Setup and Specifications

Notes, cautions, and warnings

 **NOTE:** A NOTE indicates important information that helps you make better use of your product.

 **CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

 **WARNING:** A WARNING indicates a potential for property damage, personal injury, or death.

| Chapter 4: Getting help and contacting Dell | 22 |

Set up your computer

Steps

1. Connect the keyboard and mouse.

2. Connect to your network using a cable.

i **NOTE:** Alternatively, you can connect to a wireless network.

3. Connect the display.

NOTE: If you ordered your computer with a discrete graphics card, the HDMI and the display ports on the back panel of your computer are covered. Connect the display to the port on the discrete graphics card.

4. Connect the power cable.

5. Press the power button.

6. Finish Windows setup.

Follow the on-screen instructions to complete the setup. When setting up, Dell recommends that you:

- Connect to a network for Windows updates.
 - **NOTE:** If connecting to a secured wireless network, enter the password for the wireless network access when prompted.
- If connected to the internet, sign-in with or create a Microsoft account. If not connected to the internet, create an offline account.
- On the **Support and Protection** screen, enter your contact details.

7. Locate and use Dell apps from the Windows Start menu—Recommended

Specifications of OptiPlex 3000 Tower

Dimensions and weight

The following table lists the height, width, depth, and weight of your OptiPlex 3000 Tower.

Table 2. Dimensions and weight

| Description | Values |
|--|--|
| Height | 324.30 mm (12.77 in.) |
| Width | 154.00 mm (6.06 in.) |
| Depth | 292.20 mm (11.50 in.) |
| Weight  NOTE: The weight of your computer depends on the configuration ordered and manufacturing variability. | <ul style="list-style-type: none"> • Minimum - 5.17 kg (11.41 lb) • Maximum - 6.61 kg (14.59 lb) |

Processors

The following table lists the details of the processors supported by your OptiPlex 3000 Tower.

 **NOTE:** Global Standard Products (GSP) are a subset of Dell's relationship products that are managed for availability and synchronized transitions on a worldwide basis. They ensure the same platform is available for purchase globally. This allows customers to reduce the number of configurations managed on a worldwide basis, thereby reducing their costs. They also enable companies to implement global IT standards by locking in specific product configurations worldwide.

Device Guard (DG) and Credential Guard (CG) are the new security features that are only available on Windows today.

Device Guard is a combination of enterprise-related hardware and software security features that, when configured together, will lock a device down so that it can only run trusted applications. If it is not a trusted application, it cannot run.

Credential Guard uses virtualization-based security to isolate secrets (credentials) so that only privileged system software can access them. Unauthorized access to these secrets can lead to credential theft attacks. Credential Guard prevents these attacks by protecting NTLM password hashes and Kerberos Ticket Granting Tickets.

 **NOTE:** Processor numbers are not a measure of performance. Processor availability is subject to change and may vary by region/country.
