## User Guide

(VP6960)  
V2021-01

## Overview

**Getting Started** – Connect the USB-C upstream cable to the dual Type-C ports on your computer

**4K/UHD Viewing** – Connect either or both HDMI ports to projectors, flat-screens or other high-resolution viewing devices.

**View on Legacy Displays** – Connect to lower resolution legacy displays.

**USB Devices** – Using any of four USB ports, connect to external devices.

**SD Memory Cards** – Use the SD Memory Card readers to transfer files.

**1-Gigabit Ethernet Port** – Connect to local area networks.

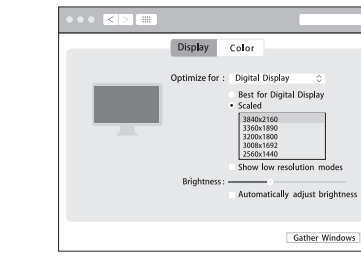

**3.5mm Audio Port** – Enables both audio output and input.

**USB-C Power Delivery Port** – Connect the USB-C charging cable to the USB-C Power Delivery port.

## Apple-Style Dual-Prong USB-C/Thunderbolt 3 Plug

The VP6960 USB-C Dual 4K Mini Docking Station is compatible with Apple computers equipped with two USB-C ports laid out in parallel as shown below.

The distance between the inner edges of the two ports is 0.8cm (0.31inch), and the distance between the outer edges is 2.2cm (0.87inch).

Super power delivery, high-speed data transmission and the ability to use up to three video ports simultaneously provides you with a seamless workflow and flawless operation.

## FCC Statement

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Re-orient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment has been verified to comply with the limits for a class B computing device, pursuant to FCC Rules. In order to maintain compliance with FCC regulations, shielded cables must be used with this equipment. Operation with non-approved equipment or unshielded cables is likely to result in interference to radio and TV reception. The user is cautioned that changes and modifications made to the equipment without the approval of manufacturer could void the user's authority to operate this equipment.
