FCC Compliance Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of Trademarks, Registered Trademarks, and other Protected Names and Symbols

This manual may make reference to trademarks, registered trademarks, and other protected names and/or symbols of third-party companies not related in any way to StarTech.com. Where they occur these references are for illustrative purposes only and do not represent an endorsement of a product or service by StarTech.com, or an endorsement of the product(s) to which this manual applies by the third-party company in question. Regardless of any direct acknowledgement elsewhere in the body of this document, StarTech.com hereby acknowledges that all trademarks, registered trademarks, service marks, and other protected names and/or symbols contained in this manual and related documents are the property of their respective holders.

Introduction

Packaging Contents
- 1x Wireless Display Adapter
- 1x Universal Power Adapter (NA/UK/EU)
- 1x USB Cable to Power Adapter Port (optional for USB Power source)
- 1x Software Installation Disc
- 1x Quick Installation Guide

System Requirements
- HDMI enabled display device (i.e. television, projector)
- 802.11n/g Wireless enabled video source device (i.e. Smartphone, computer)
- HDMI cable
- Available AC electrical outlet or USB power source
Preparing Your Site

1. Determine where the display will be located and place/mount the display appropriately.

**NOTE:** The maximum distance of the display adapter is limited to the distance of your 802.11n/g Wireless network device. If the wireless signal is obstructed by walls, or other interference the signal quality and maximum distance will likely be reduced.

Ensure the Receiver Unit is situated near an available AC electrical outlet.

Hardware Installation

1. Connect an HDMI video cable from the HDMI out port on the Wireless Video Adapter to the HDMI in port on the HDMI enabled display device.

2. Connect the power adapter from an available AC outlet to the power adapter port on the Wireless Video Adapter.

   or

   Connect the USB to power cable from an available USB power source to the power adapter port on the Wireless Video Adapter.

3. Press the Power button to the in position to turn on the device, the Power LED will be activated.
Software Operation / Installation

Initial Software Operation

1. Once Installation has completed, and the device has been turned on, the menu below will appear on your HDMI enabled display device, with an IP address listed at the bottom. By default the IP address will be:

   http://192.168.59.254/remote

2. Using a WIFI enabled device with web browser, such as a computer or SmartPhone. Connect to the Wireless Video Adapter by browsing for available networks and connecting to the WIFI2HDMC.

   NOTE: By default the SSID for the device is WIFI2HDMC and there is no security key. Please review the manual for WIFI enabled device for specific details regarding connecting to a wireless network.

3. Once you have connected to the device, open your web browser visit the Setup IP address listed on the display.

   NOTE: By default the Setup IP address is: http://192.168.59.254/remote
4. This will display the virtual remote control. Using the remote control you can operate the user interface displayed on your display.

The virtual Remote control allows for advanced device operation. Download the full product Manual at StarTech.com for advanced operation.

**Connect a Miracast Enabled Mobile Device**

**NOTE:** Exact steps regarding Miracast setup will vary from device to device. Please review the documentation included with your SmartPhone or tablet for steps specific instructions.

1. Press the Mode button on the Wireless Video Adapter repeatedly until you see the Wi-Fi Miracast screen shown on your display.
2. Open your mobile settings page.

3. On the Settings browse to Display->Wireless Display, or Media Output, or All Share Cast depending on your device.
   
   **NOTE:** Other terminology may be used depending on your device.

4. By default the Wireless Video device will be listed as the MAC address shown on the HDMI display. Tap this device to connect.

5. The video from your Miracast enabled mobile device will now be shown on your video display.

**Intel® WiDi Operation Wirelessly Share Your PC Screen**

1. Press the Mode button on the Wireless Video Adapter repeatedly until you see the Wi-Fi Miracast mode shown on your display.
2. Open the WiDi software included with your Wi-Di enabled computer system.

3. The adapter will be listed under detected adapters.

4. Select the adapter and click connect.

5. Your computer screen will now be shared wirelessly on the display.
