

INSTALLATION INSTRUCTIONS

<u>Product</u> 7160-1380 Zirkona - Pistol Grip Scanner Mount	<u>Revision</u> Rev A	<u>Form</u> INST-910 Printing Spec: PS-001
---------------------------------------------------------------------------	---------------------------------	----------------------------------------------------------------

The 7160-1380 is a pistol grip scanner mount designed to hold the scanner with the face upward so the driver can see the screen if needed. It has a large slot for the pistol grip to pass through. It needs to be positioned so the weight of the scanner holds it in the tray. Do not position the scanner upward too much so the scanner could come out of the mount. The scanner mount has 3 sets of the AMP's hole pattern, one on each side and one in the end. The mount attaches to a motion attachment through one of the AMP's hole patterns using the #10-32 mounting hardware supplied in hardware bag 7120-0914.

Below is an exploded view showing the attachment of the 7160-1380 to a 1760-1261 (GJ kit # 7170-0764).

Product Mounting Disclaimer

Gamber-Johnson is not liable under any theory of contract or tort law for any loss, damage, personal injury, special, incidental or consequential damages for personal injury or other damage of any nature arising directly or indirectly as a result of the improper installation or use of its products in vehicle or any other application. In order to safely install and use Gamber-Johnson products full consideration of vehicle occupants, vehicle systems (i.e., the location of fuel lines, brake lines, electrical, drive train or other systems), air-bags and other safety equipment is required. Gamber-Johnson specifically disclaims any responsibility for the improper use or installation of its products not consistent with original vehicle manufactures specifications and recommendations, Gamber-Johnson product instruction sheets, or workmanship standards as endorsed through the Gamber-Johnson Certified Installer Program.
