshooting > Printing Does Not Start

Printing Does Not Start

- **Check 1: Make sure that the power plug is securely plugged in, then turn the machine on.**

While the **Power** lamp is flashing green, the machine is initializing. Wait until the **Power** lamp stops flashing and remains lit green.

Note

- When printing large data such as a photo or graphics, it may take longer to start printing. While the **Power** lamp is flashing green, the computer is processing data and sending it to the machine. Wait until printing starts.

- **Check 2: Make sure that the USB cable is securely plugged in to the machine and the computer, then check the followings:**

- If you are using a relay device such as a USB hub, disconnect it, connect the machine directly to the computer, and try printing again. If printing starts normally, there is a problem with the relay device. Consult the reseller of the relay device for details.
- There could also be a problem with the USB cable. Replace the USB cable and try printing again.

- **Check 3: Restart your computer if you are printing from the computer.**

If there are any unnecessary print jobs, delete them.

➔ [Deleting the Undesired Print Job](#)

- **Check 4: Make sure that your machine's name is selected in the Print dialog box.**

The machine will not print properly if you are using a driver for a different printer.

In Windows, make sure that your machine's name is selected in the Print dialog box.

In Macintosh, make sure that your machine's name is selected in Printer in the Print dialog box.

Note

- To make the machine the one selected by default, select Set as Default Printer (Windows), Default Printer or Make Default (Macintosh).

Windows

- **Check 5: Configure the printer port appropriately.**

Configure "USBnnn" (where "n" is a number) as the printer port.

1. Log on as a user account with administrator privilege.
2. Click Control Panel, then Printer under Hardware and Sound.
In Windows XP, click Control Panel, Printers and Other Hardware, then Printers and Faxes.
In Windows 2000, click Control Panel then Printers.
3. Right-click the Canon XXX Printer icon, then select Properties.
4. Click the Ports tab to confirm the port settings.

Make sure that a port named USBnnn (where "n" is a number) with Canon XXX Printer appearing in the Printer column is selected for Print to the following port(s).
If the setting is incorrect, reinstall the MP Drivers or change the printer port to the correct one.

- **Check 6: Is the size of the print data extremely large?**

Click Print Options on the Page Setup sheet. Then, select the Prevent loss of print data check box in the displayed dialog.

[Page top ↑](#)

Advanced Guide

Advanced Guide > Troubleshooting > Copying/Printing Stops Before It Is Completed

Copying/Printing Stops Before It Is Completed

- **Check 1: Has the machine been printing continuously for a long period?**

If the machine has been printing continuously for a long time, the Print Head may overheat. To protect the Print Head, the machine may stop printing at a line break for a period of time and then resume printing.

In this case, interrupt your print session at a convenient time and turn the machine off for at least 15 minutes.

Additionally, if the machine has been printing graphics or photos with intense colors continuously over a period of time, the machine may stop printing to protect the Print Head. In this case, printing will not resume automatically. Turn the machine off for at least 15 minutes.

Caution

- The Print Head and the surrounding area can become extremely hot inside the machine. Never touch the Print Head or nearby components.

- **Check 2: Is the paper loaded?**

Make sure that paper is loaded in the Rear Tray.

If the machine has run out of paper, load paper.

- **Check 3: Do the printing documents have lots of photographs or illustrations?**

Printing large data such as photos or graphics takes time for the machine and the computer to process, during which the machine may appear to have stopped operating.

In addition, when printing data that uses a large amount of ink continuously on plain paper, the machine may pause temporarily. In either case, wait until the process is complete.

Note

- If you are printing a document with a large printing area or printing multiple copies of a document, printing may pause to allow the ink to dry.

Advanced Guide

[Advanced Guide](#) > [Troubleshooting](#) > [Machine Moves But Ink Is Not Ejected](#)

Machine Moves But Ink Is Not Ejected

• Check 1: Are the Print Head nozzles clogged?

Print the Nozzle Check Pattern to determine whether the ink ejects properly from the print head nozzles.

Refer to [Routine Maintenance](#) for the Nozzle Check Pattern printing, Print Head Cleaning, and Print Head Deep Cleaning.

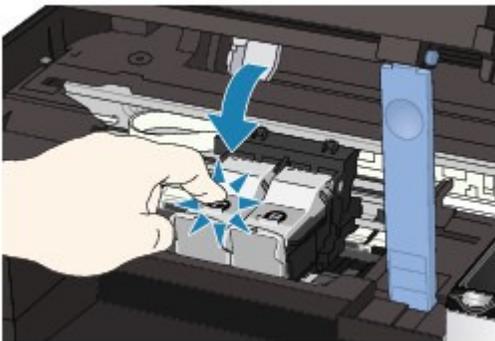

- If the Nozzle Check Pattern is not printed correctly:
After performing the Print Head Cleaning, print the Nozzle Check Pattern and examine the pattern.
- If the problem is not resolved after performing the Print Head Cleaning twice:
Perform the Print Head Deep Cleaning.
If the problem is not resolved after performing the Print Head Deep Cleaning, turn off the machine and perform another Print Head Deep Cleaning after 24 hours.
- If the problem is not resolved after performing the Print Head Deep Cleaning twice:
Ink may have run out. Replace the FINE Cartridge.

• Check 2: Is the FINE Cartridge installed properly?

If the Ink Cartridge Locking Cover is not closed securely, ink may not be ejected correctly.

Open the Scanning Unit (Cover), open the Ink Cartridge Locking Cover, then close the Ink Cartridge Locking Cover.

When you close the Ink Cartridge Locking Cover, push the Ink Cartridge Locking Cover until it clicks into place.

- **Check 3: When a FINE Cartridge runs out of ink, replace it with a new one.**

Advanced Guide

Advanced Guide > Troubleshooting > Printing Speed Is Not as Fast as Expected

Printing Speed Is Not as Fast as Expected

• Check 1: Is printing performed in Quiet Mode?

Print speed is reduced if you specified to print in Quiet Mode in the printer driver or Operation Panel. For faster printing, do not print in Quiet Mode.

For information on the printer driver settings, refer to [Reducing the Machine Noise](#).

For information to make setting on the Operation Panel, see [Changing the Machine Settings on the LCD](#).

• Check 2: Is the print quality set too high?

Increase the printing speed setting in the printer driver. Setting to prioritize speed makes printing faster.

1. Open the printer properties dialog box.

➔ [Opening the Printer Properties Dialog Box \(Windows\)](#)

Click Here: [Printer Driver](#)

* Before clicking here to open the printer properties dialog box, quit the running application software.

2. On the Main sheet, select Fast for the Print Quality setting.

Depending on the media type, the Fast option may not be available.

1. Open the Print dialog box.

➔ [Opening the Page Setup and Print Dialog Box \(Macintosh\)](#)

2. Select Quality & Media in the pop-up menu and then select Fast for the Print Quality setting.

Depending on the media type, the Fast option may not be available.

Note

- Printing speed may not improve noticeably by following the instructions above, depending on your system environment.

Advanced Guide

Advanced Guide > Troubleshooting > FINE Cartridge Holder Does Not Move to the Position for Replacing

FINE Cartridge Holder Does Not Move to the Position for Replacing

- **Check 1: Is the Power lamp off?**

Check if the **Power** lamp is lit green.

The FINE Cartridge Holder will not move unless the power is on. If the **Power** lamp is off, close the Scanning Unit (Cover) and turn the machine on.

While the **Power** lamp is flashing green, the machine is initializing. Wait until the **Power** lamp stops flashing and remains lit green, and then open the Scanning Unit (Cover) again.

- **Check 2: Is an error message displayed on the LCD?**

Close the Scanning Unit (Cover), follow the directions displayed in the error message to resolve the error, and then reopen it. For details on how to resolve the error, see [An Error Message Is Displayed on the LCD](#).

- **Check 3: Has the Scanning Unit (Cover) been left open for 10 minutes or longer?**

If the Scanning Unit (Cover) is left open for more than 10 minutes, the FINE Cartridge Holder moves to the right to prevent the Print Head from drying out. Close and reopen the Scanning Unit (Cover) to return the FINE Cartridge Holder to the left.

- **Check 4: Has the machine been printing continuously for a long period?**

Close the Scanning Unit (Cover), wait a while, then reopen it.

If the machine has been printing continuously for a long time, the FINE cartridge Holder may not move to the center since the Print Head may overheat.

Note

- Opening the Scanning Unit (Cover) while printing moves the FINE Cartridge Holder to the right. Close the Scanning Unit (Cover), and reopen it after printing is complete.

Advanced Guide

Advanced Guide > Troubleshooting > Paper Does Not Feed Properly

Paper Does Not Feed Properly

- **Check 1: Make sure of the following when you load paper.**

- When loading two or more sheets of paper, flip through the paper before loading.

- When loading two or more sheets of paper, align the edges of the sheets before loading.
- When loading two or more sheets of paper, make sure that the paper stack does not exceed the paper load limit.
However, proper feeding of paper may not be possible at this maximum capacity depending on the type of paper or environmental conditions (either very high or low temperature and humidity). In such cases, reduce the sheets of paper you load at a time to less than half of the paper load limit.
- Always load the paper in portrait orientation, regardless of the printing orientation.
- When you load the paper on the Rear Tray, load the paper with the print side facing UP and slide the Paper Guides to align with the both sides of the paper.

➔ [Loading Paper / Originals](#)

- **Check 2: Check to see if the paper you are printing on is not too thick or curled.**

➔ [Loading Paper / Originals](#)

- **Check 3: Make sure of the following when you load envelopes.**

When printing on envelopes, refer to [Loading Paper / Originals](#) , and prepare the envelopes before printing.

Once you have prepared the envelopes, load them in portrait orientation. If the envelopes are placed in landscape orientation, they will not feed properly.

- **Check 4: Make sure that there are not any foreign objects in the Rear Tray.**

If the paper tears in the Rear Tray, see [Paper Jams](#) to remove it.

If there are any foreign objects in the Rear Tray, be sure to turn off the machine, unplug it from the power supply, then remove the foreign object.

Advanced Guide

[Advanced Guide](#) > [Troubleshooting](#) > [Paper Jams](#)

Paper Jams

Note

- If you need to turn off the machine to remove jammed paper during printing, press the **Stop** button to cancel print jobs before turning off the machine.
-

➔ [Paper Is Jammed in the Paper Output Slot or the Rear Tray](#)

➔ [In Other Cases](#)

[Page top](#) ↑

Advanced Guide

Advanced Guide > Troubleshooting > Paper Jams > Paper Is Jammed in the Paper Output Slot or the Rear Tray

Paper Is Jammed in the Paper Output Slot or the Rear Tray

Remove the paper following the procedure below.

1. Slowly pull the paper out, either from the Rear Tray or from the Paper Output Slot, whichever is easier.

Note

- If the paper tears and a piece remains inside the machine, turn the machine off, open the Scanning Unit (Cover), and remove the paper. Be careful not to touch the components inside the machine. After removing all paper, close the Scanning Unit (Cover), and turn the machine back on.
- If you cannot pull the paper out, turn the machine off and turn it back on. The paper may be ejected automatically.

2. Reload the paper, and press the **OK** button on the machine.

If you turned off the machine in step 1, all print jobs in the queue are canceled. Reprint if necessary.

Note

- When reloading the paper, confirm that you are using the correct paper and are loading it correctly.
 - ➔ [Loading Paper / Originals](#)
- A5 sized paper is suited to printing documents consisting mainly of text. We do not recommend using such paper to print documents with photos or graphics, since the printout may curl and cause paper exit jams.

If you cannot remove the paper or the paper tears inside the machine, or if the paper jam error continues after removing the paper, contact the service center.

Advanced Guide

Advanced Guide > Troubleshooting > Paper Jams > In Other Cases

In Other Cases

Make sure of the following:

- **Check 1: Are there any foreign objects around the Paper Output Slot?**
- **Check 2: Are there any foreign objects in the Rear Tray?**

If there are any foreign objects in the Rear Tray, be sure to turn off the machine, unplug it from the power supply, then remove the foreign object.

- **Check 3: Is the paper curled?**
 - ➔ Check 3: Load the paper after correcting its curl.

Advanced Guide

➔ **Error Number: **** A printer error has occurred. Turn the printer off and then on again. If this doesn't clear the error, see the user's guide for more detail. Is Displayed**

➔ **Windows** Writing Error/Output Error/Communication Error

➔ **Macintosh** Error Number: 300 Is Displayed

➔ **Macintosh** Error Number: 1700 Is Displayed

➔ **Macintosh** Ink Info Number: 1688 Is Displayed

➔ **Macintosh** Ink Info Number: 1686 Is Displayed

➔ **Windows** Other Error Messages

➔ **Windows** The Inkjet Printer/Scanner/Fax Extended Survey Program Screen Is Displayed

➔ **Macintosh** The Inkjet Printer/Scanner/Fax Extended Survey Program Icon Appears

Error Number: B200 A printer error has occurred. Turn the printer off and unplug the power cord of the printer from the power supply. Then contact the service center. Is Displayed

Turn off the machine, and unplug the power cord of the machine from the power supply.

Contact the service center.

Error Number: ** A printer error has occurred. Turn the printer off and then on again. If this doesn't clear the error, see the user's guide for more detail. Is Displayed**

***** is displayed in the alphanumeric character and depends on the error occurred.

- **5100 Is Displayed**

Confirm the movement of the FINE Cartridge Holder blocked.

Cancel printing from your computer, turn off the machine. Then clear the jammed paper or protective material that is preventing the FINE Cartridge Holder from moving, and turn on the machine again.

Important

- Be careful not to touch the components inside the machine. The machine may not print out properly if you touch it.
- If the problem is not resolved, contact the service center.

- **6000 Is Displayed**

If any object is placed in front of the machine, remove it.

Open the Paper Output Tray gently, then turn the power off and back on.

- **Four-Digit Alphanumeric and "Printer error has occurred." Is Displayed**

Turn off the machine, and unplug the power cord of the machine from the power supply.

Plug the machine back in and turn the machine back on.

If the problem is not resolved, contact the service center.

- **Check 1: If the Power lamp is off, make sure that the power plug is plugged in, then turn the machine on.**

While the **Power** lamp is flashing green, the machine is initializing. Wait until the **Power** lamp stops flashing and remains lit green.

- **Check 2: Make sure that the printer port is configured appropriately in the printer driver.**

* In the following instructions, "XXX" signifies your machine's name.

- 1. Log on as a user account with administrator privilege.**

- 2. Click Control Panel, then Printer under Hardware and Sound.**

In Windows XP, click Control Panel, Printers and Other Hardware, then Printers and Faxes.

In Windows 2000, click Control Panel then Printers.

- 3. Right-click the Canon XXX Printer icon, then select Properties.**

- 4. Click the Ports tab to confirm the port settings.**

Make sure that a port named USBnnn (where "n" is a number) with Canon XXX Printer appearing in the Printer column is selected for Print to the following port(s).

If the port setting is not correct, reinstall the MP Drivers or change the port setting according to the interface you are using.

- **Check 3: Make sure that the USB cable is securely plugged in to the machine and the computer.**

- If you are using a relay device such as a USB hub, disconnect it, connect the machine directly to the computer, and try printing again. If printing starts normally, there is a problem with the relay device. Consult the reseller of the relay device for details.
- There could also be a problem with the USB cable. Replace the USB cable and try printing again.

- **Check 4: Make sure that the MP Drivers are installed correctly.**

Uninstall the MP Drivers following the procedure described in [Deleting the Unnecessary MP Drivers](#), insert the *Setup CD-ROM* into the computer's disc drive and perform Custom Install and select MP Drivers to install again.

- **Check 5: Check the status of the device on your computer.**

Follow the procedure below to check the status of the device.

- 1. Click Control Panel, Hardware and Sound, then Device Manager.**

If the User Account Control screen is displayed, follow the on-screen instructions.

In Windows XP, click Control Panel, Performance and Maintenance, System, then click Device Manager on the Hardware sheet.

In Windows 2000, click Control Panel, System, then Device Manager on the Hardware sheet.

- 2. Double-click Universal Serial Bus controllers then USB Printing Support.**

If USB Printing Support is not displayed, make sure that the machine is correctly connected to the computer.

➡ **Check 3: Make sure that the USB cable is securely plugged in to the machine and the computer.**

- 3. Click the General tab and make sure that there is no indication of a problem with the device.**

If a device error is displayed, refer to Windows help to resolve the error.

Macintosh Error Number: 300 Is Displayed

- **Check 1: If the Power lamp is off, make sure that the power plug is plugged in, then turn the machine on.**

While the **Power** lamp is flashing green, the machine is initializing. Wait until the **Power** lamp stops flashing and remains lit green.

- **Check 2: Make sure that the USB cable is securely plugged in to the machine and the computer.**
 - If you are using a relay device such as a USB hub, disconnect it, connect the machine directly to the computer, and try printing again. If printing starts normally, there is a problem with the relay device. Consult the reseller of the relay device for details.
 - There could also be a problem with the USB cable. Replace the USB cable and try printing again.
- **Check 3: Make sure that your machine's name is selected in the Print dialog box.**

➔ [Opening the Page Setup and Print Dialog Box \(Macintosh\)](#)

Macintosh Error Number: 1700 Is Displayed

- **Check: See [The ink absorber is almost full. in An Error Message Is Displayed on the LCD](#) and take the appropriate action.**

Macintosh Ink Info Number: 1688 Is Displayed

Macintosh Ink Info Number: 1686 Is Displayed

- **Check: See [Ink may have run out. in An Error Message Is Displayed on the LCD](#) and take the appropriate action.**

Windows Other Error Messages

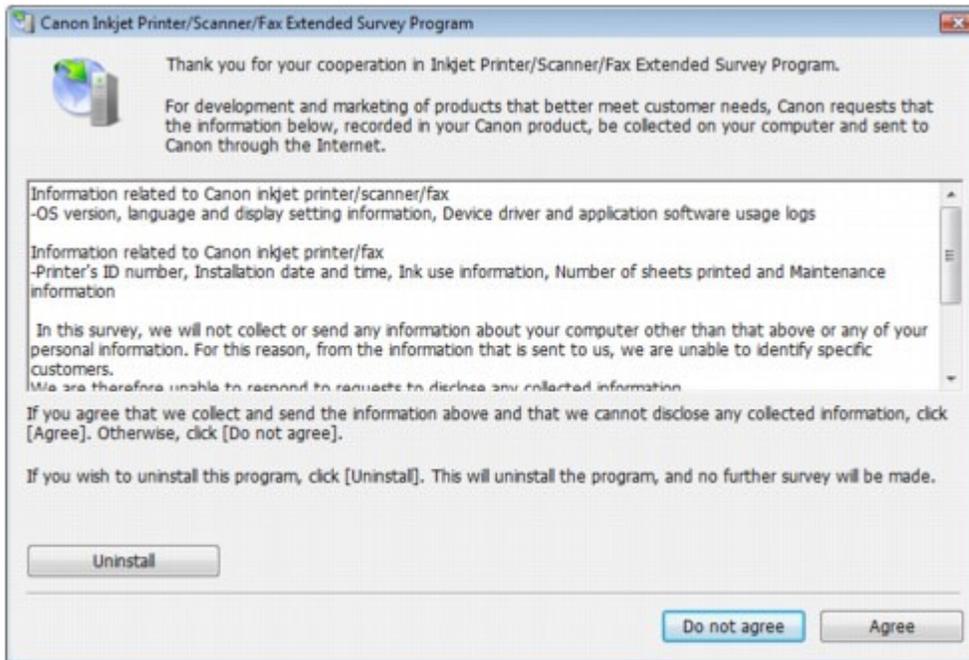

- **Check: If an error message is displayed outside the printer status monitor, check the following:**
 - "Could not spool successfully due to insufficient disk space"
Delete any unnecessary files to increase the amount of free space on the disk.
 - "Could not spool successfully due to insufficient memory"
Quit other running applications to increase available memory.
If you still cannot print, restart your computer and retry printing.
 - "Printer driver could not be found"
Uninstall the printer driver according to the procedure described in [Deleting the Unnecessary MP Drivers](#), and then reinstall it.
 - "Could not print Application name - File name"
Try printing again once the current job is complete.

Windows The Inkjet Printer/Scanner/Fax Extended Survey Program Screen Is Displayed

If the Inkjet Printer/Scanner/Fax Extended Survey Program is installed, a confirmation screen asking for permission to send the printer usage information will be displayed three months and then six months after the installation. After that, it will be displayed every six months for about four

years.

Read the instructions on the screen and follow the procedure below.

- **If you agree to participate in the survey program:**

Click Agree, then follow the on-screen instructions. The printer usage information will be sent via the Internet. If you have followed the on-screen instructions, the information will be sent automatically from the second time onward and the confirmation screen will not be displayed again.

Note

- When the information is being sent, a caution screen such as an Internet security screen may be displayed. In this case, confirm that the program name is "IJPLMUI.exe", then allow it.
- If you deselect the Send automatically from the next time check box, the information will not be sent automatically from the second time onward and a confirmation screen will be displayed at the time of the next survey. To send the information automatically, see [Changing the confirmation screen setting](#).

- **If you do not agree to participate in the survey program:**

Click Do not agree. The confirmation screen will be closed, and the survey at that time is skipped. The confirmation screen will be displayed again three months later.

- **To uninstall the Inkjet Printer/Scanner/Fax Extended Survey Program:**

To uninstall the Inkjet Printer/Scanner/Fax Extended Survey Program, click Uninstall, then follow the on-screen instructions.

- **Changing the confirmation screen setting:**

1. Select items the Start menu as shown below.
 - In Windows Vista, select the Start menu > Control Panel > Uninstall a program.
 - In Windows XP, select the Start menu > Control Panel > Add or Remove Programs.
 - In Windows 2000, select the Start menu > Settings > Control Panel > Add/Remove Programs.

Note

- In Windows Vista, a confirmation/warning dialog box may appear when installing, uninstalling or starting up software. This dialog box appears when administrative rights are required to perform a task. If you are logged on to an administrator account, click Continue or Allow to continue.

2. Select Canon Inkjet Printer/Scanner/Fax Extended Survey Program.
3. Select Change.

If you select Yes after you have followed the on-screen instructions, the confirmation screen will be displayed at the time of the next survey.

If you select No, the information will be sent automatically.

Note

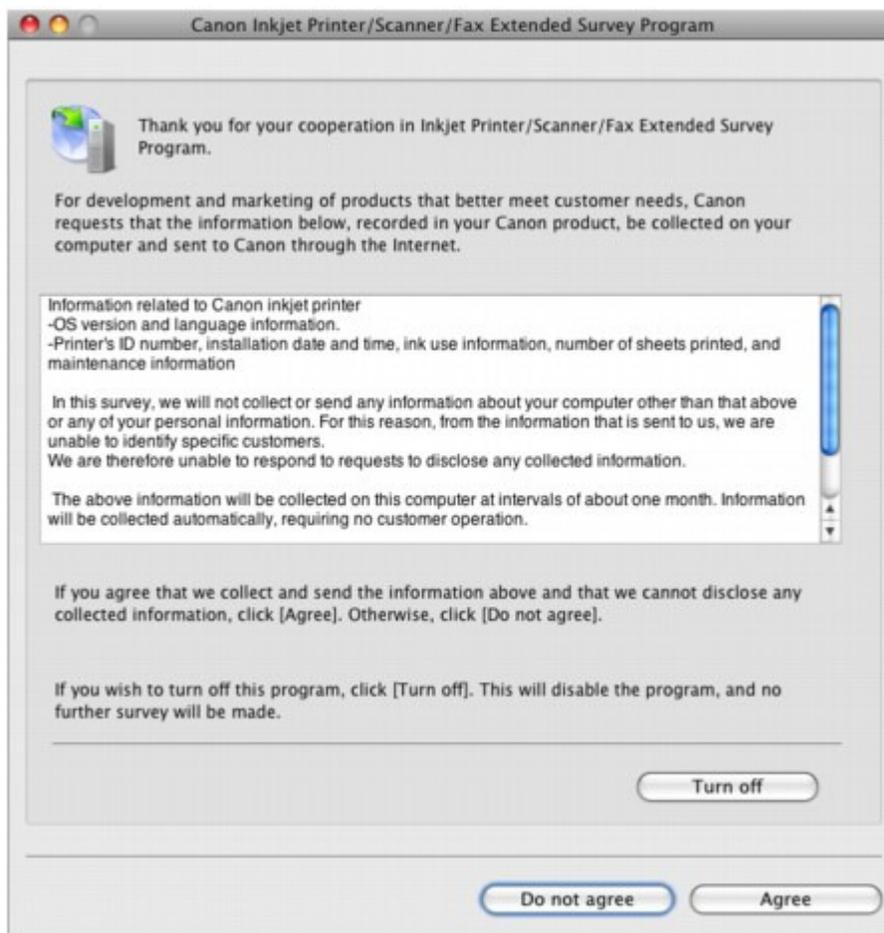

- If you select Uninstall (or Remove), the Inkjet Printer/Scanner/Fax Extended Survey Program is uninstalled. Follow the on-screen instructions.

Macintosh The Inkjet Printer/Scanner/Fax Extended Survey Program Icon Appears

If the Inkjet Printer/Scanner/Fax Extended Survey Program is installed, the printer usage information is scheduled to be sent three months and then six months after the installation. After that, it is scheduled to be sent every six months for about four years. The Inkjet Printer/Scanner/Fax Extended Survey Program icon appears in the Dock when it is time to send the printer usage information.

In Mac OS X v.10.3.9, the Inkjet Printer/Scanner/Fax Extended Survey Program is not installed.

Read the instructions on the screen after clicking the icon, then follow the procedure below.

• If you agree to participate in the survey program:

Click Agree, then follow the on-screen instructions. The printer usage information will be sent via the Internet. If you have followed the on-screen instructions, the information will be sent automatically from the second time onward and the confirmation screen will not be displayed again.

Note

- If you deselect the Send automatically from the next time check box, the information will not be sent automatically from the second time onward and the Inkjet Printer/Scanner/

Fax Extended Survey Program icon will appear in the Dock at the time of the next survey.

- **If you do not agree to participate in the survey program:**

Click Do not agree. The confirmation screen will be closed, and the survey at that time is skipped. The confirmation screen will be displayed again three months later.

- **To stop sending the information:**

Click Turn off. The Inkjet Printer/Scanner/Fax Extended Survey Program is stopped, and the information will not be sent. To resume the survey, see [Changing the setting:](#) .

- **To uninstall the Inkjet Printer/Scanner/Fax Extended Survey Program:**

1. Stop the Inkjet Printer/Scanner/Fax Extended Survey Program.

➔ [Changing the setting:](#)

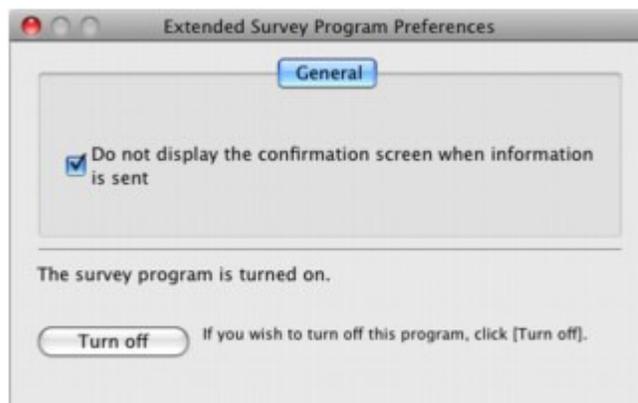

2. Select Applications from the Go menu, and double-click the Canon Utilities folder, then the Inkjet Extended Survey Program folder.
3. Place the Canon Inkjet Printer/Scanner/Fax Extended Survey Program.app file into the Trash.
4. Restart the computer.

Empty the Trash and restart your computer.

- **Changing the setting:**

To display the confirmation screen every time the printer usage information is sent or to resume surveying, follow the procedure below.

1. Select Applications from the Go menu, and double-click the Canon Utilities folder, then the Inkjet Extended Survey Program folder.
2. Double-click the Canon Inkjet Printer/Scanner/Fax Extended Survey Program icon.

- **Do not display the confirmation screen when information is sent:**
If the check box is selected, the information will be sent automatically.
If the check box is not selected, the Inkjet Printer/Scanner/Fax Extended Survey Program icon will appear in the Dock at the time of the next survey. Click the icon, then follow the on-screen instructions.
- **Turn off/Turn on button:**
Click the Turn off button to stop the Inkjet Printer/Scanner/Fax Extended Survey Program.
Click the Turn on button to restart the Inkjet Printer/Scanner/Fax Extended Survey Program.

Advanced Guide > Troubleshooting > For Windows Users

For Windows Users

Printer Status Monitor Is Not Displayed

- **Check: Is the printer status monitor enabled?**

Make sure that Enable Status Monitor is selected on the Option menu of the printer status monitor.

- 1. Open the printer properties dialog box.**

➡ [Opening the Printer Properties Dialog Box \(Windows\)](#)

- 2. On the Maintenance sheet, click View Printer Status.**

- 3. Select Enable Status Monitor on the Option menu if it is not selected.**

- **If you are using Windows Vista:**

Launching MP Navigator EX Whenever Pressing the Color or Black Button on the Machine

- **Check: Specify the response from pressing the Color or Black button on the machine.**

Follow the procedure below to specify the response on your computer.

- 1. Log on as a user account with administrator privilege.**

- 2. Click Control Panel, Hardware and Sound, then Scanners and Cameras.**

- 3. Select WIA Canon XXX ser, then click the Properties button.**

If the User Account Control screen appears, click Continue.

- 4. Click the Events tab on the WIA Canon XXX ser Properties screen.**

- 5. Select Start this program for Actions, then select MP Navigator EX Ver3.0 from the pull-down menu.**

Choose an event from the Select an event pull-down menu, then select MP Navigator EX Ver3.0 to launch for each event. If MP Navigator EX Ver3.0 is already selected for each event, click Cancel.

- 6. Click OK.**

Advanced Guide

Advanced Guide > Troubleshooting > Cannot Print Properly from a Photo Index Sheet

Cannot Print Properly from a Photo Index Sheet

Failed to scan Photo Index Sheet. Is Displayed

- **Check the following, press the OK button, then perform the Photo Index Sheet scan & print menu again.**
 - Did you set Photo Index Sheet in the correct position and orientation on the Platen Glass?
 - Are the Platen Glass and the Photo Index Sheet dirty?
 - Are all required circles on the Photo Index Sheet filled in?
 - Is the circle for the number of copies to print for each photograph filled when you print with DPOF print?

Note

- If the filled circles on the Photo Index Sheet are not dark or vast enough, the machine may not scan the Photo Index Sheet properly.

Cannot print the selected photo. Is Displayed/Differ Photo or Blank Is Printed out/Paper Feeds Before Printing Is Complete

- **Check 1: Make sure that the photo you want to print is displayed on the LCD.**
Press the **Menu** button, select Photo print, then select the photo you want to print to make sure that it is saved on the memory card.
- **Check 2: Reprint out the Photo Index Sheet.**

Note

- The machine may not scan the Photo Index Sheet properly even though Print a blank Photo Index Sheet circle is filled in. Press the **Menu** button, select Photo index sheet, follow the on-screen instructions to reprint out the Photo Index Sheet.

- **Check 3: Make sure that the photo saved on the memory card can be read by this machine.**
➔ [Printing from a Memory Card](#)
- **Check 4: Was the photo saved on the memory card processed on a computer?**
A photo processed on a computer may not be printed.

Note

- When a photo was processed on a computer is selected, "?" is displayed on the LCD.

- **Check 5: Did you make any changes to the memory card after printing the Photo Index Sheet?**
If you added photos to or deleted photos from the memory card, reprint out the Photo Index Sheet.

Important

- Do not rewrite the contents of the memory card until printing and scanning of the Photo Index Sheet are complete.

- **Check 6: Did you remove the memory card while printing?**
Do not remove the memory card before printing is complete.

 **Important**

- If the memory card is removed while printing, the stored data may be damaged or the selected photo may not be printed as the reading of the photo on the memory card and the printing of the photo are simultaneous.

Advanced Guide

Advanced Guide > Troubleshooting > Problems with Scanning > Scan Quality (Image Displayed on the Monitor) Is Poor

Scan Quality (Image Displayed on the Monitor) Is Poor

Check 1: Increase the scanning resolution.

➔ Resolution

Check 2: Set the scale to 100%.

Some applications do not display images clearly if the image is too small.

Check 3: If moire (stripe pattern) appears, take the following measures and scan again.

- On the Basic Mode tab of ScanGear (scanner driver), select Magazine(Color) in Select Source.
➔ Basic Mode Tab
- On the Advanced Mode tab of ScanGear (scanner driver), set Descreen in Image Settings to ON.
➔ Image Settings

Note

- If moire appears when you scan a digital print photo, take the above measures and scan again.
- If you use MP Navigator EX, set Document Type to Magazine(Color) or enable Descreen in the Scan Settings dialog box and scan again.
➔ Scan Settings Dialog Box (Photos/Documents)

Check 4: Check the monitor's color depth.

From the Start menu, select Control Panel > Appearance and Personalization > Adjust screen resolution to open the Display Settings dialog box. Set the color depth to Medium (16 bit) or Highest (32 bit).

- **Windows XP:**
From the Start menu, select Control Panel > Display to open the Display Properties dialog box. On the Settings tab, set Colors to Medium (16 bit) or Highest (32 bit).
- **Windows 2000:**
From the Start menu, select Settings > Control Panel > Display to open the Display Properties dialog box. On the Settings tab, set Colors to High Color (16 bit) or True Color (32 bit).

Check 5: Clean the Platen and Document Cover.

➔ Cleaning the Platen Glass and Document Cover

Check 6: If the document is in poor condition (dirty, faded, etc.), use Reduce Dust and Scratches, Fading Correction, Grain Correction, etc. in Image Settings on the Advanced Mode tab of ScanGear (scanner driver).

➔ Image Settings

Check 7: If the color tone of images is different from the original document, take the following measures and scan again.

- On the Advanced Mode tab of ScanGear (scanner driver), set Image Adjustment in Image Settings to None.
➔ Image Settings
- Open the Preferences dialog box from the Advanced Mode tab of ScanGear (scanner driver) and set Color Matching on the Color Settings tab.
➔ Color Settings Tab

[Advanced Guide](#) > [Troubleshooting](#) > [Problems with Scanning](#) > [Scanner Does Not Work After Upgrading Windows](#)

Scanner Does Not Work After Upgrading Windows

Check: Disconnect the machine from the computer, then uninstall and reinstall the MP Drivers and MP Navigator EX.

- **Step 1: Uninstall the MP Drivers.**

See "[Deleting the Unnecessary MP Drivers](#)" for details.

- **Step 2: Uninstall MP Navigator EX.**

1. From the Start menu, select (All) Programs > Canon Utilities > MP Navigator EX 3.0 > MP Navigator EX Uninstall.
2. When a confirmation appears, click Yes.
3. When uninstallation is complete, click OK.
MP Navigator EX is uninstalled.

- **Step 3: Reinstall the MP Drivers and MP Navigator EX.**

Insert the *Setup CD-ROM* into the computer's disc drive, then select Custom Install and reinstall the MP Drivers and MP Navigator EX.

Advanced Guide

[Advanced Guide](#) > [Troubleshooting](#) > [Software Problems](#) > E-mail Software Program You Want to Use Does Not Appear in the Screen for Selecting an E-mail Software Program

E-mail Software Program You Want to Use Does Not Appear in the Screen for Selecting an E-mail Software Program

Check 1: MP Navigator EX may not support the e-mail software program.

The following e-mail software programs are supported. (Image are attached to the mail message automatically.)

- Windows Mail (Windows Vista)
- Outlook Express (Windows XP/Windows 2000)
- Microsoft Outlook

Check 2: If an e-mail software program does not operate properly, check that the program's MAPI is enabled.

To enable MAPI, refer to the manual of the e-mail software program.

Check 3: If using an e-mail software program other than the ones listed above, select None (Attach Manually) when prompted to select a program and attach the scanned image manually.

Advanced Guide

[Advanced Guide](#) > [Troubleshooting](#) > [If You Cannot Resolve the Problem](#)

If You Cannot Resolve the Problem

If you cannot resolve the problem with any of the workarounds in this chapter, please contact the seller of the machine or the service center.

Canon support staff are trained to be able to provide technical support to satisfy customers.

Caution

- If the machine emits any unusual sound, smoke, or odor, turn it off immediately. Unplug the power cord from the outlet and contact the seller or the service center. Never attempt to repair or disassemble the machine yourself.
 - Attempts by customers to repair or take apart the machine will invalidate any warranty regardless of whether the warranty has expired.
-

Before contacting the service center, confirm the following:

- Product name:
 - * Your machine's name is located on the front cover of the setup manual.
- Serial number: please refer to the setup manual
- Details of the problem
- What you tried to solve the problem, and what happened

Advanced Guide

Advanced Guide > Troubleshooting > Instructions for Use (Printer Driver)

Instructions for Use (Printer Driver)

This printer driver is subject to the following restrictions. Keep the following points in mind when using the printer driver.

Restrictions on the Printer Driver

- With some applications, the Copies setting in the Page Setup tab of the printer driver may not be enabled.
In this case, use the copies setting in the Print dialog box of the application software.
- If the selected Language in the About dialog box does not match the operating system interface language, the driver screen may not be displayed properly.
- Do not change the Advanced tab items of the printer properties. If you change any of the items, you will not be able to use the following functions correctly.
Also, if Print to file is selected in the Print dialog box of the application software and with applications that prohibit EMF spooling, such as Adobe Photoshop LE and MS Photo Editor, the following functions will not operate.
 - Preview before printing on the Main tab
 - Prevent loss of print data in the Print Options dialog box
 - Page Layout, Poster, Booklet, Duplex Printing, Specify Margin..., Print from Last Page, Collate, and Stamp/Background... on the Page Setup tab
- Since the resolution in the preview display differs from the printing resolution, text and lines in the preview display may appear different from the actual print result.
- With some applications, the printing is divided into multiple print jobs.
To cancel printing, delete all divided print jobs.
- If image data is not printed correctly, display the Print Options dialog box from the Page Setup tab and change the setting of Disable ICM required from the application software. This may solve the problem.
- Software windows may not appear correctly on Windows Vista when fonts are set to Larger scale. When you want to display the windows with Larger scale fonts, set the desktop theme to Windows Classic as follows:
 1. Select Control Panel from the Start menu.
 2. Select Appearance and Personalization -> Personalization -> Theme.
The Theme Settings dialog box opens.
 3. At the Theme Settings dialog box, click the Themes tab, and select Windows Classic from Theme.
 4. Click OK.
Desktop changes to Windows Classic display.
- The card slot (memory card) of the machine may become inaccessible. In such cases, restart the machine or turn it off and reconnect the USB cable.

Points to Note with Applications

- There are following restrictions in Microsoft Word (Microsoft Corporation).
- When Microsoft Word has the same printing functions as the printer driver, use Word to specify them.

- When selecting Scaled, Fit-to-Page, or Page Layout from the Page Layout list on the Page Setup tab, the selected printing function may not be effective, depending on the version of Word.

If this happens, follow the procedure below.

1. Open Word's Print dialog box.
 2. Open the printer driver setup window, specify Page Layout on the Page Setup tab, and click OK.
 3. Without starting printing, close the Print dialog box.
 4. Open Word's Print dialog box again.
 5. Open the printer driver setup window again and click OK.
 6. Start printing.
- Illustrator/Adobe Systems Inc.
If bitmap printing takes effect, printing may take time or some data may not be printed. Print after unchecking the Bitmap Printing check box in the Print dialog box.

[Page top](#) ↕

Advanced Guide

Advanced Guide > Troubleshooting > General Notes (Scanner Driver)

General Notes (Scanner Driver)

ScanGear (scanner driver) is subject to the following restrictions. Keep these points in mind when using it.

Scanner Driver Restrictions

- When using the NTFS file system, the TWAIN data source may not be invoked. This is because the TWAIN module cannot be written to the winnt folder for security reasons. Contact the computer's administrator for help.
- Some computers (including laptops) connected to the machine may not resume correctly from standby mode. In that case, restart the computer.
- Do not connect two or more machines or multifunction printers with scanner function to the same computer simultaneously. If multiple scanning devices are connected, you cannot scan from the Operation Panel of the machine and also may experience errors while accessing the devices.
- Software screens may not appear correctly on Windows Vista when font size is set to Larger scale. If you want to display the screens with Larger scale fonts, change the theme in Appearance and Personalization to Windows Classic as follows:
 1. From the Start menu, select Control Panel.
 2. Select Appearance and Personalization > Personalization > Theme.
The Theme Settings dialog box opens.
 3. On the Themes tab of the Theme Settings dialog box, select Windows Classic under Theme.
 4. Click OK.
Desktop changes to Windows Classic view.
- Use the default display font size of the OS. Otherwise, software screens may not appear correctly.
- Scanning may fail if the computer has resumed from sleep or standby mode. In that case, follow these steps and scan again.
 1. Turn off the machine.
 2. Exit ScanGear (scanner driver), then disconnect the USB cable from the computer and reconnect it.
 3. Turn on the machine.
- ScanGear (scanner driver) cannot be opened in multiple applications at the same time. Within an application, ScanGear (scanner driver) cannot be opened for the second time when it is already open.
- Be sure to close the ScanGear (scanner driver) window before closing the application.
- Make sure that you have adequate disk space available when scanning large images at high resolutions. For example, at least 300 MB of free space is required to scan an A4 document at 600 dpi in full-color.
- ScanGear (scanner driver) and WIA driver cannot be used at the same time.
- Do not enter the computer into sleep or hibernate state during scanning.
- Calibration may take time if the machine is connected via USB 1.1.

Applications with Restrictions on Use

- If you start Media Center included in Windows XP Media Center Edition 2005, you may not be able to scan using the Operation Panel of the machine. In that case, restart the computer.
- You cannot scan images with Media Center included in Windows Vista and Windows XP Media Center Edition 2005. Scan with other applications such as MP Navigator EX.
- In some applications, you may encounter a problem when you switch to thumbnail view in the Advanced Mode tab of ScanGear (scanner driver). In that case, scan each document individually,

changing Paper Size according to the document.

- In some applications, if you select the View scanned images checkbox in the Auto Scan Mode tab of ScanGear (scanner driver), the window displaying the thumbnails of the scanned images may close automatically.
- Some applications may not display the TWAIN user interface. In that case, refer to the application's manual and change the settings accordingly.
- Some applications do not support continuous scanning of multiple documents. In some cases, only the first scanned image is accepted, or multiple images are scanned as one image.
- When scanning platen size images into a Microsoft Office application (such as Word, Excel or PowerPoint), click Custom Insert in the Insert Picture from Scanner or Camera screen. Otherwise, images may not be scanned correctly.
- Images may not be scanned correctly in some applications. In that case, increase the operating system's virtual memory and retry.
- When image size is too large (such as when scanning large images at high resolution), your computer may not respond or the progress bar may remain at 0% depending on the application. In that case, cancel the action (for example by clicking Cancel on the progress bar), then increase the operating system's virtual memory or reduce the image size/resolution and retry. Alternatively, scan the image via MP Navigator EX first, then save and import it into the application.

Advanced Guide

Advanced Guide > Appendix > Printing Area

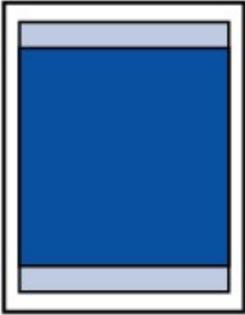

Printing Area

To ensure the best print quality, the machine allows a margin along each edge of media. The actual printable area will be the area inside these margins.

Recommended printing area : Canon recommends that you print within this area.

Printable area : The area where it is possible to print.

However, printing in this area can affect the print quality or the paper feed precision.

Note

■ Borderless Printing

- By selecting Borderless Printing option, you can make prints with no margins.
- When performing Borderless Printing, slight cropping may occur at the edges since the printed image is enlarged to fill the whole page.
- For Borderless Printing, use the following paper:
 - Glossy Photo Paper "Everyday Use" GP-501
 - Photo Paper Glossy GP-502
 - Photo Paper Plus Semi-Gloss SG-201
 - Photo Paper Pro Platinum PT-101
 - Photo Paper Plus Glossy II PP-201
 - Photo Paper Pro II PR-201
 - Matte Photo Paper MP-101

Performing Borderless Printing on any other type of paper may substantially reduce printing quality and/or result in printouts with altered color hues.

Borderless Printing on plain paper may result in printouts with reduced quality. Use them only for test printing. You can perform Borderless Printing on plain paper only when printing from your computer.

- Borderless Printing is not available for legal, A5, or B5 sized paper, or envelopes.
 - Depending on the type of paper, Borderless Printing may reduce the print quality at the top and bottom edges of the paper or cause these parts to become smudged.
- In Borderless Copying, you can specify the amount of extension by Extension amount in Device settings.

Advanced Guide > Appendix > How to Detach/Attach the Document Cover

How to Detach/Attach the Document Cover

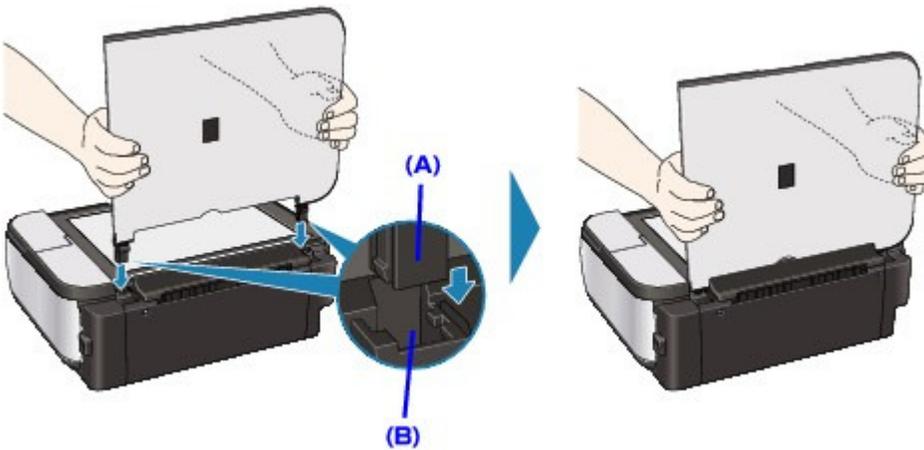

- **Detaching the Document Cover:**

Hold up the Document Cover vertically.

- **Attaching the Document Cover:**

Insert both hinges (A) of the Document Cover vertically into the holder (B) to attach the Document Cover as illustrated below.

Advanced Guide

Advanced Guide > Appendix > DPOF Print by Using the Photo Index Sheet

DPOF Print by Using the Photo Index Sheet

Print out a Photo Index Sheet, select DPOF print, scan the sheet in, and you can print using DPOF settings stored in the memory card.

This section describes the DPOF Print function and the setting items of the Photo Index Sheet.

DPOF Print

If you have specified Digital Print Order Format (DPOF) settings on your digital camera, you can print using these settings. The machine supports the following DPOF functions.

Note

- DPOF is a standard format to record the specified information regarding images, such as which image or number of copies to print.
- If you scan the Photo Index Sheet with DPOF print though the photo saved on the memory card has no DPOF information, the error message is displayed on the LCD.

Version:

Based on ver. 1.00

Supported image types:

CIFF, Exif (TIFF), and JFIF

Print Style Standard Print:

Prints photos that were specified as "Standard Print" with DPOF

Print Style Index Print:

Prints an index of photos that were specified as "Index Print" with DPOF using the machine's index printing layout

Print Style Multi-Image Print:

Prints a photo that was specified as "Multi-Image Print" with DPOF (with the specified number of copies and layout)

Print Photo Select:

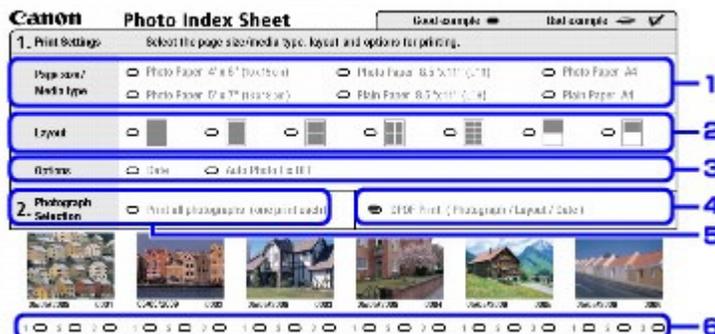

Prints only photos specified with DPOF

Number of copies:

Prints the number of copies specified with DPOF

Setting Items of the Photo Index Sheet

You can select the following setting items on the Photo Index Sheet.

Important

- When you print with DPOF print, do not fill the circle to specify the number of copies or to print a copy of all photographs on the Photo Index Sheet. If the circle is filled, the error message is displayed on the LCD.

1. Select the page size and other printing formats.

When you select the paper type other than plain paper, the photo specified as Standard Print or Multi-Image Print with DPOF is printed in Borderless. When you select plain paper, the photo is printed in Bordered.

2. Even if you fill this circle, the layout setting is disregarded.

The photo is printed in the layout specified with DPOF.

3. Specify each advanced setting.

The date printing setting is specified with DPOF. If you print the index of photos that is specified as Index Print with DPOF, all advanced setting is disregarded.

4. Fill this circle to print with DPOF print.**5. If the circle is filled when you print with DPOF print, the error message is displayed on the LCD.****6. If the circle is filled when you print with DPOF print, the error message is displayed on the LCD.** **Note**

-
- Prints are automatically enlarged or reduced to match the page size. Edges of the photo may be clipped off depending on the page size.
 - The shot date order setting by which photos are sorted follows that of DPOF.
-

Advanced Guide

Advanced Guide > Appendix > Deleting the Undesired Print Job

Deleting the Undesired Print Job

If the printer does not start printing, the print job data cancelled or failed may be remaining. Delete the undesired print job by using the Canon IJ Status Monitor.

1. Display the Canon IJ Status Monitor

Click the status monitor button displayed on the task bar.
The Canon IJ Status Monitor appears.

2. Display the print jobs

Click Display Print Queue....
The print queue window opens.

3. Delete the print jobs

Select Cancel All Documents from the Printer menu.
When the confirmation message appears, click Yes.
The deletion of the print job is complete.

Important

- Users who have not been granted access permission for printer management cannot delete the print job of another user.

Note

- When you perform this operation, all print jobs are deleted. If the print queue list contained a necessary print job, start the printing process over from the beginning.

[Page top](#) ↕

Advanced Guide

Advanced Guide > Appendix > Updating the MP Drivers > Deleting the Unnecessary MP Drivers

Deleting the Unnecessary MP Drivers

The MP Drivers you no longer use can be deleted.
When deleting the MP Drivers, first exit all programs that are running.

The procedure to delete the unnecessary MP Drivers is as follows:

When There is an Uninstaller

1. Start the uninstaller

- In Windows Vista, select the Start menu -> All Programs -> "Your model name" -> MP Drivers Uninstaller.
- In Windows XP, select the start menu -> All Programs -> "Your model name" -> MP Drivers Uninstaller.
- In Windows 2000, select the Start menu -> Programs -> "Your model name" -> MP Drivers Uninstaller.

The MP Drivers Uninstaller dialog box is displayed.

Important

- In Windows Vista, a confirmation/warning dialog box may appear when installing, uninstalling or starting software.
This dialog box appears when administrative rights are required to perform a task.
When you are logged on to an administrator account, click Continue or Allow to continue.
Some applications require an administrator account to continue. When you are logged on to a standard account, switch to an administrator account, and restart the operation from the beginning.

2. Execute the uninstaller

Click Execute. When the confirmation message appears, click Yes.
When all the files have been deleted, click Complete.

The deletion of the MP Drivers is complete.

Important

- Printer driver and scanner driver (ScanGear) will be deleted when you uninstall the MP Drivers.

When There is No Uninstaller

When there is no uninstaller in the Start menu of Windows Vista, follow these steps:

1. Select the printer to be deleted

Select the Start menu -> Control Panel -> Hardware and Sound -> Printers.
Click the model to delete, then press the Alt key on your keyboard. On the File menu, click Delete.

2. Delete the printer

When the User Account Control dialog box appears, click Continue. Then when the confirmation message appears, click Yes.
The icon is deleted.

3. Select the printer driver to be deleted

Press the Alt key. On the File menu, select Run as administrator, and then click Server Properties....

When the User Account Control dialog box appears, click Continue.

Click the Drivers tab. In the Installed printer drivers list, click the printer to delete.

4. Delete the printer driver

When you click Remove..., Remove Driver And Package dialog box is displayed.

Select Remove driver and driver package, and then click OK.

In the confirmation dialog box, click Yes.

When data collection is completed in the Remove Driver Package dialog box, click Delete.

5. Click OK

The deletion of the printer driver is complete.

Important

- You may not be able to delete the printer driver properly from the Installed printer drivers list. If this happens, restart your computer, and try again.

[Page top](#) 

Advanced Guide

[Advanced Guide](#) > [Appendix](#) > [Updating the MP Drivers](#) > [Before Installing the MP Drivers](#)

Before Installing the MP Drivers

This section describes the items that you should check before installing the MP Drivers. You should also refer to this section if the MP Drivers cannot be installed.

Checking the Machine Status

- Properly connect the personal computer and the machine. For details on connection instructions, refer to the "Install the Software" in the manual: Getting Started.
- Turn off the machine.

Checking the Personal Computer Settings

- Terminate all running applications.
- In Windows Vista, log on as a user who has the administrator rights.
In Windows XP, log on as the computer administrator.
In Windows 2000, log on as a member of the Administrators group.

Note

- When an old version of the MP Drivers is already installed, first delete (uninstall) that version. For instructions on deleting the MP Drivers, see "[Deleting the Unnecessary MP Drivers](#)."
-

Advanced Guide

Advanced Guide > Appendix > Updating the MP Drivers > Installing the MP Drivers

Installing the MP Drivers

You can access our web site through the Internet and download the latest MP Drivers for your model.

The procedure for installing the downloaded MP Drivers is as follows:

1. Turn off the machine

Important

- When you turn on the computer while the machine is on, the Windows Plug and Play function is executed automatically, and the Found New Hardware window (Windows Vista) or Found New Hardware Wizard window (Windows XP, Windows 2000) is displayed. In this case, click Cancel.

2. Start the installer

Double-click the icon of the downloaded file.
The installation program starts.

Important

- In Windows Vista, a confirmation/warning dialog box may appear when installing, uninstalling or starting software.
This dialog box appears when administrative rights are required to perform a task.
When you are logged on to an administrator account, click Continue or Allow to continue.
Some applications require an administrator account to continue. When you are logged on to a standard account, switch to an administrator account, and restart the operation from the beginning.

3. Install the driver

At the Welcome window, click Next.

Read the contents of the License Agreement window. After checking the contents, click Yes.
Installation of the MP Drivers begins.

After the Installation Complete window is displayed, check that the machine and the computer are connected through a cable.

To select the connection port for your machine manually, check the Select printer port check box, and click Manual Selection. At the Select Port window, select the connection destination, and then click OK.

4. Complete the installation

Click Complete.

Turn on the machine, and wait awhile until the connection is recognized.

This procedure installs the MP Drivers is complete.

Depending on the environment you are using, a message prompting you to restart the computer may be displayed. To complete the installation properly, restart the computer.

Important

- You can download the MP Drivers for free, but any Internet access charges incurred are your responsibility.

Advanced Guide

Advanced Guide > Appendix > Uninstalling the On-Screen Manuals

Uninstalling the On-Screen Manuals

Follow the procedure below to uninstall all of the installed on-screen manuals from your computer.

Before uninstalling the on-screen manuals, exit all on-screen manuals that are opening.

All of the installed on-screen manuals will be deleted at the same time.

1. Click Start > All Programs (Programs in Windows 2000) > Canon XXX Manual (where "XXX" is your machine's name) > Uninstall.
2. Click OK when the confirmation message appears.

Note

- When the message prompting you to restart your computer is displayed, click OK to restart your computer.

On-screen manuals other than printer driver's help and scanner driver's help are uninstalled at a time.

1. Select Applications on the Go menu.
2. Double-click the Canon Utilities folder, and then the IJ Manual folder.
3. Drag the folder of your machine's name into the trash.
4. Drag the  Canon XXX On-screen Manual icon (where "XXX" is your machine's name) on your desktop into the trash.

Advanced Guide > Appendix > Transporting the Machine

Transporting the Machine

When relocating the machine, pack the machine using the original packing materials.

If you do not have the original packing materials, pack the machine carefully using protective material and place it inside a sturdy box.

Important

- Do not transport or store the machine slanted, vertically, or upside-down, as the ink may leak and damage the machine.

1. Turn the machine off.
2. Confirm that the **Power** lamp is off and unplug the machine.

Important

- Do not unplug the machine while the **Power** lamp is lit or flashing green, as it may cause malfunction or damage to the machine, making the machine unable to print.

3. Retract the Paper Support, then close the Paper Output Tray.
4. Disconnect the printer cable from the computer and from the machine, and then disconnect the power plug from the machine.
5. Use adhesive tape to secure all the covers on the machine to keep them from opening during transportation. Then pack the machine in the plastic bag.
6. Attach the protective material to the machine when packing the machine.

Important

- Pack the machine with the FINE Cartridges left installed in the machine.

Note

- Clearly label the box as "FRAGILE" or "HANDLE WITH CARE".

Advanced Guide

Advanced Guide > Appendix > Opening the Printer Properties Dialog Box (Windows)

Opening the Printer Properties Dialog Box (Windows)

The printer driver setup window can be displayed through the application software in use or the Start menu of the Windows.

Open the Printer Properties Dialog Box through the Application Software

Follow the procedure below to configure print settings when printing.

1. Select the command you perform printing on the application software in use.

In general, select Print on the File menu to open the Print dialog box.

2. Select your model name and click Preferences (or Properties).

The printer properties dialog box opens.

Note

- Depending on application software you use, command names or menu names may vary and there may be more steps. For details, refer to the user's manual of your application software.

Open the Printer Properties Dialog Box through the Start Menu

Follow the procedure below to perform maintenance operations such as print head cleaning, or to configure print settings that are common for all application software.

1. Select items from the Start menu as shown below.

- In Windows Vista, select the Start menu > Control Panel > Hardware and Sound > Printers.
- In Windows XP, select the Start menu > Control Panel > Printers and Other Hardware > Printers and Faxes.
- In Windows 2000, select the Start menu > Settings > Printers.

2. Right-click your model name icon and then select Printing Preferences from the displayed menu.

The printer properties dialog box opens.

Important

- Opening the printer properties dialog box through Properties displays such tabs regarding the Windows functions as the Ports (or Advanced) tab. Those tabs do not appear when opening through Printing Preferences or application software. About tabs regarding Windows functions, refer to the user's manual for the Windows.

Advanced Guide

[Advanced Guide](#) > [Appendix](#) > [Opening the Page Setup and Print Dialog Box \(Macintosh\)](#)

Opening the Page Setup and Print Dialog Box (Macintosh)

You can open the Page Setup dialog box and the Print dialog box from the application program you are using.

Opening the Page Setup Dialog Box

Open the Page Setup dialog box to specify page (paper) settings before printing.

- 1. Select Page Setup... on the File menu in your application program.**

The Page Setup dialog box opens.

Opening the Print Dialog Box

Open the Print dialog box to specify print settings before printing.

- 1. Select Print... on the File menu in your application program.**

The Print dialog box opens.

Advanced Guide

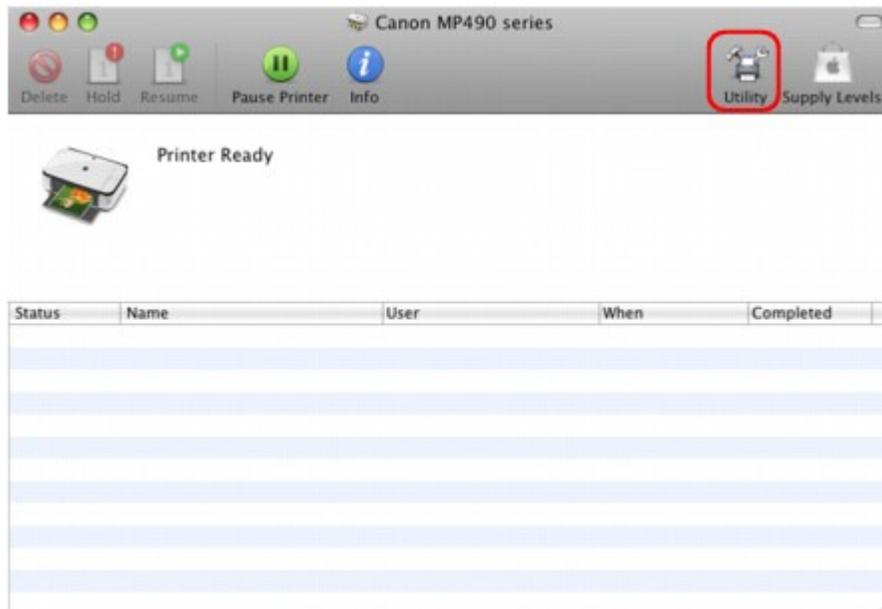

Advanced Guide > Appendix > Opening the Canon IJ Printer Utility (Macintosh)

Opening the Canon IJ Printer Utility (Macintosh)

To open the Canon IJ Printer Utility, follow the procedure below.

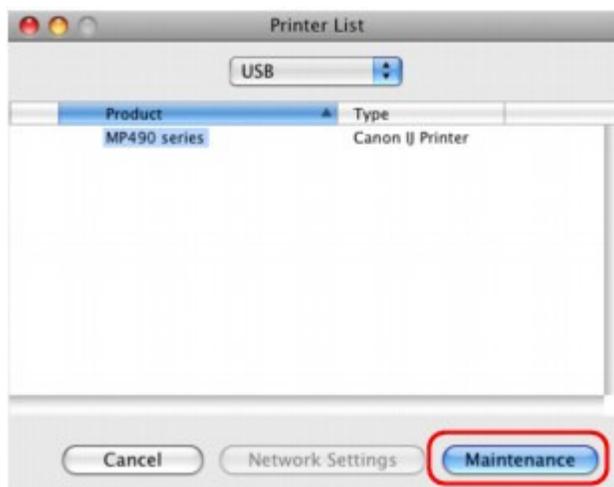

In Mac OS X v.10.5.x

1. Select System Preferences on the Apple menu.
2. Click Print & Fax.
3. Select your machine's name in the Printers and click Open Print Queue....
The job list of your machine is displayed.
4. Click Utility.

The Printer List opens.

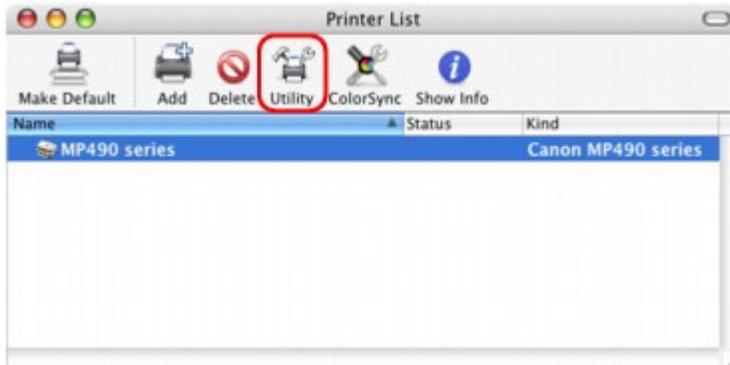

5. Select your machine's name in the Product list and click Maintenance.

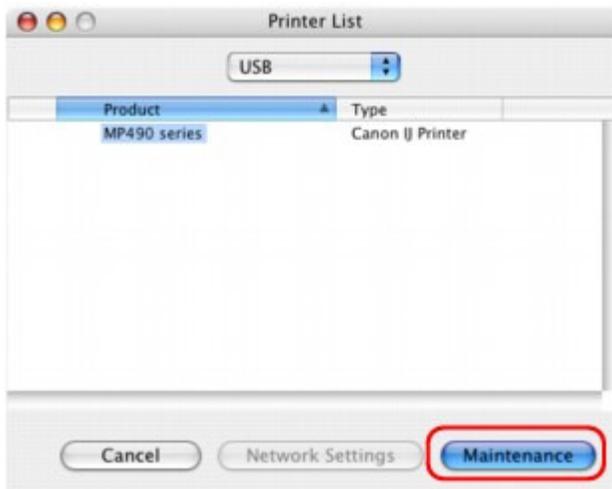

The Canon IJ Printer Utility starts up.

In Mac OS X v.10.4.x or Mac OS X v 10.3.9

1. Select Applications on the Go menu.
2. Double-click the Utilities folder, and then double-click the Printer Setup Utility icon.
The Printer List opens.
3. Select your machine's name in the Name list and click Utility.

4. Select your machine's name in the Product list and click Maintenance.

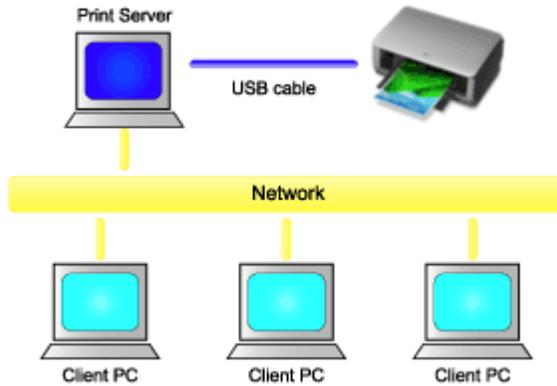

The Canon IJ Printer Utility starts up.

Advanced Guide

Advanced Guide > Appendix > Sharing the Printer on a Network

Sharing the Printer on a Network

When multiple computers are being used in the network environment, you can share the printer connected to one computer with the other computers. The Windows versions of the computers connected to the network do not necessarily have to be the same.

- **Settings on Print Server**

The procedure for setting up a computer directly connected to a printer with a USB cable is as follows:

- **Settings on Client PC**

The procedure for setting up those computers that will use this printer through the network is as follows:

When you execute print, the data is sent through the print server system to the printer.

Important

- In case an error occurred when a document is printed by the client system to a shared printer, the error message of Canon IJ Status Monitor will be displayed both on the client system and the print server system. For regular printing, Canon IJ Status Monitor will be displayed only on the client system.

Note

- Install the printer driver from the Setup CD-ROM that accompanies the machine on the print server system and each of the client systems according to the OS of each system.
- You cannot share this printer with Macintosh computers.

Advanced Guide

Advanced Guide > Appendix > Sharing the Printer on a Network > Settings on Print Server

Settings on Print Server

When you use the printer on a network, set up the printer driver for sharing on the server system.

The procedure for setting up the print server systems is as follows:

1. Install the printer driver on the print server system

For details on installation instructions, refer to the "Install the Software" in the manual: Getting Started.

2. Select items from the Start menu as shown below:

- In Windows Vista, select the Start menu -> Control Panel -> Hardware and Sound -> Printers.
- In Windows XP, select the start menu -> Control Panel -> Printers and Other Hardware -> Printers and Faxes.
- In Windows 2000, select the Start menu -> Settings -> Printers.

The Printers window (Windows Vista, Windows 2000) or Printers and Faxes window (Windows XP) is displayed.

3. Click the icon for the model name of printer to be shared

- In Windows Vista, press the Alt key on your keyboard and then select Run as administrator -> Sharing... from the displayed File menu.
- In Windows XP or Windows 2000, select Sharing... from the File menu.

Important

- In Windows Vista, a confirmation/warning dialog box may appear when installing, uninstalling, or starting software. This dialog box appears when administrative rights are required to perform a task. When you are logged on to an administrator account, click Continue or Allow to continue. Some applications require an administrator account to continue. When you are logged on to a standard account, switch to an administrator account, and restart the operation from the beginning.

Note

- Windows XP may display a message recommending the user to use the Network Setup Wizard to set up sharing. When this message appears, choose not to use the wizard and then set up sharing.

4. Set sharing

Select Share this printer (Windows Vista, Windows XP) or Shared as (Windows 2000) on the Sharing tab to set a shared name if necessary, and click OK.

The setup on the print server system is complete. Next, set up the client systems.

Advanced Guide

Advanced Guide > Appendix > Sharing the Printer on a Network > Settings on Client PC

Settings on Client PC

After setting up the print server system, set up the client system.

The procedure for setting up the client systems is as follows:

In Windows Vista

1. Install the printer driver on the client systems

To install the driver, load the Setup CD-ROM that comes with the machine, and select Custom Install.

For details on connection instructions, refer to the "Install the Software" in the manual: Getting Started.

Note

- During the installation, a screen prompting you to turn the printer on appears. Click Manual Selection and then select an appropriate port to complete your installation.

2. Start the wizard

Select the Start menu -> Network -> Add Printer.

The Add Printer window appears.

3. Add a printer

Select Add a network, wireless or Bluetooth printer, and click the icon for the printer that you have configured on the print server system to be shared, and then click Next.

Note

- If the icon for the printer is not displayed, check that the printer is actually connected to the print server.
- It may take some time for the icon for the printer to appear.

4. Complete the setup

Take the appropriate action as described on the screen and then click Finish.

The icon for the shared printer will be created in the Printers window.

The setup on the client systems is complete. You can now share the printer in the network.

In Windows XP/Windows 2000

1. Install the printer driver on the client systems

To install the driver, load the Setup CD-ROM that comes with the machine, and select Custom Install.

For details on connection instructions, refer to the "Install the Software" in the manual: Getting Started.

Note

- During the installation, a screen prompting you to turn the printer on appears. Click Manual Selection and then select an appropriate port to complete your installation.

2. Start the wizard

- In Windows XP, select the start menu -> Control Panel -> Printers and Other Hardware ->

Printers and Faxes -> Add a printer.

- In Windows 2000, select the Start menu -> Settings -> Printers -> Add Printer.

When Welcome to the Add Printer Wizard screen appears, click Next.

3. Add a printer

Select A network printer, or a printer attached to another computer (Windows XP) or Network printer (Windows 2000), then click Next.

On the Specify a Printer window (Windows XP) or Locate Your Printer window (Windows 2000), click Next and then search for the print server system.

Click the icon for the printer that you have configured on the print server system to be shared, and then click Next.

Note

- If the icon for the printer is not displayed, check that the printer is actually connected to the print server.
-

4. Complete the setup

Take the appropriate action as described on the screen and then click Finish.

The icon for the shared printer will be created in the Printers and Faxes window (Windows XP) or Printers window (Windows 2000).

The setup on the client systems is complete. You can now share the printer in the network.

Advanced Guide

Advanced Guide > Appendix > Sharing the Printer on a Network > Restrictions on Printer Sharing

Restrictions on Printer Sharing

These are restrictions that apply when you are using a printer in a network environment. Check the restrictions for the environment you are using.

When You Are Sharing a Printer in a Network

- A print completion message may be displayed. To disable the message display, follow the procedure below.
 - **In Windows Vista:**

Press the Alt key from the Printers window on the client system. Open Run as administrator -> Server Properties... from the displayed File menu.

Uncheck Show informational notifications for network printers on the Advanced tab, and then restart the computer.
 - **In Windows XP or Windows 2000:**

Open Server Properties from the File menu of the Printer and Faxes window (Windows XP) or the Printers window (Windows 2000) on the print server system.

Uncheck Notify when remote documents are printed on the Advanced tab, and then restart the computer.
- The bi-directional communication function is disabled and the correct printer status may not be recognized.

When a client user opens the printer driver properties and then clicks OK with the Enable bidirectional support check box on the Ports tab unchecked, the bi-directional function of the printer server system may also be disabled.

In this case, check Enable bidirectional support check box on both the print server system and the client system.
- When you print from a client system, you cannot use Canon IJ Preview.
- When the functions on the Maintenance tab cannot be set properly from a client system, they may be grayed out. In this case, change the settings from the print server.

When you change the settings of the print server, you should delete the icon of the shared printer from the client system, and then specify the shared settings again in the client system.

When the Same Printer Driver is Installed in the Print Server System and the Client System as the Local Printer

- The net crawl function may automatically create a network printer icon on the client system.

Advanced Guide > Using Easy-PhotoPrint EX

Easy-PhotoPrint EX

Using Easy-PhotoPrint EX

--- Transforming Your Photos into Creative Works of Art ---

Easy-PhotoPrint EX allows you to create albums, calendars and stickers easily using photos taken with digital cameras.

You can also print borderless photos easily.

Start Easy-PhotoPrint EX

Click Here: [Easy-PhotoPrint EX](#)

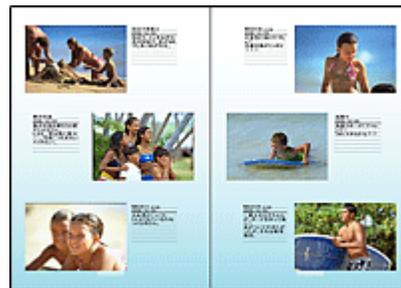

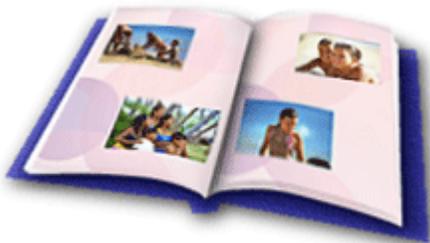

Note

- See the section below for details on how to use Easy-PhotoPrint EX.
 - ➔ [Printing with the Bundled Application Software](#)

Create a Personalized Photo Album

Creating a personalized photo album is an easy task if you use Easy-PhotoPrint EX!

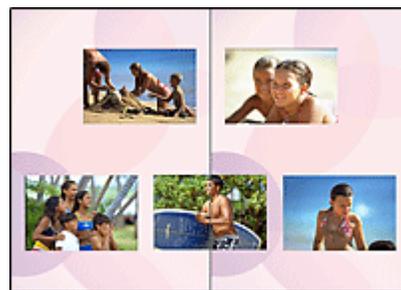

All you need to do is select which photos to use, select a layout, then load paper into your printer and print. After you bind the printed sheets, you'll have the one and only album of your memories!

You can change the layout and background, and attach comments to photos.

You can also select the size and orientation.

You can arrange a photo across the left and right pages.

CHECK!

Select a theme (background design) to create a single-themed album.

Decorate Items with Text and Frames

You can add text and frames to photos. Attach a description of the photo in an album, and add a frame to enhance the photo's atmosphere.

CHECK!

Select Album to add text and frames. You cannot decorate photos with Photo Print.

Create a Calendar Using Your Favorite Photos

Create calendars easily with Easy-PhotoPrint EX. Create your own calendar using your favorite photos! It'll be exciting to turn the calendar pages.

You can use all kinds of photos.

You can also create 2-month, 6-month and 12-month calendars.

Create Stickers

Create stickers easily with Easy-PhotoPrint EX!

Create stickers of your favorite photos and share them with your friends!

CHECK!

You can add text to photos.

Advanced Guide

Advanced Guide > Using MP Navigator EX

MP Navigator EX

Using MP Navigator EX

MP Navigator EX is an application that enables you to easily scan photos and documents. It is suitable even for beginners.

Start MP Navigator EX

Click Here: [MP Navigator EX](#)

Note

- See "Let's Try Scanning" for details on how to scan images using MP Navigator EX.

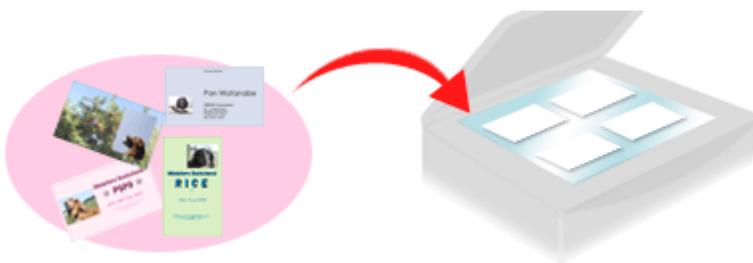

Scan Photos and Documents

You can scan easily by navigating through MP Navigator EX screens. You can also save/print scanned images using MP Navigator EX.

Scan Small Documents at One Time

You can scan multiple small documents (photos, cards, etc.) at one time. It is useful as you do not need to scan multiple times.

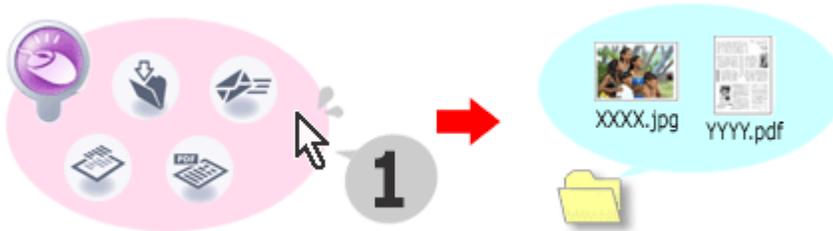

Scan Large Documents

You can easily scan documents that are larger than the Platen using MP Navigator EX. It allows you to scan the left and right halves of a document separately and combine them back into one image.

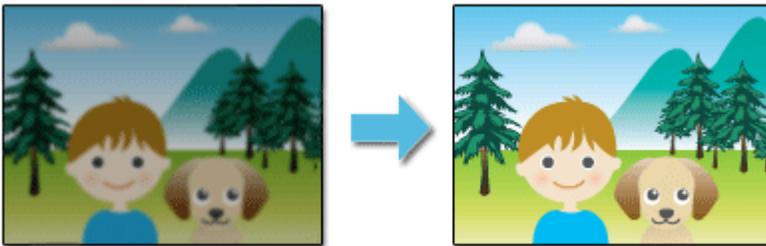

Scan with One-click

In One-click Mode, MP Navigator EX completes from scanning to saving, with a click of an icon. One-click Mode also allows you to scan and save images as PDF files or attach them to e-mail automatically.

Scan and Correct/Enhance Photos

You can easily correct/enhance scanned photos using MP Navigator EX. You do not need to use other applications.

For details on how to use MP Navigator EX, refer to " [Scanning with the Bundled Application Software](#) ."

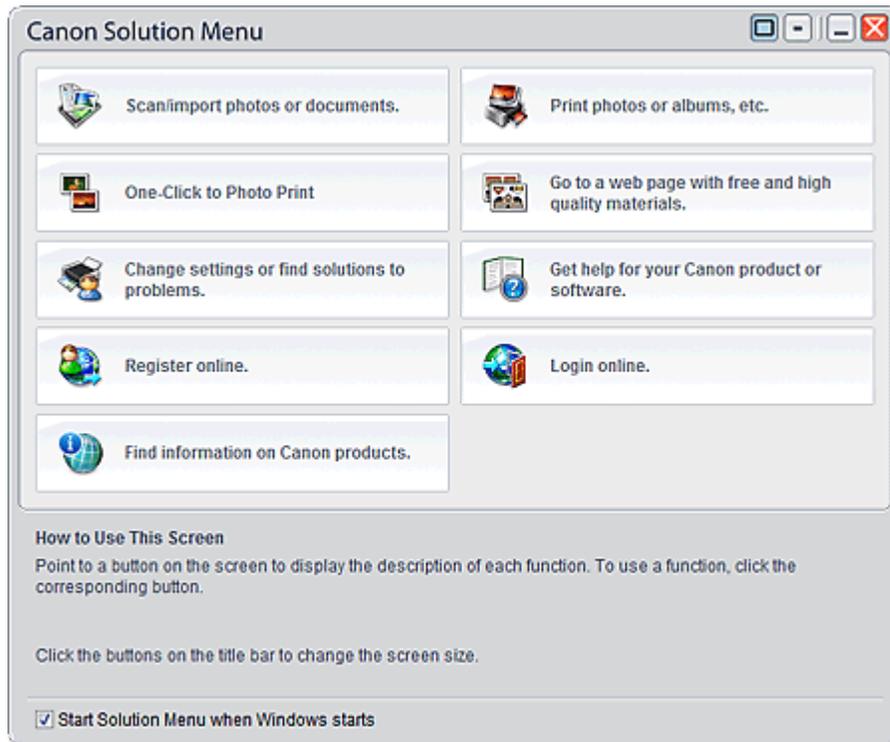

Advanced Guide

Advanced Guide > About Solution Menu

About Solution Menu

Quick Shortcut!! Solution Menu

Solution Menu is a menu window that provides quick access from your desktop to Canon applications, manuals, and online product information.

Important

- The number and types of buttons displayed in the window may vary depending on your printer and region.

Starting Solution Menu

 Click Here: [Solution Menu](#)

To start from desktop, see below.

Double-click the Canon Solution Menu icon on the desktop. Alternatively, from the Start menu, select (All) Programs > Canon Utilities > Solution Menu > Solution Menu.

From the next time, Solution Menu starts when Windows starts.

If the Start Solution Menu when Windows starts checkbox at the bottom left of the window is not selected, Solution Menu does not start when Windows starts.

Note

- Solution Menu will start automatically when you install it using the *Setup CD-ROM* that accompanies the printer.

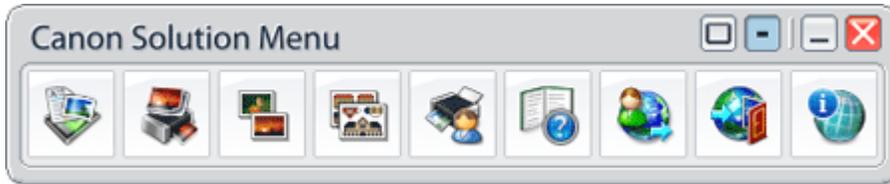

Changing the Window Size

Click  (window size: large) or  (window size: small) on the title bar to change the window size

(large or small).

Solution Menu opens with the last used window size next time it is started.

- When screen size is small

Starting an Application

1. Point to a button on the window to display the description of each application.
2. By clicking each button, the introduced application starts.
Follow the same steps to view the manuals or online product information.

Important

- Internet connection is required to access the online information. Internet connection fees apply.

Exiting Solution Menu

Click  (Close) on the title bar.

Restriction on Use of Solution Menu

This software is subject to the following restriction. Keep this point in mind when using it.

- All icons of the installed applications that support Solution Menu are displayed in the window. After the installation, you cannot rearrange the icons or delete only the icons.
