HP Z8 Fury G6i Workstation Desktop PC (DC4Z2UT)

Overview

Extraordinary performance. Exceptional outcomes.

Tap into extraordinary compute for the most complex simulation/analysis, VFX, and AI development workflows. The HP Z8 Fury G6i AI workstation delivers extreme performance with a server-grade CPU and up to 4 high-end GPUs. With HP Z Boost[1], share access to these GPUs,maximizing utilization and ROI.

From design to development – accelerate advanced workflows

Tackle multiple computationally heavy workflows with an Intel® Xeon® CPU[2], NVIDIA RTX PRO™ graphics, support for quad-wide and600W GPUs, and large storage and memory configurations.

Solutions forsmarter workflows

Get more from the HP Z8 Fury G6i with hardware and softwaresolutions. Add an HP Remote System Controller[3] to enable remote out-of-band management, and HP Z Boost[1] to share its idle GPUs acrossteams —improving productivity and maximizing resources.

Future-proof bydesign

Built to evolve, this workstation enables quick, tool-less access forgraphics, memory, and storage upgrades, and comes with an optionalMax Side Panel for extra thermal and spatial benefits, while the latticedesign keeps it cool and quiet.

Built for a bettertomorrow

HP cares about the impact our products have. That's why this device isdesigned with recycled materials, including plastic, steel and rare earthelements and is EPEAT Gold with Climate+.[4]

Features

HP recommends Windows 11 Pro for business

Work anywhere without compromising on performance with Windows 11 and HP collaboration, security, and connectivity technology. Summarize and rewrite content, get relevant content recommendations, and stay organized with Microsoft Copilot.[5]

Intel® Xeon® W Processors

Power demanding professional workloads with a next-gen Intel® Xeon® 600 processor (up to 48 cores), Intel vPro® manageability and security, and ECC Memory for data reliability.[6]

Professional Graphics

Master rendering, simulation, advanced video editing and data prep, with up to 2 optional NVIDIA RTX PRO™ 6000 Blackwell Max-Q Workstation Edition GPUs (up to 96GB VRAM per card). Work seamlessly with powerful support for quad-wide and 600W GPUs.

Ultra Fast Memory Configurations

Accelerate workflows. Power through memory-intensive workloads with up to 2TB of DDR5-6400 ECC registered memory for fast rendering, simulation, film and video editing, and deep learning performance.[7]

---

[1] HP Z Boost requires client device with Windows 10 or Windows 11 OS and Vulkan Runtime for devices without a GPU, or WSL2 with Ubuntu 22.04 or Ubuntu 22.04 LTS orgreater. Host device for sharing GPU(s) must be a HP Z workstation with NVIDIA professional grade workstation GPU(s) of Pasca l architecture or later with an installed driverversion 535 or greater, and a CUDA driver version 11.2 through to 12.3, Windows 10 or Windows 11 OS (WSL is not supported), or Ubuntu 22.04 LTS or greater or Debian 11or greater with libatomic1, libnumal1, libvulkan1, libgl1, libglib2.0-0 packages installed. Network connection required. Join waitlist to be considered for selection for earlyaccess.

[2] Multicore is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering is not a measurement of clock speed. Features and software that require a NPU may require software purchase, subscription or enablement by a software or platform provider.

[3] HP Remote System Controller is sold separately. Internet access required.

[4] EPEAT tier levels may vary by country. See www.epeat.net for registration status and tier levels by country.

[5] Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows functionality. Windows 11 is automatically updated, which is always enabled. ISP fees may apply and additional requirements may apply over time for updates. See http://www.windows.com. Microsoft Copilot requires Windows 11. Some features require an NPU. Timing and availability will be dependent on Microsoft and varies by market and device. Requires Microsoft account to log in. Where Copilot is not available, the Copilot key will lead to the Bing search engine. See http://aka.ms/WindowsAIFeatures.

[6] Multicore is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and

clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering, branding and/or naming is not a measurement of higher performance. Intel vPro® Enterprise technologies are available only on Intel® Xeon® W-3500 and Intel® Xeon® W-2500 processors. Intel vPro® requires Windows 10 Pro 64 bit or higher, a vPro supported processor, vPro enabled chipset, vPro enabled wired LAN and/or Wi-Fi 6E WLAN and TPM 2.0. Some functionality requires additional 3rd party software in order to run. Features of vPro® Essentials and Enterprise vary. See http://intel.com/vpro. Error Correction Code (ECC) memory enables enhanced data reliability. ECC memory is only available on Intel® Xeon® processor options.

[7] Memory is an optional feature that must be configured at purchase.
