## QUICK INSTALLATION GUIDE

Follow these steps to install the extender:

1. If you have the fiber models, install the SFPs in the transmitter and receiver. Compatible SFPs from Black Box are listed in the table below.

COMPATIBLE SFP MODULES		
PART NUMBER	DESCRIPTION	DISTANCE
<b>1-GBPS CONNECTIONS</b>		
LFP441	SFP 1.25-Gb, 850-nm Multimode Fiber, LC	550 m
LFP442	SFP 1.25-Gb, 1310-nm Single-mode Fiber, LC	20 km
LFP412	SFP with Extended Diagnostics - 1250-Mbps Multimode Fiber, 1310-nm	2 km
LFP413	SFP with Extended Diagnostics - 1250-Mbps Single-Mode Fiber, 1310-nm	10 km
LFP414	SFP with Extended Diagnostics - 1250-Mbps, Singlemode Fiber, 1310-nm	30 km
LFP416	SFP 1250-Mbps, Extended Diagnostics, 10/100/1000BASE-T, SGMII Interface, RJ-45	100 m

NOTE: Other SFPs may work but have not been validated by Black Box, we recommend you use the suggested SFPs to avoid technical incompatibilities. SFP is not included in the package, must be ordered separately.

2. Connect one end of an HDMI cable to the HDMI port on the source device (e.g. computer, server or other IT device). Then connect the other end to the HDMI IN port located on the TX unit.
3. Connect the HDMI display to the HDMI OUT port on the TX unit.
4. Connect the HDMI display to the HDMI OUT port on the RX unit.
5. Connect the USB ports of the source device and the TX unit with a USB type A-B cable. Then plug a USB keyboard, mouse, or other USB devices into the USB ports of the RX unit.
6. Connect the RS-232 ports of the source device and the TX unit. Then connect the RS-232 ports of the RS-232 device on the RX unit side and the RX unit.
7. Connect the microphone/speaker ports of the source device and the TX unit with the audio microphone/speaker combo cable of the accessory. Then, plug the microphone and speaker into the microphone and speaker ports of the RX unit.
8. For the CATx model, use a CAT5e cable to connect the CATx link ports on the TX unit and the RX unit.
9. For the fiber model, use two SFP modules and an optical fiber cable to connect the fiber link ports on the TX unit and the RX unit.
10. Plug the power adapter cable into the DC jacks on the TX and RX units.

### NOTES:

- a. We recommend using the highest quality materials (cables, SFP, etc.) to ensure optimal transmission quality.
- b. If the screen does not display when you connect the computer:
  1. Make sure the device cables are correctly and firmly attached.
  2. Set your display device's (TV, monitor, etc.) input source as HDMI.
  3. Check the PC BIOS configuration of the video output setting.
  4. Connect your video source to the Display DIRECTLY to check if the video signal gets through.

### NOTES:

1. Both the HDMI displays respectively connecting to TX and RX units MUST support the same maximum video resolution.
2. SFP module's bandwidth requirement is 1 Gbps minimum.
3. When plugging into any microphone or speaker ports of TX or RX units, digital HDMI audio extension will be disabled and only analog audio LINE-IN/LINE-OUT extension is enabled.

# CHAPTER 1: SPECIFICATIONS

**TABLE 1-1. TRANSMITTER SPECIFICATIONS**

<b>Console Connection</b>	
Video Output	N/A
Serial Control Port	(1) DB9 female
<b>Host Connection</b>	
Video Input	KVXLCH-100, KVXLCHF-100: (1) HDMI female; KVXLCHDP-200, KVXLCHDPF-200: (1) HDMI female, (1) DisplayPort female
<b>Local Out Video Connection</b>	
Local Out	KVXLCH-100, KVXLCHF-100: (1) HDMI female; KVXLCHDP-200, KVXLCHDPF-200: (1) HDMI female, (1) DisplayPort female
<b>Link Port</b>	
RJ-45 (KVXLCH-100, KVXLCHDP-200 transmitter)	CATx cable – max. length: 330 feet (100 meters)
SFP (KVXLCHF-100, KVXLCHDPF-200 transmitter)	Fiber optic cable – max. length: 18.6 miles (30 km), depending on SFP NOTE: SFP is not included. Must be ordered separately.
<b>USB Interface</b>	
Host	(1) USB Type B female
Device	N/A
<b>Audio</b>	
2-way analog audio	(1) Line In, (1) Line Out
<b>Serial</b>	
RS-232 Extension Port	(1) DB9 female
<b>General</b>	
LED indicator	Power: White LED
DDC Supported	DDC, DDC2, DDC2B
Max. Video Resolution	4K @ 30 Hz, 3840 x 2160 @ 30 Hz
OS Compatibility	OS Independent
Housing material	Chassis Metal
Operating Temperature	32 to 122° F (0 to 50° C)
Storage Temperature	-4 to +140° F (-20 to +60° C)
Relative Humidity	0 to 80%
Power Supply	External 5-VDC, 2-A power supply
Dimensions	KVXLCH-100, KVXLCHF-100: 0.83" H x 7.09" W x 3.27" D (2.1 x 18 x 8.3 cm); KVXLCHDP-200, KVXLCHDPF-200: 1.71" H x 7.09" W x 3.27" D (4.4 x 18 x 8.3 cm)
Weight	KVXLCH-100 transmitter: 0.82 lb. (0.372 kg) KVXLCHF-100 transmitter: 0.83 lb. (0.378 kg) (no SFP); KVXLCHDP-200 transmitter: 0.84 lb. (0.381 kg) KVXLCHDPF-200 transmitter: 0.84 lb. (0.381 kg) (no SFP)

## CHAPTER 1: SPECIFICATIONS

<b>Serial</b>	
RS-232 Extension Port	(1) DB9 male
<b>General</b>	
LED indicator	Power: White LED
DDC Supported	DDC, DDC2, DDC2B
Max. Video Resolution	4K @ 30 Hz, 3840 x 2160 @ 30 Hz
OS Compatibility	OS Independent
Housing material	Chassis Metal
Operating Temperature	32 to 122° F (0 to 50° C)
Storage Temperature	-4 to +140° F (-20 to +60° C)
Relative Humidity	0 to 80%
Power Supply	External 5-VDC, 2-A power supply
Dimensions	KVXLCH-100, KVXLCHF-100: 0.83" H x 7.09" W x 3.27" D (2.1 x 18 x 8.3 cm); KVXLCHDP-200, KVXLCHDPF-200: 1.71" H x 7.09" W x 3.27" D (4.4 x 18 x 8.3 cm)
Weight	KVXLCH-100 receiver: 0.82 lb. (0.372 kg) KVXLCHF-100 receiver: 0.83 lb. (0.378 kg) (no SFP); KVXLCHDP-200 receiver: 0.85 lb. (0.386 kg); KVXLCHDPF-200 receiver: 0.84 lb. (0.381 kg) (no SFP)

## CHAPTER 2: OVERVIEW

### 2.1 INTRODUCTION

The K VX Series 4K HDMI KVM Extenders (single-head) enable you to locally use a 4K HDMI monitor, USB keyboard/mouse/other devices, speaker, and microphone to operate a remote computer, server or other IT device featuring a 4K HDMI video output. You can also view the 4K HDMI video output of the remote source devices via the HDMI output port on 4K HDMI KVM Extender's TX unit. Dual-head models support (1) HDMI and (1) DisplayPort inputs on the transmitters to accommodate video cards with multiple outputs, and (2) HDMI outputs on the receivers.

There are four models of the K VX Series 4K HDMI KVM Extender: the single-head models are K VXLCH-100 via a CATx link and K VXLCHF-100 via a fiberoptic link. The dual-head models are K VXLCHDP-200 via a CATx link and K VXLCHDPF-200 via a fiberoptic link. Each extender consists of a transmitter (TX) and a receiver (RX).

### 2.2 FEATURES

- ◆ Single-head models support HDMI input/output video quality up to 4K @ 30 Hz, 3840 x 2160 @ 30 Hz.
- ◆ Dual-head models support HDMI or DisplayPort input/HDMI output video quality up to 4K @ 30 Hz, 3840 x 2160 @ 30 Hz.
- ◆ Has 4K HDMI local video loopback on the single-head TX units and 4K HDMI/DisplayPort local video loopback on the dual-head TX units
- ◆ Provides remote access for video/USB/RS-232/audio extension distance up to 330 feet (100 meters) over CATx cable for model K VXLCH-100 or K VXLCHDP-200; up to 18.6 miles (30 km) over fiberoptic cable for model K VXLCHF-100 or K VXLCHDPF-200, depending on the SFP used.
- ◆ The HDMI KVM Console Extender lets you control a server, or computer over single-mode or multimode fiber optic cable at distances of up to 30 km (depending on the SFP used, fiber type, and fiber bandwidth\*).
- ◆ Offers transparent USB 2.0/1.1 extension.
- ◆ Uses analog audio LINE-IN/LINE-OUT extension.
- ◆ Supports bi-directional RS-232 control communication at a fixed baud rate of 115200.
- ◆ Automatic EDID update.

\*NOTE: Reference the supported SFP chart on page 3.

### 2.3 WHAT'S INCLUDED

#### K VXLCH-100:

- ◆ (1) 4K HDMI Single-Head KVM CATx Extender Transmitter (TX)
- ◆ (1) 4K HDMI Single-Head KVM CATx Extender Receiver (RX)
- ◆ (2) 5-VDC, 2-A power supplies (with US, EU, UK, and AU plugs)
- ◆ (1) USB Type A to B cable
- ◆ (1) HDMI cable
- ◆ (1) audio microphone/speaker combo cable

#### K VXLCHF-100:

- ◆ (1) 4K HDMI Single-Head KVM Fiber Extender Transmitter (TX)
- ◆ (1) 4K HDMI Single-Head KVM Fiber Extender Receiver (RX)
- ◆ (2) 5-VDC, 2-A power supplies (with US, EU, UK, and AU plugs)
- ◆ (1) USB Type A to B cable
- ◆ (1) HDMI cable
- ◆ (1) audio microphone/speaker combo cable

#### K VXLCHDP-200:

- ◆ (1) 4K HDMI Dual-Head KVM CATx Extender Transmitter (TX)
- ◆ (1) 4K HDMI Dual-Head KVM CATx Extender Receiver (RX)
- ◆ (2) Power Supplies (with US, EU, UK, and AU plugs)
- ◆ (1) HDMI cable (6-ft./1.8-m)
- ◆ (1) DisplayPort cable (6-ft./1.8-m)
- ◆ (1) 3.5-mm audio/mic cable (6-ft./1.8-m)
- ◆ (1) USB-2.0 cable (6-ft./1.8-m)

#### K VXLCHDPF-200:

- ◆ (1) 4K HDMI Dual-Head KVM Fiber Extender Transmitter (TX)
- ◆ (1) 4K HDMI Dual-Head KVM Fiber Extender Receiver (RX)
- ◆ (2) Power Supplies (with US, EU, UK, and AU plugs)
- ◆ (1) HDMI cable (6-ft./1.8-m)
- ◆ (1) DisplayPort cable (6-ft./1.8-m)
- ◆ (1) 3.5-mm audio/mic cable (6-ft./1.8-m)
- ◆ (1) USB-2.0 cable (6-ft./1.8-m)

## CHAPTER 2: OVERVIEW

### 2.4 HARDWARE DESCRIPTION

#### 2.4.1 TRANSMITTER

##### FRONT PANEL

Figure 2-1 shows the front panel that is common to the single-head CATx and fiber transmitters. Table 2-1 describes the components.

FIGURE 2-1. SINGLE-HEAD TRANSMITTER FRONT PANEL

Figure 2-2 shows the front panel that is common to the dual-head CATx and fiber transmitters. Table 2-1 describes the components.

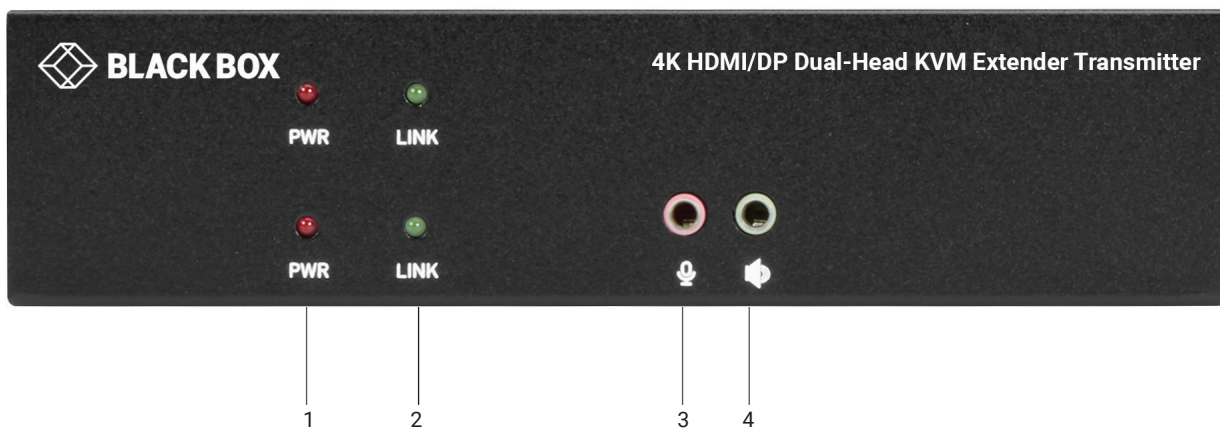

FIGURE 2-2. DUAL-HEAD TRANSMITTER FRONT PANEL

TABLE 2-1. TRANSMITTER FRONT-PANEL COMPONENTS

NUMBER IN FIGURE 2-1 OR 2-2	COMPONENT	DESCRIPTION
1	PWR LED	Lights when power to the transmitter is ON
2	Link LED	Lights when the link between transmitter and receiver units is ON; OFF when the link between transmitter and receiver units is OFF
3	Audio jack	Connects to analog audio input for audio extension
4	Audio jack	Connects to analog audio output for audio extension

## CHAPTER 2: OVERVIEW

### BACK PANEL

Figures 2-3 and 2-4 show the back panels of the single-head CATx and fiber transmitters. Table 2-2 describes their components.

# CHAPTER 3: CONNECTION DIAGRAM

Figures 3-1 and 3-2 show typical connections.

FIGURE 3-1. CATx MODEL CONNECTION DIAGRAM

FIGURE 3-2. FIBER MODEL CONNECTION DIAGRAM

## CHAPTER 4: INSTALLATION

Follow these steps to install the extender:

1. If you have the fiber models, install the SFPs in the transmitter and receiver. Compatible SFPs from Black Box are listed in the table on page 3 of this manual.

**NOTE:** Other SFPs may work but have not been validated by Black Box, we recommend you use the suggested SFPs to avoid technical incompatibilities.

**NOTE:** SFP is not included, must be ordered separately.

2. Connect one end of an HDMI cable to the HDMI port on the source device (e.g. computer, server or other IT device). Then connect the other end to the HDMI IN port located on the TX unit.
3. Connect the HDMI display to the HDMI OUT port on the TX unit.
4. Connect the HDMI display to the HDMI OUT port on the RX unit.
5. Connect the USB ports of the source device and the TX unit with a USB type A-B cable. Then plug a USB keyboard, mouse, or other USB devices into the USB ports of the RX unit.
6. Connect the RS-232 ports of the source device and the TX unit. Then connect the RS-232 ports of the RS-232 device on the RX unit side and the RX unit.
7. Connect the microphone/speaker ports of the source device and the TX unit with the audio microphone/speaker combo cable of the accessory. Then, plug the microphone and speaker into the microphone and speaker ports of the RX unit.
8. For the CATx model, use a CAT5e cable to connect the CATx link ports on the TX unit and the RX unit.
9. For the fiber model, use two SFP modules and an optical fiber cable to connect the fiber link ports on the TX unit and the RX unit.
10. Plug the power adapter cable into the DC jacks on the TX and RX units.

### NOTES:

- a. We recommend using the highest quality materials (cables, SFP, etc.) to ensure optimal transmission quality.
- b. If the screen does not display when you connect the computer:
  1. Make sure the device cables are correctly and firmly attached.
  2. Set your display device's (TV, monitor, etc.) input source as HDMI.
  3. Check the PC BIOS configuration of the video output setting.
  4. Connect your video source to the Display DIRECTLY to check if the video signal gets through.

### NOTES:

1. Both the HDMI displays respectively connecting to TX and RX units MUST support the same maximum video resolution.
2. SFP module's bandwidth requirement is 1 Gbps minimum.
3. When plugging into any microphone or speaker ports of TX or RX units, digital HDMI audio extension will be disabled and only analog audio LINE-IN/LINE-OUT extension is enabled.

## APPENDIX A: REGULATORY INFORMATION

### A.1 FCC CLASS A STATEMENT

This equipment generates, uses, and can radiate radio-frequency energy, and if not installed and used properly, that is, in strict accordance with the manufacturer's instructions, may cause interference to radio communication. It has been tested and found to comply with the limits for a Class A computing device in accordance with the specifications in Subpart B of Part 15 of FCC rules, which are designed to provide reasonable protection against such interference when the equipment is operated in a commercial environment. Operation of this equipment in a residential area is likely to cause interference, in which case the user at his own expense will be required to take whatever measures may be necessary to correct the interference.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This digital apparatus does not exceed the Class A limits for radio noise emission from digital apparatus set out in the Radio Interference Regulation of Industry Canada.

Le présent appareil numérique n'émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de la classe A prescrites dans le Règlement sur le brouillage radioélectrique publié par Industrie Canada.

## APPENDIX A: REGULATORY INFORMATION

### A.2 NOM STATEMENT

1. Todas las instrucciones de seguridad y operación deberán ser leídas antes de que el aparato eléctrico sea operado.
2. Las instrucciones de seguridad y operación deberán ser guardadas para referencia futura.
3. Todas las advertencias en el aparato eléctrico y en sus instrucciones de operación deben ser respetadas.
4. Todas las instrucciones de operación y uso deben ser seguidas.
5. El aparato eléctrico no deberá ser usado cerca del agua—por ejemplo, cerca de la tina de baño, lavabo, sótano mojado o cerca de una alberca, etc.
6. El aparato eléctrico debe ser usado únicamente con carritos o pedestales que sean recomendados por el fabricante.
7. El aparato eléctrico debe ser montado a la pared o al techo sólo como sea recomendado por el fabricante.
8. Servicio—El usuario no debe intentar dar servicio al equipo eléctrico más allá a lo descrito en las instrucciones de operación. Todo otro servicio deberá ser referido a personal de servicio calificado.
9. El aparato eléctrico debe ser situado de tal manera que su posición no interfiera su uso. La colocación del aparato eléctrico sobre una cama, sofá, alfombra o superficie similar puede bloquea la ventilación, no se debe colocar en libreros o gabinetes que impidan el flujo de aire por los orificios de ventilación.
10. El equipo eléctrico deber ser situado fuera del alcance de fuentes de calor como radiadores, registros de calor, estufas u otros aparatos (incluyendo amplificadores) que producen calor.
11. El aparato eléctrico deberá ser conectado a una fuente de poder sólo del tipo descrito en el instructivo de operación, o como se indique en el aparato.
12. Precaución debe ser tomada de tal manera que la tierra física y la polarización del equipo no sea eliminada.
13. Los cables de la fuente de poder deben ser guiados de tal manera que no sean pisados ni pellizcados por objetos colocados sobre o contra ellos, poniendo particular atención a los contactos y receptáculos donde salen del aparato.
14. El equipo eléctrico debe ser limpiado únicamente de acuerdo a las recomendaciones del fabricante.
15. En caso de existir, una antena externa deberá ser localizada lejos de las líneas de energía.
16. El cable de corriente deberá ser desconectado del cuando el equipo no sea usado por un largo periodo de tiempo.
17. Cuidado debe ser tomado de tal manera que objetos líquidos no sean derramados sobre la cubierta u orificios de ventilación.
18. Servicio por personal calificado deberá ser provisto cuando:
  - A: El cable de poder o el contacto ha sido dañado; u
  - B: Objetos han caído o líquido ha sido derramado dentro del aparato; o
  - C: El aparato ha sido expuesto a la lluvia; o
  - D: El aparato parece no operar normalmente o muestra un cambio en su desempeño; o
  - E: El aparato ha sido tirado o su cubierta ha sido dañada.

## APPENDIX B: DISCLAIMER/TRADEMARKS

### B.1 DISCLAIMER

Black Box Corporation shall not be liable for damages of any kind, including, but not limited to, punitive, consequential or cost of cover damages, resulting from any errors in the product information or specifications set forth in this document and Black Box Corporation may revise this document at any time without notice.

### B.2 TRADEMARKS USED IN THIS MANUAL

Black Box and the Black Box logo type and mark are registered trademarks of Black Box Corporation.

Any other trademarks mentioned in this manual are acknowledged to be the property of the trademark owners.
