Without question, computers are more than essential technology - they have become integral to our lives. Computers do more than make living easier; they often define the functionality and design of our offices, our homes, ourselves.

The products we choose represent how we want to describe the world around us, and how we want others to describe us. Many of us are drawn to designs from Scandinavia, which are organized, clean and functional while remaining stylish, sleek and elegant. We like these designs because they harmonize with their surroundings and become nearly transparent. Brands like Georg Jensen, Bang Olufsen, Skagen Watches and Ikea are just a few that represent this Scandinavian style and efficiency.

In the world of computers components there is only one name you should know, Fractal Design.
