INSTRUCTIONS:

1. Connecting the Clamp and the Poles

A. Screw up the small meter screws into the holes on the bottom of the pole.
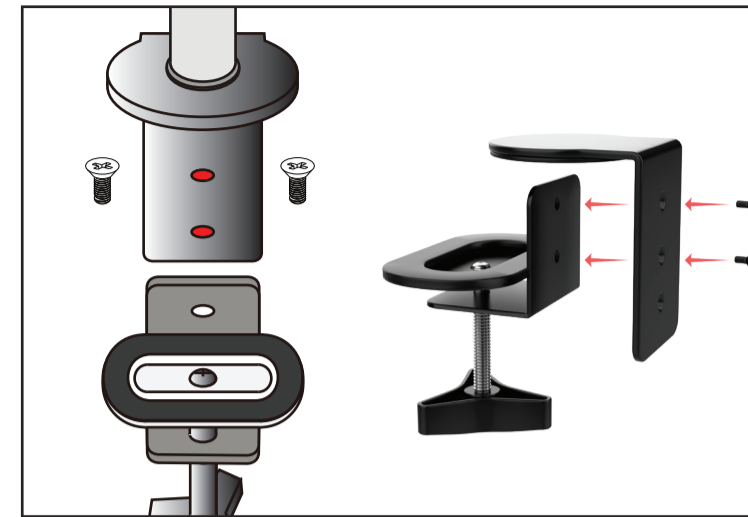

B. Align and insert the Pole into the top round component of the Clamp.

C. Screw in the screw to connect both the pole and clamp component securely.
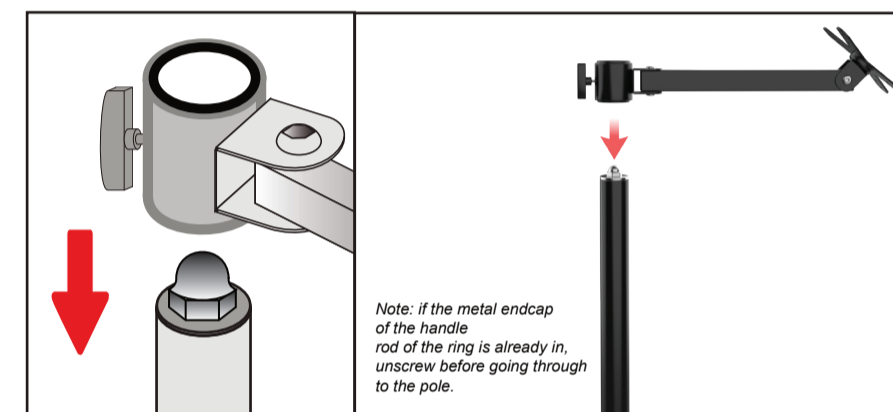

---

2. Assemble Clamp Components Together

A. Align the preferred (2) screw holes of both clamp components. Then screw in both screws until securely tightened.
B. Adjust the clamp and tightening rod to fit with different table/surface thickness.

3. Attaching adjustable VESA Plate onto Pole

Note: if the metal endcap of the handle rod of the ring is already in, unscrew before going through to the pole.
M10mm Screw

A. Loosen all VESA Plate pole grips. Slide down each VESA plate to desired position then, tighten pole grip. Adjust VESA angle and orientation as preferred. Repeat steps for other VESA plates.
B. Screw on clockwise metal endcap until securely tightened.
4. Connecting VESA to VESA

This VESA Compatible Laptop Plate allows you to connect with other VESA devices by screwing up the bolts with a screwdriver as shown.

Installing Laptop into Plate

Adjusting the Laptop Plate

This VESA Compatible Laptop Plate allows you to rotate 360 degree.

Sliding open the arms of the plate ,place your laptop in position then release to hold the laptop.
