

Test Report

CUSTOMER:

ATTENTION: Mr. Joh

Mr. John McCusker

Ashley Productions, Inc. 110 Ashley Road Newtown Square, PA 19073 USA

Conclusion:

Tested Samples	<u>Standard</u>	<u>Result</u>
09979 Welcome Magnetic Eraser	ASTM F963-17 – Physical and Mechanical Testing ASTM F963-17 – Flammability	Pass Pass
2" x 5"	ASTM F963-17: Section 4.3.5 – Eight Heavy Elements	Pass
	CPSIA Section 101 – Total Lead in Substrates	Pass
	CPSIA Section 108 – Phthalates	Pass
	Washington / Maine – Phthalate	Pass
	Cali <mark>fornia P</mark> rop. 65 – Phthalates	Complies ¹
	Cali <mark>fornia Pr</mark> op. 65 – Lead and Cadmium	Complies ¹
	CPSA Section 14(a)(5) / CPSIA Section 103 – Tracking Label	Pass
	16 CFR 1262 – Safety Standard for Magnets	Pass

SIGNED FOR THE COMPANY BY:

Baumann m

William M. Baumann Laboratory Director

The test results stated in this report relate only to the item(s) tested. Tests identified with an asterisk (+) have been subcontracted. Note 1: Based on safe levels established by products of a similar nature. Note 2: Product is exempt for Section 4.3.5.1 / 16 CFR 1303 Total Lead in Coatings because the test specimen does not have any coatings.

This report is issued by AM Testing & Services Inc. AM Testing & Services Inc.'s responsibility is limited to proven negligence and will in no case be more than the amount of the testing fees. Except by special arrangement, samples are not retained by AM Testing & Services Inc. for more than 30 days, and are the property of AM Testing & Services Inc. The results shown on this test report refer only to the sample(s) tested unless otherwise stated, under the conditions agreed upon. The test report applies to samples as-received. Anyone relying on this report should understand all of the details of the engagement. Conformance accepted based upon simple acceptance. The name, seals, marks nor insignia of AM Testing & Services Inc. may not be used in any advertising or promotional materials without the prior written approval of AM Testing & Services Inc. The test report cannot be reproduced, except in full, without prior written permission of AM Testing & Services Inc.

Item 2: Results for ASTM F963-17 Sec. 4.2 & Annex A5, Flammability of Solids

	ASTM F963-17 Section 4.2 & Annex A5: Flammability of Solids								
Sample	Sample Ignition Point Burn Length (in) Burn Time (sec) Burn Rate (in/sec) Pass / Fail								
1	Eraser <mark>– Corn</mark> er	0.75	60.0	0.01	Pass				

 DNI = Did not ignite
 in = Inches
 sec = Seconds
 IBSE = Ignited but self-extinguished

Note 1: A material is considered "flammable" if it ignites and burns with a self-sustained flame at rate greater than 0.1 inches per second along its major axis.

Note 2: A sample passes the test requirement if it self-extinguishes before burning 6 inches and prior to the lapse of 60 seconds.

Results for CPSIA Section 108 & 16 CFR 1307, Phthalates Test Method: CPSC-CH-C1001-09.3 & CPSC-CH-C1001-09.4 Analytical Method: Gas Chromatography with Mass Spectrometry

According to the Consumer Product Safety Improvement Act of 2008, the presence of three phthalates, DBP, BBP, and DINP, above 0.1% is prohibited in children's toys. Also, seven additional phthalates, DnOP, DINP, and DIDP, DIBP, DPENP, DHEXP, DCHP, are prohibited at a concentration of more than 1000 ppm in child care articles or toys that can be placed in a child's mouth or brought to the mouth. The 1000 ppm limit for the ten banned phthalates applies to each individual phthalate, not the total amount of these phthalates in the product.

Item 10: / 16 CFR 1262 – Safety Standard for Magnets

1262.2 Definitions:

The following definitions apply for purposes of this part:

(a) Hazardous magnet means a magnet that fits entirely within the cylinder described in 16 CFR 1501.4 and that has a flux index of 50 kG2 mm2 or more when tested in accordance with the method described in 1262.4.

(b) Subject magnet product means a consumer product that is designed, marketed, or intended to be used for entertainment, jewelry (including children's jewelry), mental stimulation, stress relief, or a combination of these purposes, and that contains one or more loose or separable magnets, but does not include products sold and/or distributed solely to school educators, researchers, professionals, and/or commercial or industrial users exclusively for educational, research, professional, commercial, and/or industrial purposes.

Results: According to the 16 CFR 1262 magnet safety, the final rule does apply to this product. The products listed in the final rule apply to consumer products that are designed, marketed, or intended to be used for: entertainment, jewelry (including children's jewelry), mental stimulation, stress relief, or a combination of these purposes, containing one or more loose or separable magnets. The product provided by the client did not have loose or separate magnets which makes the product pass this regulation.

1262.3 Requirements:

Each loose or separable magnet in a subject magnet product that fits entirely within the cylinder described in 16 CFR 1501.4 must have a flux index of less than 50 kG2 mm2 when tested in accordance with the method described in § 1262.4.

F.Y.I.

Component	Flux Index ≥ 50 (kG) ² x (mm) ²	Small Part as-received	
1	378.0	No	

F.Y.I. = For Your Information
