Getting Started

WARNING

See the Important Safety and Product Information guide in the product box for product warnings and other important information.

- Update the maps and software on your device (Updating Maps and Software with Garmin Express, page 1).
- Mount the device in your vehicle and connect it to power (Connecting the Device to Vehicle Power, page 2).
- Acquire GPS signals (Acquiring GPS Signals, page 2).
- Adjust the volume (Adjusting the Volume, page 2) and display brightness (Adjusting the Screen Brightness, page 2).
- Navigate to your destination (Starting a Route, page 3).

Support and Updates

Garmin Express™ (garmin.com/express) provides easy access to these services for Garmin® devices.
- Product registration
- Product manuals
- Software updates
- Map, chart, or course updates
- Vehicles, voices, and other extras

Updating Maps and Software with Garmin Express

You can use Garmin Express software to download and install the latest map and software updates for your device. Map updates provide the latest available mapping data to ensure your device continues to calculate accurate and efficient routes to your destinations. Garmin Express is available for Windows® and Mac® computers.

1 On your computer, go to www.garmin.com/express.

2 Select an option:
   - To install on a Windows computer, select Download for Windows.
   - To install on a Mac computer, select Download for Mac.

3 Open the downloaded file, and follow the on-screen instructions to complete the installation.

4 Start Garmin Express.

5 Connect your Garmin device to your computer using a USB cable.

6 Click Add a Device.

The Garmin Express software detects your device.

7 Click Add Device.

8 Follow the on-screen instructions to add your device to the Garmin Express software.

When setup is complete, the Garmin Express software searches for map and software updates for your device.

9 Select an option:
   - To install all available updates, click Install All.
   - To install a single update, click View Details and select an update.

The Garmin Express software downloads and installs the updates onto your device. Map updates are very large, and this process may take a long time on slower Internet connections.

Device Overviews

Garmin Drive 40 Device Overview

1 Power key
2 Mini-USB power and data port
3 Map and data memory card slot

Garmin Drive 50 Device Overview

1 Power key
2 Mini-USB power and data port
3 Map and data memory card slot
Connecting the Device to Vehicle Power

**WARNING**
This product contains a lithium-ion battery. To prevent the possibility of personal injury or product damage caused by battery exposure to extreme heat, store the device out of direct sunlight.

Before you use your device on battery power, you should charge it.

1. Plug the vehicle power cable into the USB port on the device.
2. Press the mount onto the suction cup until it snaps into place.
3. Press the suction cup to the windshield, and flip the lever back toward the windshield.
4. Fit the tab on the top of the mount into the slot on the back of the device.
5. Press the bottom of the mount into the device until it clicks.
6. Plug the other end of the vehicle power cable into a power outlet in your vehicle.

Turning the Device On or Off

- To turn the device on, press the power key, or connect the device to power.
- To put the device in power saving mode, press the power key while the device is on.

While in power saving mode, the screen is off and the device uses very little power, but it can wake instantly for use. **TIP:** You can charge your device faster by putting it in power saving mode while charging the battery.

- To turn off the device completely, hold the power key until a prompt appears on the screen, and select Off.

The prompt appears after five seconds. If you release the power key before the prompt appears, the device enters power saving mode.

**Acquiring GPS Signals**

When you turn on your navigation device, the GPS receiver must collect satellite data and establish the current location. in the status bar indicates the satellite signal strength. The time required to acquire satellite signals varies based on several factors, including how far you are from the location where you last used your navigation device, whether you have a clear view of the sky, and how long it has been since you last used your navigation device. The first time you turn on your navigation device, it may take several minutes to acquire satellite signals.

1. Turn on the device.
2. Wait while the device locates satellites.
3. If necessary, go outdoors to an open area, away from tall buildings and trees.

When turns green, the device has acquired satellite signals and is ready for navigation.

**Status Bar Icons**

The status bar is located at the top of the main menu. The status bar icons display information about features on the device. You can select some icons to change settings or view additional information.

- GPS signal status. Hold to view GPS accuracy and acquired satellite information (Viewing GPS Signal Status, page 14).
- Current time. Select to set the time (Setting the Time, page 12).
- Battery charge level.

**Using the On-Screen Buttons**

On-screen buttons allow you to navigate the pages, menus, and menu options on your device.

- Select to return to the previous menu screen.
- Hold to quickly return to the main menu.
- Select or to scroll through lists or menus.
- Hold or to scroll faster.
- Select to see a context-based menu of options for the current screen.

**Adjusting the Volume**

1. Select Volume.
2. Select an option:
   - Use the slider bar to adjust the volume.
   - Select to mute the device.
   - Select for additional options.

**Adjusting the Screen Brightness**

1. Select Settings > Display > Brightness.
2. Use the slider bar to adjust the brightness.

**Driver Awareness Features and Alerts**

**NOTICE**

The driver alerts and speed limit features are for information only and do not replace your responsibility to abide by all posted speed limit signs and to use safe driving judgment at all times. Garmin is not responsible for any traffic fines or citations you receive for failing to follow all applicable traffic laws and signs.

Your device provides features that can help encourage safer driving and increase efficiency, even when you are driving in a familiar area. The device plays an audible tone or message and displays information for each alert. You can enable or disable the audible tone or message for each type of alert. Not all alerts are available in all areas.
Enabling or Disabling Audible Driver Alerts

The device plays a tone and displays the distance to and speed limit (if available) for an upcoming school or school zone.

- **Speed limit exceeded**: The device plays a tone and displays the upcoming reduced speed limit so you can be prepared to reduce your speed.
- **Speed limit exceeded**: The device plays a tone and displays a red border on the speed limit icon when you exceed the posted speed limit for the current road.
- **Wrong way on a one-way street**: The device plays a message and displays a full-screen warning if you travel the wrong way on a one-way street. The edges of the screen appear red and an alert remains at the top of the screen until you leave the one-way street or correct your direction of travel.
- **Railroad crossing**: The device plays a tone and displays the distance to an upcoming railroad crossing.
- **Animal crossing**: The device plays a tone and displays the distance to an upcoming animal crossing area.
- **Curve**: The device plays a tone and displays the distance to a curve in the road.
- **Slower traffic**: The device plays a tone and displays the distance to slower traffic when you approach slower traffic at a higher speed. Your device must be receiving traffic information to use this feature.
- **Fatigue warning**: The device plays a tone and suggests upcoming rest stops after you have been driving for more than two hours without stopping.

Enabling or Disabling Audible Driver Alerts

You can turn off individual audible driver alerts. The visual alert appears even when the audible alert is disabled.

1. Select **Settings > Map & Vehicle > Audible Driver Alerts**.
2. Select or clear the check box next to each alert.

Red Light and Speed Cameras

**NOTICE**

Garmin is not responsible for the accuracy of or the consequences of using a red light or speed camera database.

**NOTE**: This feature is not available for all regions or product models.

Information about red light and speed camera locations is available in some areas for some product models. Go to [garmin.com/speedcameras](http://garmin.com/speedcameras) to check availability and compatibility, or to purchase a subscription or one-time update. You can purchase a new region or extend an existing subscription at any time.

You can go to [mygarmin.com](http://mygarmin.com) to update the camera database on your device. You should update your device frequently to receive the most up-to-date camera information.

For some devices and regions, basic red light or speed camera data may be included with your device. Included data does not include updates or a subscription.

Navigating to Your Destination

**Routes**

A route is a path from your current location to one or more destinations.

- The device calculates a recommended route to your destination based on the preferences you set, including the route calculation mode ([Changing the Route Calculation Mode, page 4](#)) and avoidances ([Avoiding Delays, Tolls, and Areas, page 5](#)).

- You can start navigating to your destination quickly using the recommended route, or you can select an alternate route ([Starting a Route, page 3](#)).
- If there are specific roads you need to use or avoid, you can customize the route ([Shaping Your Route, page 4](#)).
- You can add multiple destinations to a route ([Adding a Location to Your Route, page 4](#)).

Starting a Route

1. Select **Where To?**, and search for a location ([Finding and Saving Locations, page 6](#)).
2. Select a location.
3. Select an option:
   - To start navigating using the recommended route, select **Go!**.
   - To choose an alternate route, select **>, and select a route. Alternate routes appear to the right of the map.**
   - To edit the course of the route, select **> Edit Route**, and add shaping points to the route ([Shaping Your Route, page 4](#)).

The device calculates a route to the location and guides you using voice prompts and information on the map ([Your Route on the Map, page 3](#)). A preview of the major roads in your route appears at the edge of the map for several seconds.

If you need to stop at additional destinations, you can add the locations to your route ([Adding a Location to Your Route, page 4](#)).

Starting a Route by Using the Map

You can start route by selecting a location from the map.

1. Select **View Map**.
2. Drag and zoom the map to display the area to search.
3. If necessary, select **>, to filter the displayed points of interest by category.**

   Location markers ( or a blue dot) appear on the map.
4. Select an option:
   - Select a location marker.
   - Select a point, such as a street, intersection, or address location.
5. Select **Go!**.

Going Home

The first time you start a route home, the device prompts you to enter your home location.

1. Select **Where To? > Go Home**.
2. If necessary, enter your home location.

Editing Your Home Location

1. Select **Where To? > Saved > Set Home Location**.
2. Enter your home location.

Your Route on the Map

**NOTICE**

The speed limit feature is for information only and does not replace your responsibility to abide by all posted speed limit signs and to use safe driving judgment at all times. Garmin will not be responsible for any traffic fines or citations you receive for failing to follow all applicable traffic laws and signs.

As you travel, the device guides you to your destination using voice prompts and information on the map. Instructions for your next turn or exit, or other action appear across the top of the map.
The speed limit may appear as you travel on major roadways. This feature is not available in all areas.

![Map of route with numbered locations and directions]

1. Next action in the route. Indicates the next turn, exit, or other action and the lane in which you should travel, if available.
2. Distance to the next action.
3. Name of the street or exit associated with the next action.
4. Route highlighted on the map.
5. Next action in the route. Arrows on the map indicate the location of upcoming actions.
7. Name of the road on which you are traveling.
8. Estimated arrival time.

**TIP:** You can touch this field to change the information it shows *(Changing the Map Data Field, page 10).*

**Viewing Turns and Directions**
While navigating a route, you can view upcoming turns, lane changes, or other directions for your route.

1. From the map, select an option:
   - To view upcoming turns and directions as you navigate, select 🔷 > Turns.
     The map tool displays the next four turns or directions beside the map. The list updates automatically as you navigate the route.
   - To view the complete list of turns and directions for the entire route, select the text bar at the top of the map.
2. Select a turn or direction (optional).
   Detailed information appears. An image of the junction may appear for junctions on major roadways, if available.

**Viewing the Entire Route on the Map**
1. While navigating a route, select anywhere on the map.
2. Select 🇺🇸.

**Adding a Location to Your Route**
Before you can add a location to your route, you must be navigating a route *(Starting a Route, page 3).*

You can add locations to the middle or end of your route. For example, you can add a fuel station as the next destination in your route.

**TIP:** To create complex routes with multiple destinations or scheduled stops, you can use the trip planner to plan, schedule, and save a trip *(Planning a Trip, page 5).*

1. From the map, select 🛡 > Where To?.
2. Search for a location *(Finding and Saving Locations, page 6).*
3. Select a location.
4. Select Go!.
5. Select an option:
   - To add the location as the next destination in your route, select Add As Next Stop.

   - To add the location to the end of your route, select Add As Last Stop.
   - To add the location and edit the order of destinations in your route, select Add to Active Route.

   The device re-calculates the route to include the added location and guides you to the destinations in order.

**Shaping Your Route**
Before you can shape your route, you must start a route *(Starting a Route, page 3).*

You can manually shape your route to change its course. This allows you to direct the route to use a certain road or go through a certain area without adding a destination to the route.

1. Touch anywhere on the map.
2. Select 🧵.
   The device enters route shaping mode.
3. Select a location on the map.
   **TIP:** You can select 🗺 to zoom in on the map and select a more precise location.
   The device recalculates the route to travel through the selected location.
4. If necessary, select an option:
   - To add more shaping points to the route, select additional locations on the map.
   - To remove a shaping point, select 🗺.
5. When you are finished shaping the route, select Go!.

**Taking a Detour**
You can take a detour for a specified distance along your route or detour around specific roads. This is useful if you encounter construction zones, closed roads, or poor road conditions.

1. From the map, select 🛡 > Change Route.
   **TIP:** If the Change Route tool is not in the map tools menu, you can add it *(Enabling Map Tools, page 9).*
2. Select an option:
   - To detour your route for a specific distance, select Detour by Distance.
   - To detour around a specific road on the route, select Detour by Road.

**Stopping the Route**
From the map, select 🛡 > Stop.

**Changing the Route Calculation Mode**
2. Select an option:
   - Select Faster Time to calculate routes that are faster to drive but can be longer in distance.
   - Select Off Road to calculate point-to-point routes (without roads).
   - Select Shorter Distance to calculate routes that are shorter in distance but can take more time to drive.

**Trip Planner**
You can use the trip planner to create and save a trip, which you can navigate later. This can be useful for planning a delivery route, a vacation, or a road trip. You can edit a saved trip to further customize it, including reordering locations, optimizing the order of stops, adding scheduling information, and adding shaping points.

You can also use the trip planner to edit and save your active route.
Planning a Trip
A trip can include many destinations, and it must include at least one starting location and one destination. The starting location is the location from which you plan to start your trip. If you start navigating the trip from a different location, the device gives you the option to route to your starting location first. For a round trip, the starting location and final destination can be the same.

1. Select Apps > Trip Planner > Created > Create Trip.
2. Select a trip.
3. Choose a location for your starting point, and select Select.
4. Select the first location to navigate to, and select Next.
5. Enter a name, and select Done.

Navigating to a Saved Trip
1. Select Apps > Trip Planner.
2. Select a saved trip.
3. Select Go!
4. Select Start Location.
5. Select a location.
6. Select Add Location to add more locations (optional).

Optimizing the Order of Destinations in a Trip
The device can automatically optimize the order of destinations in your trip to create a shorter, more efficient route. The starting location and final destination are not changed when you optimize the order.

While editing a trip, select Option > Optimize Order.

Scheduling a Trip
To add scheduling information to each location in your trip, including the desired arrival time and layover duration at each location. This can help you plan your departure to reach locations in your trip on time.

1. Select Apps > Trip Planner.
2. Select a trip.
3. Select Option > Trip Settings > Edit Schedule.
4. Select the location, and follow the on-screen instructions to enter the schedule information.

TIP: If you need to schedule multiple locations in the trip, you should start from the beginning of the trip and work toward the end.

While navigating the trip, you should depart by the time shown under the starting point to reach your stops and destinations by the scheduled time. The schedule is an estimate only. Traffic conditions, construction, and other delays may affect your actual arrival times.

Using Suggested Routes
Before you can use this feature, you must save at least one location and enable the travel history feature (Device and Privacy Settings, page 12).

Using the myTrends™ feature, your device predicts your destination based on your travel history, the day of the week, and the time of day. After you have driven to a saved location several times, the location may appear in the navigation bar on the map, along with the estimated time of travel, and traffic information.

Select the navigation bar to view a suggested route to the location.

Avoiding Delays, Tolls, and Areas
Avoiding Traffic Delays on Your Route
Before you can avoid traffic delays, you must be receiving traffic information (Receiving Traffic Data Using a Traffic Receiver, page 10).

By default, the device optimizes your route to avoid traffic delays automatically. If you have disabled this option in the traffic settings (Traffic Settings, page 11), you can view and avoid traffic delays manually.

1. While navigating a route, select > Traffic.
2. Select Alternate Route, if available.
3. Select Go!

Avoiding Toll Roads
Your device can avoid routing you through areas that require tolls, such as toll roads, toll bridges, or congestion areas. The device may still include a toll area in your route if no other reasonable routes are available.

2. Select an option:
   • Select Toll Roads.
   • Select Tolls and Fees > Toll Roads.
3 Select an option:
   • To be asked each time before routing through a toll area, select Always Ask.
   • To always avoid tolls, select Avoid.
   • To always allow tolls, select Allow.
4 Select Save.

Avoiding Toll Stickers
NOTE: This feature is not available in all areas.
The map data on your device may contain detailed toll sticker information for some countries. You can avoid or allow toll stickers for each country.
1 Select Settings > Navigation > Tolls and Fees > Toll Stickers.
2 Select a country.
3 Select an option:
   • To be asked each time before routing through a toll area, select Always Ask.
   • To always avoid tolls, select Avoid.
   • To always allow tolls, select Allow.
4 Select Save.

Avoiding Road Features
1 Select Settings > Navigation > Avoidances.
2 Select the road features to avoid on your routes, and select Save.

Avoiding Environmental Zones
Your device can avoid areas with environmental or emissions restrictions that may apply to your vehicle.
1 Select Settings > Navigation > Environmental Zones.
2 Select an option:
   • To be asked each time before routing through an environmental zone, select Always Ask.
   • To always avoid environmental zones, select Avoid.
   • To always allow environmental zones, select Allow.
3 Select Save.

Custom Avoidances
Custom avoidances allow you select specific areas or sections of road to avoid. When the device calculates a route, it avoids these areas and roads unless no other reasonable route is available.

Avoiding a Road
1 Select Settings > Navigation > Custom Avoidances.
2 Select Add Avoid Road.
3 Select the starting point of the section of road to avoid, and select Next.
4 Select the ending point of the road section, and select Next.
5 Select Done.

Avoiding an Area
1 Select Settings > Navigation > Custom Avoidances.
2 If necessary, select Add Avoidance.
3 Select Add Avoid Area.
4 Select the upper-left corner of the area to avoid, and select Next.
5 Select the lower-right corner of the area to avoid, and select Next.
The selected area is shaded on the map.
6 Select Done.

Disabling a Custom Avoidance
You can disable a custom avoidance without deleting it.

1 Select Settings > Navigation > Custom Avoidances.
2 Select an avoidance.
3 Select Disable.

Deleting Custom Avoidances
1 Select Settings > Navigation > Custom Avoidances.
2 Select an option:
   • To delete all custom avoidances, select Delete.
   • To delete one custom avoidance, select the avoidance, and select Disable.

Navigating Off Road
If you are not following roadways as you navigate, you can use Off Road mode.
1 Select Settings > Navigation.
2 Select Calculation Mode > Off Road > Save.
The next route will be calculated as a straight line to the location.

Finding and Saving Locations
The maps loaded in your device contain locations, such as restaurants, hotels, auto services, and detailed street information. The Where To? menu helps you find your destination by providing several methods to browse, search, and save this information.

   • Enter search terms to quickly search all location information (Finding a Location Using the Search Bar, page 6).
   • Browse or search pre-loaded points of interest by category (Points of Interest, page 7).
   • Search Foursquare® points of interest (Searching Foursquare Points of Interest, page 7).
   • Use search tools to find specific locations, such as addresses, intersections, or geographic coordinates (Search Tools, page 7).
   • Search near a different city or area (Changing the Search Area, page 7).
   • Save your favorite locations to find them quickly in the future (Saving Locations, page 8).
   • Return to recently found locations (Viewing Recently Found Locations, page 8).

Finding a Location Using the Search Bar
You can use the search bar to search for locations by entering a category, brand name, address, or city name.
1 Select Where To?.
2 Select Enter Search in the search bar.
3 Enter all or part of the search term.
   Suggested search terms appear below the search bar.
4 Select an option:
   • To search for a type of business, enter a category name (for example, "movie theaters").
   • To search for a business name, enter all or part of the name.
   • To search for an address near you, enter the house number and street name.
   • To search for an address in another city, enter the house number, street name, city, and state.
   • To search for a city, enter the city and state.
   • To search for coordinates, enter latitude and longitude coordinates.
Changing the Search Area

By default, the device searches near your current location. You can also search other areas, such as near your destination, near another city, or along your active route.

1. From the main menu, select Where To?.
2. Select 📍.
3. Select an option.

Points of Interest

A point of interest is a place that you may find useful or interesting. Points of interest are organized by category and can include popular travel destinations such as gas stations, restaurants, hotels, and entertainment venues.

Finding a Location by Category

1. Select Where To?.
2. Select a category, or select Categories.
3. If necessary, select a subcategory.
4. Select a location.

Searching Within a Category

After you have performed a search for a point of interest, certain categories may display a Quick Search list that shows the last four destinations you selected.

2. Select a category.
3. Select an option:
   - Select a destination from the quick search list on the right side of the screen.
     The quick search list provides a list of recently found locations in the selected category.
   - Select a subcategory, if necessary, and select a destination.

Navigating to Points of Interest Within a Venue

You can create a route to a point of interest (POI) within a larger venue, such as a store in a shopping mall or a specific terminal in an airport.

1. Select Where To? > Enter Search.
2. Select an option:
   - To search for the venue, enter the name or address of the venue, select Q, and go to step 3.
   - To search for the POI, enter the name of the POI, select Q, and go to step 5.
3. Select the venue.

A list of categories appears below the venue, such as restaurants, car rentals, or terminals.

4. Select a category.
5. Select the POI, and select Go!.

The device creates a route to the parking area or venue entrance closest to the POI. When you arrive at the destination, a checkered flag indicates the recommended parking area. A labeled point indicates the location of the POI within the venue.

Exploring a Venue

You can view a list of all points of interest located within each venue.

1. Select a venue.
2. Select 📍 > Explore this Venue.

Foursquare

Foursquare is a location-based social network. Your device includes pre-loaded Foursquare points of interest, which are indicated by the Foursquare logo in your location search results.

Searching Foursquare Points of Interest

You can search for Foursquare points of interest loaded on your device.

   Select Where To? > Categories > Foursquare®.

Search Tools

Search tools allow you to search for specific types of locations by responding to on-screen prompts.

Finding an Address

NOTE: The order of the steps may change depending on the map data loaded on your device.

1. Select Where To?.
2. If necessary, select Searching near: to change the search area (Changing the Search Area, page 7).
3. Select Address.
4. Follow the on-screen instructions to enter address information.
5. Select the address.

Finding an Intersection

You can search for an intersection or junction between two streets, highways, or other roads.

2. Follow the on-screen instructions to enter street information.
3. Select the intersection.

Finding a City

2. Select an option:
   - Select a city from the list of nearby cities.
   - To search near another location, select Searching near: (Changing the Search Area, page 7).
   - To search for a city by name, select Enter Search, enter a city name, and select Q.

Finding a Location Using Coordinates

You can find a location using latitude and longitude coordinates. This can be helpful when geocaching.

2. If necessary, select ☝, and change the coordinate format or datum.
3. Enter the latitude and longitude coordinates.
4. Select View on Map.
Viewing Recently Found Locations
Your device stores a history of the last 50 locations you have found.
Select Where To? > Recent.

Clearing the List of Recently Found Locations
Select Where To? > Recent > Clear > Yes.

Finding Your Last Parking Spot
When you disconnect the device from vehicle power while the device is on, your current location is saved as a parking spot.
Select Apps > Last Spot.

Viewing Current Location Information
You can use the Where Am I? page to view information about your current location. This feature is helpful if you need to tell emergency personnel your location.
From the map, select the vehicle.

Finding Emergency Services and Fuel
You can use the Where Am I? page to find the nearest hospitals, police stations, and fuel stations.
1 From the map, select the vehicle.
2 Select Hospitals, Police Stations, or Fuel.
   A list of locations for the selected service appears, with the nearest locations at the top.
3 Select a location.
4 Select an option:
   • To navigate to the location, select Go!
   • To view the phone number and other location details, select Info.

Getting Directions to Your Current Location
If you need to tell another person how to get to your current location, your device can give you a list of directions.
1 From the map, select the vehicle.
2 Select Where To? > Directions to Me.
3 Select a starting location.
4 Select Select.

Adding a Shortcut
You can add shortcuts to the Where To? menu. A shortcut can point to a location, a category, or a search tool.
The Where To? menu can contain up to 36 shortcut icons.
1 Select Where To? > Add Shortcut.
2 Select an item.

Removing a Shortcut
1 Select Where To? > Remove Shortcut(s).
2 Select a shortcut to remove.
3 Select the shortcut again to confirm.
4 Select Save.

Saving Locations
Saving a Location
1 Search for a location (Finding a Location by Category, page 7).
2 From the search results, select a location.
3 Select Info.
4 Select Save.
5 If necessary, enter a name, and select Done.

Saving Your Current Location
1 From the map, select the vehicle icon.
2 Select Save.
3 Enter a name, and select Done.
4 Select OK.

Editing a Saved Location
1 Select Where To? > Saved.
2 If necessary, select a category.
3 Select a location.
4 Select Info.
5 Select Edit > Categories.
6 Select an option:
   • Select Name.
   • Select Phone Number.
   • Select Categories to assign categories to the saved location.
   • Select Change Map Symbol to change the symbol used to mark the saved location on a map.
7 Edit the information.
8 Select Done.

Assigning Categories to a Saved Location
You can add custom categories to organize your saved locations.
NOTE: Categories appear in the saved locations menu after you have saved at least 12 locations.
1 Select Where To? > Saved.
2 Select a location.
3 Select Info.
4 Select Edit > Categories.
5 Enter one or more category names, separated by commas.
6 If necessary, select a suggested category.
7 Select Done.

Deleting a Saved Location
NOTE: Deleted locations cannot be recovered.
1 Select Where To? > Saved.
2 Select Where To? > Delete Saved Places.
3 Select the box next to the saved locations to delete, and select Delete.

Using the Map
You can use the map to navigate a route (Your Route on the Map, page 3) or to view a map of your surroundings when no route is active.
1 Select View Map.
2 Touch anywhere on the map.
3 Select an option:
   • Drag the map to pan left, right, up, or down.
   • To zoom in or out, select + or -.
   • To switch between North Up and 3-D views, select A.
   • To filter the displayed points of interest by category, select Q.
   • To start a route, select a location on the map, and select Go! (Starting a Route by Using the Map, page 3).
Map Tools
Map tools provide quick access to information and device functions while you view the map. When you activate a map tool, it appears in a panel at the edge of the map.

Stop: Stops navigation of the active route.
Change Route: Allows you to take a detour or skip locations in your route.
Up Ahead: Displays upcoming locations along the route or the road on which you are traveling (Up Ahead, page 9).
Turns: Displays a list of upcoming turns in your route (Viewing Turns and Directions, page 4).
Trip Data: Displays customizable trip data, such as speed or mileage (Viewing Trip Data from the Map, page 9).

Volume: Adjusts the master audio volume.
Brightness: Adjusts the screen brightness.
Traffic: Displays traffic conditions along your route or in your area (Viewing Upcoming Traffic, page 9).

Enabling Map Tools
By default, only the most commonly used map tools are enabled in the map tools menu. You can add up to 12 tools to the menu.

1 From the map, select \( \nabla \).
2 Select a map tool.
   The map tool appears in a panel at the edge of the map.
3 When you are done using the map tool, select \( \times \).

Up Ahead
The Up Ahead tool provides information about upcoming locations along your route or the road on which you are traveling. You can view upcoming points of interest, such as restaurants, fuel stations, or rest areas. When traveling on a highway, you can also view information and available services for upcoming exits and cities, similar to the information on highway road signs.

You can customize three categories to show in the Up Ahead tool.

Viewing Upcoming Locations
1 From the map, select \( \nabla \) > Up Ahead.
2 Select an option:
   • To view the next upcoming location in each category, select \( \nabla \), if necessary.
   • To view information and available services for upcoming highway exits or cities, select \( \nabla \).
   NOTE: This option is available only while you are traveling on a highway or when your route includes a highway.
3 Select an item to view a list of locations for that category, exit, or city.

Customizing the Up Ahead Categories
You can change the location categories that appear in the Up Ahead tool.
1 From the map, select \( \nabla \) > Up Ahead.
2 Select a category.
3 Select \( \nabla \).
4 Select an option:
   • To move a category up or down in the list, select and drag the arrow next to the category name.
   • To change a category, select the category.
   • To create a custom category, select a category, select Custom Search, and enter the name of a business or category.
5 Select Done.

Trip Information
Viewing Trip Data from the Map
Before you can view trip data on the map, you must add the tool to the map tools menu (Enabling Map Tools, page 9).

1 From the map, select \( \nabla \) > Trip Data.

Customizing the Trip Data Fields
Before you can customize the data that appears in the trip data map tool, you must add the trip data tool to the map tools menu (Enabling Map Tools, page 9).
1 From the map, select \( \nabla \) > Trip Data.
2 Select a trip data field.
3 Select an option.
   The new trip data field appears in the trip data map tool.

Viewing the Trip Information Page
The trip information page displays your speed and provides statistics about your trip.

NOTE: If you make frequent stops, leave the device turned on, so it can accurately measure elapsed time during the trip.

1 From the map, select Speed.

Viewing the Trip Log
Your device keeps a trip log, which is a record of the path you have traveled.
1 Select Settings > Map & Vehicle > Map Layers.
2 Select the Trip Log check box.

Resetting Trip Information
1 From the map, select Speed.
2 Select \( \nabla \) > Reset Field(s).
3 Select an option:
   • When not navigating a route, select Select All to reset every data field except the speedometer, on the first page.
   • Select Reset Trip Data to reset the information on the trip computer.
   • Select Reset Max. Speed to reset the maximum speed.
   • Select Reset Trip B to reset the odometer.

Viewing Upcoming Traffic
You can view traffic incidents coming up along your route or along the road on which you are traveling.
1 While navigating a route, select \( \nabla \) > Traffic.
   The nearest upcoming traffic incident appears in a panel on the right side of the map.
2 Select the traffic incident to view additional details.

Viewing Traffic on the Map
The traffic map shows color-coded traffic flow and delays on nearby roads.
1 From the main menu, select Apps > Traffic.
2 If necessary, select \( \nabla \) > Legend to view the legend for the traffic map.

Searching for Traffic Incidents
1 From the main menu, select Apps > Traffic.
2 Select \( \nabla \) > Incidents.
3 Select an item in the list.
Traffic Data

NOTE
Garmin is not responsible for the accuracy or timeliness of the traffic information.

Traffic data is not available in all areas or for all product models. For information about traffic receivers and coverage areas, go to www.garmin.com/traffic.

To avoid traffic delays, your device must receive live traffic data.
- If your device includes a traffic receiver, it can receive traffic data from an over-the-air broadcast signal, where available.
- An FM traffic receiver is included in product models ending with LT or LMT.
- The device must be connected to vehicle power using the included power cable to receive traffic data using the traffic receiver.
- The device must be within range of a traffic data signal to receive information using the traffic receiver.

Receiving Traffic Data Using a Traffic Receiver

NOTE
Heated (metallized) windshields could degrade the performance of the traffic receiver.

If your device includes a traffic receiver, it can receive traffic data from an over-the-air broadcast signal, where available. This feature is not available in all areas or for all product models.
1. Verify your device includes a traffic receiver.
   - An FM traffic receiver is included in product models ending with LT or LMT.
2. Connect the device to vehicle power using the power cable included with your device (Connecting the Device to Vehicle Power, page 2).
   The power cable included with your device includes an antenna for the traffic receiver.

When you are within a traffic coverage area, your device can display traffic information and help you avoid traffic delays.

About Traffic Subscriptions
You can purchase additional subscriptions or a renewal if your subscription expires. Go to http://www.garmin.com/traffic.

Viewing Traffic Subscriptions
Select Settings > Traffic > Subscriptions.

Adding a Subscription
You can purchase traffic subscriptions for other regions or countries.
1. From the main menu, select Traffic.
2. Select Subscriptions > +.
3. Write down the FM traffic receiver unit ID.
   The traffic subscription code cannot be reused. You must obtain a new code each time you renew your service. If you own multiple FM traffic receivers, you must obtain a new code for each receiver.
5. Select Next on the device.
6. Enter the code.
7. Select Done.

Enabling Traffic
You can enable or disable traffic data.
1. Select Settings > Traffic.
2. Select the Traffic check box.

Using the Apps
Select Apps > Help to view information about using the device.

Searching Help Topics
Select Apps > Help > Q.

Viewing Previous Routes and Destinations
Before you can use this feature, you must enable the travel history feature (Device and Privacy Settings, page 12).
You can view your previous routes and places you have stopped on the map.
Select Apps > Where I’ve Been.

Customizing the Device

Map and Vehicle Settings
Select Settings > Map & Vehicle.
Vehicle: Sets the icon that represents your position on the map. Go to www.garmingarage.com for more icons.
Driving Map View: Sets the perspective on the map.
Map Detail: Sets the level of detail on the map. More detail may cause the map to draw slower.
Map Theme: Changes the color of the map data.
Map Tools: Sets the shortcuts that appear in the map tools menu.
Map Layers: Sets the data that appears on the map page (Customizing the Map Layers, page 10).

Changing the Map Perspective
From the main menu, select Map & Vehicle > Map & Vehicle Settings > Driving Map View.
1. Select Track Up to display the map in two dimensions (2-D), with your direction of travel at the top.
2. Select North Up to display the map in 2-D with north at the top.
3. Select 3-D to display the map in three dimensions.
4. Select Save.

Customizing the Map Layers
2. Select the layers to include on the map, and select Save.

Changing the Map Data Field
1. From the map, select a data field.
2. Select the layers to include on the map, and select Save.

Traffic Data

NOTE

Traffic data is not available in all areas or for all product models. For information about traffic receivers and coverage areas, go to www.garmin.com/traffic.

To avoid traffic delays, your device must receive live traffic data.
- If your device includes a traffic receiver, it can receive traffic data from an over-the-air broadcast signal, where available.
- An FM traffic receiver is included in product models ending with LT or LMT.
- The device must be connected to vehicle power using the included power cable to receive traffic data using the traffic receiver.
- The device must be within range of a traffic data signal to receive information using the traffic receiver.

Receiving Traffic Data Using a Traffic Receiver

NOTE
Heated (metallized) windshields could degrade the performance of the traffic receiver.

If your device includes a traffic receiver, it can receive traffic data from an over-the-air broadcast signal, where available. This feature is not available in all areas or for all product models.
1. Verify your device includes a traffic receiver.
   - An FM traffic receiver is included in product models ending with LT or LMT.
2. Connect the device to vehicle power using the power cable included with your device (Connecting the Device to Vehicle Power, page 2).
   The power cable included with your device includes an antenna for the traffic receiver.
Audible Driver Alerts: Enables an audible alert for each type of driver alert (Driver Awareness Features and Alerts, page 2). It automatically selects the zoom level for optimal use of your map. When disabled, you must zoom in or out manually.

myMaps: Sets which installed maps the device uses.

Enabling Maps
You can enable map products installed on your device.

TIP: To purchase additional map products, go to http://buy.garmin.com.
2. Select a map.

Navigation Settings
Select Settings > Navigation.

Route Preview: Shows a preview of the major roads in your route when you start navigation.

Calculation Mode: Sets the route calculation method.

Fatigue Warning: Alerts you when you have been driving for a long period without a break.

Avoidances: Sets road features to avoid on a route.

Custom Avoidances: Allows you to avoid specific roads or areas.

Environmental Zones: Sets the avoidance preferences for areas with environmental or emissions restrictions that may apply to your vehicle.

Toll Roads: Sets preferences for avoiding toll roads.

Tolls and Fees: Sets preferences for avoiding toll roads and toll stickers.

NOTE: This feature is not available in all areas.

Restricted Mode: Disables all functions that require significant operator attention and could become a distraction while driving.

GPS Simulator: Stops the device from receiving a GPS signal, and saves battery power.

Calculation Mode Settings
Select Settings > Navigation > Calculation Mode.

The route calculation is based on road speeds and vehicle acceleration data for a given route.

Faster Time: Calculates routes that are faster to drive but can be longer in distance.

Shorter Distance: Calculates routes that are shorter in distance but can take more time to drive.

Off Road: Calculates a direct line from your location to your destination.

Setting a Simulated Location
If you are indoors or not receiving satellite signals, you can use the GPS to set a simulated location.
2. From the main menu, select View Map.
3. Tap the map twice to select an area.
   The address of the location appears at the bottom of the screen.
4. Select the location description.
5. Select Set Location.

Backup Camera Settings
The backup camera settings allow you to manage paired Garmin backup cameras and camera settings. This menu appears on your navigation device only when the device is connected to a wireless camera receiver cable. See the owner's manual for your backup camera for detailed information about pairing cameras and camera settings. Go to garmin.com/backupcamera to purchase a Garmin backup camera.

Select Settings > Backup Camera, and select a paired camera.

Unpair: Removes the paired camera. You must pair the camera again before you can view it using this device and cable.

Rename: Allows you to rename the paired camera.

Guidance Lines: Shows or hides guidance lines and allows you to adjust the position of the guidance lines.

babyCam Settings
The babyCam settings allow you to manage paired Garmin babyCam™ cameras and camera settings. This menu appears on your navigation device only when the device is connected to a wireless camera receiver cable. See the owner's manual for your camera for detailed information about pairing cameras and camera settings. Go to garmin.com/babycam to purchase a Garmin babyCam camera.

Select Settings > babyCam, and select a paired camera.

Power Settings: Allows you to set the amount of time the video appears on the screen.

Flip Video: Allows you to flip or mirror the video.

Alignment: Displays the babyCam video to help you align the camera.

Check Seat Reminder: Enables a reminder to check for rear seat passengers before exiting the vehicle.

Unpair: Removes the paired camera.

Rename: Allows you to rename the paired camera.

Display Settings
Select Settings > Display.

Orientation: Allows you to set the display to portrait (vertical) or landscape (horizontal).

Color Mode: Allows you to select day or night color mode. If you select the Auto option, the device automatically switches to day or night colors based on the time of day.

Brightness: Allows you to adjust the display brightness.

Display Timeout: Allows you to set the amount of idle time before your device enters sleep mode while using battery power.

Screenshot: Allows you to take a picture of the device screen. Screenshots are saved in the Screenshot folder of the device storage.

Traffic Settings
From the main menu, select Settings > Traffic.

Traffic: Enables traffic.

Current Provider: Sets the traffic provider to use for traffic data. The Auto option selects the best available traffic data automatically.

Subscriptions: Lists the current traffic subscriptions.

Optimize Route: Enables the device to use optimized alternate routes automatically or upon request (Avoiding Traffic Delays on Your Route, page 5).

Traffic Alerts: Sets the traffic delay severity for which the device displays a traffic alert.

Units and Time Settings
To open the Units and Time settings page, from the main menu, select Settings > Units & Time.

Current Time: Sets the device time.
**Time Format**: Allows you to select a 12-hour, 24-hour, or UTC display time.

**Units**: Sets the unit of measure used for distances.

**Position Format**: Sets the coordinate format and datum used for geographical coordinates.

**Setting the Time**
1. From the main menu, select the time.
2. Select an option:
   - To set the time automatically using GPS information, select Automatic.
   - To set the time manually, drag the numbers up or down.

**Language and Keyboard Settings**
To open the Language and Keyboard settings, from the main menu, select Settings > Language & Keyboard.

**Voice Language**: Sets the language for voice prompts.

**Text Language**: Sets all on-screen text to the selected language.

**NOTE**: Changing the text language does not change the language of user-entered data or map data, such as street names.

**Keyboard Language**: Enables keyboard languages.

**Proximity Alerts Settings**
**NOTE**: You must have custom points of interest (POIs) loaded for proximity points alerts to display.

**NOTE**: This feature is not available in all areas.

Select Settings > Proximity Alerts.

**Audio**: Sets the style of alert that plays when you approach proximity points.

**Alerts**: Sets the type of proximity points for which alerts are played.

**Device and Privacy Settings**
To open the device settings, select Settings > Device.

**About**: Displays the software version number, the unit ID number, and information on several other software features.

**EULAs**: Displays the end-user license agreements.

**NOTE**: You need this information when you update the system software or purchase additional map data.

**Position Reporting**: Shares your position information with Garmin to improve content.

**Travel History**: Allows the device to record information for the myTrends, Where I've Been, and Trip Log features.

**Clear Travel History**: Clears your travel history for the myTrends, Where I've Been, and Trip Log features.

**Restoring Settings**
You can restore a category of settings or all settings to the factory default values.

1. Select Settings.
2. If necessary, select a settings category.
3. Select > Restore.

### Device Information

#### Specifications

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Operating temperature range</strong></td>
<td>From -20° to 55°C (from -4° to 131°F)</td>
</tr>
<tr>
<td><strong>Charging temperature range</strong></td>
<td>From 0° to 45°C (from 32° to 113°F)</td>
</tr>
<tr>
<td><strong>Power input</strong></td>
<td>Vehicle power using the included vehicle power cable. AC power using an optional accessory (for home and office use only).</td>
</tr>
<tr>
<td><strong>Battery type</strong></td>
<td>Rechargeable lithium-ion</td>
</tr>
</tbody>
</table>

#### Power Cables
Your device can be powered various ways.

- Vehicle power cable
- USB cable
- AC adapter (optional accessory)

#### Charging the Device

**NOTE**: This Class III product shall be powered by an LPS power supply.

You can charge the battery in the device using any of these methods.

- Connect the device to the vehicle power cable.
- Connect the device to a computer using a USB cable. The device may charge slowly when connected to a computer. Some portable computers may not charge the device.
- Connect the device to an optional power adapter accessory, such as a wall power adapter.

You can purchase an approved Garmin AC-DC adapter suitable for home or office use from a Garmin dealer or www.garmin.com.

### Device Maintenance

#### Device Care

**NOTICE**

Avoid dropping your device.

Do not store the device where prolonged exposure to extreme temperatures can occur, because it can cause permanent damage.

Never use a hard or sharp object to operate the touchscreen, or damage may result.

Do not expose the device to water.

#### Cleaning the Outer Casing

**NOTICE**

Avoid chemical cleaners and solvents that can damage plastic components.

1. Clean the outer casing of the device (not the touchscreen) using a cloth dampened with a mild detergent solution.
2. Wipe the device dry.

#### Cleaning the Touchscreen

1. Use a soft, clean, lint-free cloth.
2. If necessary, lightly dampen the cloth with water.
3. If using a dampened cloth, turn off the device and disconnect the device from power.
4. Gently wipe the screen with the cloth.

#### Avoiding Theft

12
• Remove the device and mount from sight when not in use.
• Remove the residue left on the windshield by the suction cup.
• Do not keep your unit in the glove compartment.
• Register your device at http://my.garmin.com.

Resetting the Device
You can reset your device if it stops functioning.
Hold the power key for 12 seconds.

Removing the Device, Mount, and Suction Cup

Removing the Device from the Mount
1 Press the release tab or button on the mount.
2 Tilt the device forward.

Removing the Mount from the Suction Cup
1 Turn the device mount to the right or left.
2 Apply pressure until the socket on the mount releases the ball on the suction cup.

Removing the Suction Cup from the Windshield
1 Flip the lever on the suction cup toward you.
2 Pull the tab on the suction cup toward you.

Changing the Fuse in the Vehicle Power Cable

**NOTICE**
When replacing the fuse, do not lose any of the small pieces and make sure they are put back in the proper position. The vehicle power cable does not work unless it is assembled correctly.

If your device does not charge in your vehicle, you may need to replace the fuse located at the tip of the vehicle adapter.
1 Rotate the end piece 90 degrees counter clockwise to unlock it.
2 Remove the end piece, the silver tip, and the fuse.
3 Insert a new fast-blow fuse that has the same current, such as 1 A or 2 A.
4 Place the silver tip in the end piece.
5 Push in the end piece and rotate it 90 degrees clockwise to lock it back into the vehicle power cable.

**TIP:** You may need to use a coin to remove the end piece.

Mount the suction cup (Connecting the Device to Vehicle Power, page 2).

Troubleshooting

The suction cup will not stay on my windshield
1 Clean the suction cup and windshield with rubbing alcohol.
2 Dry with a clean, dry cloth.
3 Mount the suction cup (Connecting the Device to Vehicle Power, page 2).

My device is not acquiring satellite signals
• Verify the GPS simulator is turned off (Navigation Settings, page 11).
• Take your device out of parking garages and away from tall buildings and trees.
• Remain stationary for several minutes.

**The device does not charge in my vehicle**
• Check the fuse in the vehicle power cable (Changing the Fuse in the Vehicle Power Cable, page 13).
• Verify the vehicle is turned on and is supplying power to the power outlet.
• Verify the interior temperature of the vehicle is within the charging temperature range indicated in the specifications.
• Verify the fuse is not broken in the vehicle power outlet.

**My battery does not stay charged for very long**
• Decrease the screen brightness (Display Settings, page 11).
• Shorten the display timeout (Display Settings, page 11).
• Decrease the volume (Adjusting the Volume, page 2).
• Put the device in power saving mode when not in use (Turning the Device On or Off, page 2).
• Keep your device away from extreme temperatures.
• Do not leave your device in direct sunlight.

**My device does not appear as a removable drive on my computer**
On most Windows computers, the device connects using Media Transfer Protocol (MTP). In MTP mode, the device appears as a portable device and not as a removable drive. MTP mode is supported by Windows 7, Windows Vista®, and Windows XP Service Pack 3 with Windows Media Player 10.

**My device does not appear as a portable device on my computer**
On Mac computers and some Windows computers, the device connects using USB mass storage mode. In USB mass storage mode, the device appears as a removable drive or volume, and not as a portable device. Windows versions prior to Windows XP Service Pack 3 use USB mass storage mode.

**My device does not appear as either a portable device or a removable drive or volume on my computer**
1 Disconnect the USB cable from your computer.
2 Turn off the device.
3 Connect the USB cable to your device and to a USB port on your computer.
   **TIP:** The USB cable must connect to a USB port on your computer, not to a USB hub.

The device turns on automatically and goes into MTP mode or USB mass storage mode. A picture of the device connected to a computer appears on the device screen.

**NOTE:** If you have several network drives mapped on your computer, Windows may have trouble assigning drive letters to your Garmin drives. For information about assigning drive letters, see the help file for your operating system.

Appendix

**Installing a Memory Card for Maps and Data**
You can install a memory card to increase the storage space for maps and other data on your device. You can purchase memory cards from an electronics supplier, or go to www.garmin.com/maps to purchase a memory card with pre-loaded Garmin maps.
mapping software. The device supports microSD™ and microSDHC memory cards.

1 Locate the memory card slot on your device (Device Overviews, page 1).
2 Insert a memory card into the slot.
3 Press it in until it clicks.

Data Management
You can store files on your device. The device has a memory card slot for additional data storage.

NOTE: The device is not compatible with Windows 95, 98, Me, Windows NT®, and Mac OS 10.3 and earlier.

About Memory Cards
You can purchase memory cards from an electronics supplier, or purchase pre-loaded Garmin mapping software (www.garmin.com). In addition to map and data storage, the memory card can be used to store files such as maps, images, geocaches, routes, waypoints, and custom POIs.

Connecting the Device to Your Computer
You can connect the device to your computer using a USB cable.

1 Plug the small end of the USB cable into the port on the device.
2 Plug the larger end of the USB cable into a port on your computer.
   A picture of your device connected to a computer appears on the device screen.
   Depending on your computer operating system, the device appears as either a portable device, a removable drive, or a removable volume.

Transferring Data From Your Computer
1 Connect the device to your computer (Connecting the Device to Your Computer, page 14).
   Depending on your computer operating system, the device appears as either a portable device, a removable drive, or a removable volume.
2 On your computer, open the file browser.
3 Select a file.
4 Select Edit > Copy.
5 Browse to a folder on the device.
   NOTE: For a removable drive or volume, you should not place files in the Garmin folder.
6 Select Edit > Paste.

Disconnecting the USB Cable
If your device is connected to your computer as a removable drive or volume, you must safely disconnect your device from your computer to avoid data loss. If your device is connected to your Windows computer as a portable device, it is not necessary to safely disconnect.

1 Complete an action:
   • For Windows computers, select the Safely Remove Hardware icon in the system tray, and select your device.
   • For Mac computers, drag the volume icon to the trash.
2 Disconnect the cable from your computer.

Viewing GPS Signal Status
Hold ⌘ for three seconds.

Purchasing Additional Maps
1 Go to your device product page at garmin.com.
2 Click the Maps tab.

Purchasing Accessories
Go to garmin.com/accessories.
