FAQ

Package contents

- RadiX AXE6600 WiFi 6E Tri-Band Gaming Router
- Ethernet cable
- Power adapter (The plug type varies by country or region)

Adaptor Installation

- EN** a Align the power connector with the latch on the power adapter.
b Push it all the way down. Make sure you hear a "click" sound.

- DE** a Richten Sie den Adapter am Riegel der Basis aus.
b Stecken Sie ihn bis zum Anschlag ein. Ein Klickgeräusch zeigt an, dass er richtig eingerastet ist.

- FR** a Alignez l'adaptateur avec le loquet de la base.
b Insérez-le entièrement vers le bas. Assurez-vous que vous entendez bien un « clic ».

- IT** a Allineare l'adattatore con il fermo della base.
b Inserirlo fino in fondo. Assicurarsi di sentire un "clic".

- ES** a Alinee el adaptador con el pestillo de la base.
b Insérteelo hasta el fondo. Asegúrese de que escucha un «clic».

- NL** a Lijn de adapter uit met de grendel van de voet.
b Steek het er helemaal in. Zorg ervoor dat u een "klik"-geluid hoort.

- EN** a In order to use the Dragon Shield button, the AI QoS and Traditional QoS functions need to be enabled.
b Press the Dragon Shield button to change the AI QoS mode. The light color will change as shown in the table above.
c The Dragon Shield button can be pressed for 2 seconds to turn the lights on/off in both the antennas and the Dragon Shield.

- DE** a Um die Drachenschild-Taste nutzen zu können, müssen die Funktionen "KI QoS" und "Traditionelles QoS" aktiviert werden.
b Durch Drücken der Drachenschild-Taste ändert sich der KI-QoS-Modus. Die Lichtfarbe wechselt wie in der Tabelle oben angegeben.
c DHalten Sie die Drachenschild Taste 2 Sekunden lang gedrückt um die Beleuchtung der Antenne und der Taste Ein-/ bzw. Auszuschalten.

- FR** a Avant d'utiliser le bouton Dragon Shield, les fonctions QoS AI et QoS traditionnel doivent être activées.
b Appuyez pour changer le mode QoS AI. La couleur du rétroéclairage change comme indiqué dans le tableau ci-dessus.
c Appuyez pendant 2 secondes pour activer/désactiver les antennes et le rétroéclairage du logo Dragon Shield.

- IT** a Prima di utilizzare il tasto Dragon Shield (Scudo del drago), è necessario attivare le funzioni AI Auto (Auto AI) e QoS tradizionali.
b Premere per passare alla modalità AI QoS (QoS AI). Il colore dell'illuminazione cambia come mostrato nella tabella sopra.
c Premere per 2 secondi per accendere/spegnere le antenne e l'illuminazione dello scudo del drago.

- ES** a Antes de usar el botón Dragon Shield, es necesario activar las funciones IA QoS y QoS tradicional.
b Presione para cambiar el modo IA QoS. El color de la iluminación cambiará como se muestra en la tabla anterior.
c Presione durante 2 segundos para encender/apagar las antenas y la iluminación del Dragon Shield.

- NL** a De AI QoS- and Traditional QoS functies moeten geactiveerd worden alvorens de "Dragon Shield"-knop gebruikt kan worden.
b Gebruik de "Dragon Shield"-knop om van QoS mode te veranderen. de verlichtingskleur zal hierbij veranderen zoals getoond in de tabel hierboven.
c Druk gedurende 2 seconden om de antennes en de Dragon Shield-verlichting in/uit te schakelen.

Hardware Installation

- EN** 1 Turn off or unplug the power from the cable/DSL modem.
2 Connect the modem to the LAN 1 port on your MSI router with an Ethernet cable.
3 Power on or plug in the modem to power. Check that the modem is properly functioning per its manufacturer's instructions.
4 Connect your MSI router to power by plugging the power adapter to the DC IN jack.
5 Press the power button and the power LED lights on will turn on. Configure the initial setup with either Option A or Option B as directed in this Quick Start Guide.

- DE** 1 Trennen Sie die Stromversorgung des Kabel-/DSL-Modems.
2 Verbinden Sie das Modem und Ihren Router über ein Ethernet-Kabel.
3 Schließen Sie das Modem an und schalten Sie es ein. Prüfen Sie, ob das Modem aktiv ist.
4 Verbinden Sie den Router mit dem mitgelieferten Netzteil mit dem Stromnetz.
5 Drücken Sie die Ein-/Austaste und die Betriebs-LED leuchtet auf, wenn Ihr Router bereit ist.

- FR** 1 Débranchez l'alimentation du câble/modem DSL.
2 Connectez le modem et votre routeur avec un câble Ethernet.
3 Branchez et allumez le modem. Vérifiez que le modem est allumé.
4 Branchez l'adaptateur sur la prise d'entrée CC de votre routeur.
5 Appuyez sur le bouton d'alimentation. Le voyant LED d'alimentation s'allumera lorsque votre routeur sera prêt.

- IT** 1 Scollegare l'alimentazione del modem via cavo/DSL.
2 Collegare modem e router con un cavo Ethernet.
3 Collegare e accendere il modem. Controllare che il modem sia attivo.
4 Collegare l'adattatore alla presa DC IN del router.
5 Premere il tasto di accensione e il LED di alimentazione si accende quando il router è pronto.

- ES** 1 Desconecte la alimentación del módem por cable/DSL.
2 Conecte el módem y el router con un cable Ethernet.
3 Enchufe y encienda el módem. Compruebe que el módem esté activo.
4 Enchufe el adaptador a la toma de entrada de CC de su router.
5 Presione el botón de alimentación y las luces LED de alimentación cuando el router esté preparado.

- NL** 1 Koppel de stroom los van de kabel/de DSL-modem.
2 Sluit de modem en uw router aan met een Ethernetkabel.
3 Sluit- en schakel de modem aan. Controleer de het modem actief is.
4 Sluit de adapter aan op de DC-ingang van uw router.
5 Druk op de aan/uit-knop en de voedings-LED gaat branden wanneer uw router gereed is.

- EN** 6 Connect your PC or laptop to the router with either a wired or wireless connection.
7 Open a web browser and go to <http://msirouter.login>

- DE** 6 Verbinden Sie Ihren PC oder Laptop kabelgebunden oder kabellos.
7 Öffnen Sie einen Webbrowser und rufen Sie <http://msirouter.login> auf. Standard-Nutzernamen und -Kennwort können Sie dem Typenschild am Router entnehmen. Befolgen Sie die Bildschirmhinweisungen zum Abschließen der Netzwerkeinstellungen.

- FR** 6 Connectez votre PC de bureau ou votre ordinateur portable par l'intermédiaire d'une connexion filaire ou non filaire.
7 Ouvrez un navigateur Web et allez sur <http://msirouter.login>. Le nom d'utilisateur et le mot de passe par défaut sont indiqués sur l'étiquette de votre routeur. Suivez les instructions à l'écran pour terminer la configuration du réseau.

- IT** 6 Collegare il PC o laptop cablati o wireless.
7 Aprire un browser e andare su <http://msirouter.login>. Nome utente e password predefiniti possono essere ottenuti sull'etichetta affissa al router. Osservare le istruzioni sullo schermo per completare le impostazioni di rete.

- ES** 6 Conecte su PC o portátil con cable de forma inalámbrica.
7 Abra un navegador web y vaya a <http://msirouter.login>. El nombre de usuario y la contraseña predeterminados se pueden obtener en la etiqueta adherida al router. Siga las instrucciones en pantalla para completar la configuración de la red.

- NL** 6 Verbind uw PC of laptop bekabeld of draadloos.
7 Open een webbrowser en ga naar <http://msirouter.login>. U kan de gebruikersnaam en het bijhorend wachtwoord terugvinden op het label op de router. Volg de instructies op het scherm om de netwerkinstellingen te voltooien.

- EN** 6 Download the MSI router app from Google Play Store or App Store.
7 Launch the MSI router app and scan the QR code on the label of your router to connect to it via WiFi connection. Follow the on-screen instructions to complete network settings.

- DE** 6 Laden Sie die MSI-Router-App von Google Play Store oder App Store herunter.
7 Starten Sie die MSI-Router-App und scannen Sie den QR-Code auf dem Typenschild Ihres Routers. Dadurch wird per WLAN eine Verbindung zu Ihrem Router hergestellt. Befolgen Sie die Bildschirmhinweisungen zum abschließen der Netzwerkeinstellungen.

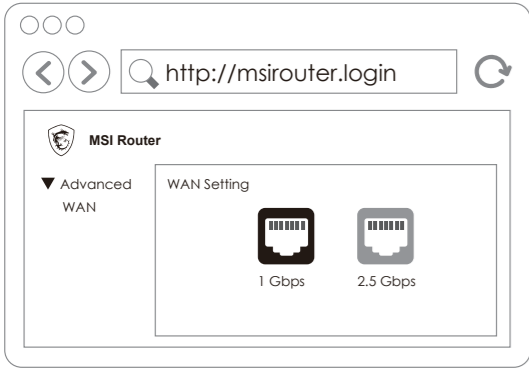

- FR** 6 Téléchargez l'application « MSI Router » sur Google Play Store ou sur l'App Store.
7 Lancez l'application « MSI Router » et scannez le code QR sur l'étiquette de votre routeur pour vous connecter à votre routeur via une connexion Wi-Fi.

- IT** 6 Scaricare l'app del router MSI da Google Play Store o App Store.
7 Avviare l'app del router MSI ed eseguire la scansione del codice QR sull'etichetta del router per connettersi al router tramite connessione WiFi. Osservare le istruzioni sullo schermo per completare le impostazioni di rete.

- ES** 6 Descargue la aplicación MSI Router desde Google Play Store o App Store.
7 Inicie la aplicación MSI Router y escanee el código QR en la etiqueta de su router para conectarse a su router a través de una conexión WiFi. Siga las instrucciones en pantalla para completar la configuración de la red.

- NL** 6 Download de MSI router app in de Google Play Store of App Store.
7 Start de MSI router app scan de QR-code op het label van uw router om verbinding te maken met uw router via WiFi-verbinding. Volg de instructies op het scherm om de netwerkinstellingen te voltooien.

Switching 2.5G port to LAN (Optional)

Regulatory Statements

Federal Communications Commission Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION:

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

The availability of some specific channels and / or operational frequency bands are country dependent and are firmware programmed at factory to match the intended destination. The firmware setting is not accessible by the end user.

FCC regulations restrict the operation of this device to indoor use only.

The operation of this device is prohibited on oil platforms, cars, trains, boats, and aircraft, except that operation of this device is permitted in large aircraft while flying above 10,000 feet.

Operation of transmitters in the 5.925-7.125 GHz band is prohibited for control of or communications with unmanned aircraft systems.

RF Exposure Information

This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 25 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provide with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

Canada Compliance Statement

Industry Canada Equipment Standard for Digital Equipment (ICES) –Canada Compliance Statement

This Class B digital apparatus complies with Canadian ICES_003. CAN ICES-003 (B)/NMB-003(B)Cet appareil numérique de la classe B est conforme à la norme NMB_003 du Canada.

Innovation, Science and Economic Development Canada(ISED) Compliance Statement

This device complies with ISED's licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d' ISED applicables aux appareils radio exempts de licence.

L'exploitation est autorisée aux deux conditions suivantes :

(1) le dispositif ne doit pas produire de brouillage préjudiciable, et (2) ce dispositif doit accepter tout brouillage reçu, y compris un brouillage susceptible de provoquer un fonctionnement indésirable.

Caution:

User should also be advised that:

- (i) the device for operation in the band 5150_5250 MHz is only for indoor use to reduce the potential for harmful interference to co_channel mobile satellite systems;
- (ii) the maximum antenna gain permitted for devices in the bands 5250_5350 MHz and 5470_5725 MHz shall comply with the e.i.r.p. limit; and
- (iii) the maximum antenna gain permitted for devices in the band 5725_5825 MHz shall comply with the e.i.r.p. limits specified for point_to_point and non point_to_point operation as appropriate. High_power radars are allocated as primary users (i.e. priority users) of the bands 5250_5350 MHz and 5650_5850 MHz and that these radars could cause interference and/or damage to LE_LAN devices.

Les utilisateurs devraient aussi être avisés que

- (i) les dispositifs fonctionnant dans la bande 5150_5250 MHz sont réservés uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux;
- (ii) le gain maximal d'antenne permis pour les dispositifs utilisant les bandes 5250_5350 MHz et 5470_5725MHz doit se conformer à la limite de e.i.r.p.;
- (iii) le gain maximal d'antenne permis (pour les dispositifs utilisant la bande 5725_5825 MHz) doit se conformer à la limite de p.i.r.e. spécifiée pour l'exploitation point à point et non point à point, selon le cas. De plus, les utilisateurs de radars de haute puissance sont désignés utilisateurs principaux (c_à_d., qu'ils ont la priorité) pour les bandes 5250_5350 MHz et 5650_5850 MHz et que ces radars pourraient causer du brouillage et/ou des dommages aux dispositifs LAN_EL.

The operation of this device to indoor use only.

The operation of this device is prohibited on oil platforms, cars, trains, boats, and aircraft, except that operation of this device is permitted in large aircraft while flying above 10,000 feet.

Utilisation limitée à l'intérieur seulement;

Utilisation interdite à bord de plateformes de forage pétrolier, de voitures, de trains, de bateaux et d'aéronefs, sauf à bord d'un gros aéronef volant à plus de 10 000 pieds d'altitude.

Radio Frequency (RF) Exposure Information

The radiated output power of the Wireless Device is below the Innovation, Science and Economic Development Canada (ISED) radio frequency exposure limits. The Wireless Device should be used in such a manner such that the potential for human contact during normal operation is minimized. This device has also been evaluated and shown compliant with the ISED RF Exposure limits under mobile exposure conditions. (antennas are greater than 25 cm from a person's body).

informations concernant l'exposition aux fréquences radio (RF)

La puissance de sortie émise par l'appareil de sans fil est inférieure à la limite d'exposition aux fréquences radio d'ISED Canada (ISED). Utilisez l'appareil de sans fil de façon à minimiser les contacts humains lors du fonctionnement normal.

Ce périphérique a également été évalué et démontré conforme aux limites d'exposition aux RF d'ISED dans des conditions d'exposition à des appareils mobiles (antennes sont supérieures à 25 cm à partir du corps d'une personne).

CE RED Compliance Statement

EU Simplified Declaration of Conformity

Hereby, msi Inc. declares that the radio equipment type GRAXE66 is in compliance with Directive 2014/53/EU.

The full text of the EU Declaration of conformity is available at the following internet address: <https://www.msi.com/support>

The device is restricted to indoor use only when operating in the 5150 to 5350 MHz & 5945 to 6425 MHz frequency range applicable in countries that support WiFi 6E.

RF Exposure Information

This equipment should be installed and operated with minimum distance 25 cm between the radiator & your body.

RED RF Output Power:

Technologies	Frequency range (MHz)	Max. Output Power(EIRP) dBm
WLAN 2.4 GHz	2400-2472 MHz	20
WLAN 5 GHz	5150-5250 MHz	23
WLAN 5 GHz	5250-5350 MHz	23
WLAN 5 GHz	5470-5725 MHz	30
WLAN 6 GHz	6115-6425 MHz	23

UK CA UKCA Compliance Statement

UKCA Simplified Declaration of Conformity

Hereby, msi Inc declares that the radio equipment type GRAXE66 is in compliance with the essential requirements and other relevant provisions of the Radio Equipment Regulations 2017.

The full text of the UK Declaration of Conformity may be found at the following internet address: <https://www.msi.com/support>

The device is restricted to indoor use only when operating in the 5150 to 5350 MHz & 5925–6425 MHz frequency range.

RF Exposure Information

This equipment should be installed and operated with minimum distance 25 cm between the radiator & your body.

IMPORTANT NOTE

For more information about your router, you can download the user manual from <https://www.msi.com/support>

Safety Instructions

Read the safety instructions carefully and thoroughly. All cautions and warnings on the equipment or user's manual should be noted.

- Do not leave the Router in an unconditioned environment with a storage temperature above 60°C (140°F) or below 0°C (32°F), which may damage the router.
- This router should be operated under maximum ambient temperature of 35°C (95°F).

Power and Operating/Storage Specifications

DC Power adapter	DC Output: + 12V with Max 3.5A current	
	Temperature	Humidity
Operating	0 ~ 40°C	50 ~ 90%
Storage	0 ~ 70°C	30 ~ 90%
