

Welcome to your Cool Keyboard!

Man & Machine's "cool" keyboards have a lot to offer. These keyboards are water and contaminant proof, and ideal for industrial, marine, and medical use, as well as other applications where moisture, cleaning, and durability are a consideration. They are also much quieter than standard keyboards. Our "cool" keyboards can be equipped with our Backlight option (where LED's are installed under each key for use in dark or low light conditions), and our "MAGFIX" option (where magnets are installed in the base to help hold it in place on ferrous surfaces). Our "touch" and "+" keyboards are also available with built-in touchpad's for an "all in one" solution.

Product specifications and options vary, please see our website for more information at www.man-machine.com
