To obtain the source code under GPL, LGPL, MPL, and other open source licenses, that is contained in this product, please visit http://opensource.lge.com.
In addition to the source code, all referred license terms, warranty disclaimers and copyright notices are available for download.
LG Electronics will also provide open source code to you on CD-ROM for a charge covering the cost of performing such distribution (such as the cost of media, shipping, and handling) upon email request to opensource@lge.com. This offer is valid for three (3) years from the date on which you purchased the product.
NOTE

• Software-related content may be changed without prior notice due to upgrades of the product functions.
• Some features described in the User Manual may not be supported in certain models.
• SNMP 2.0 is supported.

SETTINGS

Home

Global Buttons

• Mobile URL: Provides information necessary to access the monitor set through an external device’s browser. With this feature, you can view QR code and URL information. In addition, by accessing the URL, you can also run Content Manager and Group Manager 2.0, and Control Manager. (This feature is optimized for Google Chrome.)

• Input: Navigate to the external input selection screen
• Settings: Navigate to the Settings screen

Dashboard

• This feature displays key information about your Signage monitor in the center of the home screen. In the Dashboard, you can manually change settings by selecting the corresponding items.

NOTE

• If the dashboard is locked, the focus does not move.

Content Manager

• Player: Play a variety of content including images, videos, and SuperSign content.
• Scheduler: Manage schedules for content that will be played at different times.
• Template: You can create your own content using templates and media files.
• Group Manager 2.0: Distribute content schedules and setting data to the connected device.
Ez Setting

Video Wall
SETTIN GS / Ez Setting → Video Wall
Set Video Wall options to create a wide visual canvas.

- **Tile Mode**: Turn **Tile Mode** on or off.
- **Tile Mode Setting**: Display a single integrated screen on multiple Signage monitors.
- **Natural Mode**: Display the image excluding the area that overlaps with the monitor’s bezel so that the image displayed has a more natural feel to it.
- **White Balance**: Configure white balance settings (White Pattern, R/G/B-Gain, and Luminance).
- **RESET**: Reset to initial settings.

On/Off Scheduler
SETTIN GS / Ez Setting → On/Off Scheduler
Set a schedule to use your signage by time and day of the week.

- **On/Off Time Setting**: Set on/off times for each day of the week.
- **Holiday Setting**: Set holidays by date and by day of the week.

SI Server Setting
SETTIN GS / Ez Setting → SI Server Setting
Set up to connect your signage to an external SI server. Set up a server environment for SI app installation.

Server Setting
SETTIN GS / Ez Setting → Server Setting
Set up to connect your signage to a SuperSign server.

- SuperSign premium servers
- SuperSign link servers
Fail Over

SETTINGS / Ez Setting ➔ Fail Over

This feature enables automatically switching to other input sources in order of priority if the primary signal is interrupted. It also enables the automatic playback of the content stored on your device.

- **On/Off**: Turns **Fail Over** on or off.
- **Input Priority**: Set the priority of input sources for fail over.
- **Backup via Storage**: Automatically play the content stored on the device when there is no input signal.
- **Capture time Interval**: Set the interval at which the image/video played on the screen will be automatically captured when Backup via Storage has been set to Auto. (30 min, 1 hour, 2 hours, and 3 hours)

Status Mailing

SETTINGS / Ez Setting ➔ Status Mailing

This feature configures the system so that the status of the device is assessed and then notified to the administrator by e-mail.

- **On/Off**: Turns **Status Mailing** on or off.
- **Mailing Option, SCHEDULE**: Sets the email sending interval.
- **User E-mail Address**: Set the user email address of the sender.
- **Sending Server (SMTP)**: Set the address of the SMTP server.
- **ID**: Enter the account ID of the sender.
- **Password**: Enter the password for the sender’s account.
- **Recipient E-mail Address**: Set the email address of the recipient.
- **Message Delivery**: Immediately assess the status of the device and deliver the information to the specified email address.
**NOTE**

- If the status regarding any of the following items changes or becomes abnormal, a status message can be sent.
  - 1. Temp. Sensor: If the set reaches a dangerous temperature, its current temperature is recorded, and an email containing such information is sent.
  - 2. Temp. Sensor Validation: An email is sent if there is no temperature sensor connected, if the communication status of the temperature sensor is unknown, or if the information provided by the chip provider is abnormal.
  - 3. LAN Status, Wi-Fi Status: An email is sent if there is a change in the network’s connection status. The maximum number of network status changes that can be saved is limited to 50. The saved value is reset once the power turns off.
  - 4. Screen Fault Detection: An email is sent if an abnormal value is picked up by the RGB sensor while Screen Fault Detection is turned on in the Settings.
  - 5. No Signal Check: Checks whether there is a signal. If there are no signals for more than 10 seconds, an email is sent.
  - 6. Schedule Play Status: An email is sent if content cannot be played between the scheduled start time and end time in either Content Management Schedule status or SuperSign Content status. However, this does not apply when terminated using the remote control.
  - 7. Fail Over Status: An email is sent if input switching occurred due to an error. (Excludes input switching initiated by the user (RC, RS232C, SuperSign))

- Only SMTP ports 25, 465, and 587 are supported.
- The occurrence of internal input switches, excluding external input switches (RC, RS232C, SuperSign), are considered as Fail Over Status.
- One email containing the “Failover status : Failover” message is sent when switching to Fail Over Status, and the following status emails sent regularly or upon status changes contain the message “Failover status : None”.
Play via URL

SETTINGS / ⚙ ➔ Ez Setting ➔ Play via URL

Play content you want to play automatically through the built-in web browser.

- **URL Loader**: Turns **Play via URL** on or off.
- **Set URL**: Enter the URL address to display automatically.
- **Preview**: Preview your desired website by accessing the specified URL.
- **SAVE**: Save the specified URL.
- **Reboot to Apply**: Restarts the monitor set after saving the specified URL.

**NOTE**

- This feature does not apply when **Screen Rotation** is enabled, and using this feature disables **Preview**.
- **Time & Date** is not set to **Set Automatically**, website navigation may be difficult.

Setting Data Cloning

SETTINGS / ⚙ ➔ Ez Setting ➔ Setting Data Cloning

This feature is used to copy and import the settings of the device to other devices.

- **Export Setting Data**: Export the settings of the device to another device.
- **Import Setting Data**: Import the settings of another device into the device.

Sync Mode

SETTINGS / ⚙ ➔ Ez Setting ➔ Sync Mode

Sync up time and content among multiple signages.

- **RS-232C Sync**: Sync up multiple signages connected by RS-232C.
- **Network Content Sync**: Sync up multiple signages connected to the same network.
Multi Screen

SETTINGS / Ez Setting ➔ Multi Screen

This feature allows you to view multiple external inputs and videos on a single screen.

⚠️ NOTE

- After entering multi-screen mode, the screen may flicker and the picture may appear abnormal on certain devices while the optimal resolution is selected automatically. If this happens, please restart the monitor.
- In multi-screen mode, the DP daisy chain feature is not supported.

Selecting Screen Layout

When you enter multi-screen mode without having set any screen layout, the screen layout selection menu appears. When the screen layout selection menu is not displayed on the screen, go to the screen layout menu bar by pressing the up arrow key on your remote control and select your desired screen layout. If you want to close the screen layout menu, press the back key.

Closing Screen Layout Menu

From the screen layout menu, press the up arrow key on the remote control to go to the screen layout menu bar and select it or press the back key to close the screen layout menu.

Changing Screen Input

Press the button on the top right of each split screen to select the desired input.

⚠️ NOTE

- Inputs which have already been selected for other split screens cannot be selected again. To select them, press the RESET button to reset the inputs for all screens first.
- PIP mode works only when External Input Rotation is set to Off and Screen Rotation is set to Off.

Playing Videos on Split Screens

Press the button on the upper right of each split screen, select Video File, and then select a storage device to view the list of videos in the selected device. Next, select your desired video from the list to play it.

⚠️ NOTE

- Videos created with HEVC, MPEG-2, H.264, or VP9 codecs can be played on split screens. When using PIP mode, the following combinations cannot be used.

<table>
<thead>
<tr>
<th>Main</th>
<th>Sub</th>
</tr>
</thead>
<tbody>
<tr>
<td>HEVC</td>
<td>HEVC</td>
</tr>
<tr>
<td>H.264</td>
<td>HEVC</td>
</tr>
<tr>
<td>MPEG-2</td>
<td>HEVC</td>
</tr>
<tr>
<td>VP9</td>
<td>VP9</td>
</tr>
</tbody>
</table>
General

Language

SETTINGS / ☰ ➔ General ➔ Language

You can select the menu language to be displayed on the screen.

- **Menu Language**: Sets the language of your Signage monitor.
- **Keyboard Language**: Sets the language of the keyboard displayed on the screen.

System Information

SETTINGS / ☰ ➔ General ➔ System Information

This feature displays information such as the device name, software version, and storage space.

Set ID

SETTINGS / ☰ ➔ General ➔ Set ID

- **Set ID (1~1000)**: Assigns a unique Set ID number to each product when several products are connected via RS-232C. Assign numbers ranging from 1 to 1000 and exit the option. You can control each product separately by using the Set ID you assigned to each product.
- **Auto Set ID**: Automatically assigns a unique Set ID number to each product when several products are connected for display.
- **Reset Set ID**: Reset the Set ID of the product to 1.

Time & Date

SETTINGS / ☰ ➔ General ➔ Time & Date

This feature enables you to view and change the time and date on the device.

- **Set Automatically**: Set Time and Date.
- **Daylight Saving Time**: Set the start and end times for Daylight Saving Time. The DST start/end times function only when you set them more than one day apart from each other.
- **Time Zone**: Configure the continent, country/region and city.
Power
SETTINGS / ⬅️ General ➔ Power

No Signal Power Off (15 Min)
Set whether to use the 15 Min Auto Off feature.
- You can set this option to On or Off.
- If you set this feature to On, the product turns off when it has remained in No Signal status for 15 minutes.
- If you set this feature to Off, the 15 Min Force Off feature is disabled.
- It is recommended that you set this feature to Off if you intend to use the product for long periods of time as the feature turns the power of the product off.

No IR Power Off (4hour)
Set whether to use 4 Hours Off feature.
- You can set this option to On or Off.
- If you set this feature to On, the product turns off if there is no input from the remote control for 4 hours.
- If you set this feature to Off, the 4 Hours Off feature is disabled.
- It is recommended that you set this feature to Off if you intend to use the product for long periods of time as the feature turns the power of the product off.

DPM
Set the Display Power Management (DPM) mode.
- If this feature is not set to Off, the monitor will enter DPM mode when there is no input signal.
- If you set this feature to Off, DPM is disabled.

DPM Wake Up Control
Turns on the set according to the digital signal processing of the connected DVI-D/HDMI port.
- Clock, the set only checks for digital clock signals and turns on once it finds the clock signal.
- Clock+DATA, the set turns on if the digital clock and data signals are both input.
**PM Mode**
- **Power Off (Default)**: Sets the normal DC off mode.
- **Sustain Aspect Ratio**: Identical to normal DC off mode except that the Switching IC remains on. On some models, this applies only to a specific input mode (DisplayPort) and has the same effect as **Screen Off Always** in other input modes.
- **Screen Off**: Switches to **Screen Off** status when entering DPM, Auto Power Off (15 mins, 4 hours), or Abnormal Shut Down mode.
- **Screen Off Always**: Switches to **Screen Off** status when entering DPM, Auto Power Off (15 mins, 4 hours), Off Time Scheduling, or Abnormal Shut Down mode, or when there is input from the remote control's Power button or the monitor's Off button.
- **Screen Off & Backlight On**: Partially turns on the backlight to keep the display at a proper temperature when in **Screen Off** status.

**NOTE**
- In order for the screen to switch from **Screen Off** to On status, there must be input from the remote control’s **Power** or **Input** button, or the monitor’s **On** button.

**Power On Delay (0-250)**
- This feature prevents overload by implementing a power-on delay when multiple monitor sets turn on.
- You can set the delay interval in the range of 0 to 250 seconds.

**Power On Status**
- Select the operating status of the monitor when the main power has turned on.
- You can choose from among **PWR (Power On)**, **STD (Standby)**, and **LST (Last Status)**.
- **PWR (Power On)** keep the monitor powered on when the main power has turned on.
- **STD (Standby)** switch the monitor to Standby status when the main power has turned on.
- **LST (Last Status)** switches the monitor back to its previous status.

**Wake On LAN**
- Set whether to use **Wake On LAN**.
- You can set the feature to On or Off for each wired/wireless network.
- **Wired**: When set to **On**, the **Wake On LAN** feature is enabled, letting you turn the product on remotely through a wired network.
- **WiFi**: When set to **On**, the **Wake On LAN** feature is enabled, letting you turn the product on remotely through a wireless network.

**Power On/Off History**
Display the device’s power on/off history.
Network
SETTINGS / 🔄 ➔ General ➔ Network

**Wired Connection (Ethernet)**

- **Wired Connection**: Connects the monitor to a local area network (LAN) via the LAN port and configures wired network settings. Only wired network connections are supported. After setting up a physical connection, the display will automatically connect without any adjustments on most networks. A small number of networks may require the display settings to be adjusted. For detailed information, contact your Internet provider or consult your router manual.

**Wireless Network Connection**

If you have set your monitor up for a wireless network, you can view and connect to available wireless Internet networks.

- **Add a Hidden Wireless Network**: You can add a wireless network by manually typing in its name.
- **Connect via WPS PBC**: Press the button on the wireless router that supports PBC to easily connect to the router.
- **Connect via WPS PIN**: Enter the PIN number in the web page of the PIN-supporting wireless router to connect to the router in a simple manner.
- **Advanced Wi-Fi Settings**: When there is no available wireless network displayed on the screen, you can connect to the wireless network by entering the network information directly.

**3G/4G Connection**

Connect to a network via a 3G/4G USB dongle.

**LAN Daisy Chain**

- LAN Daisy Chain forms a daisy chain of LAN ports so that even if you connect only one monitor set to a network, the other sets in the daisy chain are connected to the network.
- However, the first monitor set in the daisy chain must be connected to the network through a port that is not used for the daisy chain connection.
**SoftAP**
If you set up a SoftAP, you can connect many devices via a Wi-Fi connection without a wireless router and use wireless Internet.

- You must have an Internet connection.
- The SoftAP and ScreenShare features cannot be used at the same time.
- On models that support Wi-Fi dongles, the SoftAP menu is enabled only when a Wi-Fi dongle is connected to the product.
- **SoftAp Access Information**
  - **SSID**: A unique identifier necessary to make a wireless Internet connection
  - **Security key**: The security key you enter to connect to the desired wireless network
  - **Number of connected devices**: Shows the number of devices currently connected to your Signage device via a Wi-Fi connection. Up to 10 devices are supported.

**UPnP**
Open and block UDP port 1900, which is used for UPnP.

- The default setting is **On**. Setting this feature to **Off** blocks UDP port 1900, making the UPnP function unavailable.
- If you set this feature to **Off**, Sync Mode’s "Network" option will be deactivated.
- If you set this feature to **Off** when the value for Sync Mode is "Network," the value switches to "Off," deactivating the "Network" option.
- If you change the UPnP value, the change will not be applied before a **reboot**.
- If you set UPnP to **Off**, you cannot use Group Manager 2.0 properly.
**Tips for Network Settings**

- Use a standard LAN cable (Cat5 or higher with a RJ45 connector) with this display.
- Many network connection problems during set up can often be fixed by re-setting the router or modem. After connecting the display to the home network, quickly power off and/or disconnect the power cable of the home network router or cable modem, then power on and/or connect the power cable again.
- Depending on the Internet service provider (ISP), the number of devices that can receive INTERNET service may be limited by the applicable terms of service. For details, contact your ISP.
- LG is not responsible for any malfunction of the display or Internet connection failures due to communication errors/malfunctions associated with your Internet connection or other connected equipment.
- LG is not responsible for problems within your INTERNET connection.
- You may experience undesired results if the network connection speed does not meet the requirements of the content being accessed.
- Some INTERNET connection operations may not be possible due to certain restrictions set by the Internet service provider (ISP) supplying your Internet connection.
- Any fees charged by an ISP including, without limitation, connection charges are your responsibility.

**NOTE**

- If you want to access the Internet directly on your display, the INTERNET connection should always be on.
- If you cannot access the Internet, check the network conditions from a PC on your network.
- When you use Network Setting, check the LAN cable or check if DHCP in the router is turned on.
- If you do not complete the network settings, the network may not function correctly.

**CAUTION**

- Do not connect a modular phone cable to the LAN port.
- Since there are various connection methods, please follow the specifications of your telecommunication carrier or INTERNET service provider.
- Network setting menu will not be available until the display connected to physical network.
**Tips for When Configuring Wireless Network Settings**

- The wireless network may be affected by interference from a device that uses 2.4 GHz frequency, such as a wireless telephone, Bluetooth device or microwave. Interference may also be caused by a device that uses 5 GHz frequency such as Wi-Fi devices.
- The wireless network service may run slowly depending on the surrounding wireless environment.
- Some devices may have a network traffic jam if any local home networks are turned on.
- To connect to a wireless router, a router that supports wireless connection is necessary; the wireless connection function of the corresponding router must also be activated. Ask the router manufacturer whether the router supports wireless connection.
- To connect to a wireless router, verify the SSID and security settings of the wireless router. Please refer to the user guide of the corresponding router regarding SSID and security settings of the wireless router.
- The monitor may not work properly if network devices (wire/wireless router or hub, etc.) are incorrectly set up. Be sure to install the devices correctly by referring to their user guides before configuring the network connection.
- The connection method may vary according to the manufacturer of the wireless router.
Safety Mode
SETTINGS / 🗿 ➔ General ➔ Safety Mode

ISM Method
If a still image is displayed on the screen for an extended period of time, image sticking can occur. The ISM method is a feature that prevents image sticking.

Screen Fault Detection
- The screen fault detection feature determines whether there is an abnormality at the end of screen; R, G, and B OSDs are created in the upper left-hand corner of the panel at intervals of about one second, and then a pixel sensor checks the area.
- Setting this feature to On enables the screen fault detection feature.
- Setting this feature to Off disables the screen fault detection feature.
Expert Controls

SETTINGS / 📢 ➔ General ➔ Advanced Setting

Beacon

- This option enables BLE Beacon, one of Bluetooth 4.0’s features.
- Beacon Mode (On/Off Toggle): enables the Beacon feature.
- The LG Beacon/iBeacon/Eddystone Type Beacon features are supported.

LG Beacon/iBeacon
- Beacon UUID (hex): Set the UUID.
  1. Field1: 4byte hex value (8 digits)
  2. Field2: 2byte hex value (4 digits)
  3. Field3: 2byte hex value (4 digits)
  4. Field4: 2byte hex value (4 digits)
  5. Field5: 6byte hex value (12 digits)
- Major (0–65535): Sets the Major value.
- Minor (0–65535): Sets the Minor value.

Eddystone
- Frame: Set UUID or URL.
  1. Beacon UUID (hex): Set the UUID.
     (1) Field1: 10byte hex value (20 digits)
     (2) Field2: 6byte hex value (12 digits)
  2. Setting the URL method
     - URL Prefix: Sets the prefix of the URL.
     - URL Suffix: Set the suffix of the URL.
     - URL: Enter the part of the URL that excludes the prefix and suffix.
     - URL string length is limited to 17 characters.

OK: The button used to confirm and apply the settings that you have entered.

⚠️ NOTE

- Some models do not support background screening services in iOS.
- A reboot is recommended for the settings to be applied properly.
- The UUID value is hexadecimal and the exact number of digits must be entered.
OPS Control

• **OPS Power Control**: This feature enables you to control the power of the OPS as you turn on/off the display.
  - **Disable**: Disable **OPS Power Control**.
  - **Sync (On)**: Synchronize the monitor’s power status only when the monitor is on.
  - **Sync (On/Off)**: Synchronize the monitor’s power status with the OPS.

• **Control Interface Selection**: This feature enables you to configure communication with the OPS connected to your monitor.
  - **Display**: Enable communication with external serial ports.
  - **OPS**: Enable communication with the OPS connected to your monitor.

Background Image

This feature enables you to set the default background image.

• **Booting Logo Image**: Change the logo image that appears when the device boots up. If you set this option to Off, no logo image appears when the device boots up.

• **No Signal Image**: Changes the image that appears when there is no signal. If you set this option to Off, no image appears when there is no signal.

Input Manager

This feature enables you to specify a label for each input source.

• **PC**: PC input devices
• **DTV**: HDMI, satellite and set-top boxes, DVD players, Blu-ray players, home theaters, game consoles, streaming boxes, and camera input devices.
**SIMPLINK Setup**

- When the **SIMPLINK Setup** is set to **On**, you can use the SIMPLINK provided by LG Signage.
- **Device ID**: Set the ID of the device connected via CEC wiring. You can choose a value between **All** and **E**.
- **StandBy**: Sets the scenarios for sending and receiving the OpStandBy (0x0c) command. Detailed scenarios are as follows:

<table>
<thead>
<tr>
<th></th>
<th>Transmission</th>
<th>Reception</th>
</tr>
</thead>
<tbody>
<tr>
<td>All</td>
<td>O</td>
<td>0</td>
</tr>
<tr>
<td>Send Only</td>
<td>O</td>
<td>X</td>
</tr>
<tr>
<td>Receive Only</td>
<td>X</td>
<td>0</td>
</tr>
</tbody>
</table>

**Crestron**

- This function enables synchronization with applications provided by Crestron.
- **Server**: This menu sets the server’s IP address for the network connection with the server (equipment provided by Crestron).
- **Port**: This menu sets the port for the network connection with the server. The default port number is 41794.
- **IP ID (3-254)**: This menu sets a unique ID for synchronizing with the application.
Display

Picture Mode
SETTINGS / Display ➔ Picture Mode

Mode
This feature enables you to choose the optimal picture mode for your installation environment.

- **Mall/QSR, Transportation, Education, Gov./Corp., Game, and Photo**: Display the picture optimally for your installation environment.
- **Normal**: Display the picture at normal contrast, brightness, and sharpness.
- **APS**: Adjust the screen brightness to reduce power consumption.
- **Expert, Calibration**: Allow an expert, or anyone who loves picture quality, to manually tune to the best picture quality.

⚠️ NOTE
- The kinds of Picture Mode you can select may vary depending on the input signal.
- Expert is an option that allows a picture quality expert to fine-tune the picture quality using a specific image. Thus, it may not be effective for a normal picture.
Customize

- **Backlight/OLED Light**: Adjust the brightness of the screen by adjusting the brightness of the backlight. The closer the value is to 100, the brighter the screen is.
- **Contrast**: Adjust the difference between the light and dark areas of the picture. The closer the value is to 100, the greater the difference is.
- **Brightness**: Adjust the overall brightness of the screen. The closer the value is to 100, the brighter the screen is.
- **Sharpness**: Adjust the sharpness of the edges of objects. The closer the value is to 50, the clearer and the sharper the edge becomes.
- **H Sharpness**: Adjust the sharpness of the contrast edges on the screen from a horizontal point of view.
- **V Sharpness**: Adjust the sharpness of the contrast edges on the screen from a vertical point of view.
- **Color**: Soften or deepen the tints on the screen. The closer the value is to 100, the deeper the colors become.
- **Tint**: Adjust the balance between red and green levels displayed on the screen. The closer to Red 50, the redder the color will be. The closer to Green 50, the greener the color will be.
- **Color Temperature**: The higher you set the color temperature, the cooler the colors on the screen will feel. The lower you set the color temperature, the warmer the colors on the screen will feel.
- **Expert Controls**: Customize the advanced options.
  - **Dynamic Contrast**: Optimize the difference between the light and dark parts of the screen according to the brightness of the image.
  - **Super Resolution**: Sharpen the areas of the screen that are blurry or barely distinguishable.
  - **Color Gamut**: Select the range of colors available.
  - **Dynamic Color**: Adjust the tint and saturation of the image for a more vivid and lively display.
  - **Edge Enhancer**: Provide much sharper and clearer edges to the picture.
  - **Color Filter**: Accurately adjust color and tint by filtering a specific color area of RGB space.
  - **Preferred Color**: Adjust the skin tint, grass tint, and sky tint to your preference.
  - **Gamma**: Adjust gamma settings to compensate for the brightness of the input signal.
  - **White Balance**: Adjust the overall color fidelity of the screen to your liking. In Expert mode, you can fine-tune the picture using the Method/Pattern options.
  - **Color Management System**: Experts use the color management system when they adjust the colors by using the test pattern. The color management system allows you to make an adjustment by selecting from among 6 different color spaces (Red/Yellow/Blue/Cyan/Magenta/Green) without affecting other colors. In a normal picture, you may not notice the color changes you have made.
• **Picture Option**: Customize the picture options.
  - **Noise Reduction**: Remove randomly popping dots to make the picture look clearer.
  - **MPEG Noise Reduction**: Reduce the noise generated in the process of creating a digital video signal.
  - **Black Level**: Adjust the brightness and contrast of the screen by adjusting the black level of the screen.
  - **Real Cinema**: Optimize the video image for a cinematic look.
  - **Motion Eye Care**: Reduce eye fatigue by adjusting brightness levels and lessening blurriness based on the displayed image.
  - **Aurora Led Backlight**: Make the light areas of the screen lighter and the dark areas darker for maximum contrast. Setting this feature to Off may increase the monitor’s power consumption.
  - **TruMotion**: Reduce image shaking and image sticking that can occur with moving images.
• **Reset**: Reset the picture settings. Because the picture settings are reset according to the monitor’s picture mode, please select the picture mode before resetting the picture settings.
Aspect Ratio

**SETTINGS / Display ➔ Aspect Ratio**

This feature enables you to change the picture size to view the picture at its optimal resolution.

- **Full Wide**: Stretch the picture to fill the screen.
- **Original**: Display the picture at its original resolution.

Rotation

**SETTINGS /  Display ➔ Rotation**

**Screen Rotation**

- This feature rotates the screen clockwise.
- You can set this feature to Off/90/180/270.
- When set to off, this feature is deactivated.
- It is recommended that you use content designed to be used in Portrait mode.

**External Input Rotation**

- This feature rotates the externally inputted picture 90, 180, or 270 degrees clockwise.
- When this feature is set to On (90 or 270 degrees), as for ARC, the picture is resized to be Full Wide.
- If **External Input Rotation** is enabled during WiDi operation, the position of the mouse cursor may not be displayed accurately.
- Please note that the degradation of picture quality that occurs when you have enabled **External Input Rotation** during the use of external input has nothing to do with the product itself.
- When External Input Rotation is set to On, Multi Screen’s PIP mode is disabled.
- If External Input Rotation is enabled on models that support touch, touch may not work properly.
Expert Controls
SETTINGS / Display → Advanced Setting

UHD Deep Color
If you connect an HDMI, DP, or OPS device to one of the Deep Color adjustable ports, you can select between UHD Deep Color On (6G) or Off (3G) in the UHD Deep Color settings menu.
If a compatibility issue occurs with a graphics card when the Deep Color option is set to On at 3840 x 2160 @ 60 Hz, set the Deep Color option back to Off.
• HDMI, DP, and OPS specifications may vary depending on the input port. Check the specifications of each device before connecting.
• HDMI input port 2 is best suited for high definition videos that are 4K@60 Hz (4:4:4, 4:2:2). However, video or audio may not be supported depending on the specifications of the external device. If this is the case, please connect the device to a different HDMI port.

OLED Panel Settings
• Clear Panel Noise: Correct issues that may arise when the screen is turned on for a long period of time.

Energy Saving
• Smart Energy Saving: Automatically adjust the brightness of the screen according to the brightness of the picture to save energy.
  - On: Enable the Smart Energy Saving feature.
  - Off: Disable the Smart Energy Saving feature.
• Brightness Control: Adjust the brightness of the screen to save energy.
  - Auto: Automatically adjust the brightness of the screen according to ambient light.
  - Off: Disable energy saving.
  - Minimum/Medium/Maximum: Use energy saving according to the energy saving level set for the monitor.
• Brightness Scheduling: Adjust the backlight at specified times.
  - You can set this feature to On/Off.
  - If the current time has not been set, Bright Scheduling is disabled.
  - You can add up to six schedules, and they are sorted in ascending order by time.
  - You can edit a schedule by selecting it from the list and pressing the OK button.
• Screen Off: Turn off the screen, meaning the TV only produces sound. You can turn on the screen again by pressing any button on the remote control except the power button.
Adjust (RGB-PC)
This feature enables you to configure the PC display options in RGB mode.

- **Set Automatically**: Automatically adjust the screen position, time, and phase. The image displayed on the screen can be unstable for a few seconds in the process of the configuration.

- **Resolution**: Select the appropriate resolution.

- **Position/Size/Phase**: Adjust the options when the picture is not clear, especially when characters are shaky, after the auto configuration.

- **Reset**: Resets the options to default.

- **Intelligent Auto**: Decides to run Auto Configuration on resolutions recognized for the first time by the RGB input.

HDMI IT Contents

- **Set the HDMI IT Contents function.**

- **Off**: Disable the HDMI IT Contents function.

- **On**: Enable the HDMI IT Contents function.

This feature automatically changes the monitor’s picture mode based on HDMI Contents information when an HDMI signal is entered.

Even if the monitor’s picture mode has been changed by the HDMI IT Contents feature, you can change the picture mode again manually.

As this has a higher priority than the picture mode set by the user, the existing picture mode may be changed when the HDMI signal changes.
Sound

Sound Mode
SETTINGS / 🛒 → Sound → Sound Mode

Sound Mode
The best sound quality will be selected automatically depending on the video type currently being watched.

- **Standard**: This sound mode works well for content of all types.
- **Cinema**: Optimize sound for watching movies.
- **Clear Voice III**: Enhance voices so they can be heard more clearly.
- **Sports**: Optimize sound for watching sports.
- **Music**: Optimize sound for listening to music.
- **Game**: Optimize sound for playing video games.

Balance

- **Balance**: Adjust the output volume for the left speaker and the right speaker.

Equalizer

- **Equalizer**: Manually adjust sound by using the equalizer.

Reset

- **Reset**: Resets sound settings.
Sound Out

SETTNGS / Sound → Sound Out

• **Internal Speaker/External Speaker**: You can output audio either through your Signage monitor’s internal speaker or through an external speaker connected to it.

• **SIMPLINK External Speaker**: This feature is used when you have connected a home theater device to your monitor via SIMPLINK. This feature enables audio to be outputted through the connected device. This option is activated when SIMPLINK has been set to On.

• **LG Sound Sync / Bluetooth**: Enables you to connect Bluetooth audio devices or Bluetooth headsets wirelessly to your monitor so that you can enjoy richer audio conveniently.

⚠️ **NOTE**

- Some recently connected devices may automatically attempt to reconnect to the Signage monitor when it is turned on.
- It is recommended that you set LG audio devices that support LG Sound Sync to LG TV mode or LG Sound Sync mode before connecting.
- Press Device Selection to view the devices that are or that can be connected and connect other devices.
- You can use the signage remote control to adjust the volume of the connected device.
- If the audio device fails to connect, check that it is switched on and available for connection.
- Depending on the type of the Bluetooth device, the device may not connect correctly or an abnormal behavior may occur such as unsynchronized video and audio.
- Sound may stutter or sound quality may be reduced if:
  - The Bluetooth device is too far from the Signage monitor.
  - There is an obstructing object between the Bluetooth device and the Signage monitor.
  - The Bluetooth device is used together with radio equipment such as a microwave oven or wireless LAN.
**Audio Out**

**SETTINGS / 🎤 → Sound → Audio Out**
- **Off**: Disables the use of Audio Out. (No audio outputted.)
- **Variable**: You can specify an output range for the external audio device connected to the monitor and adjust the volume within the range. You can change the volume of an external audio device within the range of 0 to 100 (the same as the Signage speaker volume). However, there may be a difference in the actual volume level outputted.

- **Fixed**: Set a fixed audio output level for the external audio device.
  - If there is no external input, no external audio is outputted.
  - The variable audio output level 100 is the same as the fixed audio output level.

**Volume Increase Amount**

**SETTINGS / 🎤 → Sound → Volume Increase Amount**
This feature enables you to adjust the amount of volume that increases/decreases when you press the up/down volume key on your remote control. The higher the value you set, the faster the volume increases. Choose from among **Low**, **Medium**, and **High** to adjust the volume range.

**AV Sync. Adjustment**

**SETTINGS / 🎤 → Sound → AV Sync. Adjustment**
This feature adjusts audio timing to synchronize video and audio.
- **External Speaker**: Adjust the sync between video and audio coming from external speakers, such as those connected to the digital audio output port, LG audio equipment, or headphones. Moving closer to – speeds up the audio output, while moving closer to + slows down the audio output, compared to the default value.

- **Bypass**: Output the broadcast signals or the sound from external devices without any audio delay. Audio may be outputted earlier than video due to the processing time for video that is inputted into the monitor.

**Digital Audio Input**

**SETTINGS / 🎤 → Sound → Digital Audio Input**
This feature enables you to choose an input source for audio output.
- **Digital**: Output the audio contained in the digital signal inputted from the connected digital input source (HDMI, DISPLAYPORT, or OPS).

- **Analog**: Output audio from the digital input source (HDMI, DISPLAYPORT, or OPS) connected to the monitor through the Audio In port.
Admin

Lock Mode
SETTINGS / Admin → Lock Mode

Home Dashboard Lock
This feature enables you to restrict changes made to dashboard lock settings on the Home screen.

USB Lock
This feature enables you to configure the USB lock feature so that settings or content cannot be changed.

OSD Lock
This feature enables you to configure the OSD lock feature so that settings or content cannot be changed.

IR Operation Lock
• If you set this feature to Off (Normal), you can use your remote control.
• If you set this feature to On (Power Key Only), you can only use the power key.
• If you set this feature to On (Block All), you cannot use your remote control. (However, Power On feature is available.)

Local Key Operation Lock
• This feature enables you to configure the Local Key Operation Lock feature so that settings or content cannot be changed.
• If you set this feature to Off (Normal), you can use the local keys on the monitor.
• If you set this feature to On (Power Key Only), you can only use the power key. (When you use a joystick, press and hold a local key to turn on/off the monitor.)
• If you set this feature to On (Block All), you cannot use the local keys. (However, Power On feature is available.)

Wi-Fi Lock
This feature enables you to turn the Wi-Fi feature on or off.

Screen Share Lock
• This feature enables you to turn the Screen Share feature on or off.
• If the Screen Share Lock value is changed, the function is not applied without a reboot.
Change PIN Code
This feature enables you to set the password you use to enter the Installation menu.

1. Enter a new 4-digit password.
2. Enter the same password again in the Confirm Password field for confirmation.

Enterprise Settings
• Enter your company account code to apply the corresponding enterprise settings.
• When your code has been entered, the monitor set gets reset, thereby applying the corresponding enterprise settings.
• This feature does not get activated if a code has already been entered.

Reset to Initial Settings
This feature resets all items except the Quick Start items (Language, Time, and Auto Power Off) to their initial settings.

Factory Reset
This feature resets the items applicable for Reset to Initial Settings, Date, Time, Language, Network IP, and the Input Label Internal Storage files.
However, Calibration mode’s RGB gain is an exception.
CONTENT MANAGER

Web Login

- Different features are supported depending on the product.
  - This Signage product comes with a feature that enables you to access it on your PC or mobile device.
  - Content Manager, Group Manager 2.0, Control Manager, Log Out, Change Password menus are provided.
- URL: https://set ip:443
- (The default password: 000000)

⚠️ CAUTION

- Supported resolutions (this program is optimized for the following resolutions):
  - PC: 1920x1080, 1280x1024
  - Mobile: 360x640 (1440x2560, 1080x1920), DPR
- Supported browsers (this program is optimized for the following browsers):
  - Chrome 56 or later (recommended)

Content Manager

Player

HOME / ➨ (Player)

The Content Manager app's player feature enables you to play and manage video content, image content, template content, SuperSign content, and playlist content in an integrated way. (The OLED models do not support the playback and management of image content and template content.)

Continuous Play

1. Select your desired type of content from the tab on the left and then select your desired content.
2. Click Play in the upper right-hand corner of the screen and enjoy the content you have selected.

Export

1. Select your desired type of content from the tab on the left and click Export in the upper right-hand corner of the screen.
2. Select the content you wish to export.
3. Click Copy/Move in the upper right-hand corner of the screen and select the device to which you wish to export the content. (If a content file stored on the target device has been selected, the processing of the content file is skipped.)
4. You can see that the content has been moved/copied to the device.
Delete
1 Select your desired type of content from the tab on the left and click Delete in the upper right-hand corner of the screen.
2 Select the content you wish to delete.
3 Click Delete in the upper right-hand corner of the screen.
4 You can see that the content has been deleted.

Filter / Sort
1 Click Filter / Sort in the upper right-hand corner of the screen.
2 1) Choose your desired sort criterion to sort content files either by file name or in the order they have been played (the most recently played file shown at the top of the list).
   2) It is possible to only view the content stored on your desired device by filtering content files by device.
   3) It is possible to only view the content of your desired type by filtering content files by content type.

Create Playlist
When creating a playlist, you cannot include characters that cannot be used in file names on Windows — such as \, /,:,*?,",<,>, and | — in the names of the files in the playlist. In addition, if the playlist contains content files whose names include such characters, you cannot move or copy the playlist.
1 Select Playlist from the tab on the left and click Create Playlist in the upper right-hand of the screen.
2 Select the content you wish to add to the playlist and click Next in the upper right-hand of the screen.
3 Set a play time for each piece of content (applicable only for photo and template content), as well as other items such as Conversion Effect, Ratio, and Auto Playback, and then click Complete in the upper right-hand corner of the screen.
4 You can see a new Playlist has been created.
Schedules

HOME / 🔄 ➔ 📚 (Scheduler)

The Content Manager app’s scheduler feature enables certain content to be played at a scheduled time through a playlist or external input.

Creating a Schedule

1. Click New Schedule in the upper right-hand corner of the screen.
2. Choose between Playlist and Input Source.
3. 1) If you have selected Playlist, select the playlist you wish to schedule the playback of.
   2) If you have selected Input Source, select the external input source you wish to schedule the playback of.
4. Enter schedule information and create a new schedule. (When creating a schedule, you cannot include characters that cannot be used in file names on Windows — such as \, /, :, *, ?, " , <, >, and | — in the name of the schedule file. In addition, if the playlist linked to the schedule contains content files whose names include such characters, you cannot move or copy the playlist.)
5. Watch the playlist or external input you selected play back at its scheduled time.

Importing a Schedule

1. Click Import in the upper right-hand corner of the screen.
2. Select the external storage device from which you wish to import a schedule.
3. Select the schedule you wish to import to your monitor. (You can only choose a single schedule.)
4. Click Select in the upper right-hand corner of the screen.
5. Check that the schedule has been imported to the monitor’s internal storage memory.

Exporting a Schedule

1. Click Export in the upper right-hand corner of the screen.
2. Select the external storage device to which you wish to export a schedule.
3. Select the schedule you wish to export from your monitor. (You can choose multiple schedules.)
4. Click Select in the upper right-hand corner of the screen.
5. Check that the schedule has been exported to the external storage device you selected.
Deleting a Schedule

1. Click **Delete** in the upper right-hand corner of the screen.
2. Select the schedules you wish to delete.
3. Click **Delete**.
4. Check that the schedules have been deleted.

Calendar View

1. When you have registered schedules, click **Calendar View**.
2. You can see that the schedules registered are displayed in the form of a timetable.

Template

**HOME / 🏡 → 📄 (Template)**

The Content Manager app’s editor feature enables you to add your desired templates.

1. Select the template of your desired format. (You can choose between Landscape mode and Portrait mode.)
2. Modify the template’s text.
   2-1. Apply your desired font style (text size, text thickness, underline, and italic).
3. Modify the media file.
4. Save the template by clicking **Save** in the top right-hand corner of the screen.
5. Check that the template you saved is shown in the template list.
### Supported Photo & Video Files

**NOTE**
- Subtitles are not supported.

#### Supported video codecs

**Tips for using USB storage devices**

- Only USB storage devices are recognized.
- USB storage devices connected to the monitor through a USB hub may not work properly.
- USB storage devices that use an automatic recognition program may not be recognized.
- USB storage devices that use their own drivers may not be recognized.
- The recognition speed of a USB storage device may depend on each device.
- Please do not turn off the display or unplug the USB device when the connected USB storage device is working. When the device is suddenly separated or unplugged, the stored files or the USB storage device may be damaged.
- Please do not connect the USB storage device which was artificially maneuvered on the PC. The device may cause the product to malfunction or fail to be played. Remember to only use USB storage devices that store normal music, image, and/or movie files.
- Storage devices formatted with utility programs that are not supported by Windows may not be recognized.
- Please connect power to a USB storage device (over 0.5 A) which requires an external power supply. Otherwise, the device may not be recognized.
- Please connect a USB storage device with the cable offered by the device maker.
- Some USB storage devices may not be supported or operated smoothly.
- File alignment methods of the USB storage device is similar to Windows XP and filenames can include up to 100 English characters.
- Be sure to back up important files since data stored in a USB memory device may be damaged. We will not be responsible for any data loss.
- If the USB HDD does not have an external power source, the USB device may not be detected. So make sure to connect it to an external power source.
  - Please use a power adapter for an external power source. No USB cable is provided for an external power source.
If your USB storage device has multiple partitions, or if you use a USB multi-card reader, you can use up to four partitions or USB memory devices.

If a USB storage device is connected to a USB multi-card reader, its volume data may not be detected.

If the USB storage device does not work properly, remove it and connect it again.

The speed at which a USB storage device is detected differs from device to device.

If the USB storage device is connected in Standby Mode, a specific hard disk will automatically be loaded when the display is turned on.

The recommended capacity is 1 TB or less for a USB external hard disk and 32 GB or less for USB memory.

Any device with more than the recommended capacity may not work properly.

If a USB external hard disk with a Energy Saving feature does not work, turn the hard disk off and on again to make it work properly.

USB storage devices (USB 2.0 or below) are also supported. However, they may not work properly in the videos list.

A maximum of 999 folders or files can be recognized under one folder.

SDHC-type SDs are supported. To use an SDXC card, format it to the NTFS file system first.

The exFAT file system is not supported for SD cards and USB storage devices.

SD cards are not supported on some models.
**Group Manager 2.0**

This feature enables you to group together multiple monitor sets on a single network into the same group and to distribute content (schedules and playlists) or copy setting data on a group basis. This feature has two modes, Master and Slave, and it can access the browser on your PC or mobile device.

**Master**

- Add, edit, and delete group.
- Clone your device’s settings data.
- Distribute **Schedules** and **Playlists** on a group basis.
- All monitor sets initially come in Master mode.

**Slave**

- Play **Schedules** and **Playlists** distributed in Master mode.
- Remove monitor sets for their groups.
- Monitor sets that have been added to a group are automatically switched to Slave mode. Conversely, when a monitor set has been deleted from a group, it is automatically initialized and switched to Master mode.
- You can duplicate the master device’s setting data to the group by using **Data Cloning**.
- You can re-download the content distributed to the group by using **Sync**.
(Group Management)

- Creating a New Group
  1. Click **Add New Group**.
  2. Enter a group name.
  3. Click **Add Device**, select the devices you wish to add to the group, and add them.
  4. Click **Done**, and you will see that a new group has been created.

- Editing a Group
  1. Click the group you wish to edit.
  2. Add a new device by using **Add Device**.
  3. Delete a device by using **Delete Device**.
  4. Check whether the devices in the group are connected to a network by using **Device Check**.
  5. You can re-copy the master device's setting data to the group by using **Data Cloning**.
  6. You can re-distribute the content distributed to the group by using **Sync**.

- Deleting a Group
  1. Click **Delete Group**.
  2. Select the group you wish to delete and click **Delete**.
  3. Check that the group you selected has been deleted.

- All Devices View: This page enables you to manage all slave monitor sets that are connected to the same network.
  1. Click **All Devices View**.
  2. Click **Reset Device Mode**.
  3. Select the slave monitor set whose device mode you wish to change and click **Reset**.
**Data Cloning**

1. Select your desired group and click **Clone**.
2. Check that the data have been copied on the slave sets.

**Content Distribution**

1. Select the type of content you wish to distribute (Schedules or Playlists).
2. Select the content you wish to distribute.
3. Select the group to which you wish to distribute the content and click **Distribute**.
4. Run the Content Manager app on the slave sets and check that the content has been distributed.

**How to Use**

- Monitors: Run/add/delete/edit apps in the Launcher bar.
- Mobile devices: Run the app in the Launcher bar or access the app from a mobile device using the QR code or URL provided.

⚠️ **CAUTION**

- You can create up to 25 groups.
- You can add up to 12 slave devices to a group.
- You can distribute the schedules stored on external devices after executing Content Manager's import operation.
- Make sure to delete all schedules stored on the slave sets before distributing any schedules.
- A list of devices you can add to your desired group appears only when the following conditions have been met:
  - The devices you wish to add must be on the same network as the master device.
  - The devices you wish to add must be in Master mode, and they must not belong to any existing group.
  - The UPnP feature must be enabled (go to **General > Network** > UPnP and set it to **On**).
- Group Manager 2.0 may not work properly in wireless network environments. It is recommended you use a wired network.
ScreenShare

This feature allows the screen of a user’s device such as a mobile or PC Windows to be shared with a display using a wireless connection such as WiDi or Miracast.

How to Use ScreenShare

INPUT / → 

1. Connect according to the instructions provided by the guide that can be accessed through the CONNECTION GUIDE button in the upper right.
2. Once the connection is established, Screen Share between the user device and the monitor is enabled.

NOTE

Configuring WiDi (Wireless Display)

WiDi, which is short for Wireless Display, is a system that wirelessly transmits video and audio files from a laptop that supports Intel WiDi to the display.

This is available only in certain input modes (Composite/Component/RGB/HDMI/DP/OPS/DVI-D).

Other than these modes, LG Signage cannot be detected by your PC.

1. Connect your laptop to AP. (This feature can be used without an AP, but it is recommended that you connect to it for optimal performance.) Go to PC Settings → PC and Devices → Devices on your laptop.
2. Click Add Device in the top center of the screen, and then you will see a list of nearby WiDi-capable LG Signage monitors. From the list of detected Signage monitors, select one you wish to connect to and click Connect.

3. The screen of your laptop screen appears on the screen of the Signage monitor within 10 seconds. The wireless environment may affect the screen from displaying. If the connection is poor, the Intel WiDi connection may be lost.

• For more information on how to use Intel WiDi, visit http://intel.com/go/widi.
• This feature only works properly with WiDi 3.5 or later versions.
• This feature only works on Windows 8.1 or later
MANAGEMENT TOOLS

Control Manager

Control and check the status of the display through the Web browser. This function is available for PCs and mobile devices. Different features are supported depending on the product.

Function

- **Dashboard**: Display a summary of the product’s status and provides links to each page.
- **Display and Sound**: Provides features such as Screen Brightness, Sound, Input, and Reboot.
- **Time & Date**: Enable/disable Set Automatically feature and displays/changes the time set for the product.
- **Network**: Set the name and IP address of your Signage monitor.
- **Screen Fault Detection**: Display the video output status of the product.
- **Tile Mode**: Display the tile mode settings of the product.
- **Fail Over**: Turns the Fail Over feature on or off and sets related items.
- **Play via URL**: Turn Play via URL on or off and set URLs.
- **S/W Update**: Update the firmware of the product.
- **Charts**: Output the product’s status information such as its temperature and fan status.
- **Logs**: Output product malfunction records.
- **System Information**: Output information such as the product’s software version and model name.

⚠️ NOTE

- When **Screen Rotation On** is set to On, **Fault Detection** does not work.
**Picture ID**

**Picture ID** is used to change the settings of a specific set (display) using a single IR receiver for multi-vision. Communication is possible between a monitor with an IR receiver and other monitors using RS-232C cables. Each monitor is identified by a Set ID. Setting **Picture ID** allows you to only use the remote control with monitors with a Set ID that matches the **Picture ID**.

1. Assign **Set ID** to the installed monitors as shown below:

![Diagram showing Set IDs and RS-232C connection]

2. Press the red **Picture ID On** button on the remote control.

3. Make sure that the **Picture ID** you set is identical to the **Set ID** of the monitor you wish to control.
   - A set with a **Set ID** that is different from the **Picture ID** cannot be controlled by IR signals.

**NOTE**

- If **Picture ID** has been set to 2, only the upper right monitor, which has a **Set ID** of 2, can be controlled by IR signals.
- If you press the green **Picture ID Off** button on your remote control, the **Picture ID** for all monitors are turned off. If you then press any button on the remote control, all monitors can be controlled by IR signals regardless of their **Set ID**'s.
TOUCH

Touch Assistive Menu

This touch-exclusive feature allows the user to configure settings without a remote control. Touching the screen for a certain period of time or pressing the Touch Assistive Menu local key brings up the Touch Assistive Menu on the screen. Different features are supported depending on the product.

Function

- 🏡 Home: Navigates to the Home screen.
- 📚 Reader Mode: A mode with low blue light, which lessens strain on the eyes when reading text.
- 🔄 Local Key: Configures the product button (local key) lock function.
- 🌐 External Input: Navigates to the external input selection screen.
- 🛠 Settings: Navigates to the Settings screen.
IR CODE

- All models do not support the HDMI/USB function.
- Some key codes may not be supported depending on the model.

</table>
CONTROLLING MULTIPLE PRODUCTS

• This only applies to certain models.
Use this method to connect several products to a single PC. You can control several products at a time by connecting them to a single PC.
In the Option menu, the Set ID must be between 1 and 1000 without being duplicated.

Connecting cables

• The image may be different according to the model.
Connect the RS-232C cable as shown in the picture.
The RS-232C protocol is used for communication between the PC and product. You can turn the product on/off, select an input source and adjust the OSD menu from your PC.
Communication Parameter

Baud Rate: 9600 bps
Data Length: 8 bits
Parity Bit: None
Stop Bit: 1 bit
Flow Control: None
Communication Code: ASCII code

⚠️ NOTE

- When using 3-wire connections (non-standard), an IR daisy chain cannot be used.
- Be sure to only use the provided gender to connect properly.
- When you have daisy-chained multiple Signage products to control them simultaneously, if you attempt to turn on/off the master device in a continuous manner, some products may not turn on. In this case, you can turn those monitors on by pressing the MONITOR ON button, not the Power button.

</table>

* Note: Commands may not work when there is no external input used.

* Some commands may not be supported on some models.
Transmission/Reception Protocol

Transmission

[Command1][Command2][ ][Set ID][ ][Data][Cr]

* [Command1]: Identifies between the factory setting and the user setting modes.
* [Command 2]: This command is used to control the monitor.
* [Set ID]: Used for selecting a set you want to control. A unique Set ID can be assigned to each set ranging from 1 to 1000 (01H to FFH) under Settings in the OSD menu. Selecting '00H' for Set ID allows the simultaneous control of all connected monitors. (The maximum value may differ depending on the model.)
* [Data]: Transmits command data. Data count may increase depending on the command.
* [Cr]: Carriage Return. This parameter corresponds to '0x0D' in ASCII code.
* [ ]: White Space. This parameter corresponds to '0x20' in ASCII code.

Acknowledgment

[Command2][ ][Set ID][ ][OK/NG][Data][x]

* The product transmits an ACK (acknowledgment) based on this format when receiving normal data. At this point, if the data is FF, it indicates the present status data. If the data is in data write mode, it returns the data of the PC computer.
* If a command is sent with Set ID '00' (=0x00), the data is reflected to all monitors and they do not send an acknowledgment (ACK).
* If you send "FF" as the value of the data in control mode via RS-232C, you can check the value currently set for the relevant feature (not applicable to some features).
* Some commands may not be supported on some models.
01. Power (Command: k a)
Controls the power on/off status of the monitor.

Transmission:
[k][a][ ][Set ID][ ][Data][Cr]
Data
00: Off
01: On

Acknowledgment:
[a][ ][Set ID][ ][OK/NG][Data][x]
* The Acknowledgment signal is returned properly only when the monitor is fully powered on.
* There may be a delay between the Transmission and Acknowledgment signals.

02. Select Input (Command: x b)
Selects an input signal.

Transmission:
[x][b][ ][Set ID][ ][Data][Cr]
Data
20: AV
40: COMPONENT
60: RGB
70: DVI-D (PC)
80: DVI-D (DTV)

Acknowledgment:
[b][ ][Set ID][ ][OK/NG][Data][x]
* Some input signals may not be available with certain models.
* If it is not distributed from SuperSign W, WebOS Player returns NG.

03. Aspect Ratio (Command: k c)
Adjusts the aspect ratio of your monitor.

Transmission:
[k][c][ ][Set ID][ ][Data][Cr]
Data
02: Full Wide
06: Original

Acknowledgment:
[c][ ][Set ID][ ][OK/NG][Data][x]
* The aspect ratio may differ depending on the model's input configuration.

04. Brightness Control (Command: j q)
Sets the brightness of your monitor.

Transmission:
[j][q][ ][Set ID][ ][Data][Cr]
Data
00: Off
01: Minimum
02: Medium
03: Maximum
04: Automatic
05: Screen Off

Acknowledgment:
[q][ ][Set ID][ ][OK/NG][Data][x]
* This feature may not be supported on some models.

05. Picture Mode (Command: d x)
Selects a picture mode.

Transmission:
[d][x][ ][Set ID][ ][Data][Cr]
Data
00: Mall/QSR
01: General
02: Gov./Corp.
03: Transportation
04: Education
05: Expert 1
06: Expert 2
08: APS
09: Photo
11: Calibration

Acknowledgment:
[x][ ][Set ID][ ][OK/NG][Data][x]
* Depending on the model, some picture modes may not be supported.
06. **Contrast (Command: k g)**
Adapts the screen contrast.

Transmission

```
[k][g][ ][Set ID][ ][Data][Cr]
```

Data 00-64: Contrast 0-100

Acknowledgment

```
[g][ ][Set ID][ ][OK/NG][Data][x]
```

07. **Brightness (Command: k h)**
Adapts the screen brightness.

Transmission

```
[k][h][ ][Set ID][ ][Data][Cr]
```

Data 00-64: Brightness 0-100

Acknowledgment

```
[h][ ][Set ID][ ][OK/NG][Data][x]
```

08. **Sharpness (Command: k k)**
Adapts the screen sharpness.

Transmission

```
[k][k][ ][Set ID][ ][Data][Cr]
```

Data 00-32: Sharpness 0-50

Acknowledgment

```
[k][ ][Set ID][ ][OK/NG][Data][x]
```

09. **Color (Command: k i)**
Adapts the screen colors.

Transmission

```
[k][i][ ][Set ID][ ][Data][Cr]
```

Data 00-64: Color 0-100

Acknowledgment

```
[i][ ][Set ID][ ][OK/NG][Data][x]
```

10. **Tint (Command: k j)**
Adapts the screen tints.

Transmission

```
[k][j][ ][Set ID][ ][Data][Cr]
```

Data 00-64: Tint Red 50-Green 50

Acknowledgment

```
[j][ ][Set ID][ ][OK/NG][Data][x]
```

11. **Color Temperature (Command: x u)**
Adapts the screen color temperature.

Transmission

```
[x][u][ ][Set ID][ ][Data][Cr]
```

Data 70-D2: 3200K-13000K

Acknowledgment

```
[u][ ][Set ID][ ][OK/NG][Data][x]
```
12. Balance (Command: k t)
Adjusts the sound balance.

Transmission
[k][t][ ][Set ID][ ][Data][Cr]
Data 00-64: Left 50-Right 50

Acknowledgment
[t][ ][Set ID][ ][OK/NG][Data][x]
* This feature may not be supported on some models.

13. Sound Mode (Command: d y)
Selects a sound mode.

Transmission
[d][y][ ][Set ID][ ][Data][Cr]
Data 01: Standard
  02: Music
  03: Cinema
  04: Sports
  05: Game
  07: News (Clear Voice III)

Acknowledgment
[y][ ][Set ID][ ][OK/NG][Data][x]
* This feature may not be supported on some models.

14. Mute (Command: k e)
Mutes/unmutes audio.

Transmission
[k][e][ ][Set ID][ ][Data][Cr]
Data 00: Quiet (Sound Off)
  01: Current Volume Level (Sound On)

Acknowledgment
[e][ ][Set ID][ ][OK/NG][Data][x]
* This feature may not be supported on some models.

15. Volume Control (Command: k f)
Adjusts the playback volume.

Transmission
[k][f][ ][Set ID][ ][Data][Cr]
Data 00-64: Volume 0-100

Acknowledgment
[f][ ][Set ID][ ][OK/NG][Data][x]
* This feature may not be supported on some models.

16. Clock 1 (Year/Month/Day) (Command: f a)
Sets the Clock 1 (year/month/day) values and Auto Time.

Transmission
1. [f][a][ ][Set ID][ ][Data1][ ][Data2][ ][Data3][Cr]
2. [f][a][ ][Set ID][ ][0][0][ ][Data1][Cr]
   1. When setting Clock 1 (year/month/day)
      Data 1 00-: 2010-
      Data 2 01-0C: January to December
      Data 3 01-1F: 1st-31st
   * The minimum and maximum values for Data1 differ depending
     on the product’s release year.
   * Enter “fa [Set ID] ff” to view Clock 1 (year/month/day)
     settings.
   2. When Setting Auto Time
      Data 1 00: Auto
      01: Manual
   * To view the set value of the Auto time, enter “fa [Set ID] 00
     ff”.

Acknowledgment
[a][ ][Set ID][ ][OK/NG][Data1][Data2][Data3][x]
2. [a][ ][Set ID][ ][OK/NG][0][0][Data1][x]

17. Clock 2 (Hour/Minute/Second) (Command: f x)
Sets the Clock 2 values (hour/minute/second).

Transmission
[f][x][ ][Set ID][ ][Data1][ ][Data2][ ][Data3][Cr]
Data1 00 to 17: Hour 00 to hour 23
Data2 00 to 3B: Minute 00 to minute 59
Data3 00 to 3B: Second 00 to second 59
* Enter “fx [Set ID] ff” to view the Time 2 (hour/minute/
  second) settings.
** This feature is only available when Clock 1 (year/month/day)
  has been set.

Acknowledgment
[x][ ][Set ID][ ][OK/NG][Data1][Data2][Data3][x]
18. No Signal Power Off (15 Min) (Command: f g)
Sets the monitor to enter Automatic Standby mode if there is no signal for 15 minutes.

Transmission
[f][g][ ][Set ID][ ][Data][Cr]
Data 00: Off 01: On
Acknowledgment
[g][ ][Set ID][ ][OK/NG][Data][x]

19. No IR Power Off (Command: m n)
Activates Auto Power Off when there is no IR signal for 4 hours.

Transmission
[m][n][ ][Set ID][ ][Data][Cr]
Data 00: Off 01: On
Acknowledgment
[n][ ][Set ID][ ][OK/NG][Data][x]

20. Language (Command: f i)
Sets the OSD language.

Transmission
[f][i][ ][Set ID][ ][Data][Cr]
Data 00: Czech 01: Danish 02: German 03: English 04: Spanish (Europe)
05: Greek 06: French 07: Italian 08: Dutch 09: Norwegian 0A: Portuguese
0B: Portuguese (Brazil) 0C: Russian 0D: Finnish 0E: Swedish 0F: Korean
10: Chinese (Mandarin) 11: Japanese 12: Chinese (Cantonese) 13: Arabic
Acknowledgment
[i][ ][Set ID][ ][OK/NG][Data][x]

21. Initial Settings (Command: f k)
Executes Reset.
Initialize Screen can only be executed in RGB input mode.

Transmission
[f][k][ ][Set ID][ ][Data][Cr]
Data 00: Picture Reset 01: Initialize Screen 02: Reset to Initial Settings
Acknowledgment
[k][ ][Set ID][ ][OK/NG][Data][x]

* This feature may not be supported on some models.

22. Current Temperature (Command: d n)
Checks the current temperature of the product.

Transmission
[d][n][ ][Set ID][ ][Data][Cr]
Data FF: Check status
Acknowledgment
[n][ ][Set ID][ ][OK/NG][Data][x]

* The temperature is displayed in hexadecimal.

23. Key (Command: m c)
Sends a key code for the IR remote control.

Transmission
[m][c][ ][Set ID][ ][Data][Cr]
Data IR_KEY_CODE
Acknowledgment
[c][ ][Set ID][ ][OK/NG][Data][x]

For key codes, see IR Codes.

* Some key codes may not be supported on some models.
24. **Time Elapsed (Command: d l)**
Displays the time that has elapsed after your monitor has turned on.

**Transmission**
```
[d][l][ ][Set ID][ ][Data][Cr]
```
**Data**  FF: Reads status

**Acknowledgment**
```
[l][ ][Set ID][ ][OK/NG][Data][x]
```
* The data received is displayed in hexadecimal.

25. **Product Serial Number (Command: f y)**
Checks the serial number of the product.

**Transmission**
```
[f][y][ ][Set ID][ ][Data][Cr]
```
**Data**  FF: Checks product serial number

**Acknowledgment**
```
[y][ ][Set ID][ ][OK/NG][Data][x]
```
* Data is in ASCII format.

26. **Software Version (Command: f z)**
Checks the software version of the product.

**Transmission**
```
[f][z][ ][Set ID][ ][Data][Cr]
```
**Data**  FF: Checks software version

**Acknowledgment**
```
[z][ ][Set ID][ ][OK/NG][Data][x]
```

27. **White Balance Red Gain (Command: j m)**
Adjusts the red gain value for white balance.

**Transmission**
```
[j][m][ ][Set ID][ ][Data][Cr]
```
**Data**  00 to FE: Red gain 0 to 254
FF: Checks red gain value

**Acknowledgment**
```
[m][ ][Set ID][ ][OK/NG][Data][x]
```

28. **White Balance Green Gain (Command: j n)**
Adjusts the green gain value for white balance.

**Transmission**
```
[j][n][ ][Set ID][ ][Data][Cr]
```
**Data**  00 to FE: Green gain 0 to 254
FF: Checks green gain value

**Acknowledgment**
```
[n][ ][Set ID][ ][OK/NG][Data][x]
```

29. **White Balance Blue Gain (Command: j o)**
Adjusts the blue gain value for white balance.

**Transmission**
```
[j][o][ ][Set ID][ ][Data][Cr]
```
**Data**  00 to FE: Blue gain 0 to 254
FF: Checks blue gain value

**Acknowledgment**
```
[o][ ][Set ID][ ][OK/NG][Data][x]
```
30. **White Balance Red Offset (Command: s x)**
Adjusts the red offset value for white balance.

Transmission

```
[s][x][ ][Set ID][ ][Data][Cr]
```

Data

- 00 to 7F: Red offset 0 to 127
- FF: Checks red offset value

Acknowledgment

```
[x][ ][Set ID][ ][OK/NG][Data][x]
```

31. **White Balance Green Offset (Command: s y)**
Adjusts the green offset value for white balance.

Transmission

```
[s][y][ ][Set ID][ ][Data][Cr]
```

Data

- 00 to 7F: Green offset 0 to 127
- FF: Checks green offset value

Acknowledgment

```
[y][ ][Set ID][ ][OK/NG][Data][x]
```

32. **White Balance Blue Offset (Command: s z)**
Adjusts the blue offset value for white balance.

Transmission

```
[s][z][ ][Set ID][ ][Data][Cr]
```

Data

- 00 to 7F: Blue offset 0 to 127
- FF: Checks blue offset value

Acknowledgment

```
[z][ ][Set ID][ ][OK/NG][Data][x]
```

33. **Backlight (Command: m g)**
Adjusts the backlight brightness.

Transmission

```
[m][g][ ][Set ID][ ][Data][Cr]
```

Data

- 00 to 64: Backlight 0 to 100

Acknowledgment

```
[g][ ][Set ID][ ][OK/NG][Data][x]
```

34. **Screen Off (Command: k d)**
Turns off/off the screen.

Transmission

```
[k][d][ ][Set ID][ ][Data][Cr]
```

Data

- 00: Screen On
- 01: Screen Off

Acknowledgment

```
[d][ ][Set ID][ ][OK/NG][Data][x]
```

* This feature may not be supported on some models.

35. **Tile Mode (Command: d d)**
Sets a tile mode and values for the tile rows and columns.

Transmission

```
[d][d][ ][Set ID][ ][Data][Cr]
```

Data

- 00 to FF: the first byte - tile column
- The second byte - tile row

* 00, 01, 10, and 11 mean that the tile mode is off
* The maximum value may differ depending on the model.

Acknowledgment

```
[d][ ][Set ID][ ][OK/NG][Data][x]
```

* This feature may not be supported on some models.
36. Check Tile Mode (Command: d z) Checks the tile mode.

Transmission
[d][z][ ][Set ID][ ][Data][Cr]
Data  FF: Checks Tile Mode

Acknowledgment
[z][ ][Set ID][ ][OK/NG][Data1][Data2][Data3][x]
Data 1  00: Tile Mode Off
      01: Tile Mode on
Data 2  00 to 0F: tile column
Data 3  00 to 0F: tile row

* This feature may not be supported on some models.

37. Tile ID (Command: d i) Sets the tile ID value of the product.

Transmission
[d][i][ ][Set ID][ ][Data][Cr]
Data  01 to E1: Tile ID 1 to 225
      FF: Checks the Tile ID

* The data value cannot exceed the value of row x column.

Acknowledgment
[i][ ][Set ID][ ][OK/NG][Data][x]

* If you enter a value that exceeds the value of row x column for the Data parameter, Ack becomes NG.
* This feature may not be supported on some models.

38. Natural Mode (In Tile Mode) (Command: d j) To display the image naturally, the part of the image that would normally be displayed in the gap between the monitors is omitted.

Transmission
[d][j][ ][Set ID][ ][Data][Cr]
Data  00: Off
      01: On

67. Brightness Scheduling (Command: s s)
Sets Brightness Scheduling.

Transmission
[s][s][ ][Set ID][ ][Data1][ ][Data2][ ][Data3][Cr]

Data 1
1. f1 to f6 (data reading)
   F1: Reads the 1st brightness schedule’s data
   F2: Reads the 2nd brightness schedule’s data.
   F3: Reads the 3rd brightness schedule’s data.
   F4: Reads the 4th brightness schedule’s data.
   F5: Reads the 5th brightness schedule’s data.
   F6: Reads the 6th brightness schedule’s data.

   FF: Reads all stored lists
3. e1 to e6 (Deletes one index), e0 (Deletes all indexes)
   E0: Deletes all brightness schedules.
   E1: Deletes the 1st brightness schedule.
   E2: Deletes the 2nd brightness schedule.
   E3: Deletes the 3rd brightness schedule.
   E4: Deletes the 4th brightness schedule.
   E5: Deletes the 5th brightness schedule.
   E6: Deletes the 6th brightness schedule.

Data 2
00 to 0f (data reading)
   00 to 3B: Minute 00 to minute 59th
   00 to 64: Backlights 0 to 100

* To read or delete a brightness schedule you have set, [Data2][Data3] must be set to FF.
* If you want to read all configured brightness schedules through FF, do not enter any values in [Data2][Data3].
* When all configured brightness schedules are read through FF, OK is acknowledged even if there is no stored list.

Example 1: fd 01 f1 ff ff - Reads the 1st index data in Brightness Scheduling.
Example 2: sn 01 1b ff ff ff ff – Reads all index data in in Brightness Scheduling.
Example 3: fd 01 e1 ff ff - Deletes the 1st index data in Brightness Scheduling.
Example 4: ss 01 07 1e 46 - Adds a schedule whose time is 07:30 and whose backlight is 70.

68. Multi Screen Mode & Input (Command: x c)
Saves and controls Multi Screen modes and inputs.
