4K Ultra HD Resolution

4 times the resolution of Full HD brings your viewing experience to the whole new level. Enjoy every detail and the breathtaking beauty of the pictures.

4K Upscaling

Ultra HD upscaling technology converts lower resolution content you watch into near 4K Ultra HD picture quality which provides further details and amazing clarity.

LED Backlight

LED backlight technology delivers stunning pictures with extreme contrasts, deep blacks, vivid details, and rich colors - all with less energy compared to a normal LCD TV of the same screen size.

Premium Video on Demand

Stream Netflix, vudu, YouTube and Pandora content to your TV. Free yourself from fixed program timeslots and watch what you like, when you like. (Premium content may require additional fees and/or PC registration.)

Built-in Wireless LAN

Enjoy network streaming over the Internet via built-in wireless LAN. Also included is a simple setup program with easy on-screen displays. (Internet features require broadband; wireless connectivity requires wireless router.)

BMR 120

Enjoy your favorite action packed sports and movies with Brilliant Motion Rate of 120. BMR120, advanced backlight control technology, provides brilliant motion clarity and sharpness making your HDTV experience even more enjoyable.

Sonic Emotion Premium

Sonic Emotion Premium fills your surroundings with the right ambience, clarifies voice, and details the sound stage, making your experience more immersive and enjoyable.

Dolby Digital

Dolby Digital, the world's leading digital multi-channel audio standard, makes use of the way the human ear naturally processes sound. With Dolby Digital you experience superb quality surround sound audio with realistic spatial cues.

HDMI 4K x3

HDMI 2.0 with HDCP 2.2 on all HDMI ports means years of worry free 4K interoperability.

Energy Star

Energy Star-labeled home electrical products are designed to use less energy - saving you money while reducing environmental pollution. In fact, Energy Star-compliant products consume less than 1 watt of power while in standby mode. This is achieved by having low standby power consumption through innovatively designed standby circuitry and stringent selection of components made with high efficiency materials.
