Lumens®

1. Package Contents

VC-WM13 **Ceiling locking Platform** **Expansion Bolts** **Screw and Spring Washer** **Anti-slip Mat**
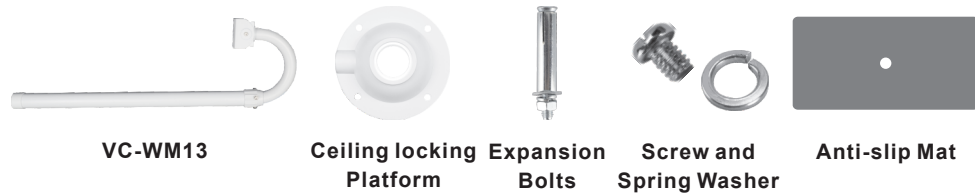

2. Product Overview and Size

Load Capacity: 10Kg

75.0°
75.0°

735~1100mm±10mm
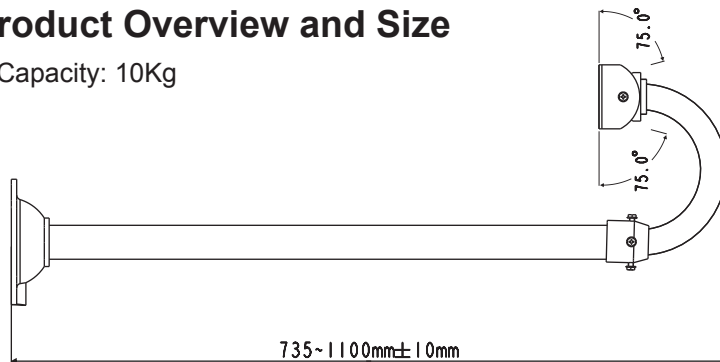

3. How to Connect

3.1 Use x4 pcs of expansion bolts to fix the ceiling locking platform to the ceiling
  ➔ Pass through the cable from the center hole of the ceiling locking platform and the J-shaped bracket
  ➔ Screw VC-WM13 into the platform
   * Due to its aperture limitation, HDMI/RS-232 cable cannot pass through the center hole for organizing the cables
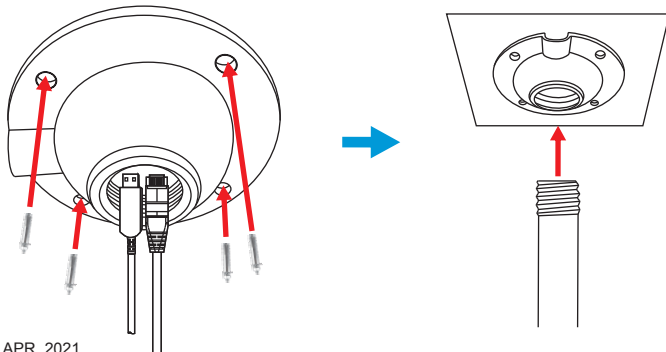

3.2 Loosen the screws on both sides to remove the camera locking platform. After sticking the anti-slip mats, use spring washers and screws one by one to mount the platform on the camera base.
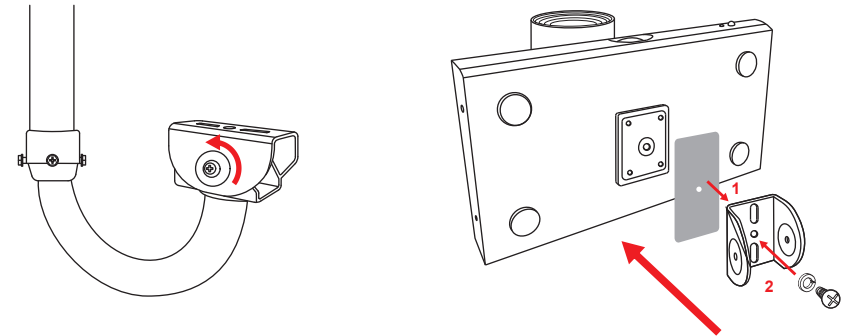

3.3 Connect with the bracket and lock the screws on both sides.

3.4 Loosen screws (3 pcs) on the regulating ring a little bit, so that the bracket can stretch up and down to adjust the height.

3.5 After adjustment, tighten the screws to fix the mounting height.
